

Rickets.

Simply the visible sign that baby's tiny bones are not forming rapidly enough.

Lack of nourishment is the cause.

Scott's Emulsion nourishes baby's entire system. Stimulates and makes bone. Exactly what baby needs.

ALL DRUGGISTS: 50c. AND \$1.00

**THOSE FAR-OFF FIELDS.**

Those far-off fields, how fair they seem,
As soft through midst of years they gleam!
We never now around us see
Such meads as those of olden be;
We never find a lake or stream
Onehalf so lovely as we deem
Those which we only view in dream,
Watering the field of memory—
Those far-off fields!

And we were happy then! The theme
Of our existence, love supreme;
And looking back on Fate's decree—
On all that happened you and me—
We sigh-for dear our souls esteem
Those far-off fields!

Eczema's Itch Is Never Ending

EXCEPT BY ACTIVE AND PERSISTENT TREATMENT WITH THE GREAT ECZEMA CURE,

Dr. Chase's Ointment.

When left to itself, eczema runs on indefinitely, causing keen distress from itching and covering the body with sores that refuse to heal.

Even with careful treatment, eczema is obstinate in yielding to curative measures, but the regular and persistent use of Dr. Chase's Ointment is the most certain means known of overcoming this torturing disease.

Internal treatments for eczema have long since been discarded, except the use of medicines to regulate the bowels and enrich the blood, while local applications are used to relieve the itching and heal the sores.

It is the remarkable success of Dr. Chase's Ointment in the cure of eczema which has given it world-wide recognition as the standard ointment for itching skin diseases.

Mrs. Robert Cleudennin, Welland Station Ont., writes:—

"For three years my daughter, Fanny, was afflicted with eczema in an intense and persistent form, and for nine days she was totally blind. The burning, itching and disfigurement were horrible, her entire face being completely raw for months, and the distress so great that she could not sleep.

"The best efforts of two eminent physicians failed to even mitigate her awful suffering. One day when I was low-spirited over my daughter's condition Dr. Chase's Ointment was recommended to me and to our surprise Fannie was helped with the first box and she has since been entirely cured by this treatment.

"Her face is now as smooth as a baby's and she is in splendid health. The credit for this cure is entirely due to Dr. Chase's Ointment, and I cheerfully give you permission to state my daughter's case, hoping that it will lead many others to secure the same good results."

There are a score of ways in which Dr. Chase's Ointment, with its extraordinary soothing, healing properties, is useful in every home: 60 cents a box, at all dealers, or Edmanson, Bates & Co., Toronto.

British Reading News.

The Post Office Department has completed its statistics of British mails coming into Canada by Canadian steamers for the months of July and August, and the figures fully bear out the conclusions which were drawn from the figures of the two preceding months that the increase in the British newspapers and magazines coming into Canada as a result of the reduction of postage is altogether phenomenal. The total increase in the number of mail bags coming into Canada from Great Britain during the months of July and August, as compared with the corresponding figures of 1906, is 162 per cent., the number for July and August, 1906, being 2,120 bags, while for the same month in 1907 there were 5,569 bags. But the full measure of the increase can best be seen by a reference to the statistics for the leading centres of population. In Toronto there were 379 bags received during the months of July and August, 1906; during the same months of 1907 the number was 1,048, an increase of 669 bags, or 171 per cent. The increase in Montreal was from 442 to 1,024, that is of 582 bags or 132 per cent. The figures for Winnipeg, however, are nothing less than amazing. During July, 1906, there were received at the office 481 bags of British mails by the Canadian steamers. For the corresponding months of 1907 the number has risen to 1,736. The increase is 1,256 bags, that is 261 per cent. of the number received in July, 1906. The "intellectual preference" is evidently proving an even greater success than was anticipated.

New Way to Cook Apples This Fall.

(Boston Herald.)

Apples take the same place among the New England fruits that potatoes hold among the vegetables. When everything else fails a desert for dinner, or mother is too busy to prepare anything unusual for supper the apple bin is ready to fill in the breach. Apple pie, apple sauce and baked apples have been the three stock ways of preparing them for so long that any change will be welcome.

Then there are lots of new ways of preparing them, though. For instance, there is the buttered apple which comes from our English sisters in cookery: Take six large apples, core and cut in halves. Place them in a buttered pie-dish and sprinkle over them sugar and a little cinnamon. Place a piece of butter the size of a walnut on each apple. Bake till apples are tender.

Then there is the baked apple sauce, which is sort of a cross between the two commonest ways of cooking the fruit. Peel, core and slice good tart apples and put them into baking dish. To three pints of the apples add a pound of sugar, the juice of three lemons and the grated rind of half a lemon. Cook two hours; turn into a dish and set aside to become ice cold. Eat with cream.

Prepared with rice they make a most delicious dessert, and a very nourishing one, too. Here is the rule: Peel, core and slice one pound of cooking apples and cook them till tender in a saucepan, with two heaping tablespoonsful of sugar, one tablespoonful of butter, half a gill of water, one clove and a piece of cinnamon stick.

Put one ounce of well washed rice into a pint of milk and cook till soft, sweeten to taste, and add it to the apples. Cook both together for fully ten minutes and let cool a little.

Whisk stiffly two whites of eggs and fold them into the above mixture. Remove the clove and cinnamon and pour the mixture into a buttered baking dish. Sprinkle the top with a little ground cinnamon and fine sugar and bake in a moderate oven for twenty minutes. Serve very hot.

For the Housekeeper.**PUMPKIN PIE.**

I think I may be able to help you to a real pumpkin pie, such as our mothers knew how to make. The pie was evolved out of the patient continuance in well doing of the housemother. The secret lies not in "pinches" of this or that good thing, but in the right preparation of the pumpkin before it is ready to be made into pies. It lies in the "stewing" of the pumpkin.

Cut the pumpkin into cubes an inch square. Place in a large kettle with plenty of water. Let it boil from eight in the morning until four or five in the afternoon, adding more water if needed. Then with an old time pudding stick begin to stir it. Keep on stirring every few minutes until your pumpkin is reduced to a rich brown, dry sauce.

The process of stewing it down requires hours.

The little mother sat in her rocker with her knitting, and did not let the pumpkin burn. Or she flitted about the kitchen attending to other duties, but not once did she forget the pumpkin. When every drop of water was dried out her watch was over. Of this dry, brown sauce, one cupful is enough for a pie. Put an egg in your pie if you like. It is not necessary. Good milk, sugar, if you wish it sweeter than the pumpkin itself, and spice to your taste, and you will not be obliged to eat over in memory that portion of your Thanksgiving dinner.

Ah, there is the trouble; what housekeeper in those strenuous days has time to watch her pumpkin stew nine hours? We fear the art has passed away.—'Independent.'

To check a cold quickly, get from your druggist some little Candy Cold Tablets called Preventives. Druggists everywhere are now dispensing Preventives, for they are not only safe, but decidedly certain and prompt. Preventives contain no Quinine, no laxative, nothing harsh nor sickening. Taken at the "sneeze stage" Preventives will prevent Pneumonia, Bronchitis, La Grippe, etc. Hence the name, Preventives. Good for feverish children. 48 Preventives 25 cents. Trial boxes 5 cts. Sold by all druggists.

The One-Room House.

(From the House Beautiful.)

A very modern architect predicts the house of one large room, a small electric kitchen attached and an enormous enclosed porch with facilities for outdoor sleeping. Whether housekeepers will care for this scheme or not is a question but it is undoubtedly true that the comparatively small kitchen, the big porch and the generous living-room have come to stay.

Provincial S. S. Convention at Fredericton.

The Provincial Sunday School Association met in Fredericton last week. The following officers were elected for the ensuing year:

President—A. H. Chipman.
Vice-president—P. G. McFarlane.

Treasurer—R. M. Currie.

Recording secretary—Miss Addie Calder.
Supt. Home Department—Rev. A. A. Rideout.

Supt. Primary Department—Mrs. W. C. Matthews.

Rev. Mr. Ganong then submitted his annual report. He reported having held meetings in 167 different places, and had given 345 addresses, sermons, etc. He recommended that a series of conferences be held directly after this convention, to give persons who were interested in the work a better grasp of the different objects of the association. He recommended further that a circular be prepared showing the disposition of the funds from the schools, etc., and also recommended that a series of supplemental lessons be introduced into both provinces. The report was adopted, and followed by discussion of its several recommendations which met with hearty approval.

The report of the Rev. A. A. Rideout, superintendent of the Home Department, followed. Mr. Rideout's report showed that there had been in the past year 69 departments, having a total membership enrolment of 2,434, and that at the end of this year there was a balance in the treasury after the settlement of all expenses of \$22 45, and stock on hand amounting to \$30. On motion the report was accepted. In presenting his report Mr. Rideout said that the Home Department in the Sunday schools was very important, and that they were doing a very successful work. He said that the object of the department was to bring the Sunday school into the homes, and to establish there a systematic study of the Bible.

Mrs. T. H. Bullock then submitted the report of the temperance department of the work of the Association. Mrs. Bullock's report showed a membership in this department of 13,666, which was an increase over last year of 980. Mrs. Bullock referred to the history of the department since its adoption in 1900 by the association. The report was adopted.

Following the report of Mrs. Bullock came that of the superintendent of the Primary Department, Mrs. W. C. Matthews, and it gave a very encouraging outlook to that department of the work, and was adopted on motion.

In the absence of Alex. Murray, president of the I. B. R. A., the Rev. Mr. Ganong read the report of that association, which showed a total membership of 2,449, and seemed to be in a growing and healthy condition.

No Honing— No Grinding

You know from daily experience, at home or in the barber shop, that the question is—"Why doesn't a razor hold its edge uniformly from heel to head without honing and grinding?" Whether it is a safety, with the certain tax of new blades, or the ordinary open-bladed razor does not alter the question. You want the comfort and satisfaction of a clean, smooth shave every morning with the confident knowledge that your razor will be ready for instant use the next time needed.

The Carbo Magnetic razor is the only razor **unconditionally guaranteed** to do this. Thirty years of study on the razor situation has perfected a new secret process of **ELECTRIC TEMPERING** that positively merges every particle of carbon (the life of steel) into the metal—giving a diamond-like hardness uniformly throughout the blade—something absolutely impossible with fire tempered steel—used in making all other razors.

But test this razor in your own home—or if you prefer, have your barber use it on you. Give us your name, or call and see the "Carbo Magnetic" razor, and we will state our proposition for testing these razors **without obligation on your part to purchase**, together with our free booklet "Hints on Shaving." This book illustrates the correct razor position for shaving every part of the face.
