

NEWS FROM THE COUNTY.

WOODSTOCK, N. B., OCTOBER 10, 1906.

Andover.

Messrs McLean and Barnaby, St. John, spent last week in town.
Walter Moore, formerly of St. Stephen but now of Calgary, spent a day in town last week.

On Wednesday evening last Mrs. S. P. Waite gave a very pleasant whist party at her home in honour of her guests, W. B. and Mrs. Murphy. A dainty luncheon was served at 11 o'clock, after which music and conversation filled in the time pleasantly. Among those present were, Mr. and Mrs. T. F. Allen, Mr. and Mrs. F. D. Sadler, Mr. and Mrs. H. H. Tibbitts, Mr. and Mrs. D. R. Bedell, Mr. and Mrs. B. Beveridge, Mr. and Mrs. W. B. Murphy, Mr. and Mrs. H. H. Brewer, Mrs. J. A. Perley, Mrs. B. Waite, Mrs. G. T. Bird, Misses Sarah Watson, Emma Miller, Mr. and Mrs. A. E. Kupkey.

The public meeting held in Beveridge's hall on Thursday evening was quite a success. There were a large number present who listened attentively to the following program: Chorus, "Canada"; speech, Mr. Elliott; duet, "Sing Me to Sleep", Mrs. S. P. and Mrs. B. Waite; speech, Rev. C. Squires; solo, "A Dream", Miss Mary Stewart; speech, Mr. Baxter; solo, "Good-bye, Sweet Day", W. B. Murphy; speech, Mr. T. Lawson.

A very enjoyable dancing party was given in Porter's hall on Friday evening, Mrs. D. R. Bejfell, Mrs. S. P. and Mrs. Bertha Waite acting as matrons. Music was furnished by the Grand Falls orchestra, consisting of five pieces. There were about thirty couples present. Those from out of town were, Messrs McLean and Barnaby, St. John; B. Traflet and Clark, Limestone.

Mrs. Holly Brewer and Miss Pearl Waite went to Woodstock Monday for a few days. LeBaron Hopkins left for Wolfville, N. S. on Monday, to resume his studies at Acadia College.

Centreville.

The exhibition has come and gone with all the incidents pleasurable or otherwise which it had in store for all who were in any way connected with it. It is said that the attendance was not so large as last year.

There is a good deal of sickness in the community. Miss Ethel Perkins is continually failing and little hope is entertained for her recovery.

The telephone boom of about a month ago seems to have run up against something; perhaps the new company, that is going to put up the Farmers' line with its cheap rate. The potato crop is proving to be an excellent one and good prices are being paid by the buyers.

The insurance commission up to this time has not brought out any damaging evidence against the Forrester management, the politician at present standing in the gap, but it is supposed if there is anything to reveal it will be done this week and the commission will then investigate the management of other insurance.

There are a good many sulky plows being sold this fall and the farmers are providing themselves with all the necessary machinery for tilling the soil to the best advantage.

John W. Reid who was burned out a few days ago is building again.

Kirkland.

We are having cool weather at present. Mrs. Joseph Gidney an old lady aged 80 years was out for a drive. She was accompanied by Mrs. Charles Gidney.

Mrs. Thompson Graham has been visiting friends at Canterbury Station and Benton. She was also in Woodstock attending the funeral of her uncle, Mr. Dickinson.

James Buchanan from Boston is visiting his sister, Mrs. Catherine Slater.

Arthur Hanson has been visiting James Carr.

Mr. and Mrs. David Dykeman, also Master Roy, were in Woodstock on a business trip, Oct. 3rd.

McIntyre Anderson from St. Stephen, has been in this place visiting relatives.

John McLuskey of Maxwell, is ill with fever.

Meta Slater intends going to St. John in a few weeks.

There is to be a harvest supper in the Orange hall on Wednesday, Oct. 10th.

Andrew McIntyre is very poorly, being confined to his room.

FOR GOOD VALUES IN
Mats, Carpets,
Oilcloths, Linoleums,
Roller Blinds,
Curtain Poles,
Wall Paper, Etc., go to
CARR'S,
HARTLAND.

He has also a large stock of
Ready-Made Clothing,
for Men, Boys and Children.
Quality and prices right.
Produce taken in exchange.

J. T. G. CARR,
Hartland, N. B.

Hints of Fashion From Paris.

Black gowns, most of them of spangled gauze, are much favored for evening wear.

Empire scarfs have taken a firm hold upon la Parisienne's affections, and are used chiefly for accomplishing that spot of color that all Paris is out-doing itself over.

The latest craze continues to be the Pierrette neck ruffle, usually of white tulle or of point d'esprit, ornamented with long ends of black velvet. Some are made of the exact color and shade of the hat donned, and the effect is very good; but all white or all black is oftenest seen.

The princess gown is still in high favor, though mostly with the fortunate possessors of faultless figures.

Stripes, and still more stripes, are being used, but the way the stripe is achieved have surely taxed the ingenuity of designers and manufacturers to their utmost.

Silk voile makes some fascinating costumes. One strikingly pretty one is of cerise finished with a touch of black taffeta.

Amber hatpins are even more popular than they were in the spring; and some of the new ones are very elaborate, embellished with incrustations perhaps, of diamonds or other precious stones.

The big liking for amber, for that matter, has spread to buckles and to necklaces—the latter, though, must be used with exceeding care, for there are very few gowns or occasions with which they look well.

White being much more used by the French, even for first mourning, than with us, many of the imported hats are lightened and made more becoming by facings of white crape, or a little of it is introduced into the trimming.

Eyesight and Marksmanship.

Some curious researches have recently been made by French army surgeons on the relationship between good eyesight and good target-practice. At first glance one would say that the two things must invariably depend the one upon the other. But the facts lead to a different conclusion. At least, they show that one may have very defective eyesight and yet be a very accurate marksman. Astigmatism, myopia and other defects of vision may exist in a marked degree without

Your Doctor

Can cure your Cough or Cold, no question about that, but—why go to all the trouble and inconvenience of looking him up, and then of having his prescription filled, when you can step into any drug store in Canada and obtain a bottle of SHILOH'S CURE for a quarter.

Why pay two to five dollars when a twenty-five cent bottle of SHILOH will cure you as quickly?

Why not do as hundreds of thousands of Canadians have done for the past thirty-four years: let SHILOH be your doctor whenever a Cough or Cold appears.

SHILOH will cure you, and all druggists back up this statement with a positive guarantee.

The next time you have a Cough or Cold cure it with

SHILOH

TO THE PUBLIC

It is right as well as our duty to acquaint you with some special advantages we have to offer in the line of

SHOES!

To look at and examine our stock will be conclusive proof that our store is the place to buy.

GIBSON & ROSS,
Corner Main and Queen Streets,
Woodstock, N. B.

destroying the ability to aim and shoot straight. In the French and German armies soldiers are permitted to shoot from the right or the left shoulder, according to their own preference, which is often guided by the superiority of one eye over the other. Accuracy of judgment counts for as much as accuracy of vision with the good marksman.

The Champagne Flaker.

The Frenchman's face was hacked and notched.

"Have you been a dulst?" one asked.
"No, no," the man replied. "I have been a champagne flaker." He touched his face.
"These honorable nicks," he said, "are champagne scars."

"Champagne scars," he went on, "decorate the visages of all the workers in the underground champagne mill of Rheims. They are caused by the bursting of the bottles. About one bottle of champagne in every ten bursts.

"There are miles and miles of champagne caves in Rheims, caves cut in the solid limestone rock, where, in a constant temperature of 45 degrees, millions of bottles of wine refine and ripen.

"The workers down there smell nothing but champagne all day long, champagne escaping from burst bottles, and as the turners move along the racks—each turns 35,000 bottles daily—they are continually saluted with explosions. Bang! And the glass splinters fly, and a little fountain of champagne perfumes the damp air.

"Day after day each bottle must be turned, turned fifty times altogether, till the sediment in it has all mounted up and concentrated itself around the cork. Then the corks remove the corks, let the sediment thicken wine in the neck of the bottle blow off and skillfully replace the cork again. The corks' and turners' work is dangerous. These men are nearly all scarred like me."—Kansas City Independent.

Nature's Perch Clamp.

"Chickens and other birds roosting on a perch no bigger than a lead pencil never fall off. Do you know why?" said a farmer.

"The tendon of a roosting bird's leg is so constructed that when the leg is bent at the knee the claws have to contract—can't open till the leg is straightened out again.

"Thus a chicken gets on its perch, bends its knee to be comfortable and with that bending locks itself, as with a key, to the wood. It can't fall off. Put a chicken on your finger and then make it sit down. Its claws will clamp your finger tight and will be unable to let go until the bird stands up again. Nature, very kindly, has so constructed roosting birds that the act of settling down clamps them to their perch."

Hobo Reversion to Type.

A London dispatch says that the tramp is a reversion to type is the opinion of Dr. J. Milton Rhodes, chairman of the Central Committee of the Poor Law Conference and student of the substrata of social life the world over. The tramp—be he the 'Weary Willie' of the United States or the vagabond of England or the Continent—has the shambling walk of the anthropoid ape. In other ways too, Dr. Rhodes sees a strong resemblance. 'I have walked with tramps and talked with tramps the world over,' said Dr. Rhodes, 'and everywhere they are the same degenerate type. Besides the shuffling gait, the resemblance to the ape is borne out in the man's face; there is not a sign of intelligence there. Morally, physically and mentally the tramp resembles the ape more and more each generation. We must discourage the growth of this class of men.'

Dangerous Postage-Stamps.

The English post-office authorities have recently ordered the withdrawal from circulation of the threepence stamp colored yellow and brown, for the reason that investigation has shown that the coloring matter employed on these stamps contains sufficient chromate of lead to produce injurious effects. It was shown during the investigation on which the order of withdrawal was based that 12 milligrams of this substance were sufficient to cause poisoning, and a single one of the objectionable stamps carries a milligram of it. Thus the repeated application of these stamps to the lips in the act of moistening might result in the accumulation of a dangerous quantity of the poison in the mouth.

Green Grape Jelly.—Gather the grapes when just ready to turn color. Cook with just water enough to prevent scorching, stirring carefully. Simmer slowly for an hour, drain and add the sugar in the proportion of one pound to every pint of the juice. Heat the sugar in the oven before adding and stir it steadily till it is thoroughly dissolved. Let it boil for about one minute, then pour into glasses.

Ripe Grape Jelly.—Wash the grapes drain and mash them. Put them into a kettle, and heat until the juice separates from the pulp and skins. Strain through a jelly-bag. Measure and proceed as directed for green grape jelly.

Grape Jam.—Wash the grapes, and squeeze the pulp from the skins. Boil the pulp until it separates from the seeds, and rub it through a sieve. Then add the skins to the pulp, and boil with an equal weight of sugar fifteen minutes. Put into small jars or tumblers and seal securely with paper.

Fit-Reform

Founders in Canada of
Hand Tailored Garments, completely finished.

"New Things"
in Trousers.

Each succeeding season sees the standard of Fit-Reform garments raised higher.

This is especially true of Trousers.

Cloths are richer—patterns handsomer—colorings more striking—than Fit-Reform has ever imported before.

Coupled with the beauty of the goods, is the peerless Fit-Reform tailoring. That is a combination that the well-dressed man finds irresistible.

B. B. Manzer, - Woodstock.

Special Sale, Beginning Aug. 1st.

Hartland Farmers' Exchange,

C. HUMPHREY TAYLOR, Prop.

COD LIVER OIL and IRON

Add PHOSPHORUS and you have FERROL

For many years it has been recognized by physicians everywhere that Cod Liver Oil and Iron should be given in combination if possible, as where one is required the other is in all probability needed, too, each enhancing the value of the other.

Strange to say, although many attempts have been made, no one ever succeeded in combining the oil and iron until, quite recently, a Canadian physician, after some years of study and experiment, managed to solve the problem. He then added just a little phosphorus; the result is

FERROL

which contains in an elegant, palatable and easily digested emulsion Cod Liver Oil, Iron and Phosphorus, the exact constituents necessary to Increase the Weight, Enrich the Blood and Build up the System.

No argument is needed to prove the value of such a preparation in the treatment of Bronchitis and Pulmonary Diseases, Scrofula, Rickets, Anæmia and wasting diseases of any kind.

For Croup, Whooping Cough and Chronic Coughs and Colds Ferrol is an absolute specific.

FERROL is not a patent mystery. The formula is freely published. It is prescribed by the best Physicians. It is endorsed by the most eminent Medical Journals. It is used in prominent Hospitals, Sanitariums, etc.

Operators Wanted.

1 vest maker; 1 trousers maker; 1 woman for plain sewing. Apply to THE GEO. W. GIBSON Co., Ltd., at the up town store.

To new subscribers
we shall give The Dispatch from now till Jan 1908 for \$1.00

NOTICE.

Notice is hereby given that application will be made to His Honor the Lieutenant-Governor in Council for a Charter of Incorporation by Letters Patent under the provision of the Joint Stock Companies Act 1893, for "The Mutual Telephone Company Limited," empowering the said Company to operate a Telephone System in the Counties of Victoria, Carleton, York, Sunbury and Queens.

H. L. ROSS,
For Applicants.
Dated at Woodstock this 18th day of Sept. 1906. 4i. Sept. 19.
