

EVERY statement, every claim, every guarantee concerning Red Rose Tea from the time it was first put on the market until to-day has been lived up to to the fullest degree. Its remarkable success and enormous sale are the result of this method of doing business, coupled with the all-important fact that Red Rose Tea has always been good tea.

"IS GOOD TEA"

Estabrooks' Red Rose Coffee will have the benefit of the same business methods. Equal skill will be employed in its selection and preparation, and equal determination to maintain its superior quality.

Estabrooks' Red Rose Coffee and Red Rose Tea will form a very strong partnership, each resting on its own quality, which, in Red Rose Tea, has been so aptly described as "good."

A good combination is Estabrooks' Coffee for breakfast and Red Rose Tea for other meals.

The Gipsy Moth.

Perhaps the most persistent and destructive emigrant that ever landed on the continent of America is the Gipsy Moth. Thorough the good offices of Inspector F B Meagher the schools of the town of Woodstock have received instructions as to the identification of this species. It is not only extremely persistent and destructive to vegetation, especially forests and ornamental trees, but it has a very interesting history as follows:—

The Gipsy Moth, a pest of European countries, was introduced into America in 1863 or 1869 by Leopold Trouvelot, a French artist. It was imported by Mr. Trouvelot in the course of his experiments with silk worms at Glenwood, Medford, Mass. Prof N S Shaler of Harvard University stated that many people who lived in the vicinity in 1869 had reported that Mr. Trouvelot imported some insect eggs about that time, some of which were blown out of a window of the room in which they were kept and that he was very much disturbed on being unable to find them. Others state that the insects escaped in the larval form.

Probably the insect was imported in the the egg. Its escape seems to have been accidental, and Trouvelot, being aware of the dangerous character of the pest, and finding his efforts for its eradication futile, gave public notice that the moth had escaped from his custody.

This pest has cost the State of Massachusetts alone over \$1,000,000 in the attempt

to eradicate it. In spite of all efforts it has gradually increased and now occupies the States of New Hampshire, Vermont and Maine as far east as Bucksport near Bangor and will surely reach New Brunswick, hence the necessity of making the children of the Province acquainted with its appearance, life, habits, etc.

For the benefit of the teachers and pupils throughout the county the following description is here given:—

The nest is a bunch of eggs covered with a light brown velvety substance from the abdomen of the female moth. It is from one, to one and one quarter inches long and about one half inch wide—elliptical in form, and is found closely attached to the bark of the trunks and branches of trees, especially the birch and oak. The peculiar light brown patch is easily recognized.

When it is considered that each female moth makes a nest and each nest contains upwards of 100 eggs some idea may be had of how fast they multiply.

The larva which hatches from each egg is a caterpillar about 1½ inches long. The body is dark brown or black and is made up of a head, seven segments and a tail. Each of the first five dorsal segments has a pair or bluish tubercles on the sixth and seventh each pair is a dark crimson red. The sixth and seventh abdominal segments have red glands. There are also two rows of tubercles on each side which bear longer hairs than on the back.

This larva, which is hatched out in May

Young's Cove.

A number of people who have been fortunate enough to wake up, in the early morning, have seen Halley's comet. Your correspondent had a good view of the comet this morning.

There was a very heavy thunder storm here on Wednesday, the lightning being very vivid also at Gagetown. Your correspondent saw the largest hailstones he has ever seen, they were nearly as large as marbles, but of a soft nature and did not do any damage.

Miss Louise Wiggins, of this place, spent Sunday with her sister, Miss Nydia Wiggins, who is teaching school at the Coal mines.

Mr C H Mott and youngest son Arthur D spent a few days in St John on a business trip.

Mrs Melbourn Ruce and son Waymen, left on Monday for Worcester, Mass.

Miss Hannah Slocum, an old resident of this place, who is nearly eighty is in very poor health.

The water in the Grand Lake is falling steadily.

The grass is looking fine for this season of the year.

Gasperaux are very scarce in the Lake at present.

Mr Arch Purdy of Jemseg, lost three cows on Wednesday during the heavy thunder storm, being struck by lightning.

A Fatal Accident.

George Bryant, a native of Liverpool, Eng who has been in Canada about two years, was killed Wednesday afternoon, while rafting logs for Wm. Simmons, at Northampton on the St. John river. He was at work with a crew of men who were taking logs from the bank and was at the foot of the brow. A heavy hemlock was started at the top and when Bryant saw it rolling down, he apparently became bewildered and unable to get out of danger. The log rolled over him crushing his head badly, and injuring him internally. He was taken to his home a short distance away and medical assistance summoned. The accident took place about 10 o'clock in the morning and he lived until 5 o'clock in the evening. He is survived by a wife, two sons and one daughter. He recently purchased a farm at Northampton and was considered an honest and respectable citizen.

Resolution of Condolence.

To Miss Grizilla Savage, relatives and friends:

Whereas it hath pleased Almighty God to remove from our midst by the cold hand of death our highly esteemed and respected brother, John Savage. One who has always been faithful and regular in his attendance at our lodge as long as health and age would permit, and ever ready and willing to assist in everything which had for its object the advancement of the high and ennobling principles of the Orange association. He was a charter member having joined by certificate at its organization, and the first honorary member of our lodge, and he was allowed the distinction which few members enjoy of having upheld the principles for the long period of over sixty years. Therefore resolved that we, the officers and members of Richmond L. O. L. No 109, who know from actual experience what it is to taste from the cup of human sorrow, desire to express to you, his sister, relatives and friends in this your time of bereavement and sorrow, our heartfelt, unfeigned sympathy and counsel you to sorrow not as those without hope. Believing in the reality of divine things, believing that God can bestow the consolation of Heavenly grace, we commend you all to his tenderest love and good will, and assure you that the shadow which has darkened your home has in a real sense caused a vacant seat in our lodge room and a painful sensation in our hearts. We are comforted and share the belief that you are likewise in the thought that earth has no sorrow that Heaven cannot heal, and we beg to assure you that we will with reverend hearts pray that God's unfailing grace may be yours in richest abundance.

and June, develops into an ordinary looking moth about an inch long. The female is a dirty white color and is distinguished by fine dark lines across the wings and a black lunule mark in the middle of each fore wing. The male is light brown in color and is marked the same as the female. The female cannot fly hence its slowness in spreading and its name—the Gipsy. Its scientific name is *Plutella dispar*.

It is important that the children be made acquainted with the pest so as to be able to give it a warm reception on its arrival. In Maine a bounty is offered for its destruction. Perhaps something of this sort would serve as an incentive to the children to keep a sharp look out for it here.

Houses and Lots For Sale.

Apply to LOUIS E. YOUNG,
Woodstock, N.B., 27th, No. 8—t

A Home If You Say So.

Call and see the the list of Derirable Cottages I am offering for sale—At all prices from \$350. upwards—Terms easy YOU may pay me by the year; YOU may pay me by the month; YOU may pay me any way you wish, I want to aid YOU in getting a home of your own, I know YOU will appreciate it. Start now.

Queen Street, WOODSTOCK, - - N. B.

SPRING TIME IS CHURN TIME

There is no churn on the market that has so many satisfied users as the DAISY.

The barrel of the DAISY is made of seasoned oak, will not chip or break, keeps sweet and clean, runs on steel ball-bearings, fitted with cream breakers and easily detachable. The frame is steel, securely braced, and has combination hand and foot drive.

The DAISY CHURN is sold only by

W. F. Dibblee & Son.

Wholesale and Retail.

BICYCLES OF QUALITY

Cleveland Rambler Standard

The Cleveland is without a doubt the peer of all the higher grade wheels—graceful in design, light weight, strong and rigid.

Built on the most scientific principals, two-joint bearing construction, accurately fitted, ground and hardened. Three-piece crank hanger, the most satisfactory, one-piece drop forged fork crown, no brazed joints.

With the Sills handle bars and cushion frame you get the pullman comfort over the roughest roads.

Absolutely Guaranteed

I also have the Rambler and Standard—two thoroughly good Bicycles, but a little cheaper than the Cleveland.

Cash or Easy Terms

I stand behind every Bicycle I sell and will replace anything not satisfactory. Get catalogue and prices.
