St. Vitus Dance

Cured Through the Use of Dr Williams' Pink Pills

Chorea, or as it is more generally known, St. Vitus dance, is a disease that usually attacks the young children, though older persons may be afflicted with it. Its most common symptoms are a twitching of the muscles of the face and limbs. As the disease pro-

gresses this twitching takes the form of spasms in which the jerking motion may be confined to the head, or all the limbs may be affected. The patient is frequently unable to hold anything in the hands or to walk steadily, and in severe cases even the speech is affected. The disease is due to debility of the nerves and is always cured by Dr. Williams' Pink Pills, which enrich the blood, tone and strengthen the nerves and thus restore the sufferer to good health. The following is a striking instance of what Dr. Williams' Pink Pills will do in this trouble. Mrs. Chas. Phipps, Pelee Island, Ont., says:—"At the age of fourteen my eldest daughter, Edith, became much run down, and the trouble developed into St. Vitus dance. First her left arm became affected, then the left leg and entire left side. She grew so bad that she actually could not hold anything in her hand, and could only go about with a sliding, jerking motion. Notwithstanding that we were giving her medicine, she seemed to be growing worse, and finally her speech became much affected. We became so much alarmed about her that finally her father got a supply of Dr. Williams' Pink Pills, and we began giving her these. In the course of a few weeks she was much better, and before all the pills were gone she was again enjoying perfect health. This was in 1908, and as she has not had a symptom of the trouble since I feel justified in saying the cure is permanent."

Be sure you get the genuine pills which are sold by all medicine dealers or may be had at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.
