**Swiss Cattle Canadas Need**

The beef industry in Canada has shown a marked falling off in production in the past few years, and only last month a conference of Government authorities and ranchers was held at Winnipeg to discuss the crisis and consider means of preventing a serious meat famine. The reason advanced for the decrease in the number of steers raised is that farmers have found dairying more profitable, and have bought cattle of the milking type to provide a constant flow for the creameries and cheese factories. Those who have sought to remedy matters propose the general adoption of Shorthorn cattle of a good milking strain, which, while furnishing a comparatively good supply of milk, combine the requirements for the block. Many farmers, in Ontario particularly, have found this combination of utilities in the Shorthorn well worth while, but dairymen generally protest against the beef cow.

Now comes the proposal that Canada import cattle from Switzerland. The bovines that graze in the valleys and on the slopes of the Alps are essentially dual-purpose cattle. According to Mr. O. to Herold of Bow Park Farm, in Brant county, who is a native of Germany, and well acquainted with agriculture on the continent. Swiss cattle are superior to the Shorthorns, both in beef requirements and milk flow. He declares that Swiss cattle alone can save Canada from the famine of beef that now seems imminent.—Weekly Globe and Canadian Farmer.

**You Breathe It**

By the simple act of breathing, we inhale life and death. You breathe air crowded with disease germs. These lodge in the membrane and at once commence their deadly work. In a night you develop a cold and before long you are in the grip of Canada's deadliest enemy—Catarrh.

You also breathe Hyomei (pronounced High-o-me) and by so doing breathe in life—Hyomei is medicated and vaporized air. In its journey through the breathing organs it arrests and kills catarrh and cold germs, soothes the inflamed membrane and commences the work of healing. Ask druggist E. W. Mair what he knows about Hyomei. You will find that he not only sells it but guarantees it. A complete outfit will cost you \$1.00 from your druggist or postpaid from the R. T. Booth Co., Limited, Fort Erie, Ont. You will find it invaluable for coughs, colds, catarrh and all kindred diseases. Money refunded if it fails.

**Just The Same**

Tim—Sarer Smith (you know 'er—Bill's missus). She threw her horf the end uv the wharf last night.

Tom—Poor Sarer!

Tim—An' a cop fished 'er out again.

Tim—Poor Bill!

**Finds Means of Preventing The  
Loss of Teeth**

Christiania, Norway, Aug. 25—At the congress of Scandinavian dentists in session here, Dr. Hansen, a youthful Norwegian dentist, announced that he had succeeded in discovering the bacillus of pyorrhea alveolaris and the means of combating this disease, which causes the loss of teeth. His colleagues assert that Hansen's discovery is epochal in the science of dentistry and represents a distinct step in advance.

**A SIMPLE FRYING TEST**

As few cooks possess a fryometer, one or two simple rules are given for testing the temperature of fat for frying. We often hear the expression "Fry in boiling fat" but this is an error, for fat boils at a very high temperature and it would be impossible to cook anything in it at such a heat. When the fat is heated so that a faint clear vapor may be seen rising from it, it is ready for cooking such things as croquettes, fishballs, etc., the ingredients of which have already been cooked.

A further test is to put a cube of bread into the hot fat. If this browns while forty is being counted, it is right for the purposes named above; but for uncooked food—filets of fish, cutlets, doughnuts, etc.—the bread should not brown until one can count sixty. If these foods were fried in fat as hot as that used for previously cooked mixtures, the outside would brown before the inside was cooked.

**NEW SPECIES OF HOGS,**

A farmer wrote as follows to a distinguished scientific agriculturist, to whom he felt under obligation for introducing a variety of swine; Respected Sir: I went yesterday to the cattle show: I found several pigs of your species. There was a great variety of hogs and I was astonished at not seeing you there.—American Thresherman.

**HIT UP THE PACE**

(From Mack's National Monthly.)

A certain Missouri boarding school for girls has as a pupil a girl named Ellen Holm from Southampton, England. In one of her letters from home Ellen told that her father was "standing," to use their expression, for some civic position. Hearing that the father of one of her schoolmates was running for mayor, Ellen sought her cut.

"I hear that your father is standing for office, too," she began with interest.

"Goodness, girl!" responded the Missourian, "they don't stand in this country—they run."

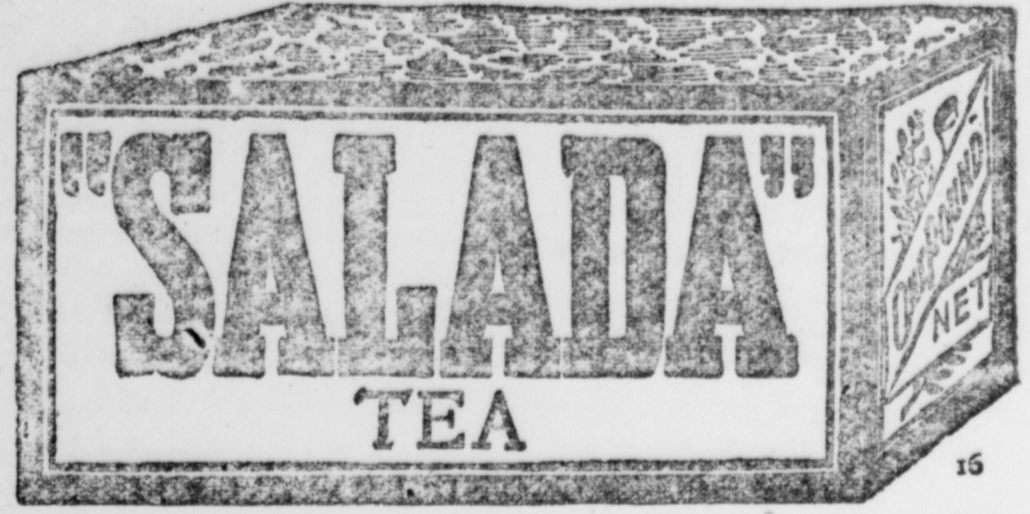

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & CO., Toledo, Ohio. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

**Road Across The Continent Of  
Canada**

Mr. Thomas W. Wilby, the pioneer of the Transcontinental road from Halifax to Vancouver, made a start from Halifax the other day and anticipates being Vancouver in 35 days' time. Mr. Wilby is accompanied by Driver F. V. Hanly, who was sent from St. Catharines, Ont, to drive the car, which is a Reo 30 H.P. five passenger touring car. The wheels of the motor were dipped into the waters of Halifax harbor, and a sample of the Atlantic was placed in a bottle to be carried the Pacific. The object of the tour is to interest the people of Canada in a national highway from Halifax to Vancouver. While there is a road over a good part of the distance, there are about 1,100 miles over which the only travel has been on horseback. Mr. Wilby is very enthusiastic over the trip and will carry letters from

prominent people to be delivered at the end of the journey.

MONCTON, Aug. 29—Mr. Thomas W. Wilby, Quebec, arrived in Moncton last evening by automobile from Halifax for Vancouver, B. C., to "blaze" the trail for the national highway across the continent, and left this morning for St. John. He will proceed westward via Fredericton, Quebec, Montreal and other cities. He expects the trip will last thirty-five days. Mr. Wilby was accompanied by his driver, Mr. F. V. Hanly, and bore a national flag presented by the secretary of the Board of Trade, Halifax, and letters of greeting from the Mayor of Halifax to the Mayor of Vancouver and the President of the Canadian Highway Association, Mr. W. J. Kerr. "I am flying the pennant of the Canadian Highways Association of British Columbia, and intend to make a log of the route as far as possible," said Mr. Wilby. He says the Nova Scotia roads are wonderful, so far as scenery is concerned, but they are very poorly kept. He left Halifax Tuesday afternoon.

**Suffragette Campaign In Canada  
Promised**

London, Aug. 30.—A vigorous campaign in Canada is promised on the part of the suffragette organization which intends to take immediate steps to strengthen the existing organizations throughout the Dominion. An official statement declares that "judging from Mr. Borden's reply such an agitation will meet with success. The only obstacle suggested by the Premier is that the franchise of the provincial parliaments has hitherto been accepted as that of the Dominion Parliament. This we regard as no obstacle at all. We demand

the franchise for all the provincial legislatures, but especially for the Dominion Parliament and this is within the power of Mr. Borden to give. Australia and New Zealand enjoy the benefit of votes for women. Why should Canada lag behind?"

**Large Increase Of Deadly Drugs**

Ottawa, Aug. 20.—The importation of deadly narcotics into Canada this year, judging from figures for the first four months of the fiscal year, bids fair to largely exceed last year's importation. These drugs include cocaine, opium, crude and powdered, and morphine. These drugs enter Canada at a high duty, in some cases almost a prohibitive duty. Despite that fact they continued to be imported in comparatively large quantities. The importation of cocaine alone for the first four months of the year has exceeded the import for the entire last year. For the first period of the present year 137 ounces have been imported at a value of \$317, as against 35 ounces, valued at \$88, for the entire fiscal year 1911-12. It is to be noted that this is cocaine in its absolutely pure state; that used for dental and other purposes being very much compounded and diluted. Opium in the crude state, is also being imported largely. Already for the first four months of the fiscal year 993 pounds have been imported from Hong Kong and Turkey, valued at \$6,322. This, however, is a proportionate decrease over last year, when for the entire fiscal year 5,017 pounds valued at \$25,863, were imported. Of powdered opium for April, May and June and July, 144 pounds, valued at \$948, were imported. The total imported last year was 355 pounds, valued at \$2,074.

The prohibitive duty on opium used for smoking purposes has entirely stopped the importation, not a single ounce having so far been brought in. The importation of morphine also does not figure in this year's statistics so far. Last year 443 ounces of this drug valued at \$1,142, were imported for the entire fiscal year.

**CLEANING HINTS.**

Leather seats and leather-covered chairs may be cleaned by a thorough rubbing with a cloth dipped in alcohol and afterwards with one moistened with beaten yolk of an egg. Then polish with a flannel cloth and a nice gloss will appear.

To renovate feather pillows, place two boards across four coffee-cans and set in the bottom of the boiler. Put enough water in the boiler to reach half-way up the cans, then place the pillows on the boards and place the cover on the boiler. Steam them thoroughly and dry them in the sun. This is an easy way to do a very difficult task.
