APP M'LEOD VINCE
Barrister-at-Law, Woodstock N. B.

NOTICE.

Notice is hereby given that a vote of the
property holding ratepayers of the Town of
Woodstock, in the County of Carleton, and a
vote of all the ratepayers of the said Town
will be taken on Thursday, the Ninth day of
June next, between the hours of ten of the
clock in the forenoon and four of the clock
in the afternoon, at the Council Chamber in
the Town Hall, in said Town of Woodstock,
upon the question of authorizing the Town to
issue Ten Thousand Dollars worth of Debentures
at par, with interest at the rate of four
per centum per annum, payable semi-annual,
thereafter, at such times and in such amounts
as the said Town Council should determine,
the money to be derived from the sale of any
Debentures to be used and applied by the
Town Council of said town for the purpose of
constructing in said town, permanent or im-
proved streets, such vote will be taken un-
der the authority of an Act of the Legisla-
ture passed at the last session of said Legisla-
ture entitled "An Act to authorise the Town
of Woodstock to borrow Ten Thousand Dol-
lars for the Permanent Improvement of the
Streets," and the mode of procedure on the
taking of such vote is prescribed by Chapter
93 of Acts of Assembly 7th Edward VII.
Dated this seventh day of May A D,
1910.
By order of Town Council,
J. C. HARTLEY,
Town Clerk of Town of Woodstock.

NOTICE.

Anyone wishing feather beds or pillows or
household furniture will please apply to
MRS. T. S. DUNCAN, Main Street.
June 1-11.

to MRS. DAVID O'NEIL, Park Street.
June 1-11.

WANTED

A first-class Male teacher for Upper Wood-
stock. State Salary. Apply to
F. D. BURKE Sec'y.
May 25-21.

Testing Fische's Memory

(Chicago Tribune.)

Even the fishes of the sea have pictures
on memory's wall. Experiments have been
made with several fishes as to their facul-
ties for remembering, but the most striking
results have been obtained with the gray
perch, which lives chiefly on a small silvery
hued sardine. Some of these were taken
and colored red and were then put into the
tank where the perch was, with several sil-
ver colored sardines. Of course, the normal
sardines were at once seized and eaten, but
it was not until hungry that the perch made
a tentative meal of one of the red colored
victims.

On recognizing the sardine flavor, how-
ever, he promptly demolished the remainder.
Later the perch devoured the sardines irrespec-
tive of color, thus showing not only traces
of a memory, but also the power to differenti-
ate color.

Subsequently sardines colored red and
blue were placed in the tank together with
the silver ones. The same scene was re-
peated, the blue sardines not being attacked
until the others were eaten and hunger com-
pelled investigation of the newcomers. After
this introduction the perch ate the sardines
of all three types without any difficulty.

Some spines of the sea nettle were then
fastened to the blue sardines. These were
at once avoided by the perch, who promptly
got out of the way of the newcomers. This
showed traces of memory as the results of
contact with the sea nettle were shown and
recognized.

**Beware of Ointments for Catarrh
that Contain Mercury.**

as mercury will surely destroy the sense of
smell and completely derange the whole sys-
tem when entering it through the mucous
surfaces. Such articles should never be used
except on prescriptions from reputable phy-
sicians, as the damage they will do is ten fold
to the good you can possibly derive from
them. Hall's Catarrh Cure, manufactured
by F. J. Cheney & Co., Toledo, O., contains
no mercury, and is taken internally, acting
directly upon the blood and mucous surfaces
of the system. In buying Hall's Catarrh
Cure be sure you get the genuine. It is
taken internally and made in Toledo, Ohio,
by F. J. Cheney & Co. Testimonials free.
Sold by Druggists. Price 75c per bottle.
Take Hall's Family Pills for constipation.

A Great Scientist

The late Dr Koch may not have accom-
plished all that he thought he had done for
time deals unsparingly with scientific theo-
ries, but there will always stand to his credit
a substantial amount of original work which
has been recognized by the greatest of his
contemporaries as both valid and valuable.
Along the line of bacteriological investigation
he has no rival except his great French con-
temporary Pasteur, whose fame equals if it
does not overshadow his own. The general
results of their work is to establish as a fact
that all pathological conditions in organized
bodies are due to the multiplication of or-
ganic germs. This great discovery has led
to attempts more or less successful to stop
the progress of disease by the practice of
inoculating the diseased body with germs
that will neutralize its efficient cause. The
work of both Koch and Pasteur was made
possible by the work of Darwin and his
disciples, but to the former belongs the great
credit that is always due to self-sacrificing,
because disagreeable and dangerous, work
among organized substances that are in a
state of putrefaction. The contemporaneous
researches of two such men in two different
countries is one of the notable coincidences
in the history of science. Toronto Daily
Globe.

Ex-President Roosevelt no doubt mean
well in instructing British statesmen as to
how they should manage such a country as
Egypt. British statesmen have had consid-
erable experience in such matters, and as
consequence are no doubt ready to listen to
all the good advice that may be tendered by
the ex-President. Toronto Globe.

TO GOLDWIN SMITH.

A toast to Canada's Grand Old Man, in his
87th year, by Joseph Lewis French (in
Cosmopolitan for June).

Hearts of old England and Canada to you!
Hearts of the North and the Empire be-
low!

We that had found you, and held you, and
knew you,

Knew you as more than the passing show;
Knew your light, a torch to the nations—
Something withheld from the enemy's
clutch.

Holding aloft 'mid supernal foundations
Faith, Truth and Scholarship. Aye it were
much.

Foreign

Professor Robert Koch, the famous bac-
teriologist, died at Baden-Baden on Friday
from a disease of the heart. He was born at
Klausthal, Hanover, Dec. 11, 1843. Prof
Koch became distinguished as an investiga-
tor of micro-organisms, but probably gained
most renown as the discoverer of the bacilli
of tuberculosis and cholera. It was in 1890
at the meeting of the International Medical
Congress that Prof Koch announced the dis-
covery of a specific for tuberculosis.

Boys' Camps.

There is more fun in a camp for boys than
can be imagined by a person that has never
been in one. The camps conducted by the
Maritime Committee of the Y M C A, have
become so popular that it is now necessary to
run them in two sections. The Directors
chosen are men who are interested in the de-
velopment of boys and want to see them
have a wholesome good time. These men
with their able assistants insure a perfect out-
ing to the boys.

Boys from all parts of the provinces are
invited to attend either section of the Mar-
itime Boys' Camp. Section one will be held Au-
gust 3-17 at Robertson's Point, N. B. The
boys gather at St John and Fredericton and
go into camp by one of the river boats. The
tents are on a high point and look out over
Grand Lake. In the distance can be seen the
village of Chipman. Half a mile down the
lake stands Sentinel Rock. It is an ideal
place for a camp.

Rev G A Lawson is to be the Director of
this camp and Mr Moor, the Boys Work Sec-
retary of the St John Y M C A, will assist
him. Both of these men are old campers and
they know how to make good fun in camp.
Mr Moor is an expert swimming teacher and
will give instructions in all sorts of water
sport.

Section two of the Maritime Boys' Camp is
held at Big Cove, N S, near New Glasgow,
July 15th to 29th. This camp is under the
direction of Rev E W Forbes, who has been
the leader of five camps. He, too, knows
how to make everyone have a good time. No
boys are allowed to be backward in the camps
he leads. Every fellow has got to have a
good time or he feels that the camp is not a
success.

The site at Big Cove is rivaled only by that
at Robertson's Point. Here, too, the tents
stand on a high hill and look out over the
water. But in this case the water is dotted
with islands and the view is out towards
Northumberland Straits. The camp has ev-
erything needed for good wholesome enjoy-
ment. Boats and a chute-the-chute are there
for the water sports, and there is an athletic
field for the land gamer.

The Maritime Boys' Camps hold for two
weeks and the cost is eight dollars. This
covers everything in camp—food, tent-space,
boats and all. Boys may attend whether
members of Y M C A or not. The age re-
quirement is that only boys of or between
thirteen and seventeen years of age will be
enrolled. Information regarding the camps
may be secured from any Y M C A Secretary
or from Mr Darrell Hibbard, Maritime Sec-
retary for Boys, New Glasgow, N S.

Street cleaning on the vacuum principle is
the latest development of a sanitary nature.
Instead of brushing up the dirt and redi-
stributing the germs, the vacuum cleaner in
Europe draws everything into a vessel, the
contents of which are carried away without
any unpleasant results. Both from a sani-
tary and aesthetic point of view this is an
improvement upon the methods now pre-
vailing.—Toronto Mail.

Fine Art of Letter Opening.

(From the London 'Chronicle')

In Russia one letter in every ten passing
through the post is opened by the authorities
as a matter of course. Indeed, the postal
authorities of every country have experts
who have raised letter opening to a fine art.
Some kinds of paper can be steamed open
without leaving any traces, and this simple
operation is finished by reburnishing the flap
with a bone instrument. In the case of a
seal a matrix is taken by means of new bread
before breaking the wax. When other meth-
ods fail, the envelope is placed between two
pieces of wood with edge projecting one-
twentieth of an inch. The edge of the en-
velope is first flattened, then roughened and
finally slit open. Later a hair line of strong
white gum is applied and the edges united
under pressure.

Wolfville, May 31—The annual Interclass
field sports were held at Acadia this after-
noon, the junior class winning the cham-
pionship by a total of 42 points, 31 scored by the
academy students. The highest individual
score was made by Eric MacDonald, of the
academy, who was first in the one hundred
and two hundred, second in the broad jump,
hurdles and pole vault and third in the high
jump, a total of 23 points. Porter of the
junior class was second.

Macdonald, who is only 18 years old, is a
son of Rev J H Macdonald, of Fredericton,
and promises to be a fine athlete.—Freder-
icton Daily Mail.

Rev J H Macdonald was pastor of the Al-
bert Street Baptist church here some year
ago.

For Sale.

Two hundred and thirty acres lumber land in
the lower part of the Parish of Woodstock corner-
ing on Eel River, for sale.
