A number of our young men have been down in Maine looking over the good farms and fine residences that are being sacrificed on account of all the young people going to the cities leaving the old folks to get along on the farm as best they can. Children Dangers.

Diarrhoea, dysentery, cholera infantum and stomach troubles are alarmingly frequent during the hot weather months. Too often these troubles become acute and a precious little life is lost after only a few hours illness. During the hot weather season every wise mother should keep a box of Baby's Own Tablets in the house, to check these ills if they come suddenly. Better still, an occasional dose of this medicine will keep the stomach and bowels clean and prevent these dangerous ailments coming. Mrs. John Lancaster, North Portal, Saska, says: "My baby's was attacked with diarrhoea and severe vomiting. I at once gave Baby's Own Tablets and next day she was as well as ever. I find the Tablets are the only medicine a little one needs." Sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

"Sir Wilfrid Laurier says that the nineteenth century belonged to the United States, but that the twentieth century belongs to Canada. This is a magnificent sentence and in a degree it expresses a great truth. Undoubtedly Canada is to witness during this century a wonderful development of her resources and is to make a marvelous progress. All the more reason why every question of dispute between Canada and the United States should be removed and the two countries developed side by side to the mutual advantage of both, so that the twentieth century shall be said to belong to America and not merely to any one section of America. Certain it is that North America will this century become the great center of political and economic power in the world. Let us begin by getting rid of the old vexatious fisheries dispute between the United States and Canada."—Wall Street Journal.
