"I had been suffering for over two months with an obstinate cough, as had also my little girl. We tried several remedies common to any drug store without obtaining any apparent relief, in fact we were growing worse. I got a bottle of Coltsfoote Expectorant from my druggist and inside of two days the cough was stopped, and the results so permanent and rapid that we decided to keep it in our home continually.

ROBERT PALEN.
C. A. R. Station, Ottawa.
Coltsfoote Expectorant is recognized the world over as the best prescription ever used by the medical profession for Coughs, Colds, Croup, Bronchitis and Tightness of the Chest. Children like it. To introduce it into every home we will send a free sample to every person sending their name and address to Dr. T. A. Slocum, Limited, Toronto. Sold by all up-to-date druggists at 25c. Send for Free Sample To-day.

Funeral of Mrs. John McAfee.

The funeral of Mrs. John McAfee took place from her late residence on Green Street on Thursday afternoon, the Rev. George D. Ireland officiating. The choir of St. Paul's church sang the hymns "Unto the Hills Do I Lift Mine Eyes," and "Lead Kindly Light." The pall-bearers were: A. W. Hay, W. W. Hay, G. H. Harrison and G. A. White. Many beautiful floral emblems were sent in by friends of the deceased, testifying to the esteem in which she was held. The remains were laid to rest in the Methodist cemetery.

Foren--Burt.

On Monday afternoon, June 8th, the Methodist parsonage, Centreville, was the scene of a very pretty wedding when Miss Annie G. Foren, of Centreville, was united in marriage to Albert H. Burt, Jacksonville. The ceremony was performed by Rev. G. Ayers assisted by Rev. W. Burton Morgan, Kingston, Ontario.

The bride who looked charming was becomingly attired in a pretty suit of brown silk and wore roses and carnations. Mrs. G. Ayers played the wedding march as the bridal couple entered the parlor which was prettily decorated with cut flowers and potted plants. After the ceremony the bridal couple repaired to the dining room where a wedding tea was served, after which Mr. and Mrs. Burt left for their home in Jacksonville.

The bride who has been in the employ of White & Tweedie for four years was extremely popular and made many warm friends. She will be missed very much in the church and especially at the parsonage where she has made her home. She was a member of the choir and a teacher in the Sabbath school. A beautiful cake basket was presented to the bride by the pastor on behalf of the choir and the Sabbath school as a small token of their esteem and love with best wishes for a long and happy wedded life.

Make Good.

Make Good.
Cut out "if" "could" and "should."
And start in to saw wood.
You can still have the best
Things in life, like the rest
Of the men who've achieved
Just because they believed
In themselves you're deceived
If you think fortune comes
With a rattle of drums
And a fanfare of state
To hand yours on a plate
That isn't the way
That she visits today.

You must get out and rustle and bustle and hustle;
You need all your muscle, for you've got to tussle.

Plunge into the fight
Hit to left and to right,
And keep crashing and smashing,
Don't let up with your striking
All things meet your liking,
For God's sake, stop bawling—
Instead do some mauling,
It makes the world bitter
To see such a quitter;
Fate scowls when she sees
A grown-up on his knees.
A man with his health
Is a mine jammed with wealth;
Full of unexplored lodes.

Why, the freckle-backed toads
Have the sense to keep jumping—
And here you are tramping!
Come, now, strike your gait—
It isn't too late,
There's no such thing as fate!
Drop that fool talk of "luck,"
And buck

Begin
To grin
And win.
—Herbert Kaufman in the June Every-
body's.

Weak women should try Dr. Shoop's Night Cure. These soothing, healing, antiseptic suppositories go direct to the seat of these weaknesses. My "Book No. 4 for Women," contains many valuable hints to women, and it is free. Ask Dr. Shoop, Racine, Wis. to mail it. Ask the Doctor in strictest confidence, any questions you wish answered. Dr. Shoop's Night Cure is sold by All Druggists.

The Heathen.

By Wilbur Nesbit.

When Sunday is, w'y I'm so bad
My folks they don't know what to do
'Cause wicked things they make me glad
An' I do what I ought'n't to!
So I'm a heathen! Yes, sir! I'm
A sit-in-darkness kind, 'at don't
Do good things ever any time
'Cause what I got to do, I won't!

An' I wish 'at I could go wild
'Tth just some feathers in my hair—
An' my aunt Sue say: "Such a child!
A perfect heathen, I declare!"
'Cause I don't like th' Sunday school,
An' I won't learn th' golden tex',
An' I won't know th' golden rule,
An' they don't know what I'll do nex'!

An' I bowed down to wood an' stone!
I bowed right at our big front door
An' at the front step—all alone—
I did! A dozen times an' more!
I shut my eyes each time; you see,
Th' heathen-in-his-blin'ness does,
An' I'm just go'g to try to be
Th' biggest' heathen ever was!

An' I don't care, nceptin' its
So hard to keep on actin' queer
With ever'body givin' fits
To me—th' only heathen here.
But if you watch me close, w'y, you'll
Know w'y I'm doin' it. You see,
Th' children in th' Sunday school
Will give their pennies all to me!

Progressive Farming Methods.

Although a certain class of farmers are rather conservative and inclined to use the methods their fathers employed, there are a great number filled with the progressive spirit of the age. Tread mills have had their place and horse-power machines have followed. Windmills still find a place, but some farmers have adopted other methods for pumping water, cutting fodder, sawing wood, etc. The gasoline and oil motor is fast finding a place on the farm and sometimes in conjunction with the windmill. Churning is now done by the gasoline or oil engine and up-to-date creameries has instalments of these motive powers.

In the western wheat lands, gang plows are seen drawn by traction engines, using oil and gasoline fuels, and on account of the bad alkaline water in parts of the west, causing foam or frothing in steam boilers, this class of engine will no doubt be generally used in some sections. The gasoline and oil engine is also adaptable for threshing, though the straw fuel used under steam boilers, makes the steam power cheap. However, if water must be drawn some distance this is counter-balanced by the cost of water haulage.

While a horse can be used for purposes that a gasoline or oil motor cannot be used, it is found to be a very profitable asset on the farm and these engines have been brought up to such perfection that they are found very reliable. They are portable and can be changed easily from one place to another. They can be installed in the barn to cut the fodder; in the yard to saw the wood and can be used for threshing, churning, running the fan to clean seed grains, etc. In some parts of Europe the automobile is used on the farm for plowing and freighting, and as this motive power becomes more widely known, isolated users of power will find it a profitable investment.

Fat In Butter-Making.

At the Dairy Department of the Ontario Agricultural College, Guelph, 23 trials have been made of cream testing from 15 to 45 per cent fat, to determine the difference, if any, in the quality of butter.

The average score for flavor in the butter made from cream testing 15 to 20 per cent fat was 40.8; cream testing 20 to 25 per cent fat produced butter with a score of 4.10; butter from 25 to 30 per cent cream scored an average of 40.9; 30 to 35 per cent, 40.6; 35 to 40 per cent, 40.9; 35 to 40 per cent, 41 and 40 to 45 per cent, 40.5 out of a possible 45.

There was also not much difference in the "keeping quality" of the butter from the lots. The samples made from the thin cream (15 to 20 per cent. fat) lost an average of one point in flavor by keeping one month, while the lots from 20 to 25 per cent. cream lost 1.8 (one and one-tenth) of a point, and the rich cream lots lost from one to two points in a month by keeping. What difference there was in this respect was not in favor of the butter made from rich cream, as is commonly supposed, but slightly less acid was developed in the rich cream at churning time.

The conclusions formed from these trials is that the butter-maker may be allowed considerable latitude as regards the percentage of fat in the cream, but cream having 25 to 35 per cent. fat gives good results, when the conditions are favorable for churning. On the farm, where cream is churned in small churns, from 20 to 25 per cent fat in the cream is satisfactory.

A woman may be too humane
To wear a bird on her hat,
And of course our praises she deserves
For tenderness like that,
But stop a minute and reflect—
She may be cruel still;
Think of the husband, who although,
It's birdless, gets the bill.
—Philadelphia Bulletin.

Dressing a Girl of Sixteen.

Choosing clothes for a girl of sixteen is often a problem to her mother for several reasons. She is inclined to be long and lanky, is apt to be still growing and unaccustomed and awkward in her new position—

Where the brook and river meet,
Womanhood and childhood fleet,
At this stage many girls need all the encouragement they can get, and if they are not to be shy and awkward when that stage should be past, some help and a considerable amount of quiet attention from their mothers will be given. They will be carefully dressed with the simplicity of young girls, yet with the daintiness which is part of their education into a refined womanhood.

The girl of sixteen of ordinary height should wear her skirts to her shoe tops; but, if she is unusually tall, a mother will use her discretion and drop the skirt to her ankles. She may wear coat and skirt suits, the coat loose or at most semi-fitting; or more graceful still for the very young girl, she may wear the one-piece dresses of the "jumper" order, or with simply white removable yokes to give freshness. When a wrap is needed, she will have a long, loose coat, finished quite plainly, to go with this dress. The skirts, with separate blouses, are somewhat less in favor for such young people, and by using them a certain amount of weight must come on the waist.

The Princess dress is rather too grown up for the girl of sixteen. For a party frock or fluffy summer dress, her unformed figure will still be better suited by the baby waist in some of its pretty variations. A wide berth is always sweet and girlish, and is again fashionable, while sashes and ribbons may be as handsome as she wishes. Boned girdles are less used.

Expensive lace is not in good taste for young girls, and no kind of lace seems ever to be so fitting as fine French Valenciennes, which has an air of simple daintiness which is desirable. It need not, of course, be real. Embroideries, however, are always left, and nothing can be lovelier for girls of this age than a little fine handwork on their best white frocks. Such decoration only needs some spare time and pleasant work on the part of the mother or elder sister, but where this is impossible there are the machine embroideries which are now very lovely, too.

The young girl's hats should match the simplicity of her other clothes. The thing most to be avoided is a load of trimming. She may have quills, a wing or an ostrich feather, but where the last is used it must be almost the only trimming on her hat, and almost the only suitable way of using it in her case is the flat sweep of the plume on the brim. High trimmed picture effects must be reserved, if her taste leans that way, until she is older. Bows of ribbon on straw or lingerie hats, a simple wreath of daisies or such flowers (roses are too old for her) or folds of some sheer gauze or muslin are adornments in the use of which she will not err. In summer silk or fisle gloves and low shoes not to pointed, but fine and carefully chosen, will complete her costume. Kid gloves, besides uncomfortable and easily spoiled in summer, are seldom used by well-dressed young girls in hot weather.

DR. A. W. CHASE'S CATARRH CURE ... 25c.
is sent direct to the diseased parts by the Improved Blower. Heals the ulcers, clears the air passages, stops droppings in the throat and permanently cures Catarrh and Hay Fever. Blower free. All dealers, or Dr. A. W. Chase Medicine Co., Toronto and Buffalo.

Woke Up To Late.

An engineer from Sutherland was spending a few days in London with a friend, and after a busy morning sight-seeing the Londoner chose a large restaurant for luncheon, thinking it would be a novel experience for the man from the north.

The visitor appeared to enjoy his luncheon but kept looking in the direction of the door. "What are you watching?" asked his friend rather annoyed.

"Well," was the quiet reply, "A's keepin' an eye on ma top coat."

"Oh, don't bother about that," said the other. "You don't see me watching mine."
"No," observed the guileless engineer, "thee has no call to. It's 10 minutes since thine went!"—Philadelphia Public Ledger.

Fooing the Team.

One of the passengers in the overcrowded bus of a Southern resort had his attention attracted by the odd behavior of its dusky driver. Every few minutes the latter would pull up his pair of bony mules, climb down from his seat and go to the rear of the bus, where he would open and shut the door with much show of force.

When the hotel was reached the passenger interrogated the ducky as to his queer actions. "Well, you see, sah," responded the driver, "them air mules am powerful tired, and they has a big load to haul; but when I gets down and slams the bus door, they thinks some one done gettin' out, and that gives 'em courage to make a fresh start!"—Arthur W. Beer.

The Long, Cold, Dark Evenings,

Are coming upon us when the wise father and mother will look about for some means to keep the young people at home.

Nothing will do this more effectually than a musical instrument, a Violin, an Organ, or a Piano. I heartily recommend to your notice the renowned Gourlay Piano. Won't you come and have a talk with me about the matter.

A Contest of Much Interest.

Curator William McIntosh, of the Natural History Society, St. John, will superintend the School Children's Competition, at the Exhibition, in that City, this fall between September 12 and 19th.

The prizes have been decided upon and all particulars of this interesting part of the show are contained in a small leaflet, which may be had for the asking.

Five dollars as a first, and three dollars as a second prize, are offered to the schools in each county sending in the best collection of plants found growing in the fields or woods of the province, which will include grasses, wild fruits in blossom, medical plants and weeds.

Then ten and five dollars are the two prizes open to the schools of the province for the two other best collections of minerals and insects. Teachers who aim to get their pupils interested in these contests, should send for the information leaflets as soon as possible. They can be obtained from R. H. Arnold, Manager of the Exhibition. Vacation days are near, and the work of preparation will be pleasant employment for idle moments.

Funeral of Mrs. Kerr.

The funeral of the late Mrs. Margaret Kerr, who died on Saturday, June 6th, of pneumonia, age 67, took place from the family residence, Oak Mountain, on Monday, June 8th at 2.30. Interment in Presbyterian Cemetery. Rev. Mr. McMillan officiated. The esteem in which she was held could no better be proven than by the large funeral which followed her to her resting place. She will be greatly missed around the Mcuintain.

3-18-St. Jacksonville, N. B.

Bridge Frocks Now.

It is now quite the fashion to dub all the good looking frocks that are not intended for balls and dinners as bridge frocks. The name is often misused.

Women who never play bridge wear the frocks by that name. We used to say "restaurant gown," and that name was amusingly used by women who rarely dined or suppered out of their own homes.

The bridge frock, so called, is any kind of a gown that you may wear to a wedding or an afternoon tea, or an informal dinner or a party if you do not wear your gowns low at the neck.

The name has jumped into popularity. Just as the men who never studied beyond the three R's wear college bands around their hats and girls who have never been on board a yacht wear the marine symbols on their sleeves, so women who do not know king from ace speak familiarly of their "bridge" frocks.
