The stock is still complete, and customers may go in and pick out what they want and take the goods away by paying half the price marked on them. The new merchants are also putting in a fine line of brand new dry goods and the prices will be marked low. ### Hartland Markets.

There is a slight upward tendency to the potato market and most of the dealers are paying 10 cents a barrel more than they have been paying during the past few weeks. The general opinion is that farmers in this and the two upper counties will go into this crop more heavily the coming season than ever. Potatoes proved a good thing last year, but everyone should remember there is danger of overdoing the matter. Strict attention should be paid to the other profitable lines. There is big money in raising stock that is well pastured and fed on hay and mash. There is lots of money in sheep and more in hogs; and good dairy cows bring in prompt and substantial returns. Hens that lay in the winter are a profitable side-line. Farmers, don't all specialize in the same crop, if you must specialize. Find out what your land and locality is best suited to and follow accordingly.

Prices this week are;

Hay loose.....	\$6.50 to	7.00
Oats.....	.40 to	.45
