**Know-How Workmen**  
**Insure Economy.**

No loss of time in experimenting if the workmen know their business. No waste of material if they know how to figure. No loss from unreasonable repairs. The way to do the best plumbing is to have men who know how to do the work.

**FEWER BROS.**  
Connell Street,  
Woodstock.

# PAIN

Pain in the head—pain anywhere, has its cause. Pain is congestion, pain is blood pressure—nothing else usually. At least, so says Dr. Shoop, and to prove it he has created a little pink tablet. That tablet—called Dr. Shoop's Headache Tablet—coaxes blood pressure away from pain centers. Its effect is charming, pleasingly delightful. Gently, though safely, it surely equalizes the blood circulation.

If you have a headache, it's blood pressure. If it's painful periods with women, same cause. If you are sleepless, restless, nervous, it's blood congestion—blood pressure. That surely is a certainty, for Dr. Shoop's Headache Tablets stop it in 20 minutes, and the tablets simply distribute the unnatural blood pressure.

Brise your finger, and doesn't it get red, and swell, and pain you? Of course it does. It's congestion, blood pressure. You'll find it where pain is—always. It's simply Common Sense.

We sell at 25 cents, and cheerfully recommend

## THE X-RAY'S RECORD.

Accidents Due to its use Exaggerated.  
(N. Y. Sun.)  
That there have been some regrettable accidents from the X-ray, both to patient and operator, in the ten years which have elapsed since its discovery, is incontrovertible, but these accidents have not been nearly so serious nor so frequent as has been stated.

There have been, so far as can be definitely learned, only four deaths among X-ray workers in the English speaking world directly attributed to its effects. All of the victims were pioneers in the field and were marked for destruction before modern methods had been introduced. These victims were: Miss Fleischman, San Francisco; Dr. Barrie Blacker, London, England; Dr. L. A. Weigel, Rochester, N. Y., and an Edison employe.

There have, of course, been serious cases of dermatitis, generally of the hands—some practitioners have lost two or three fingers in the work—but as stated above these accidents have been due to the operator making discretion subservient to enthusiasm. Many doctors, however, have been actively engaged in the work from the beginning and have come through their ten years of experimenting without any apparent ill effect.

One great source of danger hitherto has been the operation of the Roentgen ray by inexperienced persons or persons who do not possess the medical knowledge necessary for the safe administration of this treatment. In some hospitals and in the offices of many doctors patients have been treated by nurses or attendants according to a prescribed standard, without any supervision whatever from a physician or without the physical condition of the particular patient being considered.

Another and possibly a greater source of danger lies in its use by enthusiastic practitioners who do not thoroughly understand even its first principles. A manufacturer's representative will arrive at a small town on the evening of a certain day, the following morning he will sell his machine to a physician, instruct the latter in its use for half an hour, proceed to the next town and the same evening the physician will be diagnosing and treating patients.

As an adjunct to surgery the Roentgen ray has become indispensable. The conduct of many operations which are now performed with comparative ease was rendered extremely difficult, if not impossible, before its introduction. In the field of military surgery lies one of the Roentgen ray's widest spheres of usefulness.

It can fairly be claimed for the Roentgen ray that it has contributed in no small degree to the relief of the sufferer from cancer. By its aid many cases hitherto inoperable have been successfully operated upon, and in every instance the attendant pain, if not entirely eradicated, has been appreciably relieved.

As an auxiliary in the treatment of tuberculosis the Roentgen ray has proved particularly valuable, especially in the first and final stages. While in the final stages the inevitable end has never been averted, the hemorrhages, night sweats and fevers have been controlled, the pain has been allayed, the general condition made more comfortable and in many cases the patient's life prolonged.

In the early stages the appetite, weight and strength have been materially increased and the general condition so improved as to enable the patient to make a much better fight against the disease.

But it is not alone in the sphere of medicine that the Roentgen ray has proved its usefulness. For instance, it has been successfully employed in detecting flaws in metal, ores in rock, pearls in shellfish.

For some time it has been used in Japan in custom house work, being found exceedingly valuable in the detection of jewelry and precious stones concealed in packages, walking sticks, etc., but it has not been used in this connection in this country. In determining the genuineness of precious stones the X-ray is infallible.

Under the idiosyncrasies of every stone are observed. The diamond is almost transparent; the spurious imitation is opaque.

For the splendid results obtained with the Roentgen ray in this country a great deal of credit must be accorded the American Roentgen Ray Society, which has done much to stimulate interest in the science among the medical fraternity. The membership of the society at present numbers nearly two hundred and fifty, distributed throughout the United States and Canada. The society holds a four day convention annually, in which addresses are delivered, papers are read and discussed and the general status of the work reviewed.

The late Lewis Carroll, author of "Alice in Wonderland," used to tell this story to illustrate the average mathematician's contempt for poetry:

"In the course of an argument about poetry with an instructor in trigonometry he gave the instructor Tennyson's 'Charge of the Light Brigade' to read.

"There, read that," he said, "and if you don't find it full of beauty I'll give in."

"The instructor sneered, looked at the page, and began to read—

"Half a league, half a league, half a league—

"Then he threw down the book.

"If the fool means a league and a half," he snorted, "why can't he say so?"

I'll stop your pain free. To show you first—before you spend a penny—what my Pink Pain Tablets can do, I will mail you free, a Trial Package of them—Dr. Shoop's Headache Tablets. Neuralgia, Headache, Toothache, Period pains, etc., are due alone to blood congestion. Dr. Shoop's Headache Tablets simply kill pain by coaxing away the unnatural blood pressure. That is all. Address Dr. Shoop, Racine, Wis. Sold by All Dealers.

## Preserving Manuscripts.

"In the preservation of the original manuscripts of old books and old records, Japanese silk has been found in recent years to be the best safeguard," says an official of the Library of Congress.

The use of this silk removed a fear that long beset the librarians that the rare old manuscripts would simply have to leave their say, and then dry up and return to their original elements. Happily the use of silk of extreme thinness and transparency has settled the question of the life of these manuscripts for the next two or three hundred years at least. By that time some other method may have been discovered.

The Japanese silk is thinner than the thinnest tissue-paper, the threads being finer than spider-webs. It is pasted over the manuscript so firmly that it keeps off all dust and air, and yet is so transparent that it does not interfere any more with the appearance of the manuscript than would an ordinary plate of glass. It strengthens the manuscript so that the danger of handling is reduced to a minimum.

The Library of Congress is now engaged in examining and protecting all of its old manuscripts with this silk, and while it is an immense task it will probably be completed within the next few years. The silk is by no means costly.

## HAD AN AWFUL TIME

But Chamberlain's Colic, Cholera and Diarrhoea Remedy Cured him.

It is with pleasure that I give you this unsolicited testimonial. About a year ago when I had a severe case of measles I got caught out in a hard rain and the measles settled in my stomach and bowels. I had an awful time and had it not been for the use of Chamberlain's Colic, Cholera and Diarrhoea Remedy I could not have possibly lived but a few hours longer, but thanks to this remedy I am now strong and well. I have written the above through simple gratitude and I shall always speak a good word for this remedy.—Sam. H. Gwin, Concord, Ga. For sale by all dealers.

## Good Advice.

Possibly the person who patronizes the transient dealer, the peddler or the smooth traveling sharper may get a fair trade once in a while, through the chances are considerably against such a result. The people to patronize are those of your own town—those who help pay taxes, support your schools and churches, and have an hour or a dollar once in a while for a charity or other public or private good. Don't be imposed upon by some taking young fellow a stranger, who professes to represent some great and beneficent concern, for the benefit of the dear public, but who in reality represents himself and his own pocket first of all. Buy your goods from men who expect to see you again, whose interests are to a great degree yours, and who are always right near you to make good any possible deficiencies; in other words, patronize your townsmen and neighbors.—Fort Fairfield Review.

## REMEDY FOR DIARRHOEA NEVER KNOWN TO FAIL.

"I want to say a few words for Chamberlain's Colic Cholera and Diarrhoea Remedy. I have used this preparation in my family for the past five years and have recommended it to a number of people in York county and have never known it to fail to effect a cure in any instance. I feel that I cannot say too much for the best remedy of the kind in the world."—S. Jemison, Spring Grove, York County, Pa. This remedy is for sale by all dealers.

# Deering Ideal Folding Reaper.

Strong, Light in Draft, Easy to Operate.  
The Most Up-to-Date Reaper on the Market.

An important feature of the Ideal Reaper is the ease and dispatch with which the driver can make every adjustment to meet varying crop conditions without dismounting from the seat. He can quickly adjust the rakes to sweep the platform, to have them act as reels without sweeping, or tilt the platform to throw the knife down to pick up lodged grain.

Each of the four rakes can be operated exactly as desired by means of the controlling device. By an adjustment of a hand latch every rake, every second, every third, every fourth, or every fifth rake can be made to sweep the platform, or by the operation of a foot lever, the rake can be made to act as reels. This machine may be compactly folded for transportation or storage.

For sale by us and our staff of agents. For prices and terms see any of these men or consult us.

Terms: Single service \$6.00; to insure \$12.00; \$2.00 to be paid at time of service, in default thereof \$15 will be charged.

JOHN MURDOCK, Groom.

C. HUMPHREY TAYLOR, Owner.

## The Thoughtful Landlord.

(Harpers Weekly.)

A New-Yorker whose business frequently takes him through the South tells of an amusing experience in a country hotel in one of the Carolinas.

The New-Yorker soon learned that the landlord of his establishment laid it down as one of his principles of action to give his patrons a little more than they asked for—to be "extra accommodating," as he termed it.

The New-Yorker had left a call for six in the morning, so that he might take an early train north; and he went to sleep in the calm assurance that he would be aroused at the proper hour.

"I seemed hardly to have fallen into a sounder slumber," says he, "when I heard a terrific pounding at my door. I sprang up, wide awake.

"'Whats the matter?' I called out.  
"'Four o'clock!' came the landlord's voice from the other side of the door. 'Two more hours to sleep!'"
