Have You a Special Permit to Live.

One of the arguments frequently advanced by those who are solicited by life insurance agents to sign an application is, "I have until such and such a day before the premium rate increases." This, in other words, means that these persons believe that there is a certain interval of time—so many days or months—in which to decide before the age will have increased to that point where a higher premium would be charged.

This argument is both inconsistent and ridiculous. If one admits that life insurance is ever a necessity, he, by that very admission, acknowledges that it is an immediate as well as a future necessity. What is perishable at any time ought to be insured all the time. Life is perishable. Good health is perishable. These are liable to pass away at any time. Therefore, they should be insured all the time. The man who indulges the fancy that some other time will do just as well for insuring his life, is placing a big responsibility on his family. When that "some other time" arrives it may be too late. The risk is running all the time. The loss may occur at any time. Provision should be made in the present time. Today's insurance is one day ahead of tomorrow's sickness, accident or death, any one of which, particularly the last, is a barrier to securing insurance. It is against the very uncertainty of continued health and life that insurance is designed to guard, and no more fallacious claim was ever advanced than "I have until so and so to decide." By what special dispensation has one individual the right to claim that he has one month, one week, one day, one hour or even one minute of time guaranteed to him? Disease and death come in an hour we know not of, and the boastful man, confident of living out his three score and ten years, may be cut down in the twinkling of an eye.

In how many cases has this form of confidence brought misery and want to bereaved families? Men glorying in their strength have scoffed at the need of immediate insurance and have left a desolate and destitute widow in less than a year. Others have inflated their great lungs and flexed their arms to display their powerful biceps as an answer to the agent who suggests the possibility of failing health, and have been rejected by the examiner "when they got ready to insure" on account of some unsuspected and insidious disease.

No greater proof of the folly of this common argument of people to get rid temporarily of an agent could be found than in the lists published by some insurance companies of policy-holders who have died within one year after insuring. Thousands of dollars each year are paid by companies on policies that have been in force less than one year, oftentimes less than one month. These lives were sound when the applications were made; otherwise they would have been rejected. Yet within the short space of a year decay had set in and death followed. But for every thousand dollars so paid out by the companies there are other thousands which might have been paid had not men put off insuring in the foolish notion that there was no occasion to hurry.

The man who says that he has until a certain day to think it over should be able to show his special permit to live. If he cannot show such a permit it should not take him long to decide that what is CERTAIN to happen some time is LIABLE to happen ANY time. Insure today. Consult

MR. TENNYSON SMITH'S EXCEPTIONAL TERMS FOR CAMPAIGNS.

Many favourable comments have from time to time been made in the Temperance and Religious Press as to Mr. Tennyson Smith's method of obtaining his remuneration for a series of meetings.

The "The Good Templars' Watchword" (England) says:—"The plan adopted by Bro. Tennyson Smith of making no charge for his services, but taking the proceeds of his Special Lecture, is excellent in more ways than one. In the first place, it relieves the Society and the Lecturer of any guarantee of the ability of the Lecturer, proving that he knows he is able to retain his audience and sustain the interest to the close of the Mission."

The "Methodist Times" (London, England) in a paragraph on "Temperance Missions and Finance," after recording the fact that the committee which invited Bro. Tennyson Smith to Cardiff not only met all their expenses by the collections, but had a balance in hand, calls attention to this fact, and says:—"The arrangement commends itself to Societies generally, for it evidences the Lecturer's confidence in his work, as his remuneration depends largely upon his own ability to hold and interest his audiences."
