

SPRING TIME IS CHURN TIME

There is no churn on the market that has so many satisfied users as the DAISY.

The barrel of the DAISY is made of seasoned oak, will not chip or break, keeps sweet and clean, runs on steel ball-bearings, fitted with cream breakers and easily detachable. The frame is steel, securely braced, and has combination and foot drive.

The DAISY CHURN is sold only by
W. F. Dibblee & Son.
Wholesale and Retail.

NOTICE!

Wilson's new Photo Studio corner Main and Water Streets, opposite E. W. Mair's, is open for business. To reintroduce myself to the public and my old patrons, I am giving absolutely free during the next thirty days a fine genuine Oil Painting 11 1/2 x 18 1/2 in with every dozen Cabinet photographs. Don't forget that this painting will cost you more at any art store than the price you pay for the photos. Call and see me at my new studio. All work guaranteed second to none in the Province. Come early, remember the above offer is limited.

W. H. WILSON

Notice of Sale.

To Hedley V Mooers of the Town of Woodstock in the County of Carleton and Province of New Brunswick, Harness Maker and Emma E. Mooers his wife, Wendell P Jones of the Town of Woodstock aforesaid, and to the Heirs at Law, Executors and Administrators of Josiah R. Murphy late of the Town of Woodstock aforesaid, Deceased, and all others whom it may in anywise concern.

NOTICE is hereby given that under and by virtue of Powers of Sale contained in two certain Indentures of Mortgage one bearing date the twenty-eighth day of May A. D. 1895 made between Hedley V. Mooers and Emma E. Mooers his wife of the one part; and Thomas Todd of the Town of Woodstock aforesaid, of the other part, and the other said Mortgage bearing date the Twenty-second day of November, A. D. 1898 and made between the said Hedley V. Mooers and Emma E. Mooers his wife of the one part; and the said Thomas Todd of the other part, and registered in the office of the Registrar of Deeds and Wills in and for the County of Carleton, the first said Mortgage in Book "U" No. 3 on pages 152, 153 and 154, and the second said mortgage in Book "Z" No. 3 on pages 204, 205, 206 and 207, which said Mortgages were subsequently assigned to the undersigned Frederick S. Todd.

There will for the purpose of satisfying the monies secured by the said Indentures of Mortgage, default having been made in the payment thereof, be sold at Public Auction in front of the Law Office of Louis E. Young on Main Street in the Town of Woodstock on Saturday the Thirtieth day of July next at the hour of eleven o'clock in the forenoon, all the lands and premises described in the said Indentures of Mortgage as follows:—All that certain lot or parcel of land and premises, situate lying and being in the Town of Woodstock in the County and Province aforesaid on the Northern side of Chapel street and fronting thereon. Commencing at the south-westerly corner of Lot Number Twenty (20) formerly conveyed to the Wesleyan Church on Chapel Street; thence running along the Westerly line of Lot number Twenty (20) one hundred feet; thence Westerly forty feet; thence Southerly one hundred feet or to Chapel street; thence Easterly forty feet along Chapel street or to the place of beginning, known as Lot Number Twenty-two (22) surveyed by Deputy H. M. G. Garden in the year of our Lord one thousand eight hundred and sixty (1860) and being the same lot of land and premises conveyed to one John W. Garrity by the late deceased Richard Maxted and Mary H. Maxted his wife and deeded to said Hedley V. Mooers by Hugh Montgomery and wife by Deed recorded in Book "N" No. 3 of Records in pages 601 and 602 the Fourth day of June A. D. 1891. TOGETHER with all and singular the buildings and improvements thereon and the appurtenances thereto belonging. Dated the 28th day of June, A. D. 1910.

FREDERICK S. TODD,
Assignee of Mortgagee.
LOUIS E. YOUNG,
Solicitor for Assignee of Mortgagee.

When flatirons are not in use keep each one in a tight-fitting woolen bag or old stocking op. This prevents them from becoming rusty or rough. Rub occasionally on a piece of cedar when ironing to keep the starch from sticking. The odor is agreeable and it will not discolor the most delicate fabric.

Chicago Suffragettes Show Activity

Chicago, July 15—Chicago suffragettes yesterday began to follow the methods of their London sisters and inaugurated a vigorous campaign on the streets in favor of votes for woman. The first campaigners were a woman justice of peace, a woman doctor four Vassar girls and two men equipped with an automobile, a permit from the chief of police, yellow handbills and a contempt for rain. They "preached" the gospel of equal suffrage for the first time on the streets of the downtown Chicago. The women pleaded for equal rights with men with a fervor that they kept some men standing in the rain for the better part of an hour and drew occasional applause. St. John Globe.

Bake stuffed peppers or tomatoes in gem pans, as they will come out in better shape than if baked in one large pan.

TURN TO THE PHONE

When you are in doubt as to selling possibilities.

(Ring the market station. INSTANTLY you are brought in direct contact with the people who can most aid you.)

When you think it is going to rain and the reaper has been very busy all day.

(Ring the weather man.—INSTANTLY you know whether you must take to the fields with all hands, or sit down and smoke the pipe of peace.)

When your Barn is on fire.

(Ring your nearest neighbors.—INSTANTLY you know that as fast as animals can travel, fellow tillers of the soil will come to your aid.)

Every day you will find your phone "a friend indeed" and it will prove to be a "payer" too.

Booklet 3117 is free for the asking. Tell us we ought to send it to you.

Manufacturers and Suppliers of all apparatus and equipment used in the construction, operation and maintenance of Telephone and Power Plants. Address Office nearest you.

Life in A Coal-Breaker

Practically every boy graduates from school to the coal-breaker before he is fourteen—some boys as early as ten or eleven years. The coal breaker is a gaunt, tower-like wooden structure, at the top of which the coal is broken into the required sizes for use, and then in a continuous stream down chutes which empty into waiting coal-cars or pockets. The boys are employed to pick out of the moving stream the pieces of slate as they appear—straddling the chutes, or sitting on small wooden projections at the side. The atmosphere in the breaker is so thick and dark with flying coal-dust that an attempt to take a photograph of a couple of boys at noon, near a window, resulted in one indistinguishable black surface: the noise is so great that I could not distinguish the words of my guide even when he put his mouth close to my ear and shouted; the movement and shaking of the whole structure is at times so violent that in some breakers I have been obliged to hold tightly to a hand-rail for safety. The boys grow so cramped from long sitting in one position that sometimes they seize the opportunity to chase each other around the slippery metal platforms. And there was not superintendent in the four or five coleries that we have happened to visit who did not, upon our questioning, relate at least one tragedy that had occurred in his experience, of a boy who had slipped into a coal-pocket and smothered, or had been mangled and killed by falling into the machinery. When we have asked whether the slate-picking could not be done by mechanical devices, the invariable answer has been, "Yes, but the boys are cheaper."—Florence Lucas Sanville, in Harper's Magazine for June.

King George's Stamps

(Indianapolis News)
The little story is going round that when George V. named his private secretary, to take the place occupied by Lord Knollys under Edward VII, the King asked him familiarly, "What should be the opening of my reign?"

"Your majesty," was the response, "all reigns begin in the same way?"

"And how is that?"

"With the creation of a new postage stamp. Whereupon the King smiled sweetly. The secretary had struck a responsive chord, for George V. is, in fact, the first philatelist of the century. His unrivalled collection is valued at many thousands of pounds. It contains practically every stamp since 1840 the date of Rowland Hill's innovation, not only of England and the British colonies, but of every country that ever issued a postage stamp. The new British stamp will, it is said soon appear, and, of course, it will bear the effigy of George V. in profile, but turned in the opposite direction to that of Edward VII.

The postoffice has its established customs. One of these is that two Kings, one following another, must not face in the same direction.

Sand or flour thrown over burning oil will extinguish the flames quickly.

The Eyes and Light

It is an undoubted fact that people in general pay much more attention to the care of the eyes than was formerly the case, and it is well that this is so.

A great deal more is demanded of the human eye to day than in former times, even if one goes back only a very little way. It is not only the increasing strain of education, for in many ways the strain here is lessened, owing to better methods, bigger windows, clearer print, and growth of the limitations of the eye; but it is impossible to move without being impressed with the continuous and everlasting invitations to the eye to overwork itself unnecessarily. Every boat and train and trolley is lined with printed matter, and the eyes have to be jerked away like an unwilling child from a window of toys. If one flees to the real country, one finds every barn and fence plastered with admonition and advice. So that in a sense all have become involuntary and obligatory readers, even the least literary. The only way out of it all is to travel with shut eyes.

The worst danger, however, is not in the daytime. It is in all great cities at least, after dark that the greatest risk is incurred. When the healing, peaceful night descends, then comes the assault of light, and many are beginning to realize that it is from dusk to bedtime that the eyes are put to their greatest strain.

It has always been recognized that excessive light can cause injury to the eye. Snow-blindness is a conspicuous instance of this, as is also what is called eclipse blindness, meaning symptoms which follow an attempt to watch an eclipse of the sun. The same symptoms can be produced by watching any very bright light without protecting the eyes. The glare from the sand and waves brings about the same discomfort in susceptible eyes as that from snow, although mountain climbers are said to suffer more severely because the light on high mountains is richer in the ultraviolet rays that the light in the valleys.

These violet rays, which cause the trouble may be offset by the wearing of amber tinted glasses, which split up these rays before they reach the retina.

Now that by lighting electricity is becoming so general a fashion, it is advisable that people should learn how to protect their eyes from its glare; its light should always be arranged not to shine directly on the eyes the bulb should always be made of ground glass, and several lamps of moderate power are better than one extremely powerful one.—The Youth's Companion.

Summer School of Science Opens.

LIVERPOOL, N. S., July 13—Over two hundred members of the Summer School of Science arrived today. There was a concert tonight by the Liverpool band and a grand public reception in the town hall which was tastefully decorated. Mayor Mulhall made an address of welcome.

Dr. A. H. Mackay, Supt. of Education, followed. He referred to similar schools now being held in Truro and Antigonish under the patronage of St. Francis Xavier College. Here there was nearly a quarter of a thousand. No other State in the United States or Provinces of Canada were making, he believed, such a showing.

President S. A. Starratt, of Boston, spoke briefly about the advantages of the school. He stated that these teachers worked harder than the college members, and were spending a large part of their reserve fund to attend these schools. Twenty two scholarships were to be offered some of them in cash and some splendid volumes of literature.

Prof. W. W. Anderson, Mount Allison, Sackville, N. B., was especially interested in the improvements of the town since his last visit. He said they hoped to show to the schools what secrets God had hidden in the flowers and rocks. A scientific man was now criticizing his own work more carefully until at last there burst upon him whole volumes of meanings. We live today in a more transfigured world than those of any other race. Myriads of vast worlds were now beheld marking time to the Creator's command and God has spoken a greater word to us than to David who exclaimed: "The heavens declare the glory of God and the firmament showeth his handiwork."

Rev. F. S. Porter welcomed the visitors to the refreshing sea breeze of Liverpool, and Mr. W. P. Purney spoke eloquently on behalf of the school board.

Mr. J. D. Seamao, of Charlottetown, made the announcements for the week, and said the enrollment was to be a record one.—St. John Globe.

Summer Care of Bulbs.

Narcissus bulbs should be left undisturbed in the ground as long as they continue to produce good flowers. Most of the best varieties will produce good flowers for four or five years. If it is desired to increase the clumps or to make new ones, they may be dug after a few years and the bulbs

separated and given more room, when they will multiply again with renewed vigor. Hyacinth bulbs may be left in the ground from year to year, where they will often increase. If tulips are in suitable soil they may be left undisturbed for three or four years, or until they get too crowded to produce good flowers or have died out so much that they need to be replaced. As a rule, the best flowers are obtained by plant new bulbs each year. This is almost a necessary for showbeds. As soon as the petals are formed the seed pods should be removed, in order to conserve the energy of the plant, which would be used in developing seeds instead of the bulbs, but the stem and leaves should not be cut until they have dried up as they are necessary to the proper maturing of the bulb. As soon as the stem and leaves died, the bulbs may be dug up, cleaned, and kept dry until August, or if the bed is needed for annuals, they may be dug up shortly they have done flowering, and healed in a partly shaded place so that they will dry up gradually, in order to get them as mature as possible.—Canadian Horticulturist

Upper Kintore

The Annual Communion Service was held in the Upper Kintore Church Sunday July 12th. Although the day was extremely warm, both morning and afternoon services were well attended good delegations coming from the other three Colony Kirks. Four new members were received.

Mrs Canfield and four children from Boston arrived on Monday to spend the summer with her mother Mrs J. Patterson.

Mrs George Gendall is building a large cellar wall as foundation for a new barn. Mr G Barclay is doing the work.

Road work and School Meeting have proceeded for another year, much to the relief of all concerned.

The warm weather is bringing vegetation along rapidly, strawberries are very scarce owing to the heavy June frost.

Mrs John Farquhara and little daughter Kathleen have returned from a ten days visit with her parents in Bairdsville.

Remove grass stains from white garments by soaking in kerosene, then washing with soap and warm water. If the stains are not bad a little lard, rubbed on the spots then washed in soap suds, will take them out.
