What Class of Horse?

The man who expects to breed horses in the future should ask him what class of horses he should produce. Chas. McIntire, writing to The Ohio Farmer, voices the opinion of many farmers that there are two classes of horses which have a bright future before them, namely, the draught, and the carriage classes. If proper types of these classes are produced, there is sure to be a good demand, and paying prices can be expected. But it will be well for the farmer to consider carefully which one of these classes he is best situated to produce. He should remember that there is a vast difference in the horsemanship required in producing and marketing the second named classes of horses. The general farmer, though he will seldom admit it, is not a horseman. Consequently he should produce a horse that requires little expert horsemanship in the production and marketing. Every practical horse breeder knows that a draught horse can be produced, fitted and marketed with less skill than can a carriage horse. This, together with the increasing demand for draught horses, is the chief reason for rating him first of all as the horse for the ordinary breeder.

Draught horses are produced at a certainty. When the right kind of foundation stock is used in breeding, there are very few misfits. After the foal is two years old, it will pay its way by doing light farm work, and without injury to itself, if properly handled.

Blemishes and minor defects are not considered by draught-horse dealers to the extent that they are by other dealers in other classes. The draught animal goes to the market and sells well at an early age. Draught brood mares make satisfactory farm teams, particularly if the colts are foaled in the fall, rather than in the spring. All things considered, the draught horse is undoubtedly the horse for the general farmer to produce who is raising horses to sell.

The carriage horse is an excellent animal, and once secured, properly fitted and marketed, there is scarcely a limit unlike the draught horse, he is produced at an uncertainty, and, in order to be produced at a certainty must have generations of uniform ancestors back of him. The mating of animals of uniform types has been found to be absolutely necessary, if matched teams are to be produced. This means that the successfully breeding of carriage horses is a lifetime business; but if a young man is a natural horseman, loves the business, is willing to make it a study, and becomes an expert horseman (and none others will succeed in the breeding of carriage horses,) there is a bright future before the carriage horse and the man who produces him. There is one qualification which is likely to be overlooked in the breeding of carriage horses and that is size. Without size success in the business is not assured. There are sure to be misfits in the breeding of carriage horses, but if these misfits have size enough and good disposition they make fairly good farm teams, and can be disposed of readily for this or some other purpose. Size, however, must not be had at the sacrifice of quality. A 17-hand carriage horse is no longer wanted; 16 hands being a little too high, 15-2 hands is better. The breeder of carriage horses should not use a brood mare weighing less than 1,100 nor more than 1,200 pounds. The stallion should weigh from 1,150 to 1,300 pounds, and both sire and dam should be highly bred, sound with size, action, color, substance, perfect dispositions, and always of the approved type. The man who produces this type of horse fits them perfectly, builds up a market for them, and does an honest business, will be engaged in a well-paying business in the future.

A Certain Cure for Croup--Used for Ten Years Without a Failure.

Mr. W. C. Bott, a Star City, Ind., hardware merchant, is enthusiastic in his praise of Chamberlain's Cough Remedy. His children have all been subject to croup and he has used this remedy for the past ten years, and though they much feared the croup, his wife and he always felt safe upon retiring when a bottle of Chamberlain's Cough Remedy was in the house. His oldest child was subject to severe attacks of croup, but this remedy never failed to effect a speedy cure. He has recommended it to friends and neighbors and all who have used it say that it is unequalled for croup and whooping cough. For sale by All Dealers.

Woodstock Meeting Red-Hot For Rival Telephone Company.

WOODSTOCK, Oct. 17.—The motive spirit rampant at the council chamber last night, when the room was crowded to the door to further consider the question of an independent telephone company for the town, was that a competing system must be installed. J. C. Hartley was in the chair and A. D. Holyoke secretary.

Among other things Mr. Hartley said that he had several talks with many citizens who are favorable for the town to procure legislation for the establishment of a telephone company, and that a vote be taken at the January election for mayor and aldermen to see if the people approve municipal ownership of telephones.

A. D. Holyoke said that the soliciting committee, H. V. Dalling, G. E. Balmain and himself, had canvassed the town and found that the citizens were in hearty accord with the movement. They were not in a position, he said, to discuss the dividend paying qualities of the new company until we get further information. They have now about \$4,000 subscribed; there would be no difficulty in getting subscribed capital to the amount of \$12,000 on a \$24,000 plant.

J. A. Lindsay, R. E. Holyoke and N. F. Thorne, members of the committee seeking information as to the cost of a new plant, reported and they were given until next Wednesday night for a final report.

Mayor Munro expressed his approval of the course the citizens had taken. He was in favor of the town installing and owning the telephone. He gave a history of the principal of municipal ownership of telephones and referred to Port Arthur (Ont.) as a case in point, where, with a plant worth \$20,000, the receipts last year were \$8,787.81, expenditures \$6,657.58, credit balance \$2,130.23. He would show his interest in the matter by taking stock in the private company. He was also in favour of the town taking the charter over from the company.

H. V. Dalling was the most severe of any of the speakers on the N. B. Company. He had been connected with that company nineteen years. It was paying when the rates were only \$10 for business places and \$5 for residences. He told of the early history of the company, of the entry and absorption of the Union Company, and closed by saying: "I have no use for the N. B. Company. It has got to get out of this town as far as local business is concerned, and they have got to receive our messages over their trunk line. 'I would sooner steal than hire with them again.'"

A motion was unanimously carried that this meeting endorse the object of the Citizens' Telephone Company and will do all in its power as individuals to further the interest of said company.

Shake in a Bottle.

Now is the time when the doctor gets busy, and the patent medicine manufacturers reap the harvest, unless great care is taken to dress warmly and keep the feet dry. This is the advice of an old eminent authority, who says that Rheumatism and Kidney trouble weather is here, and also tells what to do in case of an attack.

Get from any good prescription pharmacy one-half ounce Fluid Extract Dandelion, one ounce Compound Kargon, three ounces Compound Syrup Sarsaparilla. Mix by shaking in a bottle and take a teaspoonful after meals and at bedtime.

Just try this simple home-made mixture at the first sign of Rheumatism, or if your back aches or you feel that the kidneys are not acting just right. This is said to be a splendid kidney regulator, and almost certain remedy for all forms of Rheumatism, which is caused by uric acid in the blood, which the kidneys fail to filter out. Any one can easily prepare this at home and at small cost.

Druggists in this town and vicinity, when shown the prescription, stated that they can either supply these ingredients, or, if our readers prefer, they will compound the mixture for them.

Dickens's Sons

(From the Westminster Gazette.)

Mr. Henry Fielding Dickens K. C., who is about to proceed to Jamaica to represent the various insurance companies interested in the claims arising out of the recent earthquake, is the sixth son of Charles Dickens, and was named of course after Fielding the novelist. Charles Dickens had a fancy for giving his sons names he had learned to love in literature. The first he had named after himself, while others were called Walter Landor, Francis Jeffrey, Alfred Tennyson, Sydney Smith Haldimand, Henry Fielding and Edward Bulwer Lytton. In the case of Mr. H. F. Dickens it has been said that Dickens contemplated at first naming his sixth son after Oliver Goldsmith, but changed the name of Henry Fielding, in a kind of homage to the style of work he was now so bent on beginning. Mr. Forster, in his Life of the novelist, doubts if anything ever more truly pleased Dickens than his son's success at Cambridge. 'Harry has won the second scholarship at Trinity Hall, which gives him fifty pounds as long as he stays there,' Dickens wrote, 'and I begin to hope that he will get a fellowship.'

Details of Frank Stephenson's Death.

The following item is taken from the Saskatoon Daily Phoenix of Saturday, October 12th:

"Word of a most regrettable occurrence in which a young Saskatonian, Frank Stephenson, lost his life, on Tuesday evening of this week, was brought to town this morning by Constable Plomley of the Delisle R. N. W. M. P. station.

"Frank met his death in Zealanda, and just how it came about can be surmised only as the body was not found until half an hour or more after the accident had occurred. When found the body was pinned between a waggon to which the dead man's team of oxen were hitched and the store of A. N. Swetman. The discovery was made about 7:30 Tuesday evening about half an hour after the young man had been seen driving that way. He was walking behind his team, and it is supposed that when approaching the building the oxen were about to pass so closely that the waggon would catch the corner. Seeing this, Frank ran forward to catch the animals, but in passing between the building and the waggon was caught, and there received his fatal squeeze.

"Fred Stephenson, a carpenter, who has been engaged on the Southside Hotel all summer, only this morning received word of his brother Frank's death, when the news was brought to him by Constable Plomley. This afternoon he and an old schoolmate of the brother's, W. T. Townsend, left for Zealanda to take charge of the body, which is either at the Swetman home or has been buried. The remains will be taken to Woodstock, N. B., where a widowed mother resides. To her the blow will be a heavy one, for the two boys at Saskatoon were her only sons.

"Frank Stephenson was about 20 or 21 years of age, and was a printer by trade. In the early spring of 1906 he came to work at the Phoenix, and remained a competent member of the staff for several months. He had a homestead in the Goose Lake country, about 70 miles southwest from Saskatoon."

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address F. J. CHENEY & Co., Toledo, O. Sold by all Druggists, 75c. Take Hall's Family Pills for constipation.

Girl Athlete's Plea for Corsets.

(Letter to the London Telegraph.)

I am twenty-one and an athletic girl. I ride a "bike" and play tennis, golf, hockey and football, and take long walks with dad. Of course, in playing games, &c., I wear corsets not very tight and broad-heeled boots, but after a good day at any sport when I come in and take my bath and dress for tea or dinner, I certainly like to be well dressed.

I put on my high-heeled slippers and smaller corsets, which I lace very tightly. My ordinary evening measure is 18½ inches, but I have one or two frocks in which I get down to 17½ inches. But as to the sensation, I really find it delicious, a feeling of being held together, braced up, &c. With tightly laced corsets I hold my head erect, step out well and keep my chest out like the drill-master at the school used to make us. The actual feeling of being well laced up is genuinely pleasurable and delightful.

There is a certain amount of moderation to be observed. I do not care to wear high heels or tight corsets in the streets or for games or long walks, having broad low heels and easy corsets for these occasions. But for the house I not only think even very high heels and very tight corsets are permissible, but I really have a great personal sense of pleasure in wearing them.

"It's this way," explained the client. "The fence runs between Brown's place and mine. He claims that I encroach on his land, and I insist that he is trespassing on mine. Now, what would you do if you were in my place?" "If I were in your place," replied the solicitor, "I'd go over and give Brown a cigar, take a drink with him, and settle the controversy in ten minutes. But, as things stand, I advise you to sue him by all means. Let no arrogant, domineering, insolent pirate like Brown trample your sacred rights. Assert your manhood and courage. Never mind the costs; I need the money."—London Opinion.

DR. A. W. CHASE'S CATARRH CURE ... 25c.
Is sent direct to the diseased parts by the Improved Blower. Heals the ulcers, clears the air passages, stops droppings in the throat and permanently cures Catarrh and Hay Fever. Blower free. All dealers, or Dr. A. W. Chase Medicine Co., Toronto and Buffalo.

QUICK RELIEF

If you keep a bottle of Johnson's Anodyne Liniment handy you needn't suffer. Keep the bandage well saturated with the liniment and your wound will soon be healed.

JOHNSON'S Anodyne LINIMENT

is a sure help in time of trouble. If you have a sprain or strain, a wrenched knee or ankle, a lame back, sore muscles, lumbago, sciatica, stiff joints, muscular rheumatism, or any other ache or pain, Johnson's Anodyne Liniment will rid you of it. Try it. Get a bottle and keep it within reach. You're sure to need it.

Guaranteed under Food and Drugs Act, June 30, 1906. Serial number 513

Sold everywhere for 25 and 50 cents a bottle

I. S. JOHNSON & CO., Boston, Mass.

The Long, Cold, Dark Evenings,

Are coming upon us when the wise father and mother will look about for some means to keep the young people at home.

Nothing will do this more effectually than a musical instrument, a Violin, an Organ, or a Piano. I heartily recommend to your notice the renowned Goulay Piano. Won't you come and have a talk with me about the matter.

C. R. WATSON,

Dealer in Musical Instruments.

Woodstock.

MYERS' Ratchet Handle PUMPS

With Cog Gear and Roller Bearing Attachments with Adjustable Base and Wrought Steel Handle. Has Patent Glass Valve Seat and Poppet Valve.

Anti-Freezing. The Easiest Working Pump Ever Manufactured.

W. F. DIBBLEE & SON,

Woodstock and Centreville.
