

"Is Good Tea"

Carleton Mining Co.

Will Sell Limited Amount of Stock at 25c per Share.

The Carleton Mining Co intend, in about six weeks, to begin taking out ore to ship. They have now about 10 tons of good shipping ore ready and a car will take 30 tons.

Now one car load will bring \$1500, (fifteen hundred) at the least and which at the out, side will only cost about \$500 to mine, ship and have treated. This will give us anyway about \$1,000 clear profit.

We are going to put a house on the ground and have a steam drill so the men will have no trouble to make good time.

Now this vein has been proved rich in gold, silver, lead and copper by three of the best experts in the world and by assayers who have tested it.

What we purpose doing is to sell \$1000 (one thousand) worth of stock in order to get some money at once to have a house put on ground and to get our drill and have things all ready for work as soon as the snow goes off.

This stock will be sold for 25 cents per share. The \$1000 will start it paying back money and the people who buy will not have to wait 4 or 5 years for returns with big interest.

Now if you have a few dollars not in use, do not wait until the car starts for you may not get this chance again at \$1.00 per share. We have had several offers made to us for our proposition but if we can get enough to ship our first car it will pay us big money to work it ourselves and we will not have to let outside parties make themselves rich on what is for us.

The following directors of the Company will be pleased to receive payment for stock: Hon. W. P. Jones, Dr. P. T. Kierstead, E. L. Greer, N. S. Dow, H. G. Noble, J. J. Rogers or Arthur Gibson. We have authorized John McDougall to sell \$1000 worth at 25c. per share. The ore is on exhibition in his window.

A Child's Health Depends on Tooth-brush.

The importance of sound teeth in children cannot be over emphasized, says The Delineator for March. "From the point of view of health the words of Cervantes are true—that a tooth is more valuable than a diamond.

At the time when children enter school they are likely to be losing their baby teeth, and hence indigestion is very apt to be caused by the decaying teeth that poison the food. These teeth should be carefully attended to, filled when necessary, and pulled out at the proper time. Although it is hard for children at this period to change their food, nature has taken the precaution to provide them in the sixth year with the best teeth for chewing purposes that they ever get, the so-called sixth-year molars. Unfortunately many people mistake these teeth for baby teeth and let them decay, but the best care should be taken of them.

So important are good teeth for digestion that every child should be trained to take care of his teeth and should be shown the luxury of a clean mouth. Here is a case where every child needs a sort of military training.

When U.S. soldiers, on account of the heat in Cuba, had thrown away their baggage and even their clothes, a British officer who was with them marveled as he saw a regiment march by, each soldier with a tooth-brush twisted into the band of his hat. Thus children should be taught that a tooth-brush is an essential article of the toilet—the last thing that they should use at night and the last thing that they should throw away.

When is She An Old Maid?

When does an unmarried woman change from a young to an old maid? That was the question, and it is one of perennial interest, discussed in a Chicago woman's club the other day. No agreement was reached, but when one speaker declared that at twenty-eight a woman is not yet an old maid, and is "probably better-looking than at any other age," she was heartily applauded by the other women present. It is interesting, says Youth's Companion, thus to discover that the members of the club are all about twenty-eight years old.

FROM A SHADOW TO ROBUST HEALTH

Is the Change! Dr. Williams' Pink Pill Made in a New Brunswick Woman.

Anaemia—bloodlessness—is a trouble confined largely to women and growing girls. Its victims are pale; they lose strength—the least exertion greatly fatigues them and they suffer continually from headaches and depressed spirits. Nothing will cure anaemia so quickly or so surely as Dr. Williams' Pink Pills—they have cured thousands of cases, not only in Canada but throughout the whole world. They do this because they make good blood. Among those cured by these Pills is Mrs. T. Chalmer Hartley, East Florenceville, N. B., who says: "At the age of sixteen I fell away to a mere shadow. I had scarcely any blood and suffered from all the distressing symptoms of anaemia. Doctors did not help me in the least, and acting on the advice of a friend I began taking Dr. Williams' Pink Pills. They effected a remarkable change in my condition; indeed I really believe they saved my life, as I have been well and strong ever since I took them. Also recommended the Pills to a neighbor's daughter who was similarly run down, and they also completely restored her health."

Every woman and growing girl should take Dr. Williams' Pink Pills occasionally. If you are ailing from any of the many troubles which afflicted your sex they will cure you; if you are ailing they will protect your health and keep you well and strong. Dr. Williams' Pink Pills are sold by all dealers in medicine or direct at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

To the Would-be Popular Girl.

The all-round fine girl wants to be liked by persons of all ages and of many types. Most of us are far too limited in our friendship, says The Delineator for March. Some of you are popular with girls, but not with men; or with men and not with girls; with your own class, but not with people of another class; with people of another class, but not with your own.

Begin, to-day, then, doing things to widen your social experience. Do some little things for four or five persons of different types; a kindness to a little child; a walk with a girl of your age; a greeting or a letter, or a book shared with one of your own men friends; a bit of sympathy to the charwoman; a conversation with some one far above you both socially and mentally, or if such a person is not accessible in the narrow rounds of your daily life, at least he can always be found on your book-shelves.

Where the Liberal Strength Lay.

Some figures published by Public Opinion show very clearly the sections of the United Kingdom in which the vote ran most strongly with the Government in the late election in Great Britain. With about 5,129,000 votes polled in England the popular majority for Liberals and Laborites was only 51,000. In Scotland, where the total vote was a little over 685,000, the Liberals had a majority of 126,000 and in Wales with a vote of a little over 300,000 the Liberals' majority was 109,000. It was the smaller sections of Great Britain which saved the Government.
