Mr. Turner brought out very beautifully the opportunities a farmer has for developing himself, physically, mentally and morally in his every day life, studying nature and looking over his stock. A Pointer for Farmers

Mr. Watters of Lakeville says: In 1909 I had a field on which had grown potatoes the previous year. I plowed a stripe around the edge of it and on the remainder of the field I used a Bissell Out-throw Disk Harrow, sowing the whole field in Wheat. When the Wheat headed out the grain on that part of the field where the Bissell Disk was used was nearly ten inches higher than where the plow was used. I sowed three bushels on the whole field and gathered fifty-seven.

We sell this celebrated Bissell Disk Harrow,—so do our agents
