The man who puts up your medicine is
the man who guards your health.

The result of medical treatment depends largely upon the quality of the medicaments, and the manner in which they are prepared. It is the man who puts up your medicine that guards your health. On his knowledge of drugs, his care in the selection of them, and his skill in compounding, your health depends.

Bring every prescription direct to us and be safe in that it will be compounded with the right ingredients and as the doctor wishes. The results that follow its use are those to be expected by the doctor.
