Elmo will leave Fairville on September 4th for the Horton Collegiate Academy, Wolfville, N. S. Mrs. Tabor will leave Fairville about the same time for Boston to visit her sister, Mrs. R. J. Flewelling.

## Mr. Carnegie's Pronouncement.

Mr. Carnegie speaks from the outside only when he writes in The Nineteenth Century concerning the groundlessness for Great Britain's precautions against Russian aggressiveness on the Indian frontier and Germany's ambitions on the high seas. He assures the world that the Briton who dreads the Russian "wolf" in India or elsewhere, or the German "wolf" on sea or in colonial empire or in shipping, is the victim of imaginary fear.

Unfortunately Mr. Carnegie has not a long career behind him as diplomatist or statesman. He is probably as innocent as a babe of the inner workings of international politics. Beyond assisting to rivet on the neck of the American nation a system of protection that has made him a Croesus he has had little part in the affairs of State. He cannot therefore speak on the subject in hand with any great weight of authority.

"If," he says, "the invasion of Britain were ever imminent, a wild supposition, in all probability the United States would be found at her side." Mr. Carnegie's expression "in all probability" shows that even in his own mind the matter is not quite certain. Most of us would be the more inclined to accept this view had not the United States Senate but a few years ago refused absolutely to ratify a treaty of arbitration with Great Britain. The safety of an empire cannot be left to the winds of chance.

Mr. Carnegie, now that he has secured himself against old age by a snug little fortune of \$300,000,000, lives in a world of ideals. He means admirably and, so far as he acts, he does admirably, on the whole.

But his view of the affairs of nations is superficial and childlike. With free libraries that would open their doors to him all over the English-speaking world he appears to have read nothing of history. Rushing in "where angels fear to tread," so delicate of necessity is the machinery for the adjustment of international relations, he is prepared to pronounce offhand on this point and that which are the cause of the gravest concern to the wisest minds of Great Britain, regardless of party.

It may be that Russia has never had any thought of attacking India, and that the the German Emperor has never had it in his mind to build a great navy, but the statesmen who rule Britain must have more than the assurance of Mr. Carnegie on these points.

It is a little odd to find Mr. Carnegie of all men lavishing praise on the Emperor William because he is "no titular Sovereign, but the real leader of his people." We should have supposed the semi-autocracy of Germany the last form of government that would have found approval in the eyes of the author of "Triumphant Democracy." More than other living men the German Emperor is responsible for the crushing armaments of Europe.

On the whole, the old Latin maxim, "Ne autor ultra crepidam," "Let not the shoe-maker go beyond his last," is one that seems especially applicable to Mr. Carnegie. When he is discussing international politics he is decidedly in strange waters, and he must forgive the world at large if it takes his articles a good deal less seriously than it takes his libraries.—Toronto Globe.

## TWO COLLEGES AFFILIATED.

## Mount Allison Accepted by McGill.

Through the generosity of such public spirited men as Strathcona, Macdonald and Mount Stephen, Canada has in McGill University been provided with what is now freely called the most thoroughly equipped technical school in the world. It is reported that before long McGill is to be still further endowed to enable her to offer to young Canadians the opportunity of prosecuting the most advanced kinds of scientific research and thus provide for them at home what heretofore they could only find in Germany.

On account of this pre-eminent position of McGill University, one of the leading colleges of the Maritime Provinces, Mt. Allison University, in establishing a department of Engineering, has sought and obtained affiliation with McGill on the following terms:—Mt. Allison has organized a faculty of applied science consisting of five full professors and two assistants, and has built shops and laboratories to enable her to give the first two years of McGill's course in Civil, Mechanical, Mining, Electrical and Architectural Engineering. Prof. Tory, of McGill, has examined with approval the Mt. Allison equipment, and the students who have completed this two years' course at Sackville are presented with a certificate which will enable them to enter without examination the third year of any branch of engineering in McGill University.

The first set of Mt. Allison men go to McGill this fall. This plan has been found to be mutually advantageous to the colleges concerned, for while it keeps some men from going to McGill for the first two years, it leads a still larger number to select McGill rather than the Massachusetts School of Technology or Cornell University, as the college from which they will graduate. The expenses at Mt. Allison are lower by \$200 a year than at Montreal, and the fine residential accommodation at that university is causing a large number of engineering students to find their way to her halls. All students who take the Arts course of Mt. Allison, with engineering options, will be able in six years from matriculation to obtain the two degrees of Bachelor of Arts and Bachelor of Engineering, and in this way they will get the best which two universities can give them, and will have acquired a broader intellectual outlook.

## A MOTHER'S STORY.

## She Tells How Dr. Williams' Pink Pills Saved Her Daughter.

Anæmia is the doctors name for bloodlessness. It is an ailment that effects almost every girl in her teens. Womanhood makes new demands upon her blood supply that she cannot meet. Month after month her strength, her very life, are being drained away. No food and no care can do her any good. No common medicine can save her, she needs new blood. New blood is the one thing—the only thing—that can make a healthy woman of her. Dr. Williams' Pink Pills actually make new blood. That is why they never fail to cure anæmia. That is how they save from an early grave scores of young girls whose health and strength depend upon their blood supply. Mrs. Anson Clark, Arden, Ont., says:—"Dr. Williams' Pink Pills have been a great blessing in my family as two of my daughters have used them with marked success. When my eldest daughter was about seventeen she began to fail in health. Her blood seemed to have turned to water. She was troubled with headaches and dizziness; the least exertion would cause her heart to palpitate violently and she could not walk up stairs without stopping to rest. She doctored for upwards of a year, and the doctor said she did not have as much blood in her body as an ordinarily healthy person would have in one arm. The doctor's treatment did not do her a particle of good. She seemed slowly fading away. Then she became afflicted with salt rheum and her hands were almost raw. About this time a neighbor advised the use of Dr. Williams' Pink Pills and she began taking them. After using the pills for a few weeks we could see an improvement, her appetite began to improve and a trace of color came to her cheeks. She continued taking the pills until she had used thirteen boxes when she was as well and strong as ever, every trace of both the anæmia and salt rheum had disappeared and she has since enjoyed the best of health. Later on my youngest daughter aged fifteen began to lose her health, but thanks to our experience with Dr. Williams' Pink Pills we knew where to look for a cure and after using four boxes of pills she was all right again. I have also used the pills myself for nervous troubles with complete success."

Rich red blood is the secret of health—Dr. Williams' Pink Pills is the secret of rich red blood. They actually make rich red blood, that is why they cure anæmia, headaches and backaches, indigestion, nervous prostration, heart palpitation, neuralgia, rheumatism, sciatica, St. Vitus Dance and the ailments that make the lives of so many women and growing girls miserable. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

## BORN.

MCBRIDE.—At Hartford, on Monday, August 13th, to the wife of Mr. Albert McBride, a daughter.

ELDER.—At 265 Gerrard Street East, Toronto, Ont., Aug. 23, 1906, to the wife of J. J. Elder, a daughter.

## MARRIED.

WATTS-BODWELL.—At Cambridge, Mass., August 4th, by the Rev. David C. Reid, James F. Watts, of Boston and Carrie E. Bodwell, of Franklin.—Cambridge Chronicle.

BOHAN-LEE.—On August 27th, at the Cathedral of the Immaculate Conception, by the Rev. A. W. Meehan, Michael Bohan, of Bath, N. B., to Julia Teresa, daughter of James Lee, Esq., of St. John.

## What Every Girl Can Do.

Every girl can do one thing well if she will only take the trouble to find out what that thing is. The difficulty is that she often looks in the opposite direction; she wants to do something great and showy or nothing at all. But there are other talents within her reach if she will only look, and these talents may be such a comfort to her in her dark hours that they will make life better and happier both for herself and those about her.

It is the girl who does things in this world who is attractive to men and to her own sex. You may not be able to do great things, to paint great pictures or to sing in grand opera, but you can learn to make bright little things for yourself and for your friends, and perhaps to play the light "catchy" airs of the day so that your friends will enjoy them, and if you can't do anything else, cultivate the art of talking brightly and of being sympathetic. The girl who puts her own griefs as much as possible aside—who takes a wholesome interest in life—is happier herself and makes those about her happy.

## TROUSERS.

A Large Assortment of Men's and Boys' Trousers have arrived at

## THE UP-TOWN STORE.

These Trousers are made from the Tweeds manufactured by the Celebrated

## HEWSON WOOLLEN MILLS.

The name "Hewson" is a sufficient guarantee of the quality of the cloth, and in buying Trousers at the Up-Town Store you are assured that they are made right.

## Hartland Farmers' Exchange,

C. HUMPHREY TAYLOR, Prop.

Having bought the Plant, Stock in Trade and Good Will of the Small & Fisher Company, Limited, we are at the old stand open for business, and solicit a continuance of the patronage so liberally bestowed on our predecessors. The above cut represents our celebrated LITTLE GIANT THRESHER which is the most reliable Roller-Bearing, Double Geared Machine on the market. These Threshers have been many years before the public, and through skilful workmanship and improvements, where circumstances have demanded it, they are still to the front. We are making them both End and Side Shake to suit the requirements of our customers. Call and see us before purchasing elsewhere.
