### Current Events

(From World W de.)

Rumors that Mr. Bryce, British Ambassador to Washington, intended to resign, are denied at the embassy. Mr. Bryce a few days ago said that he had much work yet to accomplish in the United States, and would not leave his post.

Fifteen tons of Argentine meat was put on the Vienna market one morning last week. The public rushed to buy it. All was sold in the forenoon, bringing from twelve to eighteen cents a pound.

At a dinner of the National Tariff Commission Association in Washington, President Taft made a forceful plea for legislation establishing a permanent tariff board. Several hundred large commercial organizations from all parts of the country, including more than thirty from New York city, were represented at the banquet. The President received a hearty reception.

W. R. Travers, former general manager of the Farmers Bank of Toronto, has been sentenced to six years in the penitentiary for defalcation, and his share in robbing and ruining the bank. A warrant is out for the arrest of Dr. Beattie Nesbitt, a former president, and summonses for four prominent men who were on the provisional directorate.

Lord Swaythling, head of the banking firm of Samuel Montagu & Co., London, is dead. He was the son of the late Louis Samuel. He was educated at the Liverpool Institute, and in 1853 he established the banking firm of Samuel Montagu & Co., of which he remained the head until his death. He assumed the name of Montagu by Royal license. From 1887 to 1890 Lord Swaythling was a member of the Gold and Silver Commission and from 1885 to 1900 was a member of Parliament from the Whitechapel division of Tower Hamlets. He was raised to the peerage in 1894. Lord Swaythling took great interest in advancing Jewish and other institutions and in founding new synagogues. He was known among the Jews of London as the 'King of the East End,' where he used his wealth for the welfare of the Jewish community, being second to Lord Rothschild alone in liberality as a donor to the children of his faith. In January, 1909 Lord Swaythling, then President of the Russo-Jewish Committee, caused much comment by upholding the action of the committee in deprecating the issue of the Finnish ten million dollar

loan, destined for the construction of railroads in the grand duchy, in England, and strongly advised his co-religionists and others to keep aloof from all investments in securities of that government. 'In condemning the issue of the loan, I have taken the ground that no good purpose can be served by a government that treats its subjects in such a way as Finland does,' he said.

Details received in London of the plot to assassinate the Emperor of Japan for which 23 Japanese anarchists recently were secretly tried and since sentenced to death, say mysterious explosions were heard on Mount Kiso. It was first supposed to be volcanic. A police investigation led to the discovery on the summit of the mountain of a complete modern dynamite factory, and the unearthing of a plan for the assassination of the royal family, peers and others, and the destruction of official residences.

With the exception of the youngest daughter of the late Count Tolstoy the members of his family are so persistent in making capital out of his great name and fame that Russians are becoming outspoken in their disaffection. Count Il'ya, acting for himself and his brother, has formerly piloted the Government to purchase the estate at Yasenaya Polyana and make it national property. They ask a million roubles, or about \$500,000 for their share and their mother wants a million more for hers. Their is likelihood that they will get anything from the Government. The launching of a national subscription will doubtless be the next move.

Railway traffic in Portugal was almost paralyzed for several days owing to a strike of employees. Happily there was little violence and the men have returned to work at increased wages.

Reports received in St. Petersburg show that many lives have been lost by the earthquake in Russian Turkestan.

Ontario is going to have a mounted police force operating along the international boundary under the direction of Thomas Robinson, chief immigration officer, in charge of the inspection service at Windsor. The new force will be employed to prevent undesirable persons from entering Canada from the United States. These mounted men will work in conjunction with the provincial police.

More than a hundred thousand persons, including many Europeans have died from the bubonic plague which is ravaging Manchuria and Northern China. A number of missionary doctors have left for the plague belt to help in fighting the epidemic. In order to prevent further spread if possible, no railroad trains will be operated south of Mukden for the present.

A complete agreement on all details involved has been reached between Canada and the United States, and likewise sufficient adjustment of difficulties with Newfoundland has been effected to make unnecessary any recourse to the mixed commission of The Hague tribunal in the fisheries dispute.

The Dominion Parliament resumed its sittings on Jan. 11th, after the Christmas and New Year holidays.

Owing to the fear that some of the anarchists who are being chased out of London will make their way to Canada, extra precautions will be taken by the Immigration Department to weed out undesirable who reach Canadian shores, more particularly via the ocean ports of St. John and Halifax.

Unbreakable glass has been invented in Baccarat, France. The glass has been used successfully in the lamps of miners in coal mines containing much fire damp. Magnesia and oxide are found to increase greatly the elasticity of glass.

Following the Foreign Minister's declaration in the Chamber of Deputies that France by her policy of making ententes with Russia, Great Britain, Italy, and other nations, was now in a better position than ever to carry

### The Secret of Good Pies

**PIE CRUST**, more than any other delicacy of the oven, ought to be tempting and appealing to the taste.

You do not eat pie as a nerve tonic or to strengthen your appetite. You eat it for pleasure mostly.

You want it, of course, to taste good, at the same time you want the crust to be light, flaky, wholesome. Now, pie crust properly made from

### Royal Household Flour

is always good food, the absolute uniformity of this best of all flours eliminates failure entirely. You get the same delightful results every time and your pies are more healthful and nourishing than if made from ordinary flour.

The reason is that "ROYAL HOUSEHOLD" having a larger percentage of high quality gluten, assimilates more readily,

is more satisfying than ordinary flour, comes out of the oven flakier, more tender and more digestible.

Be sure to try "ROYAL HOUSEHOLD" when next you make pies. It is the finest flour in the world not only for Pastry but for Bread and all family baking.

"Ogilvie's Book For A Cook" containing 125 pages of tried and tested recipes will be sent free to any user of Royal Household Flour who asks for it.

THE OGILVIE FLOUR MILLS CO. LIMITED.

out her traditional policy of maintaining international peace, M. Jaures, the Socialist leader in the Chamber, urged upon the Deputies that France take the lead in following up President Taft's plan for universal arbitration. M. Jaures said that the projected treaty between the United States and Great Britain would be the first link of a chain which would bind all nations and peoples not to bear indefinitely the burden of armed peace, which was only a hideous caricature of real peace.

One Gisolme, formerly a clerk in the Court of Bayonne, and only recently liberated from an insane asylum, where he had been sent for an unsuccessful attempt upon the life of the British Consul at St. Sebastian, fired twice at Premier Briand in the Chamber of Deputies on Tuesday, the man shooting from the public gallery upon the ministerial bench where the Premier sat. M. Briand was not hit, but M. Mirman, director of the department of Public Assistance in the Ministry of the Interior, was shot in the leg. The mad man, who was arrested before he could do further harm, had resented his discharge from the court at Bayonne and as M. Briand was Minister of Justice at the time, he thought he was responsible for it.

A delegation of members of the Canadian Manufacturer's Association, representing every important Canadian manufacturing interest, waited on Sir Wilfrid Laurier in Ottawa last week, and presented to him and members of his Cabinet a vigorous protest against reciprocity with the United States. The intention of the Canadian manufacturers' protest was, as far as possible, to offset or counteract the recent visit of the Western grain growers and the Western farmers, who made demands for free trade, and reduction in duties on farming implements. In a lengthy reply Sir Wilfrid said the Government had thought that it might be possible to have some measure of reciprocal trade to benefit the farmers who ask for it, without injuring the manufacturers who oppose it.

In a local shoe store one day recently a stout man appeared to be having considerable difficulty in finding just what he wanted.

After showing him a dozen or more pairs the salesman blandly observed:

'Now here is a pair that I think will suit you to perfection.'

After examining the shoes the stout man exclaimed: 'I don't like them. They are too narrow and too pointed.'

'Ah,' returned the clerk, 'but they are wearing narrow, pointed shoes this season.'

'Possibly,' returned the stout man, 'but I still wearing my last seasons feet.—Youngs town Telegram.'

### REST THE HORSE'S FEET.

Every farm horse should if possible be allowed to go without his shoes at least two or three months every year in the opinion of the Horseman. In fact it is hardly necessary to shoe a horse on the farm unless he has to go on the hard roads or work on the hard soil where he is required to do much heavy pulling. Without shoes a horse's hoof will grow out, regain its natural shape which is always more or less changes by continuous shoeing.

Many city horses with hoofs bound and cracked and otherwise injured have been taken to a farm their shoes pulled off and turned out to pasture and thoroughly cured within six months. In fact the farmers around the larger cities used to find in this class of animals a cheap supply, many of which turned out to the first class horses showing that all that was needed was rest on mother earth without their shoes.

### PULLMAN RATES REDUCED.

Chicago Jan. 29.—Announcement was made yesterday from the Pullman Company offices here that arrangements have been completed for the application next Wednesday of their new rate rules, which include a nation wide reduction of 20% in practically all upper berth rates and a cut ranging from 25 cents to \$1 or 20% of all lower berths.

### NEVER DISAPPOINTS

### SOME BABU ENGLISH

A Bombay magazine, 'Indian Education,' gives some fresh specimens of Babu English. Of one schoolmaster a pupil wrote this description: 'He was a stern faced pedagogue. Another writer says that a certain official, "a nice majestic gentleman, inhabits a most pompous bungalow." An essay on The Town in which I live closes: 'And we bewoiled the hole permeant of heavens and stars and the school sticking reflected upside down in the pond erected by our worthy Collector.'

If one should give me a dish of sand and tell me there were particles of iron in it, I might look with my eyes for them and search for them with my clumsy fingers and be unable to find them; but let me take a magnet and sweep it, and how it would draw to itself the most in visible particles by the power of the attraction! The unthankful heart like my finger in the sand discovers on mercies; but let the thankful heart sweep through the day and as the magnet finds the iron so it will find in every hour some heavenly blessing; only the iron in God's sands in gold.—O W Holmes.

## Shiloh's Cure

quickly stops coughs, cures colds, heals the throat and lungs. 25 cents.

The terrible outbreak of pneumonic plague in Siberia and Manchuria makes it necessary that quarantine should be very strictly enforced on the Pacific coast.

### For Good Reading Get
