Miss Laura Pierce has gone to Fredericton.

Rev. Thos. Pierce's text last evening was a very wholesomely suggestive one, "The disciples asked Him." A boy afterwards remarked about like this, "anybody ought to be able to preach a good sermon from that text if he were used to preaching." "Of these things also will I be inquired of," said God. "We are all animated interrogation points."

All our knowledge is the result of inquiry. The boy who breaks up his toy to examine how it is put together is asking that toy how it is made. Livingstone by his heroic explorations asked as to the sources of the Nile.

Edison with his marvellous power of making patient investigation inquired of electricity. "What secrets are you willing to reveal to me?"

What wonderful revelations have sturdy pioneers given to us as results of their questionings. The brothers Wright and Sir Alexander Graham Bell, &c, asked the air what were the requisites for sailing it, and the practical answers are being talked about and observed. Marconi asked, "can't messages be sent without wires?" and the answer "yes," and a ship in distress can be seen surrounded with ships, come to her assistance in response to wireless messages.

Ship builders have asked, "is there anyway to prevent a ship going down after having had a large hole punctured in her hold." The answer has come, "yes, build her with many water-tight bulk heads." Innumerable are the illustrations; but most beautiful of all it is to ask Him who made the waters, the air and electricity, all things, and who full of life came to impart life, yes, to ask Him. Interest indeed it is to note the questions the disciples asked Him, and the answers He gave. How well He knows, yes, knows the vital matters. With what confidence we may ask Him. Happy indeed to be in asking terms.
