Price 50 cents per bottle. Sold Everywhere. A. J. WHITE & CO., Montreal.

### Hot Water Heating.

In hot water heating systems it is customary to take practically all of the branches from the top or at an angle from near the top of the mains.

This is poor practice and shows lack of appreciation of the scientific principles upon which hot water heating depends for its efficiency. Fluids of different temperatures, contained in same vessels, invariably arrange themselves in strata, so that the hottest are on top. In accordance with this theory, the first openings on a main will draw off the greater portion of the hot water, while the colder water will be left to find its way to the most remote radiator, suffering more or less of heat by radiation all the way, and reaching its destination in poor condition for the fulfillment of the desired purpose.

If for any good and sufficient reason this method is persisted in, the mains should be run one or two sizes larger than necessary to ensure equitable distribution of the hot water to all the radiators in the system and, in particular, to ensure the supply of a fair share of the hot water to all the radiators furthest from the generator. If this is intelligently done, the water in the flow main will not enter the branch until it is heated down in the main to a point level with the outlet or side of the toe. The returns from the various radiators, that come back by way of the main return, should enter the main at the side, below the hottest returning water, which will obviate a tendency the latter often develops to back up into the return branches and retard their flow, checking the circulation and in some cases completely cutting out the radiators at the end of the line.

By taking the branches from the side of the mains quite a different result is obtained. Before the water has been heated deep enough to enter the first branch, it will have travelled quite a distance up the main. As the water heats deeper, it will travel on and in turn enter the successive branches; the hottest water, however, which is at the top of the body of water flowing through the mains, will pass on to the last branch or remotest radiator from the boiler, thus ensuring the most thorough and economical utilization of the hot water supply.—Canadian Contract Record.

Trial Catarrh treatments are being mailed out free, on request, by Dr. Shoop, Racine, Wis. These tests are proving to the people—without a penny's cost—the great value of this scientific prescription known to druggists everywhere as Dr. Shoop's Catarrh Remedy. Sold by all druggists.

### Effect Of Heat On Reinforced Concrete.

(1) All concrete mixtures when heated throughout to a temperature of 1,000 degrees F., will lose a large proportion of their strength and elasticity, and this fact must be well remembered in designing.

(2) All concretes have a very low thermal conductivity, had therein lies their well-known heat resisting properties.

(3) As a result of this low thermal conductivity, two to two and a half inches of concrete covering will protect reinforcing metal from injurious heat for the period of any ordinary conflagration (provided, of

### PLAIN TALK FROM THE DOCTOR

A prominent physician, famous for his success in the treatment of kidney and bladder troubles, stated that to the following prescription is due a great deal of his success:

- One ounce fluid extract dandelion;
- One ounce compound salutaria;
- Four ounces compound syrup sarsaparilla.

Mix and take a teaspoonful after meals and at bedtime, drinking plenty of water.

This mixture will, he says, positively cure any diseases arising from weak, clogged or inactive kidneys, and will assist these organs to cleanse the blood of the poisonous waste matter and acids, which if allowed to remain, cause lumbago, lame back, rheumatism and sciatica, and at the same time will restore the kidneys to healthy normal action. The ingredients, which are purely vegetable and entirely harmless, can be procured from any good druggist and mixed at home at very little cost.

This advice will undoubtedly be much appreciated by many readers.

course, that the concrete stays in place during the fire.)

(4) Reinforcing metal exposed to the fire will not convey by conductivity an injurious amount of heat to the embedded portion.

(5) Gravel concrete is not a reliable or safe fire-resisting aggregate.—Professor Ira H. Woolson, in a paper read before the Am. Soc. for Testing Materials.

### Banks-Tompkins.

A quiet but very pretty wedding was solemnized at the home of Mr. and Mrs. W. B. Tompkins, Bristol, Carleton county, on Tuesday the 31st Dec., when their only daughter, Miss Ella K. Tompkins was united in marriage to Hiram H. G. Banks, formerly of Florenceville, but now engaged in the lumber business at Leavenworth, Washington. The ceremony took place at high noon, and was performed by Rev. A. A. Rideout, of Fredericton, cousin of the bride, in the presence of only a few immediate relatives and friends of the young couple. The rooms were very tastefully decorated in honor of the occasion.

The contracting parties stood beneath an arch festooned with green and white, from which dropped a large white bell. The bride, who was unattended, was handsomely gowned in cream silk, with lace and applique trimmings, and carried a shower bouquet of white roses. After the ceremony the guests adjourned to the dining room, which had been prettily decorated in red, white and blue, and partook of a tempting wedding dinner, the hostess being assisted in the service by Mrs. Farley and Miss Raymond, of Woodstock.

Both bride and groom are popular, and friends expressed their good will, with some beautiful wedding remembrances that of the bride's father being a generous check, and a handsome sea sack from her mother. The groom's present was a very pretty gold watch and chain. The happy couple left on the afternoon express for a short honeymoon trip. The bride's going-away gown was of garnet broadcloth with hat to match.

When the Stomach, Heart, or Kidney nerves get weak, then these organs always fail. Don't drug the Stomach, nor stimulate the Heart or Kidneys. That is simply a makeshift. Get a prescription known to Druggists everywhere as Dr. Shoop's Restorative. The Restorative is prepared expressly for these weak inside nerves. Strengthen these nerves, build them up with Dr. Shoop's Restorative—tablets or liquid—and see how quickly help will come. Free sample sent on request by Dr. Shoop, Racine, Wis. Your health is surely worth this simple test. Sold by all dealers.

### No Mistake

A New York produce commission house which prides itself on filling all orders correctly received a letter from a New Jersey customer recently, saying:

GENTLEMEN:—This is the first time we ever knew you to make a mistake in our order. You are well aware that we buy the very best country eggs. The last you sent are too poor for our trade. What shall we do with them?

The fair fame of the house for never making an error seemed to be at stake, but the bright mind of the junior partner found a way out of it. He wrote:

GENTLEMEN:—We are sorry to hear that our last shipment did not suit you. There was however, no mistake on our part. We have looked up your original order and find that it reads as follows: "Rush 50 crates of eggs. We want them bad."—Henry H. Day.

### The Fickleness of a Woman.

(From the January Bohemian.)

Some years ago when Miss Chyvetal Herne was playing a summer engagement in Washington, she made the acquaintance of the young daughter of a Western senator. The acquaintance ripened into intimacy. Miss Herne and Lucille—such was the young lady's name—corresponded regularly after the former's departure from the capital and the Western girl kept her stage friend informed of all the gossip and news of their friends.

Not very long ago Miss Herne received a note from Lucille in which she announced the approaching marriage. Miss Herne replied at once heartily congratulating her and wishing her every happiness. Two months later Lucille wrote to say that she had discovered that she could not be content to pass her remaining days with the gentleman whom she had named and had learned to love another. Their marriage had been set for an early date.

Miss Herne replied that she had every confidence in the judgment of her friend moralized a bit concerning how much better it was to discover these things before rather than after marriage and once more expressed her warm wishes for the future happiness of her friend. Then three days ago Miss Herne received another letter from the interesting Lucille. This time there came the news that the second engagement had been broken. Yet there was a sort of nil desperandum in her future, for she announced at the same time her engagement to a third man.

At first Miss Herne was rather stunned, then the humor of the situation came to her. She took her pen in hand and wrote carefully a few lines which she despatched to Washington:

"My dear Lucille,—I desire to congratulate you on your approaching marriage with . . ."

Here Miss Herne placed an asterisk, and in a footnote she added:

"Here insert the name of the happy man."

### Boarding in Camps.

An Englishman, healthy and able to work, has refused to go to a railway construction camp when offered \$1.50 per day. The report of this apparently strange refusal gives the impression that the man was not constitutionally inclined to depend on charity, but was troubled with the fear that charges for his board, clothing, and ordinary necessities of life in the camp would be sufficient to absorb his wages and leave him little or nothing after his season's work. This fear is common among men offered work in railway construction camps, and some effort should be made to determine if it is to any extent justified.

A workman recently entered an action for false arrest and imprisonment, alleging that when he learned the charges that were to be made against his wages and refused to work he was pursued and arrested by agents of his employer and sentenced by a local Justice of the Peace. Such cases as these create a feeling of alarm among the laborers, who know how helpless they are in the hands of employers in remote construction camps. The present suspicion regarding such employment is inimical to the best interests of both employers and employees.

The importance of the interests affected is sufficient to warrant an investigation by the Labor Department. If the fears of workmen are groundless the truth should be made clear to them, and they should be encouraged to avail themselves of their opportunities. If there is a danger of or a tendency toward the abuse of power by employers in construction work, steps should be taken toward protecting those threatened with unfair treatment. A full investigation will ultimately tend to the advantage of both parties.—Weekly Globe and Canada Farmer.

### Make It Yourself.

There is so much Rheumatism here in our neighborhood now that the following advice by an eminent authority, who writes for readers of a large Eastern daily paper, will be highly appreciated by those who suffer:

Get from and good pharmacy one-half ounce Fluid Extract Dandelion, one ounce Compound Kargon, three ounces of Compound Syrup Sarsaparilla. Shake these well in a bottle and take in teaspoonful doses after each meal and at bedtime; also drink plenty of good water.

It is claimed that there are few victims of this dread and torturous disease who will fail to find ready relief in this simple home-made mixture, and in most cases a permanent cure is the result.

This simple recipe is said to strengthen and cleanse the eliminative tissues of the Kidneys so that they can filter and strain from the blood and system the poisons, acids and waste matter, which cause not only Rheumatism, but numerous other diseases. Every man or woman here who feels that their kidneys are not healthy and active, or who suffers from any urinary trouble whatever, should not hesitate to make up this mixture, as it is certain to do much good, and may save you from much misery and suffering after while.

Our home druggists say they will either supply the ingredients or mix the prescription ready to take if our readers ask them.

### FROM THE ANTILLES.

Chamberlain's Cough Remedy Benefits a City Councilman at Kingston, Jamaica.

Mr. W. O'Reilly Fogarty, who is a member of the City Council at Kingston, Jamaica, West Indies, writes as follows: "One bottle of Chamberlain's Cough Remedy had good effect on a cough that was giving me trouble and I think I should have been more quickly relieved if I had continued the remedy. That it was beneficial and quick in relieving me there is no doubt and it is my intention to obtain another bottle." For sale by all dealers.
