MUSKOKA FREE HOSPITAL FOR CONSUMPTIVES.
MAIN BUILDING FOR PATIENTS.

A national institution that accepts
patients from all parts of Canada.
Here is one of hundreds of letters
being received daily:—

John D. McNaughton, New Lis-
keard, Ont. : A young man not be-
longing here, and suffering from,
it is believed, consumption, is
being kept by one of the hotels
here. He has no means and has
been refused admission to our
hospital. The conditions where
he is offer him no chance. Could
he be admitted to your Free Hos-
pital for Consumptives? If not,
could you inform me where he can
be sent, and what steps are nec-
essary to secure prompt admittance?

NOT A SINGLE PATIENT HAS EVER BEEN
REFUSED ADMISSION TO THE MUSKOKA
FREE HOSPITAL BECAUSE OF HIS OR HER
INABILITY TO PAY.

Since the hospital was opened in
April, 1902, one thousand five
hundred and twenty-four patients
have been treated in this one insti-
tution, representing people from
every province in the Dominion.

For the week ending November
20th, 1909, one hundred and twenty-
five patients were in residence.
Ninety-six of these are not paying a
copper for their maintenance—absolutely
free. The other twenty-nine paid
from \$2.00 to \$4.00 a week. No
one pays more than \$4.00.

Suitable cases are admitted
promptly on completion of appli-
cation papers.

A GRATEFUL PATIENT

Norah P. Canham: Enclosed you
will find receipt for my ticket from
Gravenhurst, hoping that you will
be able to oblige me with the fare.
I was at your Sanatorium ten
months, and I was sent away from
there as an apparent cure. I am
now working in the city, and I am
feeling fine. I was most thankful
for the care I got from the doctors
and staff, and I must say that I
spent the time of my life while I
was there.

TAKING THE CURE IN WINTER AT MUSKOKA
FREE HOSPITAL FOR CONSUMPTIVES.

The Muskoka Free Hospital for
Consumptives is dependent on the
good-will and gifts of the Canadian
public. Money is urgently needed
at the present time to make it
possible to care for the large and
increasing number of patients that
are entering the institution.

Will you help ?

Where greater urgency ?

Truly, Canada's greatest charity.

A preliminary vote in the General Assem-
bly of the Presbyterian Church, at Halifax,
on Tuesday, was decidedly favorable, so far
as that organization is concerned, to the
principal of union of the evangelical churches
and is a clear sign of a certain drift of opin-
ion in these days.—St. John Globe.

New York, June 8.—Wholesale meat dealers
of this city are selling 587,692 pounds
of wood a year to the retail butchers, as meat
according to an estimate made by Clement J.
Driscoll, chief of the Bureau of Weights and
Measures. The wood is in the form of skew-
ers which are put into the carcasses.

The value of this amount of meat at
an average of 16 cents a pound would be
close to \$100,000, which comes out of the
pocket of the consumers eventually, Mr
Driscoll says. He had before him to-day a
umber of wholesale and retail dealers in the
line of devising some remedy for this con-
dition.

Pauper Immigration and Canada.

The question of pauper immigration has
two sides. Its British side makes appeal to
Canadian sympathy. No one who has come
into touch with the problem of the out-of-
works in the cities of Britain, its magnitude,
its discouragement, its haunting appeal, can
wonder that organized benevolent ef-
forts are being made to transport the least
unhopeful to the overseas dominions of the
Empire. Really good and humane people
give generously and patiently of their time
and money through social agencies of various
kinds for assisting these misfits and unifs of
the congested cities of England to get at
least a half chance in Canada. With the
spirit and purpose of those efforts Canadians
must have the fullest and truest sympathy.

But the question has its Canadian side.
Admittedly it is the desire of Canada to at-
tract those of the British people who have
the qualities necessary for the Canadian con-
ditions. But it would not be fair, or honest,
or humane, to mislead people in Britain as
to what is necessary to life in Canada. Every
newspaper office in Toronto has its daily in-
stance of the new-comer without money or
friends or prospects of work, discouraged,
depleted, dependent on chance charity for
the next meal. In the abstract it is a prob-
lem, but in the individual instance it is a tra-
gedy.

To avoid that tragedy the Canadian au-
thorities are enforcing the requirement that
each immigrant other than agricultural labor-
ers shall have a ticket to his destination and
at least twenty-five dollars to keep him from
want while he is looking for work. That
regulation was fully considered by Parlia-
ment. Behind it is long experience of var-
ious kinds in many Canadian cities where im-
migrants congregate. It is also sustained by
experience, some of it bitter experience, in
the United States, where the same regula-
tion is now strictly enforced. It was not en-
forced by the authorities in Canada until
after ample warning had been given to emi-
gration agencies in Britain. Even twenty-
five dollars allows no margin to a man who
lands in a strange city where he has to make
his way against hungry competition without
friends or favors or commanding skill.

It is not to the point to say that Canada
needs population. Two hundred and fifty
thousand immigrants a year, even though
thousands of them bring with them not a pit-
tance, but considerable wealth, constitute a
problem of stupendous proportions for a
small young nation like Canada. Not only
for her own sake, but for the Empire's Can-
ada must have at least some care lest, despite
the warnings of the United States, she build
into her national foundations too large a per-
centage of unfit material that will not stand
the strain of democratic self-government.
An open door to the pauper classes of old-
world cities, and the vexed problems of life
in the cities of the United States would be
duplicated in Canadian cities within a gen-
eration. That risk is too great. Whether the
present regulations are perfect or their appli-
cation in all cases just may be open to discus-
sion, but certain it is that restrictions there
must be if Canada is to be saved from becom-
ing the dumping ground for the unfit and
unfortunate of the old-world civilizations.—

**Beware of Ointments for Catarrh
that Contain Mercury.**

as mercury will surely destroy the sense of
smell and completely derange the whole sys-
tem when entering it through the mucous
surfaces. Such articles should never be used
except on prescriptions from reputable phy-
sicians, as the damage they will do is ten fold
to the good you can possibly derive from
them. Hall's Catarrh Cure, manufactured
by F. J. Cheney & Co., Toledo, O., contains
no mercury, and is taken internally, acting
directly upon the blood and mucous surfaces
of the system. In buying Hall's Catarrh
Cure be sure you get the genuine. It is
taken internally and made in Toledo, Ohio,

The Stomach Telescope.

The "stomach telescope," or gastroscope,
invented at the London Hospital last year,
has proved to be of the greatest value in the
diagnosis of stomach disorders. An eminent
surgeon recently referred in the highest
terms to the advances lately made at that
hospital in the early detection of disease of
the stomach by means of this instrument,
which will in the immediate future probably
come to be part of the equipment of every
up-to-date hospital. The gastroscope now
enables the physician or surgeon to actually
see for himself the exact condition of the
whole of the interior of the stomach, the
slightest ulceration, growth or other abnor-
mality in the lining membrane being thus
readily observed. To be able to do this is of
the very greatest importance in suspected
cancer of the stomach, where the only hope
of cure lies in the eradication of the cancer-
ous growth at the very earliest moment.
This means that the increased use of the gas-
troscope will in the future save many lives
that would otherwise inevitably be lost
through that disease.

A British army airship made a night
trip from Aldershot to London, floated
over the centre of the city for a while,
and then went back to Aldershot. The
distance covered in all was about 70
miles. The device did its work. In this
the British record with submarines has
been repeated in a way. It was not
known generally that the British submar-
ine had been perfected till it was men-
tioned that in connection with certain
naval manoeuvres a fleet of them had
made a voyage of four hundred miles.—
