

Now—and Then

YEARS ago when none of us knew better we took our wheat to the village mill and our good friend the miller ground it for us the best he could.

It wasn't his fault if our wheat was mostly grits or if it was frosted or smutty. He did the best he could with the materials we gave him and the facilities he had for grinding.

The making of flour to-day is not a mere grinding process. The great Ogilvie Flour Mills of to-day are a vast commercial enterprise extending from ocean to ocean.

Royal Household Flour

is a world product. It is well known in Africa as well as in Canada. It is as much appreciated in the poorest household at home as it is in the Royal Household abroad. To make Royal Household Flour the product it is, involves vast capital and resources. Every advanced process, every modern device that can in any way improve the quality of Royal Household Flour is immediately adopted regardless of expense.

If the production of ROYAL HOUSEHOLD FLOUR was purely a milling process it would not be better than any good flour. But it is not the milling alone that

makes it the finest flour in the world. It is the all embracing system of care and watchfulness and scientific knowledge that surround it at every stage from wheat field to kitchen.

Canadians may well be proud of Royal Household Flour. It is no small thing to have it to say that the world's most perfect flour is made in Canada from Canadian wheat and has become a world-wide factor through Canadian skill and capital.

"Royal Household" is head and shoulders above ordinary flour in quality.

The best flour for Bread and Pastry is "ROYAL HOUSEHOLD". To try it is to prove it.

If you send in your name and address, also the name of your dealer, "Ogilvie's Book for a Cook", containing 125 pages of excellent Recipes will be sent free of charge.

The King's Oak Dead.

New York, May 9.—The death of King Edward VII. has set the folk in Central Park to talking about the comparatively recent death of the King's oak, which Edward planted in Central Park at the time of his visit to this country in 1869, when he was Prince of Wales.

The death of the oak took place a year ago; it was a year ago that the King's health is said to have started on the decline. Park employees recalled that in 1901 the oak was thought to be dying. Samuel Parsons the landscape architect, reported to Park Commissioner W. L. G. that he did not think the tree would live much longer.

At that time Edward was seriously ill. It was after the death of Queen Victoria and before the coronation of the new King. An operation was performed upon the King and he recovered. At the same time a sort of operation was performed upon the oak. Some of the decaying parts were cut away, the soil about the roots was freshened and other things done to stimulate healthy growth. The tree recovered much of its former vigor.

SLEEP

The first sleep is the soundest—after the first hour the intensity of sleep slowly diminishes—hence the value of forty winks after dinner in quickly recuperating shattered powers. Temperature and vitality are lowest at about 2 a. m., so that two hours' sleep before midnight are worth four thereafter. Nature has no rule as to the length of sleep, except that men need less than women, since women are the more sensitive creatures, and a woman's heart beats five times more in a minute than a man's. Sleep should be just so long that when you wake in the morning a stretch and a yawn only are necessary to land you in a daytime of bounding vigor. As to early rising, it is comforting to hear Dr. Bryce say it is a habit that has gone far to wreck the constitutions of many a growing youth.

The coming of the Niobe.

Halifax Chronicle.—Mr George E. Boak, who returned from Ottawa last night, reports that he met with a very favorable response in connection with the projected celebration of the arrival of the cruiser Niobe, the first ship of the Canadian Navy. The date of the arrival of the Niobe, is still uncertain, but Sir Wilfrid Laurier issued instructions to have the ship here on the 20th of June if possible. The Halifax celebration appealed to the members on both sides of the House, and among those who signified their intention of coming down for the event was Col Sam Hughes, M. P. It is expected that low excursion rates will be given on the railways, and that a large number of visitors will be induced to come to Halifax for the celebration.

Comet Excites Much Interest in France.

Paris, May 11.—Astronomers in France are making observations on Halley's Comet that are attracting the greatest interest. Maurice Hamy, of the Paris Observatory, reports that the length of the tail has increased from five to ten degrees in three days. Professor Deslandres, of the Observatory of Dijon, finds a re-appearance in the spectroscopic of cyanogen, the poisonous gas which was observed in January and February, but which disappeared in March. In his report he says that the hypothesis that the gas is liable to affect the terrestrial atmosphere would not be at all absurd.

On the other hand, Camille Flammarion thinks that the tail of the comet is simply an optical phenomenon produced by the flight through ether, similar to the wake of a ship at sea.

M. Michard maintains that the comet shows important variations from its predicted orbit, which presage unexpected surprises.

Lima, Peru, May 10.—Active preparations for a possible war with Ecuador are in progress. Volunteers are enlisting daily and the war fund is being constantly increased by private donations. In this city and its immediate vicinity 24,000 soldiers are quartered while 10,000 additional troops are stationed near the frontier.

The Peruvian government believes that it has reliable information that an effort is being made by Ecuador to obtain an alliance with Bolivia as against Peru.

To this end it is asserted a member of the Moudorian cabinet left Guayaquil yesterday for La Paz, Bolivia, under instructions to negotiate with the Bolivian government and the Chilean minister at that capital.

It is now said that it was the particular wish of King Edward that the Duke of Connaught should succeed Earl Grey as Governor General of Canada. Such an appointment would be warmly welcomed in Canada.

ALCOHOL

is almost the worst thing for consumptives. Many of the "just-as-good" preparations contain as much as 20% of alcohol; **Scott's Emulsion** not a drop. Insist on having

FOR SALE BY ALL DRUGGISTS

"Slow Poison"

"I suppose I have sold millions of cigarettes in my life," remarked a tobaccoist yesterday, "and I often wonder whether my doing so will be placed against my credit in the next world. It is the one part of my business that I positively loathe. I really think that at the rate cigarettes are now being consumed—and the rate is steadily increasing—the effect will be decidedly apparent in the next generation of mankind. The cigarette is a form of slow poison which, while it may not result in death, must necessarily leave its effects upon the human system. You may not believe this, but during the hot weather I have noticed that if flies are shut in the case where cigarettes are kept they will die in less than five minutes. The very atmosphere seems to poison them."

Physical Exercise and Military Drill.

Capt. A. H. Burden, who is head of the physical and military drill in the schools in Canada, is in the city today, and had a conference with Chief Supt. Carter this morning. It is very likely that military drill will be held in Fredericton this summer and teachers will be allowed \$2 per day while undergoing instruction. In regard to physical drill, stations for teaching this drill will be established in different parts of the province. The stations will be decided later, after the Chief Superintendent has had a talk with Col Humphrey of St. John. The stations will be established wherever twenty pupils can be found to take the instruction. Chief Supt. Carter goes to St. John this evening to consult Col Humphrey in regard to the matter. —Gleaner.

Calgary, Alta., May 11.—Secretary McHugh of the Grain Exchange, in discussing Alberta crop conditions, said today that fully fifty per cent of the winter wheat in Southern Alberta has been destroyed by an extremely dry spring. The majority of the farmers who sowed fall wheat are now ploughing it up and preparing to plant spring wheat.

THOUSANDS HAVE WEAK LUNGS AND DON'T KNOW IT

Editor Used a Well Known Tonic and System Builder

The Editor and Manager of the *Burk's Falls "Arrow,"* is only human. This being so it is not surprising that he should feel and suffer as other men. Mr. Alex. Fawcett says: "I had a very severe attack of La Grippe which left me very weak, spiritless and run down. I seemed to have lost all ambition. 'At this point I realized that my condition was likely to become more serious unless I took myself in hand. One day while in this 'Half dead and alive condition' I was listlessly looking over recent files of my paper, *The Burk's Falls Arrow*' (of which I am Editor and Manager), when my eyes rested on an advertisement of *PSYCHINE*. This clearly and explicitly set forth a case so exactly resembling my own that I at once purchased a bottle at the Medical Hall. After taking two or three doses I felt like a new man, and before half the second bottle had been used, every trace of the bad effects of La Grippe had left me. 'PSYCHINE' is a marvel and I have strongly recommended it to some of my friends similarly afflicted and they have used it with equally beneficent results."

For Sale by all Druggists and Dealers, 50c and \$1.00 per bottle.

FERROZONE

Will Give You An Appetite, and With Appetite and Good Digestion Come Health and Strength.

Ferrozone will in one week give you a splendid appetite, and will so improve digestion and assimilation that full benefit will be derived from everything eaten.

There is nothing like Ferrozone to create a keen, healthy relish for food for the blood and a tonic for the nerves and brain. To those leading a sedentary life it is a perfect boon.

The Rev. Dennis O'Brien, D.D., the well known evangelist, says of Ferrozone: "I have pleasure in saying that I have found Ferrozone a remarkably good preparation. It keeps up one's appetite, cures nervousness and sleeplessness, and perhaps is the very best tonic I have used. Being in the form of a chocolate-coated tablet, it is both pleasant and convenient to take and is well worthy of my highest recommendations."

This is an example of the way people speak of Ferrozone who have used it, and should be convincing evidence of its unusual merit. It is warranted to cure Indigestion, Dyspepsia, Lost Appetite, Rheumatism, Kidney and Liver Troubles, Catarrh, and all other diseases arising from impairment of blood or nerve tone.

Refuse to accept a substitute for Ferrozone. Every druggist sells it, 50c per box, or three for \$1.25. By mail from the Ferrozone Co., Kingston, Ont.

of Canada and on these the head of King George will appear, but the first of January will probably be the date of the inauguration.

Comet Red as King Dies

New York, May 9.—The Tribune publishes the following wireless despatch from the SS-Bermudian in Bermuda waters.

On the night of the death of King Edward a phenomenon was observed at Bermuda and recorded by a scientist who was watching Halley's comet, which first became visible at about 2 o'clock in the morning. At 12 30 o'clock the fort near Hamilton began firing the salute of 101 guns to the new King at intervals of two minutes, and as the last gun was fired, at exactly 3.52 o'clock, the comet's tail flared red.

The head also became a ball of red fire, and the phenomenon continued for five minutes. Many negroes working on the docks refused to work longer, and fell to their knees and prayed. In their superstition they exclaimed that the occurrence boded no good for the reign of George V. Several large parties are expected at Bermuda this month to observe the comet.

Household Notes

A spoonfull of sugar added to the water for basting roast beef will give it a rich brown color as well as a fine flavor.

To remove a fresh millow stain wet in strong suds, cover with a paste of salt and soap, and put in the rain.

Rub over new tinware with lard, and thoroughly heat it in the oven before using it, and thus protect it from rust.

In making cranberry jelly or jam, much less sugar will be required if the sugar is not added until the fruit has been well cooked.

If knives are spotted, rub them with a cut potato, dipped in wood ashes.

To keep fat from splashing when croquettes are dropped into it, sift just a little flour into the fat when it is hot.

For the benefit of women with receipts which call for eggs by weight instead of numbers, ten eggs of medium size weight a pound.

Highest Dam In World.

The Shoshone dam in Wyoming is the highest dam in the world, being 328.4 feet from the base to the parapet. It is located in the profound canon of the Shoshone River, in one of the wildest and most picturesque regions of Northern Wyoming.

The walls of the gorge are nearly perpendicular and rise nearly 2,000 feet above the stream. At its base the dam is 70 feet across; on top it is 175 feet in length, and at the base the dam is 108 feet wide. The capacity of this irrigation basin in gallons is something like 148,588,512,000.
