TOWN COUNCIL.

The regular meeting of the Town Council was held on May 1st, all the councillors being present and Mayor Ketchum in the chair.

From the treasurer's report it appears that the overdraft at the bank at present was \$7055.24.

The usual monthly bills were read and referred to finance committee.

A communication received by the mayor drew attention to the condition of the sidewalk in front of the Sentinel Office. Communication was referred to streets committee.

Voted that the hall committee be given power to repair the roof of the town hall

Voted that the question of automobile speeding, and requesting that autos do not run in town on Saturday afternoon and evening, be left to the street committee.

Voted that the marshal be requested to see that the merchants cease to open their goods on the sidewalk.

Voted that in case Treasurer Bourne be unable to take the vote on permanent streets Chas Comben be appointed for that purpose.

Voted that the question of procuring a striker for the fire bell be left with the fire committee.

Voted to adjourn until Friday evening

FRIDAY

At Friday's meeting of the Town Council, all the councillors were present with the exception of Coun Dibblee, His Worship Mayor Ketchum in the chair.

Coun Gallagher reported progress in the matter of an interview with the auto owners regarding the request of the Council that if possible the merchants do not use their autos on Saturday and thus enable the farmers to get to town on that day.

Coun Gibson reported progress in the matter of securing a striker for the fire bell.

Voted that the bills coming from the audit committee be ordered paid.

Voted that all salaries falling due be ordered paid.

His Worship Mayor Ketchum gave a brief description of his visit to Houlton. Couns Gallagher, Mair and Gibson accompanied him. They went over on Thursday afternoon to see the stone crushing plant work. They were met by Olin Buzzel, one of Houlton's leading citizens, who placed himself and his auto at the disposal of the committee. Mr Buzzel introduced them to Frank Peabody, the first select man, who explained the general system of making roads. Entering the auto, much to the despair of Coun Gallagher, but we kept him in the auto, we went out to see the rock crushing plant, which is the basic idea for good roads. The crusher crushes the rock and is carried up in pockets; the rock is divided into four grades. They first place eight inches of large rock, which is thoroughly rolled by a ten ton roller; then comes two inches of lighter stone, and then the fittings; this is thoroughly sprinkled; drainage was most important; rock costs 50 cents a load of two tons. The whole outfit would cost \$5 000

Coun Gallagher--In the early days they got the rock for nothing, but the stone is getting scarcer and now they have to pay 25c a ton.

Coun Mair--If our ratepayers saw the State road there they would vote to a man for permanent streets; it cost \$1 a foot for a 30 foot road; they advocated wide tires for use on roads; their mud scraper is a good thing; it is built like a harrow but with close teeth they have a big gravel pit, but while they use gravel on some of the roads outside of town, the general opinion is that using gravel is wasting money. Permanent streets would be a great thing for the town.

Coun Gibson was convinced that the right thing to do was to build permanent streets: they are spending money on concrete sidewalks four inches thick; there is a beautiful piece on Main Street, down some time, with out a crack. They have a fine fire department with two horses in the barn at all times, and two horses

working outside. By adding to the batteries, it can be arranged for a striker for the fire bell.

Dr Doherty, of the A. R. Williams Machinery Co, St John, gave some valuable advice on permanent streets.

Moved by Couns Mair and Gibson and passed that the street committee procure a few garbage barrels and that the driver of the team be instructed to empty the contents at stated intervals.

Voted to adjourn.
