Let us figure with you on your entire Summer Outfit.

FOX BROS, Aroostook's Greatest Clothiers, Hatters and Furnishers,
HOULTON, MAINE.

joint from the amputated leg served a perfectly normal function. In another case, the Doctor removed the upper end of the shin bone, taking away, therefore, the lower half of the knee joint (a much more difficult and dangerous operation, as it opened the knee joint) and replaced this with a similar portion of bone from an amputated leg with entire success.

Temperance Vate.

Canadian Order Foresters Court Delight of the Vale No. 1257 was organized by McLeod Mills on the evening of May 6th with a list of 22 Charter members, since that we held our first meeting May 29th. Bro. Mills has been with us for a few days and assisted in securing a number of new members we are all well pleased with the order and prospects look favorable for having a membership of over 50 within six months.

The Officers that were installed the night that the court was instituted are as follows: William R. Fawcett, C. R. Fred Scott, V. C. R. George Munro, R. S. Allen W. Corey, F. S. Anford Chapman, Treas. John Culliton, Chap. Ora A. Bartlett, S. W. Jas. Reid, J. W. Fred Graham, S. B. Oscar Moores, J. B. Amber McElwain, conductor. Samuel Barrows was recommended as U. P. C. R.

W. H. Coffin was recommended as Examining Physician Court Delight of the Vale No. 1257.

Provincial Appointments.

The following appointments for the Court of County Carleton were gazetted last week: E. Kenneth Connell, barrister-at-law, to be a referee in equity.

John Green to be a commissioner of the parish of Wicklow civil court, in place of Alexander Ritchie, resigned.

John Green, Wilmot Kennedy, Weldon Melville, Oliver A. Miller, R. B. Clark, Julian E. Long, Glidden Merrithew, Robert H. Wilson, Wilbur P. Acheson, and Edward Savage, to be justices of the peace.

Wm. F. Anderson, of Lakeville, and James Jewett, of Florenceville, to be issuers of marriage licences.

David Hipwell to be commissioner for taking affidavits to be read in the Supreme Court.

Wallace Smith, of Woodstock, to be boom master of the Meduxakik Boom Company.

Nisbet-Beatteay.

At Sussex, Monday evening, at 5 o'clock, Miss Alma E., only daughter of Mr. and Mrs. Richard C. Beatteay, was married to Mr. Charles T. Nisbet, local manager of the N. B. Telephone Company at East Florenceville. Rev. Mr. Saunders performed the ceremony. Only immediate relatives were present. Mr. and Mrs. Nisbet will take a short trip before leaving for their future home in East Florenceville.

Will Live In Fredericton.

Joseph McVay, contractor, of St. Stephen, is in Fredericton arranging to start work on the balance of the substructure of the Fredericton highway bridge. Granite is quarried at McAdam. Mr. McVay has leased the dealership for the summer, during the absence of Dean Schofield, and will occupy it, with his family, in a few days.—Globe.

Beware of Ointments for Catarrh that Contain Mercury,

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free. Sold by Druggists. Price 75c. per bottle. Take Hall's Family Pills for constipation.

MARRIED.

GRANT-COLWELL.—At the residence of the officiating clergyman, Woodstock, N. B., June 5th, by Rev. J. C. Bleakney, Clifford H. Grant, of Green Road, N. B., to Mable M. Colwell, of St. John, N. B.

The Sword Which Struck Down John Brown.

There died recently at Mitchell, South Decota, Major Israel Green. Major Green, at the time of the John Brown raid was a lieutenant in the United States marine corps, and as such led the storming party which captured the pumping station in which Brown and his followers had taken refuge. Green on that occasion carried a light fencing sword and during the assault on the pumping station he thrust at Brown with the sword and the weapon bent double against Brown's belt. Then, taking the weapon in both hands, Green struck Brown over the head, but the weapon was

DRINK TOBACCO and CURED DRUG HABITS

New System of Treatment. Recently Discovered Remedy that Cures Rapidly and Permanently. Marvellous Results obtained that makes our remedy one of the wonders of Modern Medicine. Patients cured secretly at their own homes against their own will and knowledge. No suffering, no injections, no loss of time, or detention from business, no bad after effects.

FREE! **FREE!**

We send by mail, free of charge, our 64 page book, which fully explains our modern system of treatment, of how the Drink, Tobacco and Drug habits can be rapidly overcome and cured. This book is sent in plain envelope, sealed from observation, so no one can tell what your letter contains. All correspondence absolutely secret and confidential. Address,

DE SILVA INSTITUTE, 55 University St., Montreal, Canada.

too light to inflict more than flesh wounds.

Had Brown been killed on that occasion, the course of history might, The New York Post thinks, have been somewhat different. His immediate death in the moment of assault would have prevented the long period of waiting between the capture and execution of Brown, and the consequent strong appeal which the champion of the Slave made to the northern heart and conscience, and so might, it is thought, have probably delayed, if not averted, the Civil war. Had Brown died in the engine house, he could never, the Post says, have been the martyr of the gallows, whose soul, marching on, inspired the Union armies; there would, of course, never have been those stirring letters of courage and readiness for death that thrilled the North in the weeks between the raid and his execution, and did so much to precipitate the inevitable conflict. In other words, the fact that Green on that particular day carried a fencing instead of a service sword, may have had a vital influence in the course of the history of the American Republic.

The New Comet.

(New York Herald.)

Watch the sky at night, a little south of east, for the new comet. It can't be mistaken for anything else, for the tail is 200,000,000 miles long. The unaided eye may see it whenever clouds do not prevail and it will remain on view until further notice. The comet bears the name of Dr. Brooks, of Hobart College, who first saw its head on May 24th. It was then approaching the sun. Since then it has rounded that luminary and is moving in this direction at the rate of 100,000 miles an hour. Edwin F. Nanty, who saw it's tail behaving like a celestial searchlight on the night before Dr. Brooks found it's head, noted the change of direction at 4 a. m. Monday, when observing after results of the moon eclipse.

The newcomer is not coming directly for us. It seems likely to get near enough, Mr. Nanty thinks, to cause earth tremors and forest fires. Should it's concentrated rays strike the earth with full strength they would probably lighten the pressure of the atmosphere. Lightness to the point of dissipation would leave mankind nothing to breathe, like the man in the moon.

A Huge London Hotel.

The largest hotel in London is the Metropolitan. Upward of 6,000,000 bricks were used in its construction, with 11,000 tons of iron work, and 70 miles of electric light and bell wire have been laid. The building is ten stories high, as many as 1000 people have dinner in a day; 500 people can be seated at separate tables; a staff of a dozen clerks are needed to attend to the book-keeping, and 35 to 40 men are always busy in the kitchen, from which region over 300,000 pounds of meat, 44,000 pounds of butter, 460,000 eggs, and 75,000 quarts of milk are sent per annum, while the water used approaches 20,000,000 gallons a year.

This one of the old stories told by Henry Clews, of Travers, the New York stammering wit. Mr. Clews always insists that the average Wall Street broker is the most honest of men.

"Travers," said Mr. Clews, "was once invited to be a guest at a yacht regatta. The waters of Newport harbor were covered with a beautiful squadron. Mr. Travers found that each yacht belonged to a banker or broker. He gazed blankly into the distance for a time and then required softly: "W-w-w-where are the c-c-customers yachts?"

60 YEARS' EXPERIENCE

PATENTS

TRADE MARKS DESIGNS COPYRIGHTS &c.

Anyone sending a sketch and description may quickly ascertain our opinion free whether an invention is probably patentable. Communications strictly confidential. HANDBOOK on Patents sent free. Oldest agency for securing patents. Patents taken through Munn & Co. receive special notice, without charge, in the

Scientific American.

A handsomely illustrated weekly. Largest circulation of any scientific journal. Terms for Canada, \$3.75 a year, postage prepaid. Sold by all newsdealers. MUNN & Co., 361 Broadway, New York Branch Office, 627 F St., Washington, D. C.

Season 1909,

MAY 1st TO AUGUST 1st.

Copain 55164.

Will make the season of 1909 as follows Leave Centreville every Monday noon for Ednor Reid's Knoxford, Leave Reid's Tuesday for Centreville Leave Thursday noon for Bloodfield Corner returning Friday evening, Balance of time at Centreville.

Terms:—Leap \$7.50 Cash; Warrant \$15.00/\$8.00 to be paid at first service.

Copain is now 7 years old and has been in this country over 3 years having been imported from France August 1906 he is thoroughly acclimated and last year proved very sure. He is a perfect type of a pure bred percheron and his blood shows in the appearance and conformation of every coil. His colors are very saleable and command the top prices. Breed to the best.

For further information write or telephone the undersigned.

Special Offer.

Arrangements have been made with the publishers of the BUSY MAN'S MAGAZINE, enabling us to offer this bright, up-to-the-minute periodical along with THE DISPATCH one year for \$2.00

The regular subscription price of the Magazine alone is \$2.00.

BUSY MAN'S reproduces the cream of the world's periodical press by culling the live, interesting and instructive articles. Each issue also contains original Canadian articles of interest to every Canadian. Busy Man's is the kind of Magazine which arouses the reader's interest in the first page and keeps it up until the back cover is reached. All those wishing to keep posted on the live questions of the day should not hesitate to take advantage of our offer.

WATCH NEWS.

What's the use of a watch that doesn't keep good time! One of these may be the reason:—

- 1st. It may be no good.
 - 2nd. It may need cleaning or repairing.
 - 3rd. It may be magnetized, which is the case more often than is known.
- If it is the first—I can sell you a new one from a most choice assortment at various prices and everyone GUARANTEED PERFECTLY SATISFACTORY or money back.
- If it is the second—I am an expert in the line of cleaning and repairing. There is an experience of 30 years behind and when a watch leaves my hands it is in perfect order.
- If it is the third—I have lately installed at considerable expense a DEMAGNETIZER with which I can remedy that wrong condition absolutely. No need to carry a watch that is unreliable.

FARM FOR SALE

The Kidney-Lilly Farm on the Jacksantown road, about four miles from Upper Woodstock, containing 150 acres with a good dwelling, barns, and other outbuildings. An especially good bargain will be given for a quick half cash sale. Dec. 7th, 1908. J. N. W. WINSLOW.

Some Marvellous Feats in Surgery.

(From Current Literature.)

Whether the pulsation of the heart could be re-established was first examined some thirty-five years ago. In animals, by means of rythmical compressions of the heart by the hand, it was found possible to start the heart beating. Space forbids mention of the experiments whereby, in a considerable number of animals and through various devices, cardiac beats were restored. The most extraordinary experiments, however, were made by Kuliabko in 1902 on hearts which had been removed from the body. The prior experiments had been made on hearts remaining in the body of the animal. Kuliabko showed that after the heart had been removed from an animal and kept in ice for twenty-four or even forty-four hours, by filling the heart with certain fluids, pulsation was re-established and continued for over three hours. He was able also to take the hearts from rabbits that had died a natural death instead of being killed and on even the second, third and fourth day after death—after filling them with this fluid—the isolated heart was started in its pulsation and continued to beat for several hours. He also tried the experiment in a number of instances after death and temporary pulsation could be reduced.

Very naturally such experiments aroused the hope that some similar result might be reached in man. It was tried in desperate cases of sudden death especially from chloroform, Ricketts has collected thirty-nine cases, of which twelve recovered! In other cases the circulation has been re-established for a number of hours, so that surgeons were justified in expecting the recovery of the patients; but after a time the pulse and inspiration failed, and recovery did not follow.

All this is so new, as can easily be seen, that it is impossible at present definitely to fix on the best method of reaching the heart, whether (as in cases of wounds of the heart) by making a trap-door over it in the wall of the chest, or by quickly opening the abdo-

men and reaching the heart through the diaphragm, or by other means which are too technical for me to describe. The report of the thirty-nine cases alluded to gives a recovery rate of thirty one per cent. This will be increased in time there is no doubt.

The most recent researches in the surgery of the heart are efforts to determine whether it is possible not only to expose the heart and operate on its interior, but deliberately to open its cavities and operate on the valves. The results so far seem to show that it is no dream of a surgical Utopia, but that before long "valvular disease of the heart," hitherto an absolutely incurable disease, may be dealt with surgically and with the possibility of success. Happy the surgeon who, after suitable experiments upon animals have taught him exactly how to do it, may be able to cure such a hopeless malady!

From the heart, observes Doctor Keen next, we "naturally pass to the arteries" which conduct the blood from the heart to all parts of the body. Wounds of the arteries by gunshot, by stabs, by accidents, are not at all uncommon. Until very lately when a large artery or a large vein was wounded our only remedy was to cut down upon the blood vessel and tie it above and below the wound. If it were an artery leading to the arm and still more if it were one leading to the leg, as the principal supply of blood was cut off gangrene was a very common result. In cases of aneurysm—a disease in which the walls of the artery become weakened at a certain point, bulge and finally rupture, producing death—until recently, as in the case of a wound, our only resource was to cut down upon the artery and tie it. Here again the chief danger was gangrene. In the treatment an aneurysm, Matas of New Orleans his made the greatest improvement from the days of John Hunter, over a century ago, instead of tying the artery above the aneurysm, and arresting the current of blood in the artery, he opens the sac (that is, the dilated portion of the artery or aneurysm) and sews the wall of the sac together on the inside, leaving however a small tunnel through which the circulation is continued. Up to last June eighty-five operations of this kind have been done, with seventy-eight recoveries.

In the case of a man who had a stiff knee joint bent at an angle and immovably fixed by firm bony union. Dr. Lexer of Konigsburg removed the bones forming the knee joint and took from an amputated leg a corresponding healthy knee joint and put it in place of the bone that he had removed from the stiff knee. The transplanted bones both above and below united firmly with the bones of the patient and the strange knee

Spring Tiredness

or spring fever is only natural. It simply that you want an invigorator—something to BRACE YOU UP after the rigors of winter.

VITOL

will do the trick every time. Vitol will make a NEW MAN OF A NEW WOMAN of you. 50 cents a box or six boxes for \$2.50. For sale at the Sheasgreen Drug Co.'s, Main street, opposite Carlisle Hotel, Woodstock.
