

## SAYS THIS IS BEST

A leading health journal in answering the question, "What is the best prescription to clean and purify the blood?" prints in a recent issue the following:

Fluid Extract Dandelion one ounce;  
Compound Salatsone, one ounce;  
Compound Syrup Sarsaparilla, four ounces.

Shake well and use in teaspoonful doses after each meal and at bedtime. A well-known physician states that these are harmless vegetable ingredients, which can be obtained from any good prescription pharmacy.

This mixture will clean the blood of all impurities. In just a few days the skin begins to clear of sores, boils and pimples. It puts vigor and energy into run-down debilitated men and women. For many years Sarsaparilla alone has been considered a good blood medicine. But while it built up and made new blood, the impurities remained within and the good accomplished was only temporary. Sarsaparilla, however, when used in combination with Compound Salatsone and Extract Dandelion, works wonders. This combination puts the kidneys to work to filter and lift out the waste matter, uric acid, and other impurities that cause disease. It makes new blood and relieves rheumatism and lame back and bladder troubles.

## KING EDWARD'S FORTUNE.

His Majesty of England is Worth a Hundred Million Dollars.

(New York Globe.)

While the King of England is granted about \$4,000,000 a year by the British parliament in what is termed the civil list, this forms only a fraction of His Majesty's real wealth as the King actually owns property valued at close to \$100,000,000. As a matter of fact, the King of England must be considered as wealthier than an American with \$200,000,000. Moreover, the King has his money invested all in real estate and owns more real estate than any other single English-speaking individual, except, perhaps, William Waldorf Astor, the elder, who owns blocks and blocks of New York real property, although he has become a naturalized subject of the English monarch.

The crown lands are what make up the wealth of England's ruler. These are enormous in extent and cover great portions of London and are in every county in England. These crown lands are not and never have been national property. On the contrary, they have always constituted a personal and private appanage of the English crown, some of them coming down from as far back as the misty, historic days of the Norman conquest, back of the twelfth century.

This enormously valuable property is strictly entailed. That is no English ruler can sell it or separate it from the throne. This is the only property in the British empire which still comes under this old feudal regulation of law. The whole of the so-called new forest is crown land, and is worth many millions. It cannot be sold, and so far King Edward has not developed this property at all.

A round dozen of the best known clubs in London rent their grounds from the King. Marlborough house pays ground rent to the Crown. Stafford house and the Carlton gardens pay enormous ground rents to King Edward. So does the Duke of Buccleuch for Dover house, which is the Duke's famous palace in the Whitehall district. King Edward, while still Prince of Wales, was given by his mother, Queen Victoria, the great duchy of Lancaster, which owns forests and farms and great estates in thirteen counties in England. King Edward is said to have inherited the Scotch properties of Balmoral,

Balochbaine, and Abergeldie. He owns the great estate of Claremonte and another at Cobourg, and a villa at Baden-Baden. He owns Sandringham, where he prefers to reside, and also the vast properties attached to the Duchy of Cornwall. One source of his wealth is called the Neill legacy, which was left to Queen Victoria in 1832 by a famous miser, James Neill. This was about \$1,000,000 at the time, and is now supposed to have increased to \$1,500,000. Thus it is evident that King Edward is enormously wealthy. When his privileges are considered, and his opportunities for making money in stocks are figured up, it is easy to see that His Majesty of England will probably die richer than any American or other Englishman, barring perhaps two Americans only.

Man.  
(Life.)

See the man!

He wears a hat of straw, stiffened with glue until it is like a tin pail, or of felt or silk, stiffened with gum shellac until it is like a cast iron pot. Inside this unyielding brim is a thick band of hard, stiff leather, re-enforced with inner bands of flannel. Result: compression of the blood vessels of the scalp, causing undue perspiration, headache, baldness.

About his neck in summer is a turn-down collar, which is a high, stiff fence of eight thicknesses of starched linen. This fits closely, leaving him unable to turn his head without great effort. Imbedded in this and tied in front in a thick, uncomfortable bunch, is a tie of heavy cotton or silk, re-enforced with linings of quilted cotton flannel.

His shirt has a stiff, unyielding front of the firmness of a priest's breastplate. This must be donned with dexterity and worn with care, lest it break or bend. His waistcoat is made of heavy wollen cloth, and in summer he wears one of heavier, thicker and warmer of duck or chevot. This warmth and thickness, however, are only in front where nature has already protected the lungs and heart. At his back, where protection is required against draughts or chill, the waistcoat is of thin muslin.

His coat is built similarly, the fronts being re-enforced with lapels of many linings.

About his waist he buckles a belt so tightly as to interfere with breathing and circulation, yet can rarely get it tight enough to achieve its own purpose.

For this reason he must wear suspenders, which are probably the most uncomfortable garment known.

He carries a stick which has no pretence to use or beauty.

He has dozens of pockets into which he never puts anything.

He has buttons which button nothing and buttonholes which are not to be used.

He has strange jewelry of clumsy intent. Great buttons of uncouth shape must be thrust through stiffly starched layers of linen. Collar buttons must be lost and hunted for.

He has rings on his fingers, pins in his scarf, chains across his breast, fobs dangling from his pockets and studs in his shirts.

He is not what he was created, but is what he has created.

Is the man a savage?  
No—he is the lord of creation!

Trial Catarrh treatments are being mailed out free, on request, by Dr. Shoop, Racine, Wis. These tests are proving to the people—without a penny's cost—the great value of this scientific prescription known to druggists everywhere as Dr. Shoop's Catarrh Remedy. Sold by all druggists.

## Making Diamonds.

The production of artificial diamonds has long been a dream of the experimenter.

But the difficulty lies in the extreme reluctance with which carbon assumes the liquid state. Under pressure, to be sure, it will liquify; but the pressure required is about 15 tons to the square inch. In the depths of the earth, such a pressure may ap-

plied by the weight of geographical strata; but how may it be attained in the laboratory?

A most ingenious answer to this question was found by Prof. Henri Moissan, of Paris. It is based on the well-known fact that the metal iron has the property—which it shares with a few other substances, including water—of expanding instead of contracting as it passes from the liquid to the solid state; combined with the further fact that liquid iron absorbs or dissolves carbon, much as water does sugar, in increasing quantity with increasing temperature.

Moissan fills an iron receptacle with pure iron and pure carbon obtained by calcining sugar, closes it tightly, and rapidly heats it to the highest temperature attainable in an electric furnace, bringing it to a degree of heat at which the lime furnace begins to melt, and the iron volatilizes in clouds.

The dazzling fiery spectacle is then lifted out and plunged instantly into cold water, until its outer surface is cooled and hardened, thus forming a shell of iron that holds the interior contents with an inflexible grip.

As this molten interior matter cools, the carbon separates from the iron solvent in liquid drops, and under the almost unimaginable pressure of expansion of the solidifying iron, these liquid drops become solid crystals of diamond.

## Biliousness and Constipation.

For years I was troubled with biliousness and constipation, which made life miserable for me. My appetite failed me. I lost my usual force and vitality. Pepsin preparations and cathartics only made matters worse. I do not know where I should have been today had I not tried Chamberlain's Stomach and Liver Tablets. The tablets relieve the ill feeling at once, strengthen the digestive functions, helping the system to do its work naturally.—Mrs. ROSA POTES, Birmingham, Ala. These tablets are for sale by all dealers.

Chapped hands are quickly cured by applying Chamberlain's Salve. Price, 25 cents. For sale by all dealers.

"It will be impossible for us to transact any public business to-night," said the president of the City Council, because of the lack of a quorum.

"Mr. Chairman," said the new member arising quickly, "I have been elected on a pledge to my constituency that I shall work untiringly and unceasingly for the upbuilding and uplifting of our city, and I now and here move that a committee be appointed to consider the immediate purchase of as good a quorum as the market affords, and that the committee be instructed to secure the quorum and have it properly installed by the next meeting night. And further more," he said, with a fine patriotic touch, "let us obtain a good American quorum, and not one of those ancient Roman things!"—Success Magazine.

## Deering Ideal Folding Reaper.

Strong, Light in Draft, Easy to Operate.

The Most Up-to-Date' Reaper on the Market.

An important feature of the Ideal Reaper is the ease and dispatch with which the driver can make every adjustment to meet varying crop conditions without dismounting from the seat. He can quickly adjust the rakes to sweep the platform, to have them act as reels without sweeping, or tilt the platform to throw the knife down to pick up lodged grain.

Each of the four rakes can be operated exactly as desired by means of the controlling device. By an adjustment of a hand lever every rake, every second, every third, every fourth, or every fifth rake can be made to sweep the platform, or by the operation of a foot lever, the rake can be made to act as reels. This machine may be compactly folded for transportation or storage.

For sale by us and our staff of agents. For prices and terms see any of these men or consult us.

## Colds

A cold is always the result of undue exposure to low temperatures. The rapid cooling of the surface, when not balanced by proper reaction, produces the congestion and inflammation of the nasal and bronchial membranes, commonly called a cold. As the slightest cold predisposes the individual to attacks of the most severe and dangerous character, the necessity for its quick cure need not be emphasized. Take

## Chamberlain's Cough Remedy

as soon as the first indication of the cold appears and all dangerous results will be avoided. It not only cures a cold quickly but counteracts any tendency of a cold to result in pneumonia. This fact has been fully proven during the epidemics of colds and grip of the past few years. No case of either of these diseases having resulted in pneumonia when this remedy was used, has ever been reported to the manufacturers or come to their notice, which shows conclusively that it is not only the best and quickest cure for a cold, but a certain preventive of that dangerous disease—pneumonia.

There is no danger in giving this remedy to children as it contains no opium or other harmful drug. It is pleasant to take.

Price, 25c; Large Size, 50c.

Butter Parchment For Sale at The Dispatch Office.

## GREATEST OF TONICS

Those who use it get well.

A certain cure for all run down conditions and wasting diseases.

Highly recommended for Insomnia.

## THE PROOF.

The following is a sample of thousands of testimonies to the wonderful merits of PSYCHINE in the most difficult cases. Doctors are prescribing PSYCHINE in their practice with the most satisfactory results.

"Several years ago my wife was so seriously ill of lung trouble as for months to be unable to walk, at which time a noted physician told me that the next dress that I would buy for her would be a shroud. She used PSYCHINE and is now reasonably well.

REV. C. E. BURRELL,  
"Baptist Minister,  
Forest, Ont."

For Coughs and Colds take PSYCHINE.  
For Throat and Lung trouble take PSYCHINE.  
For Catarrh and Consumption take PSYCHINE.  
For after-effects of La Grippe, Pneumonia and Pleurisy take PSYCHINE.

For Loss of Appetite take PSYCHINE.  
For Indigestion and Dyspepsia take PSYCHINE.  
For Chills or Fevers take PSYCHINE.  
For Run-Down System take PSYCHINE.  
To Feel Young and Keep Young take PSYCHINE.

**PSYCHINE**

An Unfailing Cure for all Throat, Lung and Stomach Troubles.

A Reliable Remedy for diseases caused by exposure to cold or wet.

For sale at all druggists, 50c. and \$1.00, or Dr. T. A. Slocum, Limited, 179 King St. W., Toronto

## USED PSYCHINE 20 YEARS AGO.

"Years ago I was almost a physical wreck, and was suffering with lung trouble. Friends and neighbors thought I would never get better. I began to despair myself. Losing faith in my physician, I procured another one who recommended the use of PSYCHINE. It was surprising beyond description the effect it had. I seemed to gain with every dose. Inside of two weeks I was able to attend to my housework again. There are no symptoms of consumption about me now.

"MRS. HENDERSON, St. John, N.B."
