

PASTOR AND PEOPLE PRAISE PSYCHINE (PRONOUNCED SI-KEEN)

A Marvellous and Triumphant Record
of Victory Over Disease.

No medicine has ever effected as large a number of wonderful and almost marvellous cures as Psychine. It has had one continuous record of victories over diseases of the throat, chest, lungs and stomach. Where doctors have pronounced cases incurable from consumption and other wasting diseases Psychine steps in and rescues numberless people even from the very verge of the grave. Coughs, Colds, Catarrh, Bronchitis, Chills, Night Sweats, La Grippe, Pneumonia, and other like troubles, all of which are forerunners of Consumption, yield quickly to the curative powers of Psychine.

Mrs. Campbell, one of the many cured, makes the following statement:

I cannot refrain from telling all who suffer of my remarkable recovery with Psychine. In April, 1904, I caught a heavy cold which settled on my lungs and gradually led to consumption. I could not sleep, was subject to night sweats, my lungs were so diseased, my doctor considered me incurable. Rev. Mr. Mahaffy, Port Elgin Presbyterian Church, recommended Dr. Slocum's Psychine to me, when I was living in Ontario. After using Psychine for a short time I ate and slept well, the night sweats and cough ceased. Months ago I stopped taking Psychine, as I was perfectly restored to health and to-day I never felt better in my life. Psychine has been a god send to me.
Mrs. ANDREW CAMPBELL,
Cottonwood, N.W.T.

PSYCHINE never disappoints.
PSYCHINE has no substitute.

There is no other medicine "Just as good."

At all dealers, 50c. and \$1.00 per bottle.
If not write to

DR. T. A. SLOCUM, Limited, 179 King St. W., TORONTO.

Dr. Root's Kidney Pills are a sure and permanent cure for Rheumatism, Bright's Disease, Pain in the Back and all forms of Kidney Trouble. 25c per box. at all dealers.

Close To Death.

"One winter afternoon, while I was lecturing to a class of two hundred students at the Hahnemann Medical College of Chicago," says a writer in The Chicago Tribune, "one of the experiments—a color reaction—failed.

"The solutions were on the table in unlabelled, tall cylindrical jars. I depended upon my memory and their arrangement upon the table to inform me of the nature of the various solutions, which were all colorless or un-mixed. The experiment failed, and concluding that the potassium hydrate solution had been misplaced, in an undertone I directed my assistant to procure some sticks of the chemical from the laboratory, make a solution quickly and bring it to me. In his haste the assistant seized some sticks of potassium cyanide instead of the proper chemical. The cyanide resembles the other in form, color and appearance. But the cyanide is the most powerful and rapidly fatal poison in the world. He made the solution with the cyanide and brought me the deadly mixture. I used it without suspicion and again the reaction failed.

"Seeking to discover the cause of the trouble, I put a few drops of the cyanide upon my tongue. It was a mere taste, and with any other poison in the pharmacopoeia it would have been a trifling error. But it is not safe to taste the subtle and deadly cyanide. A black cloud seemed to gather

above me, high up, beyond the ceiling, in the upper chambers of the air, yet trailing down so that it lightly touched my head. It descended rapidly, but with a heavy, jerking motion like a rusty shutter. The students flickered before my eyes for a moment and disappeared in that black cloud. It was of an intense, inky, blackness, and as I stared into it I observed that its lower fringe did not quite obliterate the feet of the students in the first row. There was a stupendous roaring in my ears like the fall of a cataract, and there also was a certain obtruding of all the senses. Yet I was conscious of a startling internal clearness of thought, as if the mind, withdrawn from all outward things, was preternaturally active within, I felt certain that if that velvety cloud dropped low enough to hide the student's feet I would be dead, and I struggled to regain consciousness.

"All idea of time disappeared. I could not tell how long I had been there, and only obscurely where I was. The strongest state was a mingling of curiosity and anxiety as to whether the students' feet would disappear.

"The torpor deepened, a strange sense of isolation, of remote distance from everything came over me, death probably was near. If one drop more had been taken, it would, in all probability have been fatal, but as it was, the energies of the system began to throw the poison off.

The cloud suddenly began to ascend with heavy jerks, even as it had descended. The roaring in the ears died away, and out of the blackness and nothingness that had surrounded me, the ceiling, the students, the table of chemicals—all the familiar surroundings—reappeared.

There seemed to be no commotion in the class. I resumed my lecture.

On enquiry I found that several students had noticed a momentary hesitation, as if I was at a loss for a word."

Whooping Cough.

I have used Chamberlain's Cough Remedy in my family in cases of whooping cough, and want to tell you that it is the best medicine I have ever used.—W. F. GASTON, Posco, Ga. This remedy is safe and sure. For sale by All Dealers.

Millions of Feet Sunken Timber.

The scarcity of pine timber in the middle west has impelled the lumber mills to engage in a novel undertaking, by which they hope to save millions of dollars worth of logs which now lie at the bottom of the Mississippi and other rivers extending from the northern part of Minnesota, where the Mississippi has its source to LaCrosse, Wis., in all about 1000 miles of river bed. For fifty years logging has been carried on by rafting pine logs down this great highway, the logs being floated down the Mississippi to a point just north of St. Paul, where they are gathered up and made into rafts. From this point they are floated down the river to the various mills, guided by small steamboats or tugs.

It is believed that the river bottom is literally paved with pine logs as far south as Dubuque, Ia. It has been demonstrated that logs may be raised with great profit. The plan is to lift these logs with a hoisting engine erected on a flat-boat, place the logs on the river bank, and have a government scaler inspect them and record the marks found thereon. When the original owner can be found he will be compensated at the rate of \$8 a thousand feet. This represents just as much profit to the owner, and still leaves a margin of profit to the hoisters, who can find a ready market for the reclaimed logs at from \$12 to \$14 a thousand feet.

The logs that become "deadheads" or "sinkers" are chiefly of the small variety, known to lumbermen as "pig iron" Norway. They seldom are more than 8 to 12 inches through at the butt and are heavy and soggy. Rivermen say a great many of these sink before leaving the landing, a few of them "deadhead" it down stream for a way, one end bobbing in the water until, thoroughly water-soaked, they sink to the bottom.

Sound pine logs do not deteriorate when submerged in water, no matter how long they are immersed. Logs which have lain under water for half a century have been found in perfect condition, and lately some of the best lumber produced has been that from some gigantic pine logs that were felled forty-five years ago and became drawn down in one of the neighboring lakes by the waterlogging of hardwood timber with which the raft was bound. The entire raft, chain-bound, was lifted, and half a million feet of perfect timber was recovered.

Other streams in Minnesota and Wisconsin, where logs have been rafted for years will be explored by the company now formed to begin operation on the Mississippi River. Each lumberman has a private mark which is affixed to every log, the same as a brand is applied to range cattle. The state logging surveyor has a copy of these marks or brands, and when a log is recovered it will be an easy matter to tell to whom it originally belonged.

Choosing Dress Hats.

One can talk about spring hats with entire certainty, as it is definitely decided what will be the vogue. Straws and the soft berids are shown in beautiful colorings and the

drooping lines so smart in shoulder effects are repeated in the ultramodish millinery for spring and summer. These are gained through veiling, folds of chiffon and various other ways, though none is quite so elegant as ostrich plumes.

The milliners use willow plumes with wonderful effect in trimming many of their choice models. For instance, a handsome dress hat of silver lace has a small jampot crown and drooping brim. At the sides of the crown there is a cleverly twisted knot of silver gauze from which two beautiful willow plumes of salmon pink curl backward, drooping low over the hair.

Try This For Your Cough.

To relieve a cough or break up a cold in twenty-four hours, the following simple formula, the ingredients of which can be obtained of any good prescription druggist at small cost, is all that will be required: Virgin Oil of Pine (Pure), one-half ounce; Glycerine, two ounces; good whisky, a half pint. Shake well and take in teaspoonful doses every four hours. The desired results can not be obtained unless the ingredients are pure. It is therefore better to purchase the ingredients separately and prepare the mixture yourself. Virgin Oil of Pine (Pure) should be purchased in the original half-ounce vials, which druggists buy for dispensing. Each vial is securely sealed in a round wooden case which protects the Oil from exposure to light. Around the wooden case is an engraved wrapper with the name—"Virgin Oil of Pine (Pure)"—plainly printed thereon. There are many imitations and cheap productions of Pine, but these only create nausea, and never effect the desired results.

A Banker's Advice.

(Rosthern, Sask., Enterprise)

A farmer went to a bank recently to get his note renewed and the banker asked him if his implements were out in the weather. Upon being told they were, he was informed to go home and house his farm machinery, and then come in and renew his paper. If some farmers knew their own business as well as some bankers do theirs, there would be fewer implements rusting out in the element.

Eccentric—A term applied to those whom we cannot afford to call fools.

Temper—Something that at once gets the best of a man and betrays the worst of him.

Wisdom—That which is greater than gold, provided it is our wisdom and some other person's gold.

Sour Grapes—A kind of disagreeable fruit we would rather taste ourselves than have some one else reach.

Gravity—A stratagem invented to conceal lack of intellect.

THE GREAT DURABILITY AND WATERPROOF QUALITIES OF THE FISH BRAND POMMEL SLICKER. Make it First Choice of the man Who Knows EVERY GARMENT GUARANTEED. IF YOUR DEALER IS OUT OF FISH BRAND, DON'T CHANGE YOUR MIND, HAVE HIM GET THEM OR SEND ORDER AND PRICE TO US. \$3.50 BLACK OR YELLOW. TOWER'S FISH BRAND Slicker Co. Ltd.

A Help to Economy

Steam or Hot Water Heating will prove economical after the pipes are in. The fittings cost a little more than stoves or a furnace, but the advantage is greater. You operate a hot water system for almost nothing—it is almost no bother—it is the most perfect method.

Let us take measurements and tell you the cost.

FARM FOR SALE

A 165 acre farm in Jacksontown, formerly owned and occupied by Cook Estey. Eighty acres cleared and rest well wooded. House and farm buildings. Apply to Rev F S Todd, Woodstock, Jan 9, 11

Everybody Agrees

that COD LIVER OIL and IRON are beyond question the greatest medicines known. Then why does not everybody take Cod Liver Oil and Iron? Simply because most people cannot take the Oil and few can digest the Iron in any ordinary form. These difficulties have been entirely removed by the introduction of FERROL, in which the Iron is scientifically combined with the Oil, rendering the Oil palatable and the Iron digestible. While:

FERROL

is manufactured from the best quality of Cod Liver Oil (the whole of the Oil) and is richer in oil than any other emulsion, and while it contains just the right quantity of the best form of Iron and Phosphorus, it is so scientifically prepared that not one person in a thousand finds any trouble in taking it, and infants digest it without difficulty. Moreover the well-established value of the Oil and Iron is immensely enhanced by the process of manufacture, and as the formula is freely exposed it is not to be wondered at that physicians everywhere have fully endorsed FERROL and used it largely in their practice. FERROL is invaluable for the treatment of any kind of Lung or Bronchial troubles, while for wasting diseases it has no equal, and
