THIS MAY INTEREST YOU:

Last year the sale of Pelham's Peerless fruit and ornamental trees increased 40 per cent in New Brunswick because we deliver standard trees and to contract grade. Our agents made money in proportion to the increase in sales. We want now a reliable agent for Carleton county. Pay Weekly. Exclusive Territory.

NOTICE

All householders are hereby notified that they are required to thoroughly clean up their premises and remove all rubbish and matter injurious to the public health. Any persons keeping pigs within the limits of the town are notified that they are acting contrary to law and on information being laid will be at once prosecuted. Any person found dumping rubbish in any place other than the town dumping ground at the upper end of Connel Street will be prosecuted. March 29th 4-1
 By order of the
BOARD OF HEALTH

QUEER THINGS

A wee girl tells of some things she cannot understand;—
 A clock can run, but cannot walk,
 Shoes have a tongue but cannot talk,
 A comb has teeth but has no mouth,
 A north wind brings the wind down south,
 Bottles have necks, but have no heads
 And pins have heads but have no necks,
 And needles have to hold their thread
 Right in their eye—how it must vex!
 If I were needle, comb or shoe,
 I never should know what to do,
 My head already's in a whirl—
 I'm glad to be a little girl!
 —Weekly Globe.

\$3,600 in Cash Prizes for Farmers

ARE you one of the thousands of Canadian farmers who have used or intend using Canada Cement for the construction of some farm utility? If you contemplate building anything whatsoever of concrete, make up your mind right now to build it with a view to winning one of the prizes we are offering. Read the rest of this announcement and you will learn how you may try for a share in the \$3,600 we are giving away, to encourage the use of cement upon the farm. Throughout Canada the farmers have taken such a keen interest in our campaign that it has inspired us to go further along these educational lines. We have decided, therefore, to offer a series of four \$100.00 prizes to each of the nine Provinces, to be awarded as follows:

PRIZE "A"—\$100.00 to be given to the farmer in each Province who will use during 1911 the greatest number of bags of "CANADA" Cement for actual work done on his farm.

PRIZE "B"—\$100.00 to be given to the farmer in each Province who uses "CANADA" Cement on his farm in 1911 for the greatest number of purposes.

PRIZE "C"—\$100.00 to be given to the farmer in each Province who furnishes us with a photograph showing best of any particular kind of work done on his farm during 1911 with "CANADA" Cement.

PRIZE "D"—\$100.00 to be given to the farmer in each Province who furnishes the best and most complete description of how any particular piece of work shown by photograph sent in, was done.

In this contest no farmer should refrain from competing, because of any

feeling that he may have little chance against his neighbor who he thinks might use more cement than he does.

For it will be noted that Prizes "C" and "D" have no bearing whatever on quantity of cement used. The man who sends us the best photograph of so small a thing as a watering trough or a hitching post, has as much chance for Prize "C" as a man who sends a photograph of a house built of cement—and the same with Prize "D" as to best description.

Canada Cement is handled by dealers in almost every town in Canada. Should there not happen to be a dealer in your locality, let us know and we will try to appoint one.

Contest will close on November 15th, 1911, and all photos and descriptions must be in our office by that date. Awards will be made as soon as possible thereafter. The jury of award will consist of: Prof. Peter Gillespie, Lecturer in Theory of Construction, University of Toronto; W. H. Day, Professor of Physics, Ontario Agricultural College, Guelph; and Ivan S. Macdonald, Editor of "Construction."

Now, you cannot hope to do concrete work to the best advantage unless you have a copy of our free book, entitled, "What the Farmer Can Do With Concrete." This book tells how to construct well-nigh anything on the farm, from hitching post to silo. Whether you enter the contest or not, you'll find this book most helpful. A post-card asking for the book will bring it to you promptly. Send for your copy tonight. From your cement dealer or from us, you can obtain a folder containing full particulars of contest. If you send to us for it, use the coupon provided in this announcement.

Please send me full particulars of Prize Contest. Also a copy of "What the Farmer Can Do With Concrete."

RULES FOR COOKING

If one could have a thermometer and use it in testing the heat, many things would, says The Commoner, be the better for cooking at the right temperature. Turnips, beets and all vegetables of the root class, contain very little starch but much fibre and should be cooked at just the boiling point—210 degrees Fahrenheit. Potatoes are starchy food and must be boiled quickly. Meats, eggs, peas, beans, lentils, milk, etc. should be cooked below the boiling point, in order to soften the animal fibre. Potatoes baked in an oven are more digestible than when boiled in water. In cooking meats, the object is to retain its natural juices and make it tender. The outside must be quickly seared to prevent the juices escaping, and this may be done either by dry heat in the oven, or by pouring boiling water over it, keeping the water boiling until the outside is hardened. After this, it should be cooked with less heat.

Dumplings are served with stews, and take the place of crust or starchy foods. And Irish stew is a light stew in which potatoes are used, and the neck of mutton is the piece usually used for this purpose. Foods rich in starch, such as rice, must be boiled rapidly, as rice, cooked with a slow heat, especially as is often done in a double boiler, is heavy, water-soaked and often the cause of indigestion.

A DAILY THOUGHT

Every day is a new beginning,
 Every morn is the world made new;
 Ye who are weary of sorrow and shining,
 Here is a beautiful hope for you—
 A hope for me and a hope for you.—Susan Coolidge.

THE COLLARLESS BLOUSE

The blouse with a collarless neck will be even more fashionable this summer than it was last. The special new feature this year is the very wide around collar which is also seen in sailor shape. This is made of embroidery and oftentimes of silk or satin worked in heavy colored floss. The brilliant Bulgarian embroideries are also used for these collars. However not every summer girl looks her best in a collarless blouse. For this reason many of the blouses which are cut out at the neck are worn with a tucker and high collar of transparent chiffon or Greek tulle.

It will be quite the fashion this summer to have the filmy material for the tucker and collar the same color as the dress. Another idea is to have it cream-white lace with an inch-wide band of chiffon around the top of the collar which matches the frock in color. This is sure to be becoming to the girl with a long slim neck.

Madam Paquin is favoring just at present in the way of a neck finish a tulle ruche. She is making it up in both black and colors.

Shiloh's Cure
 quickly stops coughs, cures colds, heals the throat and lungs. . . . 25 cents.

HURT ONCE TOO OFTEN

At an inquest a doctor once stated that two of the deceased's injuries were fatal, but fortunately the others were not. An Irish paper goes one better and describes how a deaf man was run down by a tram and killed. He was injured in a similar way some years ago—Black and White.

WELSH RABBIT.

Most young people would consider supper incomplete without the addition of a rabbit. To a pound of full American cheese allow a cupful of cream or rich milk with as much cream as you can spare; two eggs and two level tablespoonfuls of butter; salt and paprika to taste. Shave or crumble the cheese and put all together in the chaffing dish with the hot-water pan underneath. Then light the lamp and as soon as the water begins to heat begin to stir. Stir and cook to a thick smooth cream, turn out the flame at once and serve.

PASSING OF THE COCHINEAL.

Before many years cochineal scarlet will have become a thing of history only, like the Tyrian purple of antiquity—at least, that is the conclusion of Mons Leon Dignet, who has been studying the state of the cochineal industry in Mexico. The first specimens of cochineal were taken to Europe by the Spanish adventurers in the sixteenth century. The Indians had cultivated the cocoon from which the color is derived in pre-Columbian times, and after the Spanish conquest the industry developed rapidly. The city of Oaxaca was the centre of the cochineal country in the days of Humboldt, but only a few plantations of the nopal cactus, on which the insects are fed, now remain. The female insects only are used to form a dye, and they are gathered by brushing the branches of the nopal as soon as they begin to lay their eggs. They are then desiccated in ovens, or killed with boiling water.

INVESTITURE OF THE PRINCE OF WALES

London, April 21.—Wales is enthusiastic over the forthcoming investiture of the Prince of Wales at Carnarvon Castle. The committee charged with arrangements has accepted the offer of the Welsh coal miners to supply the gold required for the Prince's insignia.

Exchange; California is coming to the front as a cotton growing state, last year's production having amounted to 16,000 bales which will be largely increased this year, Arizona, too, is experimenting with cotton growing and meeting with much success. It has been asserted by men prominent in the cotton industry that the time is coming when the United States will produce enough cotton to meet the demands of the entire world for the staple.

Shiloh's Cure
 quickly stops coughs, cures colds, heals the throat and lungs. . . . 25 cents.

A bill providing that no woman shall be permitted to work more than nine hours in any day or more than fifty hours in any week has been passed by the Missouri Legislature and signed by the governor. The bill will take effect June 20, and most of the factories stores and laundries will have to reseat their schedules before that time.

FORTY YEARS OF LIFESAVING.

WASHINGTON, D C April 20.—Today marked the fortieth anniversary of the establishment of the United States life saving service. An act of April 20, 1871, authorized the Secretary of the Treasury to establish stations on the coasts of Long Island and New Jersey, and to employ crews of trained surfmen at a compensation not to exceed \$840 a month. Subsequent legislation has extended the service to all the ocean and lake coasts of the country. At the close of the last fiscal year the life saving establishment embraced 231 stations 201 being on the Atlantic coast, 60 on the lakes, 19 on the Pacific, and one at the falls of the Ohio, Louisville. Since 1871 the life savers have given aid in nearly 22,000 ship disasters. In which 147,000 persons were involved and property valued at \$235,000,000 saved. The cost of the maintenance of the service is about \$2,250,000 a year.

The general Superintendent of the service is Sumner I Kimball, who has held this position ever since it was created forty years ago and in his annual reports there has appeared more unintentional romance than in any other documents that come from the Government Printing Office.
