

**HOME-MADE MEDICINE**

**Said to Relieve Kidney Trouble and Rheumatism**

One ounce Fluid Extract Dandelion;

One ounce Compound Salatone;

Four ounces Compound Syrup Sarasaparilla;

Mixed and taken in teaspoonful doses after meals and at bedtime, is stated by a prominent physician to give most excellent results in kidney or urinary affections, and also in rheumatism and sciatica. The mixture opens the clogged pores of the kidneys, thus assisting them in their work of filtering all waste and poisonous matter from the blood, and expels these in the urine. To allow this poisonous matter to remain means that it will settle in the muscular tissues or joints, and cause the untold misery known as rheumatism.

The mixture is composed of harmless vegetable ingredients which can be purchased at any good drug store, and mixed at home.

Anyone suffering from any of these afflictions will no doubt be pleased to learn of so simple and highly recommended remedy.

**An Expert View on Dairy Breeds.**

Edward Van Alstyne, who was head of the dairy department of the Pan-American Fair, is a firm believer in the special purpose cow. A large, fine-looking cow will commonly sell for more than another cow less handsome in appearance but giving an equal amount of milk, but Mr. Van Alstyne argues that it is foolish to pay more for such a cow and feed her five or six years the extra amount of grain required to maintain her heavy weight, only to have two or three hundred more pounds of old cow beef to sell at the end of her dairy usefulness. It would be just as sensible, contends Mr. Van Alstyne, to buy one of the old-style, out-of-date mowing machines, double the weight of the modern mowers, and drag the extra weight over the fields for many years, merely to gain the old iron for which the heavy machine would sell when worn out.

From his experience Mr. Van Alstyne considers the Holstein, the Ayrshire and the Jersey or Guernsey the leading types of dairy breeds. The Holstein, he finds, will produce a quart of milk at less cost than any other breed, and is well adapted to those who wish to produce milk at low cost, regardless of richness, and who will supply plenty of food without obliging the cow to hustle for a living. Some consider the Holstein a general-purpose cow, but Mr. Van Alstyne does not think much of its beef qualities. Some strains of the breed have been bred to produce rich milk, but the quantity is thereby reduced, and he would not recommend the Holstein as a butter breed.

The Ayrshire is a breed not fully appreciated, according to Mr. Van Alstyne, on account of the lack of special attention to advertising methods on the part of the fanciers of the breed. The Ayrshire is well adapted to hill pastures, and on such locations ought not to be supplanted by the Holstein. The milk is richer in solids and fat, and the cow better adapted to finding her own living in rough pastures. The milk is well balanced in composition and desirable for cheese making, and the cow is of good constitution, and occupies a place between the Holstein and the Channel Island breeds.

The Jerseys and the Guernseys are very much alike and are classed about equal in Mr. Van Alstyne's estimation. They are, above all, good butter cows. The Holsteins at the Pan-American Exposition made more pounds of butter than the Channel breeds, but it cost twelve cents a pound, where the Jerseys and Guernseys made it for nine cents, and they are accordingly the best breeds for the man who wishes to make butter. Not only is the milk richer, but it creams more readily, and can be handled to better advantage after the cream is obtained. It can be churned with less trouble from temperature and other conditions. The color is also better, especially in winter, the Guernsey breed being the only breed that produces high-colored butter during the winter season.

For the dairyman stocking his farm Mr. Alstyne advises that the start be made with pure-bred stock if possible. Although the first cost is higher, such stock is more likely to breed true and produce better quality. The surplus young stock, too, can be sold for much higher price than grade stock, but as far as the yield of milk and butter is concerned it is possible to get about as good results by breeding up a herd of choice grades with a pure-bred sire. The choice of breeds should be such as suits the requirements of the dairyman, his farm and pasture condition, his market and the class of produce to be turned out.

Get a free sample of Dr. Shoop's "Health Coffee." If real coffee disturbs your Stomach, your Heart, or Kidneys, then try this Clever Coffee imitation. While Dr. Shoop has very closely matched Old Java and Mocha Coffee in flavor and taste, yet he has not even a single grain of real Coffee in it. Dr. Shoop's Health Coffee Imitation is made from pure toasted grains or cereals, with Malt, Nuts, etc. Made in a minute. No tedious wait. You will surely like it. Sold by All Dealers.

**Horse Meat For Food.**

(Montreal Witness.)

The visit of a Chicago meat dealer to Montreal has brought up the question of the possibility of a regular horse meat business here in the near future.

'F. A. Hart & Co., sausage casings, Chicago,' were the words read on the card presented to Dr. Loberge, medical health officer, by the person above referred to. The visitor explained that, besides sausage casings, his firm operated a horse abattoir in Chicago, where animals are slaughtered and the meat exported. A regular government inspection has been inaugurated, and Norway is getting the product. There is apparently, no attempt to conceal the nature of the meat under a fancy name. It is sold for what it is. The enterprising Chicago manufacturer has come to study what might be done in Montreal in the export trade of horse meat. His examination so far has been rather discouraging, principally for the reason that Montrealers charge too much for their horses.

This incident has caused the medical health officer to consider the question of the horse meat trade in the event of its assuming some development, when the Board of Health would have to adopt certain regulations. He said yesterday that he could find nothing against the erection of a special abattoir for the slaughter of horses, although there might be some legal point in the fact that the city was pledged to prevent the public sale of meat from any but the recognized abattoirs.

Referring to the use of horse meat in Paris, where certain restaurants have signs announcing that they keep the delicacy on hand, Dr. Loberge remarked with a smile that many visitors who wished to taste a dish so new to them, were surprised to find that it was just like beef. 'The fact is,' added the doctor, 'that those strangers are given beef, the genuine article being reserved for 'connoisseurs.'

In the opinion of Dr. Loberge, the horse meat trade is one that must come, owing to the high price of beef.

**Deafness Cannot Be Cured.**

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucus lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO, Toledo, O. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

**Seasickness as a Cure for Terror.**

John, do you realize that there is only a plank between us and eternity?" asked Mrs. Tremois solemnly. To her the ocean had ever been a vast and mysterious peril—indeed, all bodies of water larger than a bath tub had for an aspect of menacing danger—but the expostulations and persuasions of her husband had at last prevailed over her terrors, and she had embarked upon this voyage to Europe for their holiday. But now, in the darkness and desolation of this first night out, all her fears had returned, magnified, and illuminated by a weird and inexplicable "gone" sensation where her stomach used to be when she was home. "Oh, John," she repeated still more solemnly, "do you realize that there is only a plank between us and eternity?"

"All right, my dear," murmured Tremois, drowsily, "it's lucky there is." "Oh, John, John," cried Mrs. Tremois, starting up in her berth as an unusual sound reached her ears a few moments later. "Oh, John, do you realize that there is only a plank between us and eternity?"

"This ain't eternity, it's the Atlantic Ocean," muttered Tremois sleepily. "Forget you want to be an angel, and go to sleep, Martha, now do!"

"Oh, John! Oh, my husband!" screamed Mrs. Tremois, as to her excited fancy a moment later the vessel seemed on the point of rolling completely over. "Oh, do you realize that there is only a plank between us and eternity?"

"Dad bust it! Martha, are you going to keep it up forever? Why can't you go to sleep and quit bothering about your blasted old lumber yard?" snarled Tremois impatiently.

"You wretch!" shrieked Mrs. Tremois, springing from her berth and standing white and trembling in the middle of the state room. "Oh you abandoned wretch! How

dare you swear like that with only a plank between us and eternity?"

Tremois groaned aloud in bitterness of spirit. "Martha," he quired with pathetic resignation, "are you ever going to stop jabbering like a camp meeting, and let me get some sleep?"

"Sleep! Oh, how can you, how dare you, sleep?" demanded Mrs. Tremois, wringing her hands wildly. "with only a plank between us and eternity!"

For right in the middle of her most rational question, to Mrs. Tremois terror-filled imagination the ship seemed to stand straight up on its head for one long dizzy moment, and as it sank slowly, sickeningly back into the fathomless deep, she dropped gasping to the floor.

And thenceforward the actual miseries of the present excluded all thought of the future.

A new industry is to be started at the Chaudiere, Ottawa, within another month, that of making pulp from spruce and hemlock refuse, which, up to the present time, has nearly all been cast aside as waste. The Ottawa Pulp and Paper Company has been formed for the purpose of carrying on the work. The pulp will be shipped to Massena, N. Y., where it will be manufactured into various kinds of paper. The enormous demand for all sorts of pulp and paper on the outer side of the line makes a venture of this kind important. The United States paper manufacturers are unable to procure sufficient raw material, and every day the situation is growing worse owing to low water in the rivers and the closing down of factories for various reasons.

**No Difference.**

Lawrence Mott, author and automobilist, condemned scoring at a dinner.

"I condemn," he said, "scorching and the scorcher, but I don't condemn the scorcher unheard. I can't condemn the accused man hastily. Hasty condemnation is always a mistake."

"Once on a Canadian railway I got off the train for a five minute luncheon at a railway eating bar."

There was a man beside me gobbling away, and when he finished I heard him say bitterly, as he took out his purse:—

"Call that a ham sandwich? It's the worst ham sandwich I ever ate. No more taste than sawdust, and so small you could hardly see it."

"Ye've et your ticket," said the waiter. This here's yer ham sandwich."

A charitable woman of Washington, hearing that a young girl, whose mother was in poor circumstances, was convalescing from a dangerous illness, sent, out of the goodness of her heart, some expensive California grapes and pears.

The charitably-disposed lady herself took the fruit to the house of the girl where the mother received her in a manner that appeared to the donor not indicative of much gratitude.

A few days thereafter the charitable woman again called.

"How did your daughter like the grapes and pears?" asked she.

"Oh, pretty well," was the reluctant reply. "Did she eat them all?"

"Oh, yes; she got away with 'em. But she's a good deal like me; she likes something nice and tasty—like canned corn."

**Contractors Notice.**

Sealed tenders marked "Tender for Centreville School Building," will be received by the undersigned up to six o'clock, p. m., of the 29th instant, for the erection and completion of a Public School Building at Centreville in the County of Carleton according to the plans and specifications to be seen at the offices of H. J. Clark, Secretary to Trustees, Centreville, and H. H. Mott, architect, St. John. Each tender to be accompanied by a certified bank cheque or cash for an amount equal to five per cent. of the tender which will be forfeited if the party tendering declines to enter into contract when called upon. Should the tender not be accepted the deposit will be returned. Two good securities must be named in each tender. The lowest or any tender not necessarily accepted.

HIRAM J. CLARK, Secretary to School Board. Centreville, N. B., Aug. 17, 1907. 2ins.

Sealed tenders addressed to the undersigned and endorsed "Tender for Dalhousie Ferry Wharf," will be received at this office until Monday, September 16, 1907, inclusively, for the rebuilding and enlargement of the Ferry Wharf at Dalhousie, Restigouche County, N. B., according to a plan and specification to be seen at the offices of E. T. P. Shewen, Esq., Resident Engineer, Chatham, N. B., on application to the Postmaster at Dalhousie, N. B., and at the Department of Public Works, Ottawa.

Tenders will not be considered unless made on the printed form supplied, and signed with the actual signatures of tenderers. An accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, for fourteen hundred (\$1,400.00), must accompany each tender. The cheque will be forfeited if the person tendering decline the contract or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order, FRED. GELINAS, Secretary.

Department of Public Works, Ottawa, August 15, 1907.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

Are an added charm to the pleasure of attending the opera.

Their delightful deliciousness keeps one in rare good humor, so that the clever dialogue and catchy songs are heartily appreciated and the parts that drag, if any, are readily overlooked.

When you buy Moir's Chocolates, note the fineness and smoothness of the pure, rich chocolate coating and the rare delicacy of the widely varied centers.

Taste them once and you'll always specify Moir's.
