Field And Garden Seeds.

The Season for the purchase of Field and Garden Seeds now being at hand, we are led to think of the importance of buying only those Seeds which are pure and of strong germinating powers. The farmer who buys the best seed obtainable does a service, first to himself; second, to his neighbors; third, to his country. On the other hand, the man buying poor seed injures himself, his neighbour and his country; himself by raising a small crop of inferior quality; his neighbour by maintaining in his own fields a nuisance in the shape of Weeds, the seeds of which, at harvest time, will be blown into the adjoining fields; his country by diminishing to the extent of its own ability its producing power for the best products. In this connection we believe that the passing of the Seed Control Act of 1905 by the Dominion Government has been a large benefit to the farmers of our country, as it has undoubtedly prevented unscrupulous dealers from selling the very poorest seeds. For the above reasons the proprietors of York and Kent Brands of Timothy have been especially careful to buy only the best seeds procurable. We have seen a report of a qualified expert, which says that in the samples analyzed York and Kent Timothys do not contain a single weed seed named in the Control Act of 1905. Therefore, if the farmers of this county wish to protect their own, their neighbor and country's interest, they will insist of getting York and Kent Timothy Seeds.
