**VALUABLE MEDICAL
PRESCRIPTION**

Recommended by a Well-known
Toronto Doctor, Whose Love
for Humanity is Greater than
His Prejudice Against Proprietary Medicines.

The following very valuable prescription, by an eminent and successful physician, will be appreciated by many who are suffering from la grippe, cold, cough, pneumonia, or any throat, lung or stomach trouble, or run-down system, as it is a certain cure, and will save many a doctor's bill. It is almost a certain preventive as well:—
"When you feel that you are taking cold or have chilly feeling or aching in any part of the body or head, or feel weak, tired, dizzy, unfit for work, pain in the head or back of the neck, do not neglect these dangerous symptoms, but send immediately to your druggist and get a bottle of Psychine (pronounced Si-keen), and prepare as follows:

"Psychine, 2 teaspoonfuls.
"Sherry, whisky or water, 2 teaspoonfuls.
"Choice of the latter can be made according to the judgment and preference of the patient.

"Mix thoroughly and take regularly before each meal and at bedtime."
This prescription has been used in thousands of cases and has been so universally successful that a number of leading physicians regularly prescribe Psychine in their practice for any of the above troubles, or any run-down, wasting or constitutional difficulty. It is the most reliable and valuable home remedy. It tones up the entire system, giving a feeling of youthfulness and vigor, adding many years to the life of those who use it.

"Years ago I was almost a physical wreck and was suffering with lung troubles. Friends and neighbors thought I would never get better. I began to despair myself. Losing faith in my physician, I procured another one who recommended the use of PSYCHINE. It was surprising beyond description the effect it had. I seemed to gain with every dose. Inside of two weeks I was able to attend to my housework again. There are no symptoms of consumption about me now."
MRS. HENDERSON, St. John, N.B.

"I had been suffering from La Grippe. My lungs were weak and I had a cough, but Psychine cured me."
MRS. H. BEAN, Chéapside, Ont.

Psychine can be procured from any druggist at 50c. and \$1.00. It is a very

Soup Stock.

Soups are as difficult to classify as hash, according to Olive Green, in "One Thousand Simple Soups" (G. P. Putnam's Sons), being made of almost any substance which teeth are accustomed to act upon. The soup kettle has been aptly termed "the kitchen wastebasket," receiving many a choice culinary manuscript which might otherwise go for naught.

With an energetic and active soup-kettle, true household economy is possible. The failure of yesterday may easily become a triumph of today, and experiments which a disdainful family sneered at, and refused to include, are often sent rejoicing down "the little red lane."

Roughly speaking, soup-stock may be made of almost anything. A genius can go to a refrigerator in which are a few unpromising scraps of meat, a few tablespoonfuls of left-over vegetables, either fresh or canned, and with these apparently hopeless materials, a chicken foot, beef extract, gelatine, an onion and a tomato, evolve a masterpiece.

Everything except mutton fat and potato peelings and ice cream may be made to yield up its last quota of nourishment in the soup-kettle. Even a fried egg has a place in the soup-kettle, and chicken is even more desirable if old.

Sore Nipples.

Any mother who has had experience with this distressing ailment will be pleased to know that a cure may be effected by applying Chamberlain's Salve as soon as the child is done nursing. Wipe it off with a soft cloth before allowing the babe to nurse. Many trained nurses use this salve with best results. For sale by All Dealers.

It is better to go forward slowly than round and round ever so fast.

There is never much good in "good enough."

"I've gone every day this week," sighed little Mrs. Wallace, "to look at a perfect love of a hat in Mrs. Smith's window. Such a darling white chiffon affair, Edward, with great big bunches of perfectly exquisite white roses and such heavenly lace! But the price—well I wanted it tremendously, but I just couldn't afford to buy it."
"Perhaps—"

"You're a dear, but alas! There isn't any perhaps. Edward I paid the cook this noon and what do you think? She marched right down and bought herself that very hat."

The Magistrate—Are you guilty or not?
The prisoner—Well, your honor, I think I am but I'd like to be tried to make sure.—Sketch.

"Now that Grindle has made his pile he has joined the church."

"Wonder why he didn't join before?"

"Didn't want anything to interfere with his business."—Cleveland Plain Dealer.

The Backward Child

Ignorance, which is almost always cruel, is nowhere more so than in dealing with children. Those who are grown up can too well remember the almost invariable cruel fate of the backward children—the exasperation of their teachers and the scorn of their classmates.

A quarter of a century ago no one dreamed that there was anything to do with the so-called stupid child but to goad and jerk and jeer and gibe him along the road to knowledge. Fortunately, science, aided by good common sense, is at work changing all this, and to-day any teacher worthy of the name seeks for the cause behind the backwardness, and is convinced that in very few cases indeed can it be traced to "original sin."

We are not now considering the question of deficient children—of those who really have something wrong with the brain. Although the parents of these unfortunates often speak of them as "backward" in the effort to hide, even from themselves, that they are not like other children, they are, as a matter of fact, a class by themselves, and should be recognized and handled accordingly. By "backward children" is meant all those who rarely know a lesson, who never seem to pay attention, who pass any given point on the road to knowledge with unnatural slowness, and who do not seem to be reached by the usual motives of emulation, shame, and so on.

It will usually be found on careful examination that these cases have a physical basis. Often in the case of the very poor it is a heart-breaking fact that this basis is partial starvation. The children start for school in the morning either on no breakfast at all, or on such a meager or badly prepared one that it is the same as none. Experiments in the line of furnishing these poor children with a meal in the school building have met with astonishing results in the improvement of the mental condition.

Adenoids are the cause of much apparent stupidity in children. A child afflicted with these growths never breathes properly, his blood is not aerated, and that causes a state of auto-intoxication; so that he sits with his mouth wide open, staring vacantly into space, attending to nothing and forgetting everything.

It is no longer the fashion to shout angrily at this poor child. Instead, he is taken to a specialist and his adenoid growths are removed. The result is a most astounding improvement in his general condition and power to study.

Eye-strain, or deficient vision, often keeps children backward. If a child is observed to twist into wrong attitudes while writing or to have trouble in reading from the blackboard at a reasonable distance, he should be examined by a competent oculist.

Relief From Rheumatic Pains.

"I suffered with rheumatism for over two years," says Mr. Rolland Curry, a patrolman, of Key West, Fla. "Sometimes it settled in my knees and lamed me so I could hardly walk, at other times it would be in my feet and hands so I was incapacitated for duty. One night when I was in severe pain and lame from it my wife went to the drug store here and came back with a bottle of Chamberlain's Pain Balm. I was rubbed with it and found the pain had nearly gone during the night. I kept on using it for a little more than two weeks and found that it drove the rheumatism away. I have not had any trouble from that disease for over three months." For sale by all dealers.

Old Blunt—Ah! Miss Nightingale, that "Winter song" was charming. It carried me back to the days of my childhood.

The singer—I am so glad you liked it.

Old Blunt—Why, I could actually hear the bellowing, the old windmills creaking, and the discordant winds howling about the doors.—Tit-Bits.

The Stranger—Hi, mister! Look sharp—your lion's been and broke loose!

The lion tamer—Oh, dear He'll get himself run over—I'm sure he will! Run and drive him back, there's a good chap.—Pick me up

BUY THIS LITTLE HOME.

On Broadway, a small comfortable dwelling house containing 7 rooms, water in the house, near Broadway school and convenient to the C. P. R. yard. Will sell less than cost. Apply to F. L. ATHERTON, Woodstock.

COD LIVER OIL and IRON

Add PHOSPHORUS and you have FERROL

For many years it has been recognized by physicians everywhere that Cod Liver Oil and Iron should be given in combination if possible, as where one is required the other is in all probability needed, too, each enhancing the value of the other.

Strange to say, although many attempts have been made, no one ever succeeded in combining the oil and iron until, quite recently, a Canadian physician, after some years of study and experiment, managed to solve the problem. He then added just a little phosphorus; the result is

F E R R O L

which contains in an elegant, palatable and easily digested emulsion Cod Liver Oil, Iron and Phosphorus, the exact constituents necessary to **Increase the Weight, Enrich the Blood and Build up the System.**

No argument is needed to prove the value of such a preparation in the treatment of Bronchitis and Pulmonary Diseases, Scrofula, Rickets, Anæmia and wasting diseases of any kind.

For Croup, Whooping Cough and Chronic Coughs and Colds **Ferrol** is an absolute specific.

FERROL is not a patent mystery. The formula is freely published. It is prescribed by the best Physicians. It is endorsed by the most eminent Medical Journals. It is used in prominent Hospitals, Sanitariums, etc.
