

**Wilbur Wright Aviator,
Dead**

Dayton, Ohio, May 30.—Wilbur Wright a noted aviator, died at 3.35 this morning, of typhoid fever. Death came after the distinguished patient had lingered for days and nights on the brink in the throes of a burning fever.

When Mr. Wright died he was surrounded by the members of his family, which include his aged father, and Orville, the co-inventor of the aeroplane. The patient was seized with typhoid while on a business trip in the east on the day he returned to Dayton from Boston and consulted the family physician almost immediately. It was several days before his case was definitely diagnosed as typhoid.

Throughout the early part of his illness, Mr. Wright attributed his sickness, to some fish that he had eaten in a Boston Hotel. He explained to his physician, however, that he had no particular reason to believe that the disease originated from this source.

Mrs. Edmund Daggett

On Monday the 20th., instant, Mrs. Edmund Daggett, of Grand Manan, died of heart failure. Mrs. Daggett was one of the oldest and best known residents of the island. Her whole life was spent on the island, she having been born there seventy six years ago, and through all the intervening years she was closely identified with the social and religious life of the island. For fifty five years she was an active member of the Free Baptist church, now the United Baptist church, always taking a leading part in all its activities and she will be much missed from its membership. In early life she was married to Edmund Daggett who survives her, their married life extending over fifty years. Their home was an open house to all strangers and its hospitality and kindness was much appreciated by island visitors. There are five children living Misses Laura and Ella of Waltham, Mass., and Edna of Alberta, Rev. J. B. of Centreville, N. B., and Ralph of Vancouver. The funeral services were largely attended and were conducted by Rev. Mr. Ives of Eastport.

In argument, unlike aviation, a great many men are not finally landed until they go up in the air. [—Lippincott's

Sweeping Victory For Women in Ohio

COLUMBUS, May 28.—What is regarded as a sweeping victory for the woman suffrage cause was won here today when the delegates to the Constitutional Convention after several hours of debate passed the woman suffrage clause by a vote of 740 to 37. Not only that, but they decided that the measure will be presented to the voters of Ohio at the coming election. This was made possible by striking out a provision that it should be submitted separately from other proposals. The measure as passed on its second reading contained this provision to present this measure separate from all others.

Opposed To Sunday Olympic Games

TORONTO, May 31.—The Canadian Olympic committee some time ago forwarded to those in control of the Swedish Olympic games a protest against certain competitions being scheduled for Sunday, among them the Decathlon and the Pentathlon. Having received no reply, the following cable was despatched.

"Athletes refuse Sunday competitions. Is change possible?"

Yesterday the following reply was received:

"Sunday competition, regret change impossible."

The Canadian Olympic committee will now endeavor to have those Sunday competitions in which Canadians are entered held on the following morning. This course was adopted at Athens in 1906.

Mount Allison Institutions

SACKVILLE, May 29.—The board of regents of the institutions have been in session all day. Routine matters were taken up. Rev. Dr. G. M. Campbell, who has been acting principal of the Ladies' College, was given the permanent appointment. It was decided to procure a man to act with Dr. Borden and Dr. Campbell to complete the endowment fund of the college. Already \$94,000 has been raised and it is hoped that the amount will be increased to \$200,000 before the end of the year.

Eighty Drowned

London, May 30.—A despatch from Budapest says that eighty persons have been drowned by the floods in Southern Hungary.

Lightning's Freak With Locomotive

Philadelphia, May 30.—Struck by lightning, the locomotive of a Baltimore and Ohio freight train left the tracks in the extreme southern section of this city last night, overturned and crushed the conductor, Daniel Edwards, to death. Thomas McCullen, the engine driver, was probably fatally burned, and three other members of the crew were seriously hurt.

Conscription For Chinese Republic

NEW YORK, May 30.—A statement from Yuan Shai Kai, just received here from Peking, outlines the Chinese leader's plan is based on universal conscription. "In this twentieth century," says Yuan, "a newly constituted state must needs possess a strong army to maintain its independence. China is in a different position from England, set in an encompassing sea, or from America, alone on its sundered continent. The military system of our republic must be modelled on great continental powers like Germany or France."

Frederick, Md. [May 29.—The initial steps have just been taken here looking to the formation of a national association to erect a suitable memorial to Barbara Freitchie, the heroine of Whittier's famous poem. It is proposed to erect the memorial in Olivet Cemetery in this city, where the remains are soon to be re-interred after lying for nearly fifty years in the old German Reformed graveyard. The new grave will be located close by that of Francis Scott Key, the author of "The Star-Sprangled Banner."

Wiping dishes for a friend several times lately, I noticed that one of the articles was usually a baking powder can, on the sharp rim of which I was cautioned not to cut my fingers. Curiosity prompted me to inquire its use, when I learned that it served for a knife for slicing cold potatoes to be warmed over, the round, sharp edge doing the work more quickly and affectively than a knife. Holes punched in the bottom of the can prevent its heating soon when used over the fire. E. D.

Oliver Wendell Holmes, who heard Gilbert and Sullivan's opera, Patience, sung at Boston, is said to have been specially pleased with Gilbert's lines, "I am not fond of uttering platitudes, in stained-glass attitudes." It is quite in

Some Features We've Told You Little About

In our previous advertisements the big features of the Standard have been emphasized. You've heard a great deal about the Enclosed Dust-Proof Gearing—The Self-Oiling System—The Center Balanced Bowl—The Liberal Space Between Disc Edges and Bowl for holding Accumulation of Impurities—The High Crank Shaft—The Low Supply Can—of the

Standard

cream separator. But there are other features that add greatly to the convenience and satisfaction of Standard owners.

For instance, there's the Wide Open Bowl so easy to get at and wash. No tubes to clog up either. Then there are the Discs which are all washed together on a disc holder in about one minute. They are numbered so they cannot be put together wrong.

Then, too, the Standard Bowl doesn't leak. That's because the bowl shell fits tight without screwing down on top of a rubber ring, causing wear on the rubber and allowing milk to leak through when the bowl is revolving.

Another good feature is the Interchangeable Clutch which permits the Standard to run down without wear on the working parts. Note—When you stop the crank, the gears all stop and the bowl runs down if its own accord and without wear. The Interchangeable Clutch also enables you to "pump" the handle and start the machine quickly and easily.

But there are other features—many of them—told about in our booklets. Write for them. They are free to all progressive dairymen and women.

harmony with Dr. Holmes' own. "Said an undisputed thing in such a solemn way."

Miss Bessie Burton

Miss Bessie Burton passed away at St. Andrews on Tuesday last, after a tedious illness, aged twenty seven years, leaving a sorrowing mother and two brothers, Vere Burton of Fort William and Harry Burton of the Bank of Nova Scotia, St. Stephen. The funeral took place Sunday at 3.30 o'clock, Rev. G. H. Elliott conducting the service in All Saints' church and at the grave. The pall bearers were G. F. Hibbard, F. Howard Grimmer, Judge Cockburn and Edwin Odell. A very large number of persons followed the remains. The floral tributes were very beautiful and many, emblematic of the young lady, who lived a beautiful life, loved by many and mourned by all who knew her, whose only comfort is "Earth has an angel less, Heaven one more." General sympathy for the family is expressed.—St. Croix Courier.

Miss Burton visited Mr. and Mrs. I. B. Merriman about a year ago and made many friends, who will sincerely regret her death.

Rain May Bring Out Many Logs

FREDERICTON, May 31.—The rainfall here so far is almost four inches. Up to noon to-day the water in the river here had come up a foot and Manager Arthur Brown of the St. John Log Driving Company said that he expected the freshet would make it necessary to discontinue rafting operations for some days. Rafting crews have been at work at both the Douglass and Mitchell booms for the past week.

Robert Aiken said this morning that the heavy rain and consequent rise of water would result in a large quantity of logs running into the booms without much work on the part of his sons who are the contractors on the lower corporation this year. It is expected that when all the logs reach the booms this year these will be fully 100,000,000 superficial feet if not more. The contractors receive between 20c. and 25c. per thousand feet and should clean-up as much as \$12,000 or \$15,000 this year on the work.

To the small streams in the central and southern portion of the province where many drives have been hung up driving crews were despatched yesterday and to-day in hopes of getting out the logs. A crew of men has been sent from here to Shin Creek on the Oromocto,

where John E. Moore, of St. John, had about 2,000,000 feet of logs stranded. On account of the logs being some distance from safe waters some difficulty is anticipated with the drive.

**INDIGESTION
RIGHTLY CURED**

By Toning Up the Stomach to do the Work Nature Intends It Should.

Indigestion should not be neglected for a moment, for by depriving the body of its proper nourishment through the food, the trouble grows steadily worse. Neither should stimulating medicines, which ruin the already weak stomach by making it work beyond its strength, be used; nor pre-digested foods, which do not excite a flow of the digestive fluids, and by disuse cause the stomach to grow weaker. Nowhere is the tonic treatment by Dr. Williams' Pink Pills more clearly useful. The principle of this treatment is to enable the stomach to do its own work by building up the blood and giving tone to the nerves. When these are once restored to their normal health indigestion disappears and the cure is permanent. Here is an experience with this treatment. Mr. John Brennenstall, Calgary, Alta., says: "For years I was an almost constant sufferer from indigestion, and naturally because there was much nutritious food which I could not eat owing to the pain and discomfort which followed, I was becoming much run down. I tried many medicines but none of them helped me until I began the use of Dr. Williams' Pink Pills. After taking a few boxes I was much better and in the course of a couple of months was quite well, and could eat any food set before me."

If you are a sufferer from indigestion, or any trouble due to bad blood or weak nerves, you can begin to cure yourself to-day by taking Dr. Williams' Pink Pills. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

A VEILED ALLUSION

When Salome danced before the King 'Tis said that she never wore a thing That could cause her royal swain to rail, So she did n't dance without avail.

THE LITTLE GIANT

Potato Harvester

Strong as a Giant

Performs the Work Easily

"Made Right"

A Perfect Digger

A Few Good Reasons Why The Little Giant Digger Excels.

Great Strength because perfectly proportioned—Light Draft, by reason of scientific design of hitch—Leverage System direct and easily manipulated—Truck Wheels, large size, and automatically turned—Vines and Trash deposited at side of row—Potatoes not bruised but are thoroughly separated from soil—Main Wheels set close to frame, do not run on the next row—Chain Driven, no gears to wear out—Light Enough for Two Horses and strong enough for four horses—Elevator Web Capacity sufficient for heaviest rows, being 22 inches wide and 7 feet long—Main Sides of Frame are moulded in one piece to secure a rigid frame.

The Little Giant Potato Digger took the lead in Aroostook County last year, not only in the number sold but in the superior quality of its digging power as well. Many farmers, after seeing it work discarded machines they had used but a few seasons and bought the little Giant, not only on account of the superior work done with this machine, but on account of its light draft, being easily handled by two horses, and as we consider the farmers of Carleton County entitled to just as good machines as our neighbors across the Line, we have secured the agency for the Little Giant and will be pleased to show you this machine and quote prices. Call at our warehouse or send for circulars.
