

# PURITY FLOUR

If that name is on the sack you can buy with confidence

## Current Events

Stormy scenes were witnessed in the British House of Commons in connection with the Veto Bill. Mr. Asquith, the Premier, tired vainly for three quarters of an hour to secure a hearing, but the Opposition party howled him down time and again by cries of 'traitor, traitor, traitor,' while Lord Hugh Cecil, the Unionist Free Trader, incessantly demanded 'divide,' and created so fierce an indignation on the Radical side of the House, that an appeal was made to the speaker to metaphorically turn him out. Mr. Asquith was obliged to issue to the newspapers a summary of the speech he was prevented from making. The Unionists are facing a party crisis and the Premier demands guarantees of the bills adoption in the House of Commons, otherwise he will use the royal prerogative and elect new peers.

Private W. J. Clifford, who belongs to the Tenth Royal Grenadiers, Toronto, has been successful in carrying off the much coveted King's Prize at Bisley. He made a remarkable performance, winning at the same meet the Prince of Wales' prize. He was congratulated by Lord Kitchener. The Prince of Wales' prize is \$500, while that given by the King is \$1,250, and never before have two such rich prizes fallen to one man. His marksmanship was very remarkable in each of the three stages, making a total of 319 out of a possible 355. Clifford is the first Canadian-born to reach the King's Prize.

The Reciprocity Bill has been adopted in the United States Senate by a vote of almost two to one. The figures were 57 to 21. The Democrats strongly supported the measure, only three being recorded as opposed while a long series of amendments was promptly rejected. The result was received throughout the United States with great rejoicing, and the signature of the President will be added during this week. The first amendment to come up was that of Senator Mc Cumber, reducing duties on necessities of life, and increasing the free list. This was swept away by 64 to 16, indicative of all the votes on the amendments. Others followed with the same result.

Some 100 American editors have been touring Canada after their convention in Detroit and have been

full of reciprocity in all their speeches.

According to figures received in London the deaths from the plague in India have reached the enormous total of 650,690 for the half year ended on June 30. The disease has taken a strong hold in that country though its ravages are little heard of except through the occasional official statistics.

The dock strike in Cardiff, South Wales, assumed such a serious aspect that 500 Lancashire Fusiliers were sent to occupy the buildings in the dock district. There was rioting by the shipping strikers and the streets were strewn with wreckage and the hospitals filled with the victims of mob violence.

An invasion of Portugal by Captain Couciere, at the head of the Royal forces from the north, appears imminent, according to despatches, and all attention is fixed on the north. The Portuguese Monarchists are gaining strength and possess thousands of rifles of the latest pattern, smuggled into Galicia from Germany and Belgium, and also field guns and maxims. The Monarchists are remaining on the Spanish frontier conspiring openly against the republic.

It has been announced that the Marconi Wireless Telegraph Company will reduce the cost of telegrams to 8 cents a word. A movement is on foot for a similar reduction of cablegrams between England and Canada.

The Government in Hayti is preparing for battle and is making a last stand for its existence—World Wide.

### DAMAGED BY GALE

Machiasport, Aug 1—Weirs, boats and seines were damaged to the amount of several thousand dollars by the northeast gale of Friday night and for the next two or three weeks the sardine business on the eastern Maine coast must suffer in consequence. Such a gale at this season was wholly unlooked for and the fishermen were totally unprepared to withstand its fury. The packers contend that such heavy weather so early in the summer necessarily forced the fish into deep water, thus cutting off the possibility of an August catch. As a rule it takes weeks for the herring to play back on to the coast and they are looking for a scarcity of the raw material for at least a month to come.

### NEW BRUNSWICK ROADS WORST IN 10,000 MILES

(Fredericton Mail)

There are several auto paries in the city to day and the roads throughout the length and breadth of New Brunswick are receiving universal condemnation. One gentleman in particular Dr. Jewett, of Woodstock, spoke with considerable heat on the subject of poor roads in New Brunswick. He started that he had travelled nearly ten thousand miles this summer in his car and had passed through his native province and four States of the Union, Rhode Island, New Hampshire, Massachusetts and Maine and in none of these states had he encountered such roads as at home. Twelve miles this side of Westfield and from there up the roads were execrable and were a menace to safe travel. He said he had travelled all the distance without a puncture and considered the feat remarkable—he now thinks it doubly so, and in a manner miraculous, when he dwells upon his last trip from St John to this city. Dr. Jewett credits his successful run to the excellence of his machine which he had thoroughly overhauled at the Fredericton Garage before starting on his tour. Dr. Jewett thinks he struck the heat wave while he was in Boston experiencing 104, 102, and 100 degrees.

Dr. Jewett is accompanied by his wife and leaves the city for home on Monday next completing a month's tour.

Doctor (to his cook, who is just leaving)—Sarah, I am very sorry, but I can only give you a very indifferent character.

Sarah—Well, sir, never 'mind. Just write it like you do your prescriptions.—Stray Stories.

### IMPROVEMENT

Mr B—I suppose you find your daughter very much improved by her two years stay at college?

Mrs Proudmother—La yes! Mary Elizabeth is a carnivorous reader now and she frequently impoverishes music. But she isn't a bit stuck up—she's unanimous to everybody, and she never keeps a caller waiting for her to dress—she just runs in nom de plume, and you know that makes one feel so comfortable.—Lippincotts.

## LUNG TROUBLE

Promptly Relieved and Permanently Cured by Inhaling Catarrhazone.

Mrs. Biny Brown, of Tenesape, N.S., Was Cured by Catarrhazone of Lung Trouble and Catarrh, After Hundreds of Other Remedies, Failed.

If your lungs are weak; if there is consumption in your family; if Colds, Catarrh, and Bronchitis bother you, be sure to use Catarrhazone. It is especially adapted for these diseases and cures every time.

Mrs. Brown took cough mixtures, but they made her sick. Then she used an atomizer, but, after resorting without benefit to poultices and numerous other remedies, she tried Catarrhazone.

"I used Catarrhazone Inhaler," writes Mrs. Brown, "five minutes every hour, and soon recognized that it was going to cure me. I could feel the soothing medicated air spreading through the air passages of the throat, and it touched the sore spots in the lungs that other remedies failed to reach. Catarrhazone seemed to go just where it was needed most, and soon put a stop to my cough. It restored me to perfect health, and I am convinced that no cough, cold, or catarrh can exist if Catarrhazone is used."

No treatment is so clean, so pleasant, so certain to cure as Catarrhazone. By means of the Inhaler, the local symptoms, such as coughing, inflammation, and congestion, are speedily corrected. Ferrozone tablets, which are taken after each meal, purify and cleanse the blood of all poisons, and build up and strengthen the system.

This local and constitutional treatment is always effective, and cures cases that have been given up as hopeless. Money can't buy or produce anything better, and to get cured it is absolutely necessary to use Catarrhazone.

### Sewer Caved In Fifty Men Buried

TWO TAKEN OUT DEAD—LIST MAY GROW LARGER

East Liverpool Ohio Aug 4—In a sewer cave in at the plant of the Pittsburgh Crucible Steel Company at Midland Pa seven miles from here, early to day, fifty men were buried. Two were taken out dead, and others were probably fatally hurt. Rescues are still at work, and the death list may grow larger.

### SAYING THE RIGHT THING.

I don't seem to be able to say the right thing to women, a bashful young man confidence to us the other day, and that's why I don't shine in society. I'll tell you an instance of it. Not long ago I met a woman I hadn't seen for years, and I could see that she was trying to keep young. So I thought I'd say a graceful thing to her.

You carry your age remarkably well, said I.

Well the moment I said it I could see that I was in the wrong. She was looking chilly and getting red, so I said;

Don't mind my little jokes—I never mean what I say. As a matter of fact, you don't carry your age a bit well.

And then she killed me with a haughty look, and sailed away without saying goodbye. Say, how should I have put it?—Cleveland Plain Dealer.

Seven demonstration farms have been established by the government in Alberta and are the first to be undertaken in the Dominion.

### Tallest Skyscraper In The World

NEW YORK TO HAVE IT—COST \$13,000,000.

New York, Aug 2—Robert McMaster Gillespie sent word from Paris today that he had just completed the financing of the new skyscraper the Woolworth building in New York city. For the whole undertaking wrote Mr Gillespie we wanted \$13,000,000; \$5,000,000 for land \$1,000,000 for the foundation and \$7,000,000 for the building. The money has been secured. The Woolworth building, when completed will be the tallest office structure in the world. It will contain 55 stories and from the sidewalk to the top of the Gothic tower the height will be 750 feet. The building will occupy the entire Broadway front on the west side between Barclay street and park place. Frank W Woolworth the owner and proprietor of the chain of five and ten cent stores bearing his name, it is estimated \$4,500,000 for the building.

To get a suitable foundation for the structure it has been necessary to go down to bed rock from 110 to 130 feet below the surface. The caissons being sunk for the foundation are among the largest ever made for building operations some of the caissons being 19 feet in diameter. Most of this work is now finished and actual construction of the building will begin in a short time.

A professor was in a barbers chair his face covered with lather, when several under graduates entered the shop. They had no idea of the identity of the customer, and behaved in a manner of which in less hilarious mood they would have been ashamed. When the towel was removed the professor, cleanly shaved stood before them. So nonplussed were they that no one tried to take the vacant chair and the barber called several times, Next gentleman! Next gentleman! The professor smiled somewhat grimly as he said, It isn't a bit of use, James. There's not a man among them who has the effrontery to answer to that name!

### BAKING POWDER

One pound of the best quality of cream of tartar; ½ pound of baking soda; ½ pound of cornstarch

Mix all together; sift the mixture four times to be sure of incorporating all the ingredients evenly; put at once into glass jars or cans with tight tops

I wonder why Blank is doing so much more business than I am!

Is it because he Advertises in the Dispatch?
