Crop Report.

The showery weather of last week was a severe set-back to harvesting and to those who were still at their baying. Some early grains that had been cut suffered severely. Taking all things together—the long draught and the heavy rain—crops in general cannot be quite up to the average. From all quarters oats are reported short, light and immature. At one time it seemed that those sown late would prove good, but it is now found that the stalks were so blighted by the hot sun as to afford insufficient ground-work for a full head. Oats sown early are very light.

Wheat is said to be doing fairly well, and much of it has been cut. Buckwheat is also giving promise of a fair yield.

Potatoes, while free from rust, have been seriously injured by the drought and their probable yield is a matter for much speculation.

Butter and eggs bring the producer a good thing. Prices on Monday were:

Eggs	20 to 22
Butter	20 to 22
