FADED LINEN SUITS

A good many colored linen tailored suits seem to fade, and thus lose their freshness a matter in which the natural linen has the advantage. However one of our friends says that instead of having a colored linen suit faded, she has it dipped by a dyer thus restoring its original color for about the same price the city laundry charges for doing it up. This is not beyond the skill of the home dyer and can be done very cheaply. The greatest defect in home dyeing is the attempt to crowd too much fabric into an insufficient quantity of liquid, resulting in spotty and uneven coloring. The garment must be lifted and stirred frequently during the process, and where too much is crowded into the kettle this cannot be done effectually.

A GOOD UNDERSKIRT

The underskirt of fine colored linen or chambray with a ruffle of the same material, with machine-embroidery in white, is practical and extremely neat, says an exchange. The embroidery has many eyelets, which makes the flounce doubly effective.

Underskirts of white albatross, trimmed with silk suffies, are dainty and practical.

PEACH HONEY

A delicious spread is made as follows: Use soft, good overripe peaches. Pare, mash them in the hand as you drop them into a vessel. Rub through a colander or sieve to remove lumps. Measure the pulp. Take three times as much sugar as pulp, put into saucepan with a little water, and bring to a boil. Add the pulp and boil five minutes, or until as thick as desired.

PEANUT SANDWICHES

Shell and skin freshly roasted peanuts and roll them to fine crumbs on a pastry board. Add salt to taste, and mix the powdered nuts with enough fresh cream cheese to make a paste that can be easily spread on a buttered bread. Keep in a cool, damp place until wanted.

HOUSEHOLD SUGGESTIONS

When windows are difficult to open, rub the sashes with soft soap.

When frying fish or anything for which blinding fat must be used, a small pinch of salt will stop the fat spluttering all over the stove.

Saucepans should never be allowed to get crusted with soot on the outside. Not only is a dirty saucepan of this kind unsightly, but it does not heat nearly as quickly as a clean one.

All traces of mud can be removed from skirts and gentlemen's black garments by rubbing the stains with a raw, cut potato.

Shabby leather bags, etc., may be improved in appearance by being rubbed over with well beaten white of egg, and then polished with beeswax and turpentine, the finish rubbing being given with a soft, clean cloth.

Prunes and other dried fruits are best kept in stone crocks with covers.

A little mint added to the currants makes a particularly tasty jelly to serve with lamb.

ANXIOUS TO PLEASE

It is well enough to be particular about ones diet, but the virtue may be overdone. A writer in the Philadelphia Bulletin illustrates the point with a report of a conversation, heard at a quick lunch counter:

Give me two new laid, brown shelled eggs fried on one side and mounted on a grilled slice of Virginia peach fed ham—be sure it is peach fed, mind you.

The waiter roared down the speaking tube:

Two new laid, brown shelled eggs, fried on—fried on—

Then he turned to the man again.

Excuse me, sir, he said, but which side will you have them fried on, please?

HOW'S THIS?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Toledo, O. We the undersigned have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligation made by his firm.

W. LIND, KINNAN & MARVIN, Local Druggists Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists.

Take Hall's Family Pills for constipation.

Make use of time; the hour which is not used is lost.

WILL CANADA BECOME TROPICAL?

Major R. A. Marriott, of New York, has published a pamphlet entitled, "Why We May Expect Warmer Winters." Major Marriott points out that Captain Scott's return from the Antarctic expedition emphasized the rapidity with which the southern polar ice was retreating. He declares that it is a well known fact that in the northern regions a similar condition of things is taking place. "In Canada," he says, "certain lands bordering on the north have been hitherto reported too icebound for agricultural operations, but large tracts have now been found to present favorable climatic conditions owing to some change that has taken place. Iceland now bears its name for in mid-December, 1910, there was no snow, and scarcely any frost." Major Marriott thinks that the change is due to the diminishing obliquity of the earth's axis. He says that 11,633 years ago the globe swung at an inclination of 35 degrees, and ice covered the greater part of it. Now, he says, it swings at an inclination of 23 degrees. "The year 2295 A. D. marks the apex of the general period, when the contrast between summer and winter will be least," Major Marriott declares. That year is only 384 years ahead of us, and we might reasonably expect each century of approach to show some slight modification of climate. If Major Marriott, comments the Canadian Century, is right, the island of Montreal may some day be as famous for oranges as it now is for melons, plums, and apples, and winter navigation of the St. Lawrence will no longer be a question of ice breaking. Hudson's Strait will be navigable for at least as long a period as the St. Lawrence now is, and the great Bay of Hudson will be surrounded by populous settlements. Anyone looking at the map of Canada can imagine what a great country our Dominion would be if it were habitable from the United States boundary to the Arctic Ocean.

HARDWOOD FLOORS

Put one quart of turpentine in a mason self-sealing jar. To this add four ounces of finely cut beeswax. Adjust the lid and set in sunshine. Shake it occasionally until beeswax is dissolved and it is the consistency of thick cream. Apply with a small rag, rubbing thoroughly into floors and polish with soft cloth after it is dry. Easy to apply and once used, will never be discarded. Fine also for columns and painted floors.

TO TRY PASTOR FOR HERESY

Pittsburg, Pa., July 8.—The first heresy trial held by the Reformed Presbyterian Church in more than half a century is scheduled to begin here Monday with the Rev. Dr. John H. Dietrich, pastor of St. Mark Memorial Reformed Church of this city as the defendant. Dr. Dietrich has professed to represent the newer ideas of progress and advancement in church and scriptural doctrine. He has said that he does not believe there ever was a fall of man. This and similar utterances from the pulpit form the basis for the heresy charge.

CARRY MILK IN CHUNKS.

The people of Siberia often buy their milk frozen, and for convenience it is allowed to freeze about a stick, which forms a handle to carry it by.

The milkman leaves one chunk or two, as he case be, at the home of his customers. The children of Irkutsk instead of crying for a drink of milk, cry for a bite of milk. The people in winter-time do not say, "Be careful not to spill the milk," but "Be careful not to break the milk." Broken milk is better than spoiled milk, though, because there is an opportunity to save the pieces.

A quart of frozen milk on a stick is a very formidable weapon in the hand of an angry man or boy as it is possible to knock a person down with it. Irkutsk people hang their milk on hooks, instead of putting it in pans. Though of course when warm spring weather comes pans and pails are used as the milk begins to melt.

It is announced from Hamburg that prominent Danish interests there are forming a company with a capital of \$240,000 to exploit the whal fishery in Southwest African waters, where Norwegian companies are now reaping enormous dividends.

VOLCANO DEFRAUDS THE UNITED STATES

WASHINGTON, July 26.—Bo-go, a volcano in Japan, is defrauding the United States out of duties on raw sulphur every day in the year. Customs officials, after a long wrestle with Bo-go's case, have decided they can not do anything with it. Raw sulphur, as most everyone knows, comes from the crater of a volcano. It is free of duty. Refined sulphur pays \$4 a ton. But Bo-go's crater is so hot that it refines the sulphur as fast as it makes it.

The Shrewd gentlemen who own Bo-go steadfastly refuse to pay duty on the sulphur and the treasury knows of no way to make them do so.

Farm Topics

ALFALFA POINTERS.

A Valuable Crop For Stock Raisers

Good crops of alfalfa can be grown on almost all soils that have good, deep drainage. Water must never stand on or near the surface.

It will yield from three to five tons of excellent hay per acre per season, and for soiling or pasture it has few equals.

It is richer in flesh-forming nutrients and is excellent for feeding with corn or other starchy foods.

It is more digestible than red clover, and is not far behind wheat bran in feeding value.

It is an excellent soil renovator, gathering nitrogen from the air, opening up the soil and bringing large quantities of mineral food from the subsoil.

It may be sown at any time from early spring to midsummer, provided there is sufficient moisture to give it a good start, but rather early sowing seems preferable.

The seed bed must be deep and finely prepared and about twenty pounds of good seed per acre should be used. The seed should be lightly covered with a harrow or a weeder.

Inoculation will be necessary in nearly all cases and should not be neglected.

A good dressing of farmyard manure will materially in securing a good stand and vigorous growth. It will also facilitate the inoculating process.

During the first season the growth should be cut down every time it reaches a height of five or six inches. Where a nurse crop is used this treatment should be practised after the latter has been removed.

If the crop is grown for hay it should be cut every time about one-tenth of the blooms have appeared. It is generally not wise to try to get a hay crop for the season.

Alfalfa should not be pastured the first season and never closely. When cattle or sheep are pastured on it, care must be taken to prevent bloating.

Cultivation with a disc harrow, set shallow, after cutting in July and August, if the soil is dry, is likely to be beneficial.

RAPE FOR HOGS

It is estimated that one acre of rape fed in conjunction with a limited grain ration is equivalent in feeding value of 2,500 pounds of corn and shorts. This is a cheap swine food that is truly worth while. Experiments have shown that growing pigs on rape pasturage made gains of 100 lbs live weight on 33.5 pounds less supplementary grain than similar pigs on clover pasture. Rape is an excellent crop for summer or fall pasture. It furnishes the cheapest green food for swine. Hogs are able to maintain their health and vigor when rape is sown at intervals during early spring and summer. It may be pastured from June till late

autumn. If a farmer has a portable fence and a plot of rape growing by the side of his hog pasture he can mature his pork for market under favorable conditions throughout the whole season. Care must be taken not to turn the hogs into the pasture till the crop is about ten or twelve inches high. Hogs must be prevented from rooting in the pasture lot. The cost of growing rape is about \$7 per acre and the food value is usually not less than \$20.

COLD IN WEST IS BAD FOR THE CROPS.

Winnipeg, July 24.—The cold weather which, it is now admitted, very seriously retarded the growth of the crops, has reached its climax in Winnipeg district and other points in Manitoba last night. The thermometer fell rapidly and people went about in overcoats. From practically all parts of the country come reports that the crops have been at a standstill now for nearly three weeks. In many districts wheat is not a point nearer harvest than during the first week of July. It has been the coldest July known in the three western provinces for twenty years and even under the most favorable conditions the harvest will be late. In past years cold weather in July has usually been followed by excessive heat in August and if this comes experts are still confident of big crops, although all now admit that the situation is very serious.

KEEP TO THE LEFT.

France which only the other day accepted the standard of Greenwich time has now paid England the further compliment of adopting her rule of the road.

One of a new set of rules for regulating traffic which however will not come into force for a year orders that "drivers of vehicles of every description and those riding or in charge of domestic animals must keep to the left in crossing and to the right in overtaking and passing."

The speed limit for motor-cars will be abolished and a very salutary rule has been made for motor signals in towns. A motor car must now show a deep toned horn and a motor cycle a shrill one while bicyclists ring bells.

When they hear the signal pedestrians must leave the road clear.

No Liniment Like "Nerviline"

Fifty Years' Use Proves it the Strongest, Safest, Best

1,000,000 BOTTLES SOLD ANNUALLY

The unexampled success of "Nerviline" is due to the fact that it is five times stronger, three times more penetrating, more pain-relieving than any other liniment.

One million bottles used every year—think what this means! Surely stronger proof is not possible that Nerviline is a trusty liniment, a household remedy upon which mothers can depend in case of accident or sudden sickness. Scarcely an ache or pain that Nerviline won't cure—among the hundreds of ailments for which it is guaranteed are the following:

- Headache, Sciatica, Lumbago, Sore Back, Earache, Diarrhoea, Neuralgia, Rheumatism, Chest Colds, Toothache, Cramps, Bowel Disorders. Doctors will tell you that nothing but the purest and most healing anti-septic drugs are used in Nerviline—that's why it is so safe for general family use, for the baby as well as the parent. If you haven't tried Nerviline, do so now—your neighbors are almost sure to know of its manifold merits and uses. Refuse any substitute for Nerviline. Sold the world over in large 25c bottles, five for \$1.00, all dealers, or The Carruthers Co., Kingston, Ont.
