MARKETS SOMEWHAT STRONGER.

Farmers Advised to Sell Potatoes--Other Prices.

There has been a slight revival of business in the local hay trade and the outlook is brighter than the last report indicated. While the crop in Carleton Co., was immense and the quantity still unmarketed is great, there is so much hay of inferior quality that the price for any kind is not so good as if the first class grade predominated.

There is little hay in Carleton Co., to grade even second class in the American markets,

MRS. ADDIE HARDING, 810 Court street, Syracuse, N. Y., writes: "I have been a user of Peruna for the last twelve years and can truthfully say that there is no better medicine on earth."

"A SURE PREVENTIVE." "I have been annoyed with a cough for years. Often it was so bad that I could not sleep half the night. Many people thought I had consumption."

"I am glad to say that Peruna cured me entirely. I take Peruna occasionally when I do not feel well and I also give it to my children."

"Peruna is the best medicine for coughs and colds. I have told many people how much Peruna has helped me."

Peruna tends to lessen the cough, decreases the expectoration, strengthens the patient, increases the appetite and in many cases procures sound, refreshing sleep.

But the value of Peruna in the treatment of a case of consumption is not so great as it is in the prevention of consumption.

Since it is well known that consumption begins with a common cold or catarrh, any medicine that can be relied upon to relieve these must be regarded as a preventive of consumption.

Thousands of cases of incipient consumption, or chronic coughs, or settled colds, have reported Peruna as being a safe and reliable remedy for these ailments.

Dr. Hartman has for many years advocated the fresh air treatment for consumption. At the same time he has recognized Peruna as a useful palliative for the many distressing symptoms which accompany the white plague.

Everywhere we hear of sanitariums established at the expense of the state for the treatment of the vast army of consumptives.

The open air treatment, fresh air and sunlight, are recognized by the medical profession generally as being the greatest necessities in the treatment of consumption in all of its stages.

and the only outlet is St. John and occasional orders from the North Shore and some parts of Nova Scotia. Yet at the price quoted below farmers have little cause for complaints.

Some of those who read the market reports from Montreal, Toronto, Boston and St. John are puzzled to know why there is such a great difference in prices paid by buyers here and in the cities. In the case of Montreal and Toronto there is a cost of 60 to 90 cents per barrel on potatoes which is made up by freights, shrinkage heating demurrage on cars, commissions, etc.; hence if a dealer pays \$1.00 per barrel here when the market in Montreal is quoted at \$1.60 he stands a small show for getting any profit out of the added 60 cents. The same is true in a greater degree with an American market.

With regard to hay the cost of transportation is more although the danger of loss is not so great. To read of hay bringing \$23, in Boston is fascinating, but Carleton Co., hay is not the \$23.00 kind that Boston's aristocratic horses eat, while the trifling cost of \$10 per ton duty, transportation, and commission takes the gloss of the bargain.

Oats are in fair demand and the prices will likely creep up to a better figure. Buyers advise the farmers to sell their potatoes now while a dollar is being offered. Of course it would be disastrous if all the spuds in the country were hauled in one week, but the outlook is such that there should be a steady supply coming in from now on.

Shipments of potatoes from New Brunswick have been few as yet. Last week several carloads went out from Victoria County and the upper part of Carleton, while at present there are cars loading at Andover, Bath, Florenceville and Hartland. Shipments of Aroostook spuds via the C. P. R. are being made more freely than they have been.

Hatfield & Scott of Hartland have a market for beef at good prices as far as beef goes this year.

MRS. FRANCES WILSON, 32 Nelson street, Clinton, Mass., writes:

"Had you seen me at the time of my illness and now, you would not wonder that I take delight in sounding the praises of Peruna."

"My ailment was a severe cold which attacked the bronchial tubes and lungs. I followed your special directions and after using six bottles of Peruna I was on my feet again."

"I think Peruna a wonderful medicine."

The promptness with which Peruna relieves a fresh cold, and even removes chronic colds, that have become thoroughly established, is well known throughout the entire country. This ranks Peruna as a reliable prophylactic against consumption.

Mr. Wm. Swain, 4245 Stiles street, W. Philadelphia, Pa., writes:

"Before I commenced taking Peruna I had used almost everything I could think of for catarrh."

"I felt so tired when getting up in the morning and my lungs felt dry and sore. No one who has not experienced it can imagine how I suffered."

"I tried nearly everything recommended, but nothing did me any permanent good."

"The first bottle of Peruna did me so much good that I continued taking it until completely cured."

"I cannot praise Peruna high enough. I wish every one could know of it."

Those suffering from colds can do nothing better than to procure a bottle of Peruna and give it a fair trial.
