

THE Greatest of Tonics
PSYCHINE
 (Pronounced Si-KEEN.)
 FOR ALL THROAT AND LUNG TROUBLES

TWENTY-FIVE YEARS' SUCCESSFUL RECORD

MONEY can buy advertising space, but it can't buy a quarter century's successful record of wonderful and almost miraculous cures of the most difficult and intricate cases of throat, lung and stomach troubles. Such is Psychine's record. Thousands of cases given up by leading doctors as hopeless and incurable have been quickly and permanently cured by Psychine. It is an infallible remedy for coughs, colds, bronchitis, pneumonia, consumption, indigestion, loss of appetite and all wasting diseases.

"My son had a terrible cough and was wasted to a shadow. Doctors said he could not live. He used Psychine, it cured him."—Mrs. J. Ranger, Brockville.
 "After taking \$5.00 worth of Psychine my lungs are well and life is again worth living."—Mrs. L. Richards, Marietta Cove, N.S.
 "My lungs are now sound as a bell after using Psychine."—H. Robbins, Bridgeburg, Ont.
 "Psychine saved my life."—A. Walden, 7 Cornwall St., Toronto.

Youkon Brand of Cold.

E. L. Parsons, an old-time Yukon miner, just returned from the frozen North, told some remarkable stories of happenings at Dawson City, when the thermometer drops many degrees below zero. He said:

"Strange manifestations appear as a result of the extreme cold. A fire in the stove roars and crackles like a great forge, and wood seems to dissolve in the flames like a chunk of ice; the wood is gone and you wonder what became of the heat. At 60 below zero every stovepipe throws out a great white cloud of smoke and vapor, which streams away for fifty or one hundred feet, mingling with the other white-gray mist or haze that remains permanent in the atmosphere, like a fog, whenever such a low temperature is reached. This white-gray fog is not the fog Easterns know, but a frozen mist; every man, woman, child, animal, and even the fire that burns, is throwing out moisture into the air which is immediately turned into a vapor, which remains visibly suspended in the air.

"Prospectors in attempting to boil a dish of rice or beans upon a camp fire unprotected from the weather find that the side of the dish which is in the fire will boil while that part exposed to the weather will freeze. Edged tools subjected to this temperature become as hard and as brittle as glass and break as readily under strain. I have seen a safety-valve blowing off steam, with the temperature 60 below zero, with icicles hanging to the valve, having formed from condensation. These icicles did not melt in the out-

rushing stream, but remained there for many days."

Mr. Parsons told of some instances when a frozen foot, ear or hand had been thawed by immersion in coal oil for some time—often for several hours. He said: "This is absolutely a safe remedy and one thus escapes the surgeon's knife, as no bad results follow. This is not hearsay, for a man from our camp was found after he had been out all night with the thermometer 50 degrees below zero, and both his hands were frozen to the wrists. He was taken into camp and his hands soaked in coal oil for five hours. All the frost came out and not even a finger tip was lost. The doctors were amazed as they thought amputation would have to be resorted to. His hands were as white and as hard as marble, and when placed in the oil they snapped and crackled as the oil began to act upon the icy crystals." The temperature of the oil should be about the same as that of the living room. Great caution must be exercised during the extremely cold weather not to freeze the lungs, which one will quickly do if he hurries about. Quick and fatal pneumonia can be contracted in a few moments. Many a fine team of horses has been lost in this way up in the Yukon.

One must be careful about touching metals with unprotected hands. It is dangerous to take hold of a doorknob when it is 60 below, or thereabouts with unprotected hands, unless you are careful to release your hand instantly, for if you do not it will freeze your inner palm in five seconds, the result being

much the same as from touching a red-hot stove. Canned goods undergo great contraction during extreme cold, and take in air; in summer, with a temperature of 90 degrees above zero, the reverse conditions prevail, causing leakage and loss.

The Bridegroom's Joke.

Under the thin disguise of harmless fun, many an unpardonably rude prank is played upon newly married couples. It is refreshing to hear of an occasional instance in which the "Joke" reacts on the Joker. A young man and his bride, who had just been married in a Western town, were starting on their wedding journey. They had managed to reach the train in safety, despite the showers of rice and old shoes.

Just as they had taken their seats in the car, one of the bridegroom's chum's came hastily in to bid him goodbye. As the young husband extended his hand the friend snapped a handcuff round his wrist.

The groom had been suspecting a trick of some kind, and before the practical joker could play a similar trick on the bride, he found the other handcuff snapped round his own wrist. He was chained to the happy bridegroom himself.

"That's a good one on me, Harry," he said, with a sickly kind of smile, "but I'll have to ask you to come to the door with me and get the key to these things from the fellow outside that's got it. Hold on, conductor, just a minute!"

But the conductor, whose quick eye had taken in the situation, refused to wait. He gave the order for starting, and the train pulled out. It was a through train, and made no stop for the next fifty miles. Before it stopped, however, the brakeman, with the aid of a sharp file and a hammer, succeeded in releasing Harry. The practical joker meanwhile, had had to pay full fare for the fifty miles and still had his fare home to pay.

FROM THE ANTILLES.

Chamberlain's Cough Remedy Benefits a City Councilman at Kingston, Jamaica.

Mr. W. O'Reilly Fogarty, who is a member of the City Council at Kingston, Jamaica, West Indies, writes as follows: "One bottle of Chamberlain's Cough Remedy had good effect on a cough that was giving me trouble and I think I should have been more quickly relieved if I had continued the remedy. That it was beneficial and quick in relieving me there is no doubt; and it is my intention to obtain another bottle." For sale by All Dealers.

A young New York woman who had spent some time in a professional capacity at Tuxedo came back impressed with the polite habits of the "smart set."

"A woman belonging to New York's Four Hundred," said she, "was giving a pizza tea while I was there. A guest took a lump of sugar in her fingers instead of using the sugar tongs, and the hostess indignantly ordered the butler to take the sugar-bowl away and fill it with new sugar. "The woman guest was so much insulted at this that she threw tea-cup, saucer, and all over the railing and went home."

This suggests by contrast the conduct of the southern woman who, when a clumsy man guest broke a rare tea-cup let a few moments go by and then broke another of the same pattern as if by accident in order to put the unfortunate man at his ease.

Erin Sends Out 5,000,000.

No page in history reveals such a migration as that of the Irish to America. The figures are astonishing. From 1640 to 1860 not fewer than 2,000,000 crossed the ocean to settle in the United States; from 1860 to 1880 an additional million made a fresh start in life in the great republic over the seas, and from 1880 to the present time another million was added to our population. Since 1860 the average has been 500,000 a decade.

The twelve agricultural States, represented by Ohio, Indiana, Michigan, Illinois, Wisconsin, Missouri, Iowa, Minnesota, Kansas, Nebraska, North and South Dakota, contain one-fourth of the 5,000,000. Of the portion settled in the North Atlantic States but one-fifth are on farms; but this tendency to crowd into the towns disappears when the surroundings are agricultural, as is shown by the large percentage—more than 50—of those who have taken to farming in the twelve agricultural States above mentioned.

It is only because the bulk of the Irish in America are not in the midst of farming districts that they are less an agricultural people than the other immigrant elements added to the population. They have found an outlet for their energies in the congested districts, and their wonderfully adaptive natures have allowed them easily to enter upon the industries of the people among whom they were thrown.

It is in the Eastern States that the Irish promise to ultimately constitute a majority of the population. This is already the case in three New England States and in many New England cities. In New York city they are barely behind the Germans, and slightly so in Chicago.—(Chicago Chronicle.)

Try This For Your Cough.

To relieve a cough or break up a cold in twenty-four hours, the following simple formula, the ingredients of which can be obtained of any good prescription druggist at small cost, is all that will be required: Virgin Oil of Pine (Pure), one-half ounce; Glycerine, two ounces; good whisky, a half pint. Shake well and take in teaspoonful doses every four hours. The desired results can not be obtained unless the ingredients are pure. It is therefore better to purchase the ingredients separately and prepare the mixture yourself. Virgin Oil of Pine (Pure), should be purchased in the original half-ounce vials, which druggists buy for dispensing. Each vial is securely sealed in a round wooden case which protects the Oil from exposure to light. Around the wooden case is an engraved wrapper with the name—"Virgin Oil of Pine (Pure)"—plainly printed thereon. There are many imitations and cheap productions of Pine, but these only create nausea, and never effect the desired results.

The Pronunciation Of Latin.

Men who were schoolboys from fifteen to forty years ago are aware that a change in the pronunciation of Latin has taken place since their time. Nearly every school and college and university has substituted the "Roman" pronunciation for the English method which used to prevail. And yet the modern schoolmaster, both here and in England, laments that the Roman pronunciation makes no headway. The old time schoolboy laughs at him. He knows why it is. Each year's classes of young Doctors and young lawyers take their nice fresh Roman pronunciation into professional life,

THE BEST PLUMBING

At most reasonable prices is what I am offering the public. Estimates cheerfully furnished on any kind of work in my line. A full line of materials of all kinds. Aqueduct Pipe at specially low rates. All work guaranteed first class.

Fredericton Business College

next term? You may enter any time after Jan. 1st. The sooner the better. Attendance for fall term larger than ever. Have had applications for far more graduates than we could supply. Write for FREE catalogue, to

W. J. OSBORNE, Principal,
 Fredericton, N.B.

What Has the Old Year Done for You?

Why not make the new year a success by taking a course of study with us? Two of the largest business concerns in the state applied to us for a book keeper and a stenographer this week, and we did not fill the positions as our graduates are all employed. Opportunities like this come to those who are prepared. Write, telephone or call.
 O. A. HODGINS, Prin, Houlton, Me.

to find at once a conservative force of older lawyers and judges and doctors sticking to the English pronunciation. Finding themselves powerless to overcome this, they yield to it, conform to the prevalent practice, and so themselves become a part of that conservatism which opposes the next class. It is doubtful if the Roman pronunciation of Latin ever gains permanent foothold outside of schoolrooms.

"Et up Whar He's Gwine."

Among the passengers on a Seaboard train the other day was a billy goat. He was tagged and put in the baggage car and started to his destination. Billy got hungry, and as they wouldn't let him eat the trunk straps he chewed up and swallowed the tag that was around his neck. One of the negro train hands came in, and in astonishment saw that Bill had eaten his tag, and exclaimed to the baggage master: "Fore Gawd, boss, dis billy goat has et up whar he gwine."

COD LIVER OIL and IRON

Add PHOSPHORUS and you have FERROL

For many years it has been recognized by physicians everywhere that Cod Liver Oil and Iron should be given in combination if possible, as where one is required the other is in all probability needed, too, each enhancing the value of the other.

Strange to say, although many attempts have been made, no one ever succeeded in combining the oil and iron until, quite recently, a Canadian physician, after some years of study and experiment, managed to solve the problem. He then added just a little phosphorus; the result is

FERROL

which contains in an elegant, palatable and easily digested emulsion Cod Liver Oil, Iron and Phosphorus, the exact constituents necessary to Increase the Weight, Enrich the Blood and Build up the System.

No argument is needed to prove the value of such a preparation in the treatment of Bronchitis and Pulmonary Diseases, Scrofula, Rickets, Anæmia and wasting diseases of any kind.

For Croup, Whooping Cough and Chronic Coughs and Colds Ferrol is an absolute specific.

FERROL is not a patent mystery. The formula is freely published. It is prescribed by the best Physicians. It is endorsed by the most eminent Medical Journals. It is used in prominent Hospitals, Sanitariums, etc.
