HOW TO MAKE DEVONSHIRE CLOTTED CREAM

Devonshire clotted cream is prepared as follows: New milk warm from the cow is strained into open pans. These pans hold about five to six quarts and their dimensions usually are: Width across the top, 15 inches, height, 7 inches; width across bottom, 11 inches.

The heating is commonly performed by putting the pans on the kitchen range or hob or by means of a hot water stove as used in special steamers, or the Devonshire cream stove. Scald the pans of milk with cream on the surface until the cream shows 175 degrees F., or until a wrinkled appearance is seen all over the surface of the cream.

A VERY USEFUL TREE

There is no tree known on earth which serves so many purposes as the bamboo. The native of India obtains from it part of his food, many of his household utensils and a wood at once lighter and more capable of bearing greater strains than heavier timber of the same size.

Upon the west coast of South America and in the large islands of Asia bamboo furnishes all the materials for the construction of houses, pleasant, substantial and preferable to those of stone, which the frequently recurring earthquakes bring down upon the heads of the tenants.

The fact that the bamboo is hollow has made it eminently useful for a variety of purposes. Small boats even are made of the largest trunks by strengthening them with strips of other wood where needed. In one day the bamboo attains the height of several inches and with a microscope its development can be easily watched.

LOG DRIVING TROUBLE AMICABLY ADJUSTED.

Fredericton, July 21—This morning a conference was held between Mr. W. W. Aiken, one of the contractors for the corporation drive, and Mr. Lewis H. Biss, manager of the St. John River Log Driving Company. Mr. Percy A. Guthrie of Crockett and Guthrie was also present for the Messrs. Aiken. Further conferences will be held and it is likely that the outcome will be that the company will handle the present drive from Woodstock to the boom limits.

LAST DAY OF THE RECIPROCITY DEBATE.

Washington, July 21—Speeches by Senator La Follette of Wisconsin explaining his proposition for revising the woolen and cotton schedules of the tariff law and William Alden Smith of Michigan and other senators on various phases of the Canadian reciprocity bill were scheduled to occupy today's session of the Senate in anticipation of tomorrow's reciprocity vote.

TWO DREADNOUGHTS FOR CHILIAN NAVY

Santiago, Chile, July 21—The government has accepted British offers for the construction of two battleships of the Dreadnought type.

John Brown & Company Ltd, an English firm, has been awarded the contract for two ships which will be equipped with the guns of Vickers Sons & Maxim.

ROYALIST FORCES ARE WELL ARMED

LISBON, via Badajoz, Spanish Frontier, July 21.—An invasion by Captain Couclere at the head of the Royalist forces, appears imminent. All attention is now fixed on the north. The Portuguese monarchists possess thousands of rifles of the latest pattern smuggled into Galicia, Spain from Normandy and Belgium, and also many field guns and Maxim's.

The monarchists remain on the Spanish frontier, conspiring openly against the Republic, notwithstanding the continued assurances of the Spanish government. The Socialists daily hold military drills and practice rifle shooting on the large private estates and among the hills.

During the monarchists' regime all Portuguese regiments were kept far below their normal strength to save expense. The provisional government, however, called all reservists to the colors. These numbered about 22,000, and were more than were needed under arms. It was thought, and furthermore they entailed great expense. Accordingly, all but 8,000 were dismissed but ordered to be in readiness to respond for service on twenty-four hours notice.

BLOCKADE ORDERED FOR HAYTIAN PORTS

Port-au-Prince, July 21—The government has proclaimed a blockade of the ports of St. Marc, Gonavies and Port Liberté. Having only one warship at its disposal how ever an effective blockade is impossible. The order for the bombardment of St. Marc and Gonavies has not been carried out, and the cruiser Anjou Simon is now anchored before Archaie, a port eighteen miles northwest of the capital General Seftimus Marius, the Minister of War, who failed to disembark on his arrival here with the president, has been dismissed from office. Word reaches here that the pillaging at Cape Haytian has been stopped by energetic measures taken by the revolutionary committee presided over by General Albert S. Lave, The American German and Italian legations have made urgent requests for the despatch of warships to Haiti for the protection of their respective interests. Practically a new cabinet has been named as follows: Minister of the Interior, General Sylvain; War, Mort Palisade, formerly Governor of Port-au-Prince; Foreign Relations, Jeremie; Finances, Torulus Nicoll; Public Works, Magnan; Public Instruction, Chateau. General Furey has been put in charge of the organization for defence.

Are You Using An Oily Liniment?

Beware of Any Thick, Greasy Liniment That Contains Acids and Strong Ammonia.

No doctor would think of prescribing a greasy, thick, ammonia liniment—they can't penetrate, and in consequence are unable to reach the source of pain. The best liniment for general household use is "Nerviline," which is sold under positive guarantee to cure pain.

Nerviline is sure to cure pain because it is immensely stronger than other liniments, because it is more penetrating, because it relieves the congested condition that excites pain, because it restores circulation of the part. Now you understand why one person in three throughout the Dominion of Canada uses Nerviline. These people have tested it. They know how good it is, because in the hurried and one minor ailments that afflict us at odd times they found Nerviline always cured. Nerviline is an absolute antidote to pain, powerful, soothing, and certain in its action.

Nerviline is estimably the finest remedy for pain found in the world. Not an ache or pain anywhere that Nerviline does not cure. Try Nerviline for neuralgia, headache, sciatica, lumbago, stiffness, rheumatism—wherever there is soreness, or pain, rub on Nerviline, and you'll be cured. Refuse anything offered you instead of Nerviline. Large 25c bottles, five for \$1. All dealers, or The Cataract Company, Kingston, Ont.

Seal Brand Coffee advertisement featuring an image of a coffee can and a cup of coffee. Text: "When buying your coffee don't merely say 'A pound of best Coffee'—Specify Seal Brand Coffee. It costs no more than inferior grades and our reputation is behind it. Packed in 1 and 2 pound cans only. CHASE AND SANBORN, - MONTREAL."

Farm Topics

CATCH FORAGE CROPS.

The shortage of hay and grass has during the recent dry weather forced keepers of live stock to do some serious thinking. Fortunately there is an opportunity even yet to supplement the food supply for farm animals by sowing early maturing crops for forage purposes. Common millet, sown at the rate of two or three pecks per acre, grows readily under adverse conditions and makes good hay for cattle. Sorghum sown at the rate of one and a half to two bushels per acre makes coarse hay that is suitable for any kind of live stock. Barley and field peas, a bushel of each per acre, will make an excellent combination. Large quantities of rape may be sown and will provide an excellent pasturage for hogs or sheep. I should be seeded at the rate of about three pounds per acre. Even rye if sown immediately will yield considerable fall pasture. These crops put in now will help materially in providing food for live stock, and will save the necessity of drawing on the winter supply.—Weekly Globe and Canadian Farmer.

A SOUND PROOF ROOM.

The Physiological Institute of the University of Utrecht possesses one of the most remarkable rooms in the world, a chamber about seven and a half feet square, which is said to be absolutely noiseless, as far as the entrance of sounds from outside is concerned.

This room is situated on the top story of a laboratory building, and is an inside room, but so arranged that it can be ventilated and inundated with sunshine. The walls, floors and ceiling each consist of half a dozen layers of different substances, with air spaces and interstices filled with sound deadening materials.

Some persons when in the room experience a peculiar sensation in the ears. While every effort has been made to exclude sounds that are not wanted, of course the object of constructing this singular room was to experiment with phenomena connected with sound. Some of the sounds employed are made in the room itself; others are introduced from outside by means of a copper tube, which is plugged with lead when not in use.—Scientific American.

AEROPLANES MAY YET HELP PROTECT FORESTS FROM FIRE.

Spokane, Wash., July 20—Major Frank A. Fenn, supervisor of the Selway national forest, embraces 1,600,000 acres formerly part of the Nez Perce reserve in northern Idaho, predicts that the time is not far distant when aeroplanes and wireless telegraphy will be important factors in protecting timbered lands in the Pacific slope country.

A man in a flying machine could do more accurate and extensive survey work in the mountains in a few hours, he believes, than is usually accomplished by twenty rangers in a week when fires are raging in the rough country, and with wireless station installed on the high peaks, he adds, it would be a comparatively easy task to assemble men and apparatus at convenient points to extinguish the flames or prevent spreading.

Several hundred miles of telephone lines have been constructed this season to protect the forests and one big timber holding concern is making experiments with motorcycles in northern Idaho. So far this season there have been no serious fires in any of the Northwestern forest.

Canada, generally, quite successful at Bisley, is doing better there this year than usual. This is good. It proves that the Canadian representative is equal to what is before him, either in the field of show or in the substantial and dangerous work of the rifle pit.—St. John Globe.

QUEER THINGS

The peacock has a score of eyes, With which he cannot see; The codfish has a silent sound However that may be.

No dandelion can tell the time Although they turn to clocks; Cat's cradle does not hold the cat, Nor foxglove fit the fox.

—Christina Rossetti

Be slow in choosing a friend, slower in changing.

—Benjamin Franklin

A DAILY THOUGHT

"Plant blessings and blessings will bloom Plant hate and hate will grow You can sow today—tomorrow shall bring The blossom that proves what sort of thing, Is the seed, the seed that you sow."

ODOR ON KNIVES

Never put the ivory or wood handles of knives into hot water, or they will split. If a knife has been used for cutting onions or any other strong scented vegetable, dig the blade of it once or twice into garden mold to remove the smell before it is washed.

COMMONS IN SESSION ALL NIGHT LONG

(Canadian Press)

London July 20—The House of Commons sat until 5 o'clock this morning debating the insurance bill. Chancellor Lloyd George is in strong conflict with the labor party, who are seeking to amend the bill in the direction of making the state undertake great financial responsibility, so that the workmen may pay smaller contributions.

The chancellor is resisting on the ground that he has already conceded overmuch in this direction. The situation between the government and the laborites is strained.

The house of Dr Samuel Johnson, in Gough Square, Fleet street, London, which was lately acquired by Cecil Hamsworth, is to be presented by him to the nation for preservation as a museum. It is a solid eighteenth century building, where in an upper room Johnson worked for ten years, largely on his dictionary. American tourists in London go to see it as a matter of course, and there will be much satisfaction in the United States at the preservation of this "stout, old fashioned, oakblasted house," as Carlyle described it.

An order has just been issued by Bavaria's regent, Prince Luitpold, that in the future no official document or letter is to be written with a typewriting machine. He positively refuses to read anything presented in this form of writing. For some time he had been objecting to it, but as this did not prevent the use of the handy machine it has now been publicly forbidden for all official purposes.

GOLD AND FURS FROM ALASKA

Seattle, Wash., July 20—The steamship Senator has arrived from Nome and St. Michael with \$80,000 in gold and \$250,000 worth of furs and whalebone.
