A Batch of Fires.

Last Thursday at noon a fire alarm was rung in from the residence of Mrs. W. N. Hand, Broadway. The furnace pipe burned out. At two o'clock the same day an alarm was sent in from the Royal Bank; the furnace pipe was burning out. Very little damage was done by either fire.

The third fire on Thursday was more seri-C. P. R. track owned by Mrs. W. T. Drysdale and used by Philips & Phillips as a potatoe house caught fire about half past nine and, though the hose company were on hand promptly and worked vigorously, it was pretty well gutted. It contained about one car load of potatoes. The loss on both building and contents were covered by insurance.

On Saturday night about half past ten a car of potatoes, owned by Turney & McKeen, on the siding at Queen Street caught fire and the firemen were able to put it out by the use of pails of water and a liberal supply of snow.

On Sunday at 2 15 p. m. an alarm was sent in from Mrs. R. B. Porter's residence on Counell Street. The chimney burned out and the house was so filled with smoke that the loss must be nearly \$200.

The Bank of Nova Scotia.

The Bank of Nova Scotia has issued its seventy-fifth annual report. In this there are some interesting facts. This bank has an absolutely independent audit at the head office. Naturally those at the head of the bank are pleased with results, for the net profits, after providing for losses, are \$653, 516.59. The net profits of the bank for the year were 23.89 per cent. of the capital, being the highest in the history of the bank; aica, last week, killed many people \$100,000 was written off the bank premises business, in fact the best in its history. In regard to the management much credit | As a remedy for all the ills of chilhood aking the total now 83, New Brunswick is due to Mr. H. C. McLeod, the general manager and his staff who have worked most assiduously with the result that the past year, so far as earnings and deposits are concerned, was the best in the history of the bank. Consequently those who contemplate making deposits would do well to bear in mind that the strength and standard of this institution is such as to make it quite trustworthy because of the securities involved.

The Kingston Earthquake.

The new year is keeping up last year's record as a year of earthquakes and volcanic eruptions. The earthquake which destroyed a large part of the City of Kingston, Jamand injured hundreds more. Kingston, and its predecessor, Port Royal, have had their full share of natural calamities, but we may take it for granted that as at San Francisco, Martinique, and on the slopes of Mount Ætna, the people who have suffered bereavement and property loss, will find the attractions of their old home greater than its terrors and will promptly commence to rebuild. Money for the relief of the sufferers is being offered on all hands. The Dominion parliament has voted \$50,000 and is ready to give another equal amount if it is required,

Cipher Price Marks.

"The cipher price mark, the tag not marked '1,75' but 'P17CDG, 'is getting to be a thing of the past," said a jeweler. "The public mistrusts it. There is nothing that wins the confidence of the public like a price mark in big, plain figures. Most cipher price marks are easily read. They have for their key, as a rule, the sentence 'I push trade.' 'I' is 1, the 'p' 2, the 'u' 3, and so on down to hte 'e' which stands for 0. Thus '\$2,75' in cipher would be \$p r. h.' Ciphers are useful for firms that give long credit, for such firms must naturally ask more from a six months' customer than a spot cash one. But they are very unpopular things. They arouse universal mistrust."-New Orleans Times-Democrat.

Jeweller's Bit of Advice.

'I think I'll have to bring her in and let her choose,' said the embarrassed young man as he looked hopelessly at the diamonds spread out on the table.

'Pardon me for a bit of advice,' the eweller said, earnestly, leaning forward, but I've had a lot of experience in such matters. If you pick it out your self and take it to her she'll surely be satisfied. Always are. But if she comes here and sees bigger, handsomer rings she won't be content with the one you can afford. The \$500 or \$800 ring she sees will stay by her. We've often lost sales that way. I've frequently seen the young woman pick out a ring that the man obviously couldn't afford and he would find some excuse for not buying it.'

Then the young man said he thought he might as well decide on that \$110 trifle at
