

## Grain Blockade Will Be Serious

Toronto, Sept. 9.—Mr. E. J. Chamberlain, president of the Grand Trunk Railway, back from a tour of the west with a party of Grand Trunk officials, predicts a more serious grain blockade this year than has ever occurred before. But he points out that the railways have facilities for moving the grain from the terminals, and it is not the railways that are at fault. "I don't hesitate to say," Mr. Chamberlain observed, "that the three railways are in a position as far as rolling stock is concerned to move all the grain they will be asked to handle, but it cannot be removed from the terminal points. There is now at Montreal a considerable quantity of last year's grain awaiting removal, and our company has a great many loaded cars standing idle. The labor troubles in England have contributed towards the probable blockade by delaying steamship sailings, but in any case there are not enough steamships to take the grain away with proper despatch. As far as elevator accommodation is concerned, as far as it is not required for storage but only for transferring grain from the cars to the ships, everything will be all right. There is no doubt though that better facilities for getting the grain out of the country, or additional storage facilities are absolutely essential. Railroad cars are not intended for storage purposes, but they are obliged to be used for that purpose now."

## Diver No Longer Excised

Paris, Sept. 4.—A diving apparatus invented by M. Maurice Fernez an ex-sailor of the French navy has been tested in the Seine. It consists of a tube fixed to the mouth of the diver by means of a rubber band and attached to a small pump, operated above the water, which keeps him supplied with air. The diver does not wear the heavy costume used in the old methods of diving.

M. Fernez descended twice, remaining more than ten minutes under water each time. His walk along the bottom of the Seine could be traced by means of the enormous air bubbles, occasioned by his breathing, which rose to the surface.

The width of the new suit skirts averages about two and one-quarter yards.

Touques of Oriental embroidery are being used with good effect on children's wrap.

## Rafting Work At The Booms Will Be Over By Oct. 1st

Upwards of 70 million feet of logs had been rafted by the St. John River Log Driving Company up to September 1st and Manager Arthur Rowan expects that by the first of October the seasons work at the booms will be finished.

In fact it is expected that the Douglas boom work will be finished before the end of the present month and it is usual to take some little time longer in closing up the Douglas boom work. Aside from the loss entailed by the mid-summer freshet, the present season has not been an unsatisfactory one; but the total amount of lumber will not exceed 100 million feet it is now said.

The following statement shows the amount of lumber in superficial feet rafted up to September 1st:

Hemlock	95,980
Cedar	6,245,130
Pine	4,102,050
Spruce	60,140,768
Totals	70,584,528
Gleaner.	

## Mr. Andrew Currie

Mr. Andrew Currie died at his home in Richmond on Saturday, of paralysis aged 73 years. He leaves a widow, three daughters, Mrs. Norman Smith, of Woodstock, Mrs. William Armstrong, of Lakeville, and Miss Martha, nurse in the Fisher Memorial Hospital; also five sons, Robert and John, of Richmond, Dr. R. A. of Woodstock, Allan, of Philadelphia, and Waldo at home. He will be much missed among his friends and neighbors.

## Mr C D Richards Resigns

At a meeting of the school board held on Wednesday evening last, the secretary read the resignation of Mr. C. D. Richards, principal of the Fisher Memorial School. Mr. Richards is going to Fredericton to become a member of a

W. L. Archibald, Ph.D., Principal.

prominent law firm.

The board felt that they would not like to stand in the way of any arrangements Mr. Richards had made, but in justice to the taxpayers thought that a satisfactory substitute should be found before the principal severed his connection.

## Gardiner-Mersereau

The home of Mr. and Mrs. O. S. Mersereau, Fredericton Jct. was the scene of a happy event on Wednesday, Sept. 4th, when their youngest daughter, Mamie Augusta, was united in marriage to Wm. Frank Gardiner of Hartland, N. B. Rev. S. W. Schurman, the home pastor of the contracting parties officiated while Miss Verna Slipp of Lewell, Mass., played the wedding march. The bride was attired in her travelling suit of Navy blue serge with a cream satin waist and was attended by Miss Jennie Slipp of Hampstead, Cousin of the groom. She was dressed in pale blue silk muslin. Harold S. Mersereau, brother of the bride, acted as best man. Only intimate friends and near relatives were present. The groom's present to the bride was a 4-piece silver tea service, to the bridesmaid a bracelet, to the best man a pearl tie pin and to the organist a locket and chain. The happy couple left on the evening train for Fredericton and Schiedam Place, Hampstead, where they will spend a few days the guests of Miss Jennie Slipp, after which they will return to Hartland where they will make their home. Many friends and relatives wish them long life and prosperity.

## SONG OF THE SAD SARDINE

Reference to the fight over the sardine made in Truth. Here are three stanzas:

Time was, in days not long gone by  
Ere all this fuss and rout,  
When of my own identity  
I hadn't any doubt.  
Put on me now, with carping glee,  
Unnumbered lies and lies.  
And vow whatever else I be,  
I'm not myself at all.

Then pity, friends, this hapless fish,  
Give ear unto his groan,  
Who hasn't got, in several dishes,  
A name to call his own.

## Fifty New Students Expected At U. N. C.

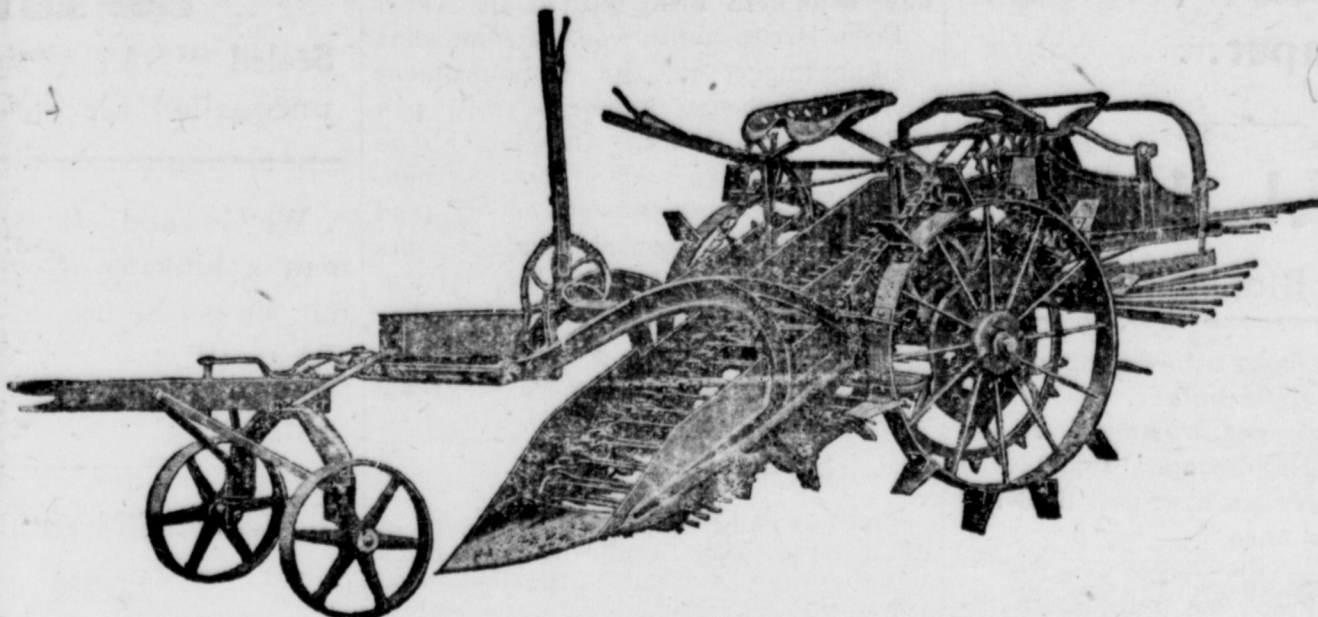

Fredericton, Sept. 9.—Fall matriculation and supplemental examinations at the University of New Brunswick will commence on Thursday. Chancellor Jones said to-day that it might be that the number of new students would be as high as fifty, which would be a considerable advance over past records.

# THE LITTLE GIANT Potato Harvester

Strong as a Giant

Performs the Work Easily

"Made Right"

A Perfect Digger

## A Few Good Reasons Why The Little Giant Digger Excels

Great Strength because perfectly proportioned—Light Draft, by reason of scientific design of hitch—Leverage System direct and easily manipulated—Truck Wheels, large size, and automatically turned—Vines and Trash deposited at side of row—Potatoes not bruised but are thoroughly separated from soil—Main Wheels set close to frame, do not run on the next row—Chain Driven, no gears to wear out—Light Enough for Two Horses and strong enough for four horses—Elevator Web Capacity sufficient for heaviest rows, being 22 inches wide and 7 feet long—Main Sides of Frame are moulded in one piece to secure a rigid frame.

The Little Giant Potato Digger took the lead in Aroostook County last year, not only in the number sold but in the superior quality of its digging power as well. Many farmers, after seeing it work discarded machines they had used but a few seasons and bought the little Giant, not only on account of the superior work done with this machine, but on account of its light draft, being easily handled by two horses, and as we consider the farmers of Carleton County entitled to just as good machines as our neighbors across the Line, we have secured the agency for the Little Giant and will be pleased to show you this machine and quote prices. Call at our warehouse or send for circulars.
