### PRINCESS IRIS

The beautiful bewildering fantasy "Princess Iris" with many new and thrilling features produced with superb scenery and mechanical effects will be seen at the Hayden Gibson Theatre on Friday & Saturday April 7th and 8th. From the beginning to the end it is a carnival of excellent fun, indelibly stamping it as the big fun show of all shows. Probably no entertainment ever arranged for the amusement loving public has been so carefully staged, as the many bewildering illusions that are introduced during the action of the play, not only require a good deal of attention but also a lavish outlay of money for their construction, and what seen will not amuse, but charm the eye of all the beholders.

The stars of the play Mildred and Rouclere need no introduction as their long line of success stamp them as artists of the highest rank and their supporting company is in keeping with their standard.

During the action of the play many pleasing specialties will be introduced and among them the many will be "Azra" the aerial fantasy; that of a living woman floating in the air and disappearing right before the audiences eyes.

Don't forget the date, April 7th and 8th.

Mildred and Rouclere are the most successful illusionary entertainers. They make all other conjurers, wizards and black art fellows pale into the horizon, for they not only introduce all the big illusions known to the art during their performance of Princess Iris but also many that have never been seen before and all of which are invented and patented by Mr Rouclere, they run all through the action of the play and combined with beautiful scenic and electrical effects, pleasing specialties that are introduced by a company of noted artists go to make one of the most original and unique performances ever offered upon any stage, it is three hours of continual laughter combined with surprise after surprise.
