Dairying in Carleton County.

The Carleton Creamery, owned by the Maritime Dairy Co., has been running since about the first of May and now has ten routes on which it is collecting cream. The management are this year paying 20 cents a pound for butter fat at the farmer's door. Some of the cream collected has contained as much as 50% of butter fat, but this cream is rather difficult to handle. The management are not offering any of their butter on the local market, but are selling daily large quantities of ice cream.

William Love turned the Glassville cheese factory into a creamery and has been making butter since the first of June.

The only cheese factory that will be operated this season is the Jacksonville factory, which Mr. Good hopes to start up in a few days.

An Importation of Well Bred Horses.

The Hon. L. P. Farris, chief commissioner of agriculture returned last Thursday from England and France where he and Ora P. King, M. P. P. of Sussex had gone as a commission from the local government to purchase horses and sheep for the improvement of the stock of the province. They bought 38 horses which will be embarked about the 29th of this month for Quebec.

Hon. Mr. Farris said he was well pleased with the result of the trip. Though they had to pay pretty high prices for the horses purchased they would be found fine animals. They bought thirty-eight in all—twenty-four Clydesdale fillies from two or four years old, two Clydesdale stallions, ten Percheron fillies and two French coach fillies. The fillies averaged \$300 each, one of the stallions cost \$1,000 and the other \$1,500. The latter he declared the finest ever imported into Canada and that all are superior to any ever brought to New Brunswick. The Clydesdales were bought in Scotland, the Percherons and French coach horses in France. Prices were high, he said, because many horses are being shipped to Argentine, Australia and other lands. In their selection, Messrs. Farris and King were assisted by Robert Ness, of Quebec, an expert judge of horses, who was over on a buying trip for himself.

Arriving at Quebec the horses will be brought to this province and will likely be offered at auction at Fredericton and Moncton.

Mr. Farris said they intended also to buy a number of sheep but gave up the idea because they were so dear and it was too early in the season; lambs were too young and very high and they decided that they could buy better in Ontario or Quebec and this would be done and the sheep sold at some of the New Brunswick exhibitions.

A model maker, who has lived in New York city for 72 years, says that there are at least 67 men in the city who are working on perpetual-motion machines.

A. Wilnot Hay's Mill Burnt.

About 12 30 Sunday morning fire was discovered in Wilnot Hay's saw mill on the South side of the Meduxnakeag. By the time the firemen got on the scene it was burning furiously and nothing could be done to save it.

However, the firemen turned their attention to the saving of the buildings of the Imperial Packing Co. and the lumber near the mill. In this they were successful.

There was no nightwatchman employed on the premises but they had been cruised by an employe as late as eleven o'clock and there was no sign of fire then. The entire contents of the mill, including a rotary, shingle and lath machines, edger and three engines were destroyed. A certain quantity of lumber among it staves and barrel heads belonging to the Cooperage Co. was also burned.

Mr. Hay estimates his loss at \$15,000 and he had but \$3,000 insurance. The loss of the Cooperage Company was about \$1500 with an insurance of \$500.

Mr. Hay had a crew of men at work on the ruins Monday morning. He will rebuild at once.

A Tiny Human Machine.

"We met little Joe one day in a Pittsburg toby (cheap cigar) factory," writes Owen R. Lovejoy in the July Woman's Home Companion. A tenement room twelve feet square, with a low ceiling, not an open door or window, was occupied by twelve or thirteen people, who were rolling this cheap cigar. We had gone with the friend of the children to see little Joe, a boy of eleven, who worked twelve hours a day except on one day of the week, when his hours continued on to midnight.

"As we watched him bending over his table, his fingers flying deftly at their work, we seemed to see two pictures of little Joe sitting before us. First was the perfect machine, a human organism, trained to lightning motions that produced five or six hundred of these cigars each day, for which he received eight cents a hundred. Second, the sallow chest, the ominous cough, which combined to write with his life blood Nature's curse upon our social neglect. Without speaking a word Joe told us more convincingly about child labor than all the census reports that were ever compiled."

DAVID TAPLEY of McAdam was in Woodstock yesterday.

COUNTY Councillor H. F. Grosvenor of Meductic was in Woodstock yesterday.
