Rheumatism
Cured by Booth's Kidney Pills

T. E. Foster, of St. John St., Fredericton, N. B., says: I have found more actual relief from Booth's Kidney Pills than in all else have ever tried for rheumatism. The pains my limbs

have lessened greatly and I am better and have in years previous. My appetite has built up and I eat and sleep better than have in over

three years. My general health is greatly improved and I can credit this only to Booth's Kidney Pills.

This is the Booth Kidney Pill way. These wonderful Pills are sold under a guarantee to refund your money if they fail to relieve any sufferer from Rheumatism or any trouble having its origin in the Kidneys. They cure Backache, dull shooting pains, thick and cloudy urine, gravel and stone, rheumatism and all diseases of the kidneys and bladder. Booth's Kidney Pills are sold by all druggists and Dealers, 50c. box, or postpaid from H. R. T. Booth, Co., Ltd., Fort Erie, Ont. and guaranteed by E. W. Mair.

FILLING FOR FLOOR CRACKS

For filling floor cracks, mix wheat flour and linseed oil to the consistency of paste; fill into the cracks by applying with a knife blade—a putty knife is excellent for this. Smooth the surface level with the floor boards, and let dry, then paint or stain the floor as liked.

WHITING TO CLEAN GLASSWARE ETC.

For cleaning glassware, nickel, mirrors, or tinware, take spanish whiting, and wet with cold water to make a thick paste; wet only what you intend to use at the time. Rub this over the article to be cleaned, then dry, then go over it with another coat, dry, and so on. The dirt will come off with the whiting, and the polish will be very brilliant. This is fine for window glass, as no water is used, and the hands are not wet.

Railways Must Have Heated Cars For Perishable Freight.

Ottawa, Dec. 6—Assistant Chief Commissioner D'Arcy Scott, of the Dominion Railway Board, issued an order in the application of Sanitoris Limited, of Arrprior requiring the railway companies during cold weather to furnish heated refrigerator cars for the carrying of perishable freight in less than carload quantities.

Are You Bilious?

Mi-o-na Will Cure You

Blacks specks floating before your eyes—dizziness and sick spells, prove that your liver is out of order, your digestion bad and your internal machinery generally out of order. To remedy this state of affairs you must go to the seat of the evil and tone up the stomach.

MI-O-NA Tablets are a perfect stomach tonic and will relieve indigestion in 24 hours. They do more than this for they also cure biliousness, vomiting of pregnancy, sea or car sickness and stomach disorders caused by excessive indulgence.

MI-O-NA cures by strengthening and invigorating the stomach. It is guaranteed by druggist E. W. Mair, who will refund your money if it fails. A large box costs you 50c. or your druggist or postpaid from The R. Booth Co. Limited, Fort Erie, Ont.

NEW ROLLER SKATE.

Miniature Bicycles That Are Capable of Great Speed.

A new form of roller skate, the invention of M. Louis Marchand, a young French engineer, resembles nothing more than miniature bicycles, weigh twenty-five pounds each and work automatically. They have thick pneumatic tires, and the wheels, of which there are two on each skate, are twelve inches in diameter.

Thirty miles an hour can easily be made by an experienced skater with these skates. The skate is clamped to the shoe, and when the foot is raised a spring is automatically wound up around a specially constructed gear attached to the rear wheel. When the foot is put to the ground the pressure releases the spring, unwinds the gear and revolves the rear wheel at a great rate. Nearly 900 revolutions a minute are thus produced.

Both skates are equipped with the winding device, but it is set in motion on one only, a safety clutch being provided to lock it on the other. But for the setting of this clutch it would be impossible for the skater to stop, for obviously he would always have to have one foot on the ground. Before starting this clutch is set on one skate, which just trails along after the other and which is relied upon when the skater wishes to stop.

SUCKING UP TREASURE.

Well Borer and Dredger Used to Recover Sunken Gold.

The search by a British syndicate for the Florencia, a ship of the Spanish armada which went down in Tobermory bay, Isle of Mull, in 1558, has met with considerable success. This ship is said to have carried 30,000,000 pieces of eight as its treasure cargo.

A number of these coins have been recovered, along with sword hilts, scabbards, large quantities of black African oak, muskets, skeletons and stone and iron shot. A piece of eight was a Spanish coin worth 80% cents in American money, so that the coins recovered by the Florencia are worth nearly \$2,400,000, an amount of gold weighing about fifty short tons.

The apparatus used in searching for the treasure is unique, consisting of a specially constructed section dredger used to sink artesian wells. The boring auger penetrates the sea bottom for several feet and brings up samples, which are examined for treasure. Then the scow supporting the borer is moved to another point, and if the previous haul of sample bottom reveals treasure the suction dredger is set to work at that point. The material sucked up by the dredger is discharged into a large sieve with a mesh sufficiently small to retain objects one-third of an inch in diameter.

Cats and Tuberculosis.

Dr. W. L. Ensor of Lockwood, O., has dissected more than 100 cats during the past six months, and in all of them, he says, he found germs of tuberculosis. Among Dr. Ensor's patients was the head of a family who was afflicted with tuberculosis. From the history of the case the doctor was convinced that the family cat had brought the disease to the house. As a result he made an investigation. He offered money for cats, and a hundred or more were killed and examined. "I found in all of them germs of tuberculosis," the doctor said. "Of course not all the cats were in the last stage of the disease, although at least 30 per cent were in a serious condition. I venture to say that enough of the germs were present to make any of them a danger to a household. Cats prowl around in various places and thus carry the germs with them. The household pet is a menace."

An Electrical Laundry.

The laundry of a Colorado hotel is electrically equipped throughout, even the water being heated and the starch cooked by electricity. The equipment includes motors for driving the machinery, an eighty-five kilowatt, 250 gallon boiler, generating steam at eighty pounds per square inch; a twenty kilowatt circulating type water heater connected to a 600 gallon hot water tank and a six gallon starch cooker.

To Make Brazed Joint.

If occasion should arise when it is desirable to make a good, clean brazed joint the metal should be carefully cleaned, heated to a bright red and then covered with the flux of the following formula: One pound of boracic acid, four ounces of pulverized chloride of potash and three ounces of carbonate of iron.

MODISH FURS.

Smart Girls Wear Their Neckpieces Thrown Over Shoulder.

In an article on "Furs" in the November Woman's Home Companion appears the following:

"It is always interesting to know at the beginning of the season what the new styles are in furs as to shape and trimming, but of much more importance is the question, What are the fashionable furs? Last year among the inexpensive furs Australian opossum was high in favor. This year it has been set aside, and a new fur

POINTED FOX SET.

called chinchilla squirrel has taken its place. This fur is not quite so inexpensive, as much work has to be done in matching the skins. Chinchilla squirrel is the pelt of the ground squirrel dyed in a lovely chinchilla gray. When the pelts are correctly matched and dyed it shows a striped effect. Paris is using this fur extensively for flat muffs and empire and colonial scarfs and also for trimming purposes. It is called petitgrain. The fashionable maid does not drape her fur neckpiece around her shoulders like a shawl, but tosses it over one shoulder, while the opposite end hangs down straight. The set of pointed fox illustrates the modish way of wearing the neckpiece. The picture shows also the smart new gaiter boot with buttoned top of contrasting material."

FOR STUFFY ROOMS.

Different Ways to Purify Air in Close Apartments.

There is no greater purifier of air than open windows, but sometimes in sickrooms this method of changing the air is impossible.

Have you ever tried overcoming closeness by carrying a rolled burning newspaper through a sickroom? Equally good is a tablespoonful of vinegar ignited over an alcohol lamp.

An atomizer for spraying cologne can be used with toilet water or witch hazel with refreshing effect.

There are special spirit lamps that have a connection with a platinum ball attachment that are excellent to permeate a room with purifying odors. There are special mixtures for burning in these lamps, but a good cologne or toilet water answers.

The lamp burns until the platinum ball glows red hot; then the flame is extinguished. The vaporization of the cologne is increased by coming in contact with the heated metal, and the room is soon fragrant.

A quick way to cool a room is to wet a small crib sheet with cologne or water highly scented with perfumed bath tablets. Hang in a draft of air or shake the sheet lightly while still wet.

Nestles For King Baby.

The fascinating little Afghans for the baby's carriage are made of white handkerchief linen. First a strip of the material is cut into three-quarter wide by one and one-half yard long proportions. Then a half yard of the length is turned back from what is to be the upper end of the spread. This turnover is daintily embroidered in white and trimmed at either end with blue braid.

Guaranteed Full Weight

"SALADA" Tea is weighed by electric weighing machines. The net weight is printed on every package. We absolutely guarantee it to contain full weight without the lead covering. Have your grocer empty a package and weigh it for you.

Sealed "SALADA" Packets guarantee full weight and tea unequalled for goodness, freshness and fine flavour.

... of pink or blue satin ribbon. The lower end is rather more closely hand embroidered, and finally the entire afghan, including the folded over edge, is bordered with wide cluny, put on flatly.

One of the most substantial and effective afghans is made of macrame, of appearance similar to those of handkerchief linen. But instead of folding over the top of a yard and a half long strip of the macrame all over the apparent turnback veils coarse unbleached net, and to this is attached the under section, after which the macrame edging is sewed flatly upon the sides of the entire spread.

Valuable Information.

Silks have been so fashionable the past season that a hint on their preservation will not come amiss. When they are put away they should not be folded in white paper, for the chloride of lime used in bleaching the paper is apt to spoil the color of the silk.

KEEP OLD LINEN.

It Will Come In Handy For a Number of Purposes.

An old sheet makes an excellent ironing cloth.

In the sickroom it may be folded in two and placed under the invalid, protecting the undersheet and saving the washing bill.

When the sheet is much worn it should be cut up, and the best pieces should be laid away in the medicine chest that they may serve for poulticing and bandages.

Table napkins that are considerably the worse for wear will still make capital glass and china towels.

Sheets invariably give way in the center before they are worn at the edges. When they show signs of breaking down in this way they should be cut up the middle, the two sides should be joined together, and a good strong undersheet is then ready for use and will wear again for years. When past even this service the sheets may be utilized as dust covers.

Old sheeting may also be sewed up into useful bags for inclosing frocks while they are in the wardrobe or lace cushion slips, which can be filled with down or feathers.

The Stole Sash.

The stole sash falling at the front—back of the waist line and a little to one side is extremely fashionable.

CHARMING ACCESSORY OF EMBROIDERED VELVET.

The sash shown here is of material like the gown, and appliques of velvet, embroidered, match the wide collar.

Sardine Salad.

Take some cold cooked fish—haddock will do—free it from skin and bone and flake it. Place a layer of this in a dish and sprinkle it over with minced gherkins and a few bruised capers. Arrange on this a layer of sliced German sausage and arrange on the top of the pile sardines freed

from skin and bone and split in halves. Cut some lettuce hearts into quarters, place around the dish with hard boiled eggs, also cut into quarters. Then pour over the following sauce: Take the flesh of three sardines and rub to a smooth paste with the yolk of two hard boiled eggs, a pinch of cayenne, a grate of nutmeg and two tablespoonfuls each of olive oil and vinegar. Beat the sauce well before adding it to the salad.

Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

LAMP BURNERS SHOULD BE KEPT CLEAN.

When your lamps smoke, remove the wicks from the burners and boil the burners for half a day in a solution of half a teacupful of baking soda to a quart of water; as the water boils down add more to it. Use an old kettle, as it will injure a good one. After boiling at least four hours rinse thoroughly in clear water, dry perfectly, put in new wicks, and your lamps will burn clean and bright. Never throw away the burners unless they are broken. This treatment cleans out all the tubes and makes them like new. Lamps treated in this way once a month will never explode.

Excellent lamp-wicks may, it is said be made out of men's socks: felt hats by cutting them into slips the width you want them, and letting them soak in vinegar for a couple of hours, then drying them.

MAKING CIDER VINEGAR

Only sound, ripe apples should be used for making cider, avoiding dirty fruit or washing it before pressing. Use only the juice from the first pressing, place in clean barrels which have been well scalded or steamed to destroy any germs. Do not fill the barrels full, and do not tightly cork, as the free access of air is necessary. In ordinary cellar temperatures the first stage, the alcoholic fermentation should be complete five or six months, but by storing in warmer quarters and by the use of yeast, the time can be considerably shortened. The second stage, the acetic fermentation, may be hastened by heat and by the use of "mother," or sharp vinegar. When the required acidity is reached, the barrels should be filled to the bung and corked tightly to avoid undesirable fermentation.

MONSTER LAKE VESSEL.

Some of the big new vessels on the great lakes will, says the Springfield Republican, stand comparison with all but the largest of the ocean liners. At Detroit, for example, a new side-wheeler was launched a few days ago which can carry 6,000 passengers besides 1,500 tons of freight. Her length is 500 feet and her breadth of beam a trifle under 100 feet. Few ocean steamers can offer anything so grand as her main saloon, 400 feet long: such a palatial central cabin has always been the pride of side-wheelers, on lake or river. The new boat will have a speed of 22 miles an hour.
