BOARD OF HEALTH

FERRY SERVICE AT CHATHAM DISCONTINUED.
CHATHAM, N B May 3—Miramichi Steam Navigation Company directors at a meeting this morning decided to discontinue the ferry service at Chatham. This action was taken because of the fact that the service is not paying, and when the local government refused to grant any increase, subsidy and the Town Council ordered the company not to increase its rates, the only thing to do was to throw up the service. The ferry will not be run after to night by the company. It is now up to the Council to arrange for some service quickly. The ferry is the connecting link between Chatham and down river points, and its discontinuance will be a great loss to the town and business.

\$3,600 in Cash Prizes for Farmers

Tell Us How You Did It

You may win a prize by doing so

SUPPOSE your friend Bob Wilson, on the next concession, "pulled up" at your front gate on the way back from market and asked about that silo or barn foundation you built, you would be glad to tell him, wouldn't you? And it wouldn't take you long, either, would it? And, as a matter of fact, you'd find as much pleasure telling him as he would in listening— isn't that right?

First you would take him over to view the silo or barn foundation. Then you would start to describe it—its dimensions—the kind of aggregate used—the proportions of cement used—number of men employed—number of hours' working time required—method of mixing—kind of forms used—method of reinforcing, if any—and finally, what the job cost. So that by the time you finished, neighbor Wilson would have a pretty accurate idea of how to go about building the particular piece of work which you described.

Now couldn't you do the same for us, with this difference—that you stand a good chance of getting well paid for your time? In Prize "D" of our contest, open to the farmers of Canada, we offer \$100.00 to the farmer in each Province who will furnish us with the best and most complete description of how any particular piece of concrete work shown by photograph sent in was done. The size of the work described makes no difference. The only important thing to remember is that the work must be done in 1911 and "CANADA" Cement used.

In writing your description, don't be too particular about grammar or spelling or punctuation. Leave that to literary folk. Tell it to us as you would tell it to your neighbor. What we want are the facts, plainly and clearly told.

Sounds simple, doesn't it? And it is simple. And surely it is well worth your while when you think of the reward in view. Now sit right down, take your pen or pencil—fill out the at-

tached coupon—or a post-card if it's handy—and write for the circular which fully describes the conditions of this, the first contest of the kind ever held in Canada.

Every dealer who handles "CANADA" Cement will also be given a supply of these circulars—and you can get one from the dealer in your town, if that seems more convenient than writing for it.

Contest will close on November 15th, 1911—all photos and descriptions must be sent in by that date, to be eligible for one of these prizes. Awards will be made as soon as possible thereafter. The decisions will be made by a disinterested committee, the following gentlemen having consented to act for us, as the jury of award: Prof. Peter Gillespie, Lecturer in Theory of Construction, University of Toronto; Prof. W. H. Day, Professor of Physics, Ontario Agricultural College, Guelph; and Ivan S. Macdonald, Editor of "Construction."

Having decided to compete for one of the prizes, your first step should be to get all the information you can on the subject of Concrete Construction on the Farm. Fortunately, most of the pointers that anyone can possibly need, are contained in our wonderfully complete book, entitled "What the Farmer Can Do With Concrete." A large number of Canadian farmers have already sent for and obtained copies of this free book. Have you got your copy yet? If not, you'd better send for one to-day. Whether you are a contestant for one of our prizes or not, you really ought to have this book in your library. For it contains a vast amount of information and hints that are invaluable to the farmer.

Please send full particulars and book.

THE ANTI MANCHU REVOLT

The rising in Canton, while it may attract to the banner of revolt the baser elements of Chinese society and degenerate in places into brigandage and murder, is inspired by lofty political aims. The revolutionists stand for internal economic and political reforms, and for the maintenance of the integrity of the Empire against foreign aggression. They aim at the modernization of China.

It was the Cantonese, Kang Ju We that led the movement that fizzled out in the Boxer rising, drove the leaders into exile, and gave to the foreign powers a further pretext for the occupation of Chinese territory. At that period the reform party had for a time the ear of the late Emperor and his advisers, but the dowager Empress, since deceased, frustrated their plans and identified the Manchu dynasty with reactionary influences that have since aroused dormant racial animosities and linked the reform party definitely with revolutionary aims that threaten the reigning dynasty.

The revolutionists have, therefore, come to be known as the "queueless ones," an expression which symbolizes a national revolt against the rule of the Manchus, who degraded the vanquished Chinese three centuries ago by imposing on them the Manchu customs and dress, including the queue, or pig tail. The recent abandonment of this badge of servitude by the Chinese marked a significant stage in the awakening of that great Empire. Until their conquest in 1644 the Chinese wore their hair like the Koreans, gathered in a knot at the top.

The present insurrection is the direct outcome of the failure of Chinese rulers to withstand the recent pressure of the Muscovite, aggravated by the sufferings of the people through plague and famine, together with the corruption and tyranny attendant on a system of government that seeks to combine local autonomy with

centralized authority without any of the safeguards inseparable from representative institutions. What the Manchus won by the sword they keep by the sword. They are the ruling caste and fill the high offices. In every province there is a separate Manchu army distinct from the Chinese, but as the former number in all only about two hundred thousand, or about one fourth of the total Chinese troops, the anxiety displayed in Canton as to the loyalty of the latter can be understood. Meantime the destiny of China is in the balance. Unless the Manchu dynasty stands definitely for reform it may go down under the rising torrent that modern ideas, national pride and economic pressure have set free.—Toronto Globe

13 WEEKS IN HOSPITAL Came Away No Better and Then Two Boxes of Zam-Buk Worked Complete Cure

Mr Fred. Mason, the well known upholsterer and mattress manufacturer of S. Andrews N B., says:—"I had eczema on my knee, which caused me terrible pain and inconvenience. The sore parts would itch, burn and tickle, and then when rubbed or scratched, would become very painful. I tried various remedies but got no better, so I decided to go to Montreal and take special treatment. I received treatment at the Montreal General Hospital for thirteen weeks, but at the end of that time I was not cured, and almost gave in. A friend advised me to give Zam Buk a trial, and although I had little hope of it doing me good I took the advice. Almost as soon as I applied Zam Buk I stopped the itching and irritation. I persevered with the balm, and it was soon evident that it would do me good. Each day the pain was reduced the sore spots began to heal, and by the time I had used a few boxes of Z. m. Buk I was cured."

For eczema, blood poisoning, piles, ulcers, sores, abscesses, varicose ulcers, bad leg, sore feet blisters, insect stings, poisoned wounds, cuts, burns, bruises and all skin injuries and diseases, Zam Buk is without equal. Zam Buk Soap should also be used for washing all wounds, eczema patches and sores. All drug stores and stores sell Zam Buk at 50c. box and Zam Buk Soap at 25c. per tablet, or from Zam Buk Co., Toronto

ORANGE AND LEMON PEEL

The thrifty housewife need not throw away her lemon and orange peel. Following is a method of utilizing such peel. Cut the rinds into shreds with a sharp knife, boil until tender in clear water, when they are drained and cooked in sugar and water until transparent. Take from the syrup drain slightly once more, dust thickly with powdered sugar, dry, and you have a cheap garnish for desserts.

The grated rind of lemon may be dried and mixed with an equal quantity of granulated sugar for a flavoring. Pack in air-tight bottles.

Grape fruit rind may be shredded and candied like orange peel, or can be cut into bits and made into a marmalade.

Lemons and oranges are the better of being scrubbed a little with a vegetable brush before using when it is intended to make the use of the peel. The porous surface of the rind holds many black specks.

BRITISH DREADNAUGHT SERIOUSLY DAMAGED

London, May 5.—The Dreadnought cruiser Invincible was seriously damaged while being docked at Portsmouth on Tuesday for an overhauling. The moment the great weight rested on the wooden block the steel frames strengthening the vessels double bottom buckled, forcing the keel upward. The frames were bent like a bow, the immense weight of the ship bulging them out on both sides. The dock was immediately refilled and the Invincible floated out. An examination showed the extent and seriousness of the injury and repairs are likely to be long and costly. The Invincible has given continual trouble ever since she was put in commission. Her guns have not been fired for more than a year, owing to difficulties with the electrically operated barbette.

HOUSEHOLD NOTES.

To remove odor from a knife used in peeling onions, run it through a raw potato. Mahogany, or any other colored wood, may be darkened by polishing with cold drawn linseed oil.

A tin kettle or coffee pot is easily cleaned by being rubbed with a woollen rag soaked in paraffin.

When cleaning house use plenty of turpentine in the scrub water. It means certain death to moths.

White cloth is the best covering for pantry shelves. Keep red paper around the edges to ward off insects.

Very pretty curtains for living rooms or dining rooms may be made of madras. It washes well and is durable.

If gilt frames are coated with copal varnish it will preserve them, and they can be washed with water without removing the lustre from the gilt.

To take axle grease out of goods rub the spot with lard. Rub the goods in the hand as if washing. Let stay in three hours, and then wash out in cold water, using plenty of soap.

Cold water, a teaspoonful of ammonia and soap will remove machine grease when other means would not answer owing to the colors running.

Wipe off screens with a duster each morning, and beat with a soft brush. The beating should be done lightly in order that the wire be not bulged.

CHOCOLATE FUDGE

Two cups of white sugar, two cups of brown sugar, one cup of milk, two table spoons of cocoa, pinch of salt and vanilla flavoring. Boil until it forms a soft ball in water; let cool, then beat vigorously until creamy and pour onto a buttered plate.

What's the good of having friends if you can't ask favors of them?

That's right. But I've noticed that the man who has the most friends is the one who asks the fewest favors.—Cleveland Leader.

Why didn't you bring my umbrella back before?

It's been raining all week.—Lippincott's Magazine.
