BUTTER PAPER FOR SALE BY The "Dispatch"

Household Hints

0

Lyonnaise Potatoes

Heat one tablespoonful of butter in a frying pan. Add one tablespoonful of chopped or thinly sliced onion, and when they are fried to a pale brown color, turn in one pint of diced cold boiled potatoes seasoned to taste. Shake until the butter is absorbed, but do not allow the potatoes to color. Add one tablespoonful of chopped parsley

Breakfast Biscuit

To a half cup melted butter, a little salt and two teaspoonfuls of baking powder, add one quart of milk and flour enough to make a stiff batter. Do not knead to make into dough. Drop from a spoon into buttered pans and bake in a hot oven, as only a quick oven will make them light and tender.

Broiled Partridge

Divide and flatten the bird, season it with salt and pepper, or cayenne, dip it into clarified butter, and then into very fine bread crumbs, and take care that every part be equally covered, place over a very clear fire, and broil gently from twenty to thirty minutes. Send it to table with brown mushroom sauce, if for dinner, but if for a luncheon dish, a good slice of butter put on the moment it is taken off the grill would be preferred.

Tea Punch

To the juice of three oranges, three lemons and the pulp and juice of one ripe pineapple add one pint of sugar and let it stand until the sugar is dissolved. Pour a quart of boiling water over one tablespoonful of Ceylon or other strong tea and let it stand until cold. Strain and add to fruit, pulp and juice. Add one quart of apolinaris water and pour over a block of ice in a punch bowl.

Progress Comes by Death

One of the straight facts about living beings is that so far as this earth is concerned, they die, and the question is whether we can hope to find that this fact of death has a use for life. That would be a great discovery, for we are apt to think that death is useless and cruel.

Well, death certainly has a value for life - not for the life of the creature that dies, but for the lives of others. If there were no death the e would be no parenthood and childhood, for plainly there would soon be no room for the introduction of new heings if those already there did : et make room for them. Without parenthood and childhood, and all that they mean, no kind of life-human, animal, or vegetable - would be anything like what we know; and there would be no more progress, for that depends on new and higher kinds of life being born in the world. Thus, without death, mankind could never have been produced.

The Parnell Monument

The elaborate Parnell monument in Dublin, which has been in course of construction for a long time past, at a cost of about \$45,000, is now complete, and the unveiling will take place on October 1, when the ceremony will be performed by Mr. John Redmond, M.P. Parnell is represented standing in oratorical attitude, with his left hand resting on a table. The inscription, an extract from one of Parnell's own speeches, reads as follows: - "To Charles Stewart Parnell. 'No man has a right to fix a boundary to the march of a nation. No man has a right to say to his country, 'Thus far thou shalt go and no further.' We have never attempted to fix a ne plus ultra to the progress of Ireland's nationhood, and we never shall."

POWER OF ELECTRICITY

Effect of Electricity on School Children.

A rather remarkable experiment has been carried on for some years in one of the public schools of Stock-holm, Sweden, to test the beneficial influence of electricity on the development of the human body. Two groups each of twenty-five children, as nearly alike as possible in general health, and size and weight of the individuals, were given instruction in two rooms, both being equal in size, ventilation, lighting and exposure. But the group in one of the rooms was continually exposed to the influence of elctric currents, while the other

group was not. Now, after three or four years of the tests, it is claimed that the "electrified" children have outstripped the other group, growing faster, "'ling on weight quicker, developing better appetites and showing more physical resistance. As a whole, the mentality of the electrified group was the greater, as backwardness in the majority of cases is the result of some physical defect.

Well Known Business Man of Montreal Urges Canadian Manufacturers To Wake Up and Get After Foreign Trade

Mr. George F. Johnston, the wellknown financier is urging the manufacturers and traders of Canada to consolidate and form an association through which authentic information of the wants of other countries-particularly South America-could be secured for the benefit of Canada. Mr. Johnston's appeal, in part, is:-

Has not the time arrived when we should put forth some concerted action whereby we would render valuable aid to our Canadian exporters. This might be accomplished by following the example of our neighbors to the south of us by the formation of a Canadian Export Association. Our export trade is growing at a remarkably rapid rate and the work of such an association would be to educate our expanding manufacturers and traders who may be anxious to participate in profitable over-seas business. It would be the purpose of the suggested association to establish an intelligence department and through the agency of accredited correspondents who would supply ruling prices, point out new markets and fresh sources for the purchase of cur raw material.

It may be news to many Canadians to know that there is scarcely a country in the world where Canadian merchandise does not find a ready market, both in the countries of the Old and New World. We have now a direct steamship service to Australia, New Zealand and the Far East and we have lately turned our attention to the development of trade to Latin South America and with most promising results.

From January 1st. to September 30th. of last year, the exports and imports between Canada and Argentine aggregated \$5,051,467, which is \$3,-000,000 more than the previous year. During the nine months above mentioned, Canada sent to Argentine \$2,869,913 worth of goods and bought from that republic \$2,181,554.

In looking over all the countries' trade with each of the Republics of South America, I personally believe that our trade of 1910 with the Argentine might be duplicated in each one of the other Republics, if we put the proper trade machinery into operation. Canada in the last few years, has been developing her export trade at a very rapid rate.

I would like to see our government assist in establishing a direct line of steamships with South America. This would facilitate the work of an energetic and patriotic Canadian Export Association. In many ways South America presents a very attractive field for Canadian business men and I believe, as one personally acquainted with South America and its business, that there is no doubt a large trade could be worked up, if proper attention were paid to cultivating the republics of South America. As everyone knows, South Americans for the most part, are not competitors of Canada. They buy what we have to sell and sell us commodities which we require. The only exception to this statement is the Argentine Republic and even with this republic our export trade last year was over \$5,000,000. Canada should have, next to Great Britain, the first claim upon South American trade, because of the fact that the chief commercial houses of South America are English and would naturally give a preference to Canada. There is invested in South American enterprises at the present time, over two billions dollars of British money and as a result of this large amount of British capital invested, Canada, as a part of the British Empire. would receive a cordial welcome should she energetically seek closer trade relations with South American countries.

As a Canadian much interested in Canadian enterprises, I would like to see a system of organized effort to extend and enlarge our export trade and for that purpose, I would suggest the formation of a powerful league, known as the Canadian Export Association, which league ought to secure diplomatic influence for the successful exploitation of Canadian commerce. In order to secure a remunerative business for a direct steamship line, the government might grant a subsidy, which subsidy would not be required after a more extensive trade had been developed, as it would soon be-apparent that Canadian steamships would soon have a paying cargo each way.

It might be pointed out that the greater part of manufactured goods used in South America are imported and that there is hardly an article

THE ROYAL BANK WOODSTOCK WOOD-WORKING COMPANY, LIMITED,

ganize an export association and to

develop and extend our export trade.

New Eardine Factory

Eastport, Nov. 17.-Rumors of im-

portant changes in sardine circles are

rife at the present time and it is report-

ed that a company has been formed

for carrying on the sardine business

more extensively on the Canadian side.

The interested parties are prominent

residents of St. Andrews, the Canadian

Pacific R. R. Company and one of the

prominent officials of the Sea-coast Can-

ning Company of this city. It is the in-

tention of the new concern to erect a

large plant at Chamcook, N. B., near

St. Andrews, and the materials for the

foundation are now being procured at

ly so as to be in readiness to take care

of the spring run of fish. The majority

of the weirs near St. Andrews are un-

der the control of Mr. DurrellGrimmer,

Bangor Commercial

packers and employs alike.

Deluge Halts Tripoli War

London, Nov. 17-Operations at Trip. oli practically are held up by a prodigious rainfall which has swamped the trenches and converted the roads into impassable quagmires. The troops are undergoing considerable hardships. Conditions became even worse yesterday, a notherly gale compelling the warships and transports to put to sea for safety.

Both Vienna and Constantinople report that Italy has consented to postpone her naval operations in Turkish waters. This is the result, according to the despatches, of protests made by

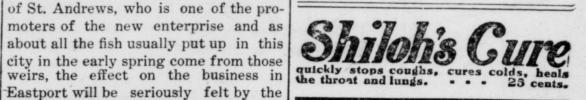

Times

Another case of deluded American the Dominion on the subject and if emigrants has come to light through a recent application to the State Department for the relief of a small colony of about twenty-eight families from Mobile and the Gulf coast who were taken to the Carribbean coast of Honduras to work on plantations there. The American minister and consul officer reported to the State Department that these people were in great distress and private funds were procured from charitable Americans to defray the costs of their passage back to the United State. The gunboat Wheeling has been sent to Honduras to investigate and report upon conditions there.

A Natural Error

"How did that story pan out about the man up in the Bronx who found the St. George. It is expected the work of big hailstone on his back stoop this morning?" asked the city editor. construction will be pushed along rapid-

"Nothing in it," replied the reporter. "He discovered it wasn't a hailstone after all. The iceman left it there." November Womvn's Home Companion
