BOARD OF HEALTH

THE LYNCH DRIVE IN CORPORATION

Fredericton May 27th Word was received from Boiestown that the Lynch drive of over six millions got into the corporation limits on the Miramichi last night. Other drives on the Miramichi are making slow progress.

Mr Flavian Chouinard is here today from the headwaters of the St John river. He came down the river to make a personal inspection, and found a lot of work ahead on the corporation drive. Mr Chouinard's head drive of fourteen millions for Murray & Gregory, and Mr A M Carrier's drive of about seven millions, for Sisson & Catler, are about the only ones out on the upper St. John.

CURRENT EVENTS

The Dominion Parliament adjourned for two months on May 19, having been in session since November 17th. Among the important measures passed were those guaranteeing the Canadian Northern Railway Bonds, amendments to the Railway act and trade relations with Japan.

The Russian Douma has authorized the expenditure of \$150,000,000 for a reorganization of the navy. Four Dreadnoughts and six submarines for the Black Sea, and four Dreadnoughts for the Baltic in addition to four battleships are among the additions proposed for the fleet.

At the imperial education conference recently held privately at the Foreign Office, London, it was resolved that the simplification of spelling was a matter of urgent importance throughout the empire, 'demanding such practical steps in every country as may appear most conducive to the creation of enlightened public opinion and the direction thereof to the maintenance of English in purity and simplicity among all English speaking people. The conference was satisfied with the foregoing resolution or declaration without recommending any specific reform, though there were many suggestions submitted among them being a proposal from Dr Mackay of Nova Scotia that there be progressive simultaneous simplification of spelling with recurring periods throughout the English speaking world, including the United States. Dr Mackay did not propose that adults be compelled to adopt the new methods, but that new ways be adopted and new spellings issued, say, every twenty-five years, these to be taught to each new generation of children. The conference adopted various resolutions unifying educational arrangements in the empire.

There has been much severe fighting between French troops sent to relieve Fez in Morocco and the rebellious tribesmen, but so far the latter have been repulsed on each occasion.

The proposal that France should be included in an arbitration treaty between the United States and Britain is received with much gratification in French government circles.

An important amendment has been added to the bill providing for the trial of youthful offenders in France. Those under 13 years have been removed from the jurisdiction of the public law courts. The Senate almost unanimously voted last week that women should be eligible for the duty of holding the usual preliminary inquiry and reporting to the tribunal in such cases.

The installation of more powerful machines in the wireless station on the Eiffel Tower, in Paris, has been completed and signals were

THE LOVE OF OATS

Why Normal, Active People Always Crave Oatmeal

Oats contain more body-building food than any other grain that grows. They contain more energy-giving food. You know their effect on horses.

Oats contain more organic phosphorus than any other grain, and phosphorus is the brain's main constituent. They contain more lecithin, and lecithin is the chief component of the entire nervous system.

That's why workers love oatmeal. That's why growing children crave it. It is simply the call of nature for what bodies, brains and nerves require.

But some oatmeal fails to meet these requirements. Only the richest, plumpest oats supply a food worth while. The choicest oats are sifted 62 times to get the grains for Quaker Oats. Only ten pounds are secured from a bushel. But these fine oats, when prepared by the Quaker process, supply the utmost in oatmeal.

Oatmeal is the most important food you serve. And the best costs only one-half cent per dish. Don't supply your table with inferior oats.
 Made in Canada.

sent last week to Canada. The service will be officially inaugurated by a message from President Falliers to Sir Wilfrid Laurier, Premier of Canada, on the occasion of the coronation of King George, as it is the desire of the officials that the first message shall be exchanged with a country where French is largely spoken.

The Alsace-Lorraine constitution bill has emerged from the Reichstag committee a much more democratic instrument than it was expected it would be. After protracted negotiations between the various parties and the Government the Reichsland gets three votes in the Federal Council, and at the eleventh hour the Government conceded the demand of the Socialist Radicals for a one man one vote principle instead of the loaded plural voting system. Another progressive amendment guarantees the freedom of religious belief and freedom of language. Elections are to be held on Sundays and to be subject to the control of the Imperial Government. French is to be taught in the schools and used in official documents in all districts where French is spoken by a majority of the population.

The Hukwang loan for the construction of railroads in the province of Hunan and Hupei was signed in Peking on May 20th by the representatives of the American, British, French, and German groups of bankers. Besides providing for the original amount of \$30,000,000 provision is made in the agreement for an extra \$20,000,000 should that additional sum be needed for the completion of the project. Bankers are of the opinion that the loan is the most important financial transaction ever signed in China. It provides for the construction of 1,200 miles of railroad in Hunan and Hupei, and the loan is secured by the revenue of those provinces which, in case of default may be administered by the marine customs.

Forest fires in Hokkaido, the northernmost of the islands of Japan, are devastating a vast area of the land. A number of villages already have been destroyed. The troops have been called out, and every available man is fighting the flames. The fire line is almost sixty miles in length. It is impossible to estimate the number of fatalities or the amount of damage resulting from the conflagration. Hokkaido, or Yezo, the most northern of the principal islands of Japan, has an area of 36,200 square miles. It is densely forested and abounds in game. It has a population of about 1,000,000.

The opponents of reciprocity between Canada and the United States in the Senate at Washington are making every effort to prevent the issue now being brought to a vote. There is talk of asking President Taft for a recess from July 1st to October 1st, but it is not believed that he will consent to the request.

Lord Lansdowne's bill for the reform of the House of Lords received its second reading on May 22 without division. As there was no division, whatever revolt there is among Unionist peers was not disclosed, but speeches by the Dukes of Somerset and Marlborough and others showed it to be considerable, and it is not expected that the committee stage will be proceeded with.

Gustav Mahler, the eminent composer, died in Vienna on May 18th, from angina pectoris.

The King entertained the premiers of all the British Colonies now in London at a luncheon in Buckingham Palace, on the afternoon of May 22, conversing with them afterwards for over an hour.

Mr Barteaux, French Minister of War, was instantly killed, and Premier Monis seriously injured on Sunday afternoon, when a huge monoplane, in starting on a Paris Madrid race suddenly swooped down upon the crowd below. M Train, the airman in charge, had encircled the field and was seeking a safe landing. Just then a corps of outriders galloped beneath him. To avoid crushing into the soldiers, he swerved sharply aside, and the air current created by the

passage of the cavalry proved too strong for him to hold his machine in check. It suddenly plunged down upon the Ministerial party, which had been hidden behind the cavalry. M Berteaux was horribly mangled. M Monis buried beneath the wreckage of the monoplane, sustained compound fractures of his right leg; his nose was broken and his face was badly contused. His condition is now pronounced by his physicians as satisfactory. Among those slightly injured were M Henri Deutsch de la Meurthe, the aged patron of aviation. The accident may result in the resignation of the Cabinet. M Cruppi has been temporarily appointed Minister of War. Over one hundred persons were injured and five killed when an aeroplane fell among spectators at Kurak, Russia. Britain's first naval airship, built with much secrecy, has been launched successfully and christened the 'Mayfly.' The huge machine which can be moved upon the water, is 502 feet in length. A number of spectators who invaded the aviation course at Augsburg, Germany, were startled by the sudden swooping of one of the aeroplanes. Before they could escape, one was killed and two fatally injured.

The Emperor of Germany has returned home after spending a most pleasant week in London, being greeted everywhere he went in the most kindly manner by great throngs of people who gathered to see him as he passed.—World Wide

BREAD GRIDDLE CAKES

One and one half cups flour, one cup stale bread crumbs, three teaspoons baking powder, one teaspoon salt, two tablespoons sugar, one half cup boiling water, three quarter cup milk, one egg, well beaten, two table spoons melted butter. Add boiling water to the bread crumbs, and let stand five minutes. Add the milk, sift to gether thoroughly the flour, salt, sugar and baking powder, and add to the bread mixture; then add the eggs and butter Fry as griddle cakes.

A BOON TO STOCK-RAISERS

To Know How to Cure Colic, Distemper, Colds, Swellings—Saves Thousands Each Year.

It is a matter of vital importance to every farmer, horse-owner, and stock-raiser to know exactly what to do when one of his animals is taken suddenly sick. The letter of Mr. Frank F. Fullerton, which we print below, gives information of inestimable value, and tells of his experience in curing ailing stock during the past thirty-eight years:

SAVED \$1,000 BY NERVILINE

"Several years ago, when my horses took colic I used to give them Cayenne Pepper in hot milk, but in a few cases only did it help, and because I had no proper means at hand I lost several valuable animals. Some one told me of the success Mr. Wendling of Brockville, Ont., had in his racing stables with 'Nerviline,' so I laid in a supply. It wasn't very long before Nerviline saved the life of a valuable stallion of mine, which was worth at least \$1,000.00. This horse was taken with colic, and would have died had it not been for Nerviline. I have used Nerviline for reducing swellings, for taking out distemper lumps, and easing a bad cough, and always found it worked well. I recommend every man who owns horses to keep Nerviline on hand."

THE GRIZZLY MOVES ON.

(From the Washington Herald.)
 While it isn't likely that the grizzly bear will ever become extinct, said Capt. Jerry Kreiser, an old time plainsman and Rocky Mountain prospector, he has all the same come to be something of a rarity in many of his original haunts, and the hunter seeking sport with him now must journey into the fastnesses of the far Sierras and Coast Range Mountains or into the wilderness of the British provinces in the Northwest.

In former days when the hunter and the ranchman had only their double barreled guns, the grizzly had little fear of them. But when the repeating guns and the rest of the destroyers began to confront him he gradually but reluctantly fell away from the pleasant borderland and sought safety in the deepest isolation.

When there were buffaloes on the plains the grizzly bears were keen and persistent hunters of them. A herd of buffaloes on its journey seldom escaped attack from grizzlies all along the line. When a grizzly and buffalo came to battle there was sure to be a savage contest, although it never lasted long the buffalo usually being the vanquished.

Confronted by a bear a buffalo would invariably charge furiously upon its big and ugly foe. This was as the bear expected. He waited erect on his haunches the onset of the buffalo. As the latter rushed forward with lowered head and was almost upon the bear the bear would throw himself to one side with astonishing quickness and at the same time deliver a blow with one of his powerful paws that seldom failed to break his antagonist's neck. It sometimes happened though that a bull was young and agile enough to swerve this blow long enough to give in turn a deadly thrust of his horn into the bear's side making the combat a mutual slaughter.

THE QUEEN'S CROWN

London, May 31.—Queen Mary's crown for the Coronation has just been completed. It is according to her own design, with an elegant lacelike acery wholly in diamonds the Kohinoor being set in the centre. The crown weighs 19 ounces, the Queen having insisted that it should not exceed the weight of an ordinary hat. It will be used only at the Coronation. After that ceremony, the gems will be dismounted and used in separate articles of jewelry.

The King will wear his father's crown.

COOKERY RECIPE.

Sardines on Toast.—This may be served for the family luncheon, or for a chafing dish supper. Turn out a small box of sardines, free them from bones, and separate with a fork into a small piece. Melt four tablespoonfuls of butter, add one third of a cupful of soft, stale bread crumbs and stir until well blended; then add one cupful of rich milk. Bring to the boiling point and add two hard boiled eggs finely chopped and the sardines, Season with salt pepper and paprika, Serve hot on pieces of buttered toast and garnish with parsley.

BREAK IN PANAMA DAM.

Panama May 27.—A rumor that the Miraflores Dam had broken away precipitating thousands of cubic yards of mud and silt into the lock is officially denied. It is admitted however that there was a small breakage. The damage amounts to about \$25,000.

A DAILY THOUGHT

The steps of faith fall on the seeming void
 And find the rock beneath.—Whittier.
