

SPRING TIME IS CHURN TIME

There is no churn on the market that has so many satisfied users as the DAISY.

The barrel of the DAISY is made of seasoned oak, will not chip or break, keeps sweet and clean, runs on steel ball-bearings, fitted with cream breakers and easily detachable. The frame is steel, securely braced, and has combination and foot drive.

The DAISY CHURN is sold only by
W. F. Dibblee & Son.

WOODSTOCK, N. B.

Notice of Sale.

To Hedley V. Mooers of the Town of Woodstock in the County of Carleton and Province of New Brunswick, Harness Maker and Emma E. Mooers his wife, Wendell P. Jones of the Town of Woodstock aforesaid, and to the Heirs at Law, Executors and Administrators of J. S. R. Murphy late of the Town of Woodstock aforesaid, Deceased, and all others whom it may in any in any-wise concern.

NOTICE is hereby given that under and by virtue of Powers of Sale contained in two certain Indentures of Mortgage one bearing date the twenty-eighth day of May A. D. 1895 made between Hedley V. Mooers and Emma E. Mooers his wife of the one part; and Thomas Todd of the Town of Woodstock aforesaid, of the other part, and the other of said Mortgages bearing date the Twenty-second day of November, A. D. 1898 and made between the said Hedley V. Mooers and Emma E. Mooers his wife of the one part; and registered in the office of the Registrar of Deeds and Wills in and for the County of Carleton, the first of said Mortgages in Book "U" No. 3 on pages 152, 153 and 154, and the second of said mortgages in Book "Z" No. 3 on pages 204, 205, 206 and 207, which said Mortgages were subsequently assigned to the undersigned Frederick S. Todd.

There will for the purpose of satisfying the monies secured by the said Indentures of Mortgage, default having been made in the payment thereof, be sold at Public Auction in front of the Law Office of Louis E. Young on Main Street in the Town of Woodstock on Saturday the Thirtieth day of July next at the hour of eleven o'clock in the forenoon, all the lands and premises described in the said Indentures of Mortgage as follows:—All that certain lot or parcel of land and premises, situate lying and being in the Town of Woodstock in the County and Province aforesaid on the Northern side of Chapel street and fronting thereon. Commencing at the south-westerly corner of Lot Number Twenty (20) formerly conveyed to the Wesleyan Church on Chapel Street; thence running along the Westerly line of Lot number Twenty (20) one hundred feet; thence Westerly forty feet; thence Southerly one hundred feet or to Chapel street; thence Easterly forty feet along Chapel street or to the place of beginning, known as Lot Number Twenty-two (22) surveyed by Deputy H. M. G. Garden in the year of our Lord one thousand eight hundred and sixty (1860) and being the same lot of land and premises conveyed to one John W. Garrity by the late deceased Richard Maxted and Mary H. Maxted his wife and decedent to said Hedley V. Mooers by Hugh Montgomery and wife by Deed recorded in Book "N" No. 3 of Records in pages 601 and 602 the Fourth day of June A. D. 1891. TOGETHER with all and singular the buildings and improvements thereon and the appurtenances thereto belonging. Dated the 28th day of June, A. D. 1910.
FREDERICK S. TODD,
Assignee of Mortgagee.

LOUIS E. YOUNG,
Solicitor for Assignee of Mortgagee.
The above sale is postponed until Saturday the 13th day of August next at eleven o'clock in the forenoon
Dated this 30th day of July 1910.

Report of Meetings for New Brunswick Department of Agriculture

Hon. D. V. Landry, Commissioner for Agriculture.

In presenting to you my report of work done June 13 to July 23, 1910, allow me to acknowledge the completion of preliminary work. I found that the meetings had been well advertised and arrangements for meetings placed in careful hands. I am pleased also to note that quite a number of members of the legislature attended meetings and gave addresses, among whom were Premier Hazen, Dr. Landry, Commissioner for Agriculture, Mr. Dixon of Hillsboro, Mr. Woods of Welsford, and a number of others whose names nor addresses I did not catch. One thing particularly pleasing to me was the fact that the tone was there the remotest hint as to the political alignment of the persons who spoke, all alike expressing their appreciation of the importance of a better agriculture throughout the province.

To me these meetings have been particularly encouraging. They were well attended by an enquiring people and I am hopeful that the foundation is being firmly laid for a general uplift of the agriculture of the province. Perhaps by no means can this be done so effectively as by bringing before the people all the people at all times, the tremendous importance of the soil as the only foundation of Provincial and Canadian greatness. Compared with the soil every other avenue of wealth sinks into insignificance.

From my observation, I think that the best time to hold these meetings is during the summer between seeding and haying. If I may be allowed to suggest, I think it would be a move in the right direction to have a woman delegate along to give separate talks to the women during the afternoon and address the women during the afternoon and addresses joint meetings in the evening.

I have to acknowledge the valuable assistance I received from Mr. John Woods of Welsford, who was with me for six days, also from Rev. J. B. Duggett, with whom I went to Deer, Campello and Grand Manan Islands.

At most of the places visited meetings were held. 37 meetings were held at 29 different points. 99 different addresses were given and there was a total attendance of 2357 people, an average attendance at each place of 133 and at each meeting of 82 persons. Everywhere I met carefully attentive people. Again thanking you for your arrangements which did so much to make my work a pleasure, I remain,
Yours respectfully,
ANDREW ELLIOTT

Ottawa, Aug 12.—The census Bulletin shows that the conditions of field crops in Canada this year have been greatly modified by temperature and rainfall, and that between the East and the West it is hardly possible to make a statement of averages that will not be misleading. In the eastern provinces growth has been uniformly good throughout July, and the percentages of condition have been high for every crop; but in extensive tracts of the northwest provinces drought has prevailed and crops are reported in every stage of condition. The northerly parts of these provinces have been largely exempt from the drought, and there the per cent conditions are high. It is difficult to indicate fairly an average of conditions for the East and West which does not take account of the areas sown, and these have been considerably reduced since the June

report. The August report will give revised figures from which yields may be estimated.

In comparing the per cent condition of crops for 1909 and 1910 it should be remembered that fall wheat, rye, peas, buckwheat, mixed grains, beans, potatoes, hay and clover and corn are principally produced in the eastern provinces; and spring wheat and flax mostly in the northwestern provinces; with oats and barley in nearly equal proportions in the two regions.

Fall wheat is grown chiefly in Ontario, and its condition for all Canada has been reduced by a relatively poor crop in Alberta. Compared with the condition at the same time last year, it is 84.63 to 76.53. Rye is 84.20 in 1910 to 81.84 in 1909; peas is 81.70 to 87, buckwheat 87.64 to 86.15, mixed grains 99.91 to 87.23, beans 84.43 to 84.33, potatoes 81 to 92, hay and clover 90.87 to 73.79, corn for husking 84.39 to 82.86 and corn for fodder 80.76 to 83. These crops, which are mainly grown in the East, show a high average of condition, affected only in a slight degree by reports for the West.

The average condition of spring wheat is 77 for 1910 to 84.57 for 1909, and of oats 79.57 to 87.78 for all Canada, which is substantially lower than the averages for the East. In the three Northwest Provinces the condition of spring wheat is 62, of oats 58.62 and of barley 63.60.

The estimated yield of fall wheat in the country is 18,724,000 bushels, being 26.47 bushels per acre. The hay and clover crop is estimated at 15,496,000 tons, or 1.80 tons per acre, and of alfalfa 1.92 tons per acre.

Mrs. J. Ellen Foster Dead

One of Few Women to Practice Before U. S. Supreme Court.

WASHINGTON Aug 11.—Mrs. J. Ellen Foster, widely known woman lawyer and active in the temperance cause, died here today from the result of an operation.

She was graduated from an Iowa law college and entered in professional partnership with her husband. She was one of the few women ever permitted to practice before the Supreme Court of the United States.

Mrs. Foster was an active member of the W. C. T. U. and was regarded as general counsel for that body. She was also identified with prison work and was recently appointed to investigate conditions at the District jail.

Mrs. Foster also engaged in general work for the uplift of woman-kind and as such was a friend of the sex throughout the country.

The arguments in the Atlantic fisheries dispute before the Hague Arbitration Tribunal are closed, and we may soon look for a decision. The questions involved are varied, and we need not be surprised if they are not all decided in favor of the British claims. One of these is the rights given to the inhabitants of the United States under the treaty of 1818 do not extend to any fisherman on board United States vessels who are not residents of that country. Another is that United States vessels and their crews, when fishing in Newfoundland waters, are subject to the laws of Newfoundland. A third, that these vessels, when entering the harbors of Newfoundland, should report at the custom houses, and pay light and harbor dues. A fourth, as to whether they have the right to fish in the harbors, bays and creeks.

The governments of Australia and New Zealand are planning a system of wireless telegraphy to connect the British islands of the South Pacific.

Rural Phones

Solve These

Every-Day Problems

Problem I. Bad Roads—
The old way was to curse nature and idly await sun's return.
The new way is to telephone for what you want, and smile because you get the information in a thousand parts of the time.

Problem II. Weather Forecasts—
The old way was to work on isolated information, and to excuse the losses with "That's what the farmer has to put up with."
The new way is to telephone every morning to the weather man and overcome much of the needless hustle and bustle of the old way.

Problem III. Prices Current—
The old way was to ask a neighbor or trust to the newspapers.
The new way is to get information in the nick of time over the phone, thus knowing when to sell and when to hold.

Problem IV. Emergencies—
The old way of procedure when some one took sick, was to harness up the "driver" and make all haste for the doctor. Effort in this direction often procured as its only result the information: "doctor is out."
The new way is to call up the doctor on the phone, and know instantly what can be done pending the medical man's arrival.

Problem V. Help—
The old way was to allow men to go on boys' errands—waste half a morning walking to Smith's only to find that his harrow was already loaded.
The new way is to make the phone your errand boy—buy, borrow, beg by means of the "silent partner."

We have prepared a Booklet describing fully a rural phone system. Hadn't you better instruct us to send you this interesting bit of information, seeing it costs you nothing.

MONTREAL TORONTO WINNIPEG VANCOUVER REGINA

The three hundred Lapland reindeer brought to Labrador by Dr Grenfell last year are thriving, and promise to solve the problem of making the interior of the country habitable. These animals furnish meat, milk, butter, cheese, leather, furs for clothing, and a far better beast of burden than the savage arctic dogs that kill game and make it impossible to keep domestic animals. Their food is the forest shrubbery, mosses lichens and seaweeds. Dr Grenfell predicts that Labrador will soon be exporting reindeer venison.

There is little hope of saving the leaning tower of Pisa. The old tower is on the verge of collapse, owing to the weakness of the foundation, and the inclination from the perpendicular has recently increased. The ringing of the bells in the tower has been stopped because the vibrations thus caused threatened to throw down the structure.

Peat promises to be the fuel of the future in this country. At the Dominion experimental station, peat fuel ready for use has been produced at a cost of less than two dollars a ton.

COWAN'S MAPLE BUDS

The most delicious of chocolate confections. They stand alone in their smoothness, richness and unique flavor. Insist on having COWAN'S. Name and design patented and registered.
