Distressing Headaches

Headaches are largely the result of disordered kidneys. Mrs. Hall, 81 Flora Street, St. Flora St., St. Thomas, Ont., says "I suffered for years with headaches of a most distressing nature. They would come on suddenly, and would last for days at a time. These were usually accompanied by spells of dizziness that would leave me unable to attend to any house duties. My back was weak and caused me much suffering through the night. I had doctored for years, but to no avail. Nothing benefited me

and my condition was gradually becoming worse. I learned of Booth's Kidney Pills. One box gave me a complete and lasting cure. I have not had a headache or dizzy spell since and I feel like a new person." Booth's Kidney Pills are sold by all druggists, 50c. box, under a guarantee to refund your money if they fail to relieve any disease having its origin in the kidneys or bladder. Postpaid from The R T Booth Co, Ltd, Fort Erie, Ont. Sold and guaranteed by E. W. Mair.

Czarevitch Convalescent

Washington, Nov. 26.—The Russian embassy made public today a cablegram announcing that the young Czarevitch, heir apparent to the Russian throne, is recovering rapidly from the attack he sustained recently.

Attempt to Wreck Russian Emperor's Train Miscarried

London, Nov. 22.—A despatch to a news agency from St. Peterburg says that an unsuccessful attempt was made last Monday to wreck the train on which Emperor Nicholas and the members of the Russian imperial family were returning from Spala to Tarskoelelo by tearing up the rails and sleepers near Koslowa Ruda.

The correspondent adds that owing to misinformation as to when the imperial train was due the work of the would-be wreckers was done after the train had passed the spot picked out for its ditching.

One tablespoonful of rich cream will take the place of one egg in custard

One tea spoonful of cornstarch adds lightness, but no richness to cake.

A Bad Stomach

Mrs. S. Keast, of Clarksburg, Ont., says "A bad stomach trouble, that had bothered me for years, baffled and puzzled skilled physicians, was nicely relieved by Mi-o-na. My food would not digest but fermented in my stomach, forming a gas that gave me untold suffering and pain and also made me weak, nervous, irritable and unable to rest. Since using Mi-o-na I can go to bed at night and sleep and wake up in the morning refreshed. I cannot speak too highly of Mi-o-na."

The dyspeptic nervous or otherwise, who does not give Mi-o-na a trial is losing an opportunity to regain health, for Mi-o-na Tablets are guaranteed to cure dyspepsia and all stomach disturbances, such as vomiting of pregnancy, sea or car sickness and the stomach sickness after excessive indulgence. All druggists, 50c. or from P. E. R. T. Booth Co, Ltd., Fort Erie, Ont. Sold and guaranteed by E. W. Mair.

SANITARY BASEBOARD.

New Type of Interior Finish Eliminates Square Corners. In finishing the interior of dwellings the right angle corner formed by the baseboard and the floor, either with or without a quarter round, has never been quite satisfactory. The square corners catch the dirt, and the pieces forming it have a tendency to warp and form cracks. The accompanying

sketch shows a new type of a two piece baseboard which entirely eliminates these troubles. The lower piece joins the flooring and is laid with it, while the top piece is put on after the interior is finished. When complete it has a very neat and pleasing appearance, and it is also sanitary.—Popular Mechanics.

TO PREVENT JOLTING.

German Invents Substitute For the Pneumatic Tire. Automobileists undoubtedly will hail with delight the invention of a former German infantry officer by the use of which the running of an automobile over a pavement curb would result in the occupants of the car feeling no jolt. It is asserted that cobblestones and uneven country roads may be negotiated in automobiles with as much freedom from discomfort as is experienced by passengers on railroad trains.

In reporting the invention to the state department Consul Talbot J. Talbot of Brunswick, Germany, sends the following translation describing it: "The greatest difficulty in automobile construction has been the pneumatic hooping of the wheels. The tires are a constant source of worry and, in case of explosion, of danger to the owners of such vehicles. All substitutes, such as spring wheels or solid rubber hoops, have failed to supplant the pneumatic tire. The solid rubber hooping is too dear and, besides, does not possess the requisite elasticity.

"A former German infantry officer has apparently succeeded in solving the difficulty. He has shifted the point of elasticity, which formerly consisted of metal spring plates under the body of the wagon, to the axles of the wheels by an ingenious angle lever system. The result is astonishing. The inventor uses ship's cable for hooping, but even with wooden wheels he can maintain a completely elastic course over cobblestones, country roads, etc., as the wagon jolts are no longer up and down, but move in a horizontal plane, forward and backward. He can cross the pavement curb without the occupants of the automobile feeling a jolt, as the body of the wagon is not raised, as formerly, but drawn under."

DIET FADS ATTACKED.

Physician Disputes Some Ideas About Feeds and Nutrition.

A Britisher is your true "knocker" of fads, provided he turns at all in that direction. Dr. A. L. Benedict has taken this tangent and has set about disputing a lot of ideas concerning feeds and nutrition.

Few people, comparatively, eat too much; most of them, through fad diets, economy and lack of condition for a normal appetite, don't eat enough.

A cooked egg is more nourishing than an egg eaten raw.

Sugar, used to the extent of three to four ounces a day, is one of the cheapest and best foods for the development of energy; if not all digested, it isn't as harmful to the digestive organs as are the undigested fats and proteins.

Starch never advances far toward digestion in the stomach; the pancreas deals with it easily and effectively.

Fruits, nuts, desserts and the like are unnecessary to the physical needs of the system.

Excepting the olive, almost the only vegetable feeds that contain appreciable fats are nuts.

Meat and many vegetables contain as much phosphorus or "brain food" as does the fattest fish.

A Welsh rabbit is starchy, highly nutritious and no harder to digest than is milk curd. It's what you drink with

after midnight that burps. The best bouillon and other clear soups have about 6 per cent of proteid content. Beef tea is about as nourishing as is the water in which an egg has been poached.

Of eggs and milk, the calories of a day's rations should call for twenty-five eggs or three quarts of milk. As to raw oysters, 2.2 pounds yield fifty calories, which is about one-twelfth of what a person needs of proteid.

No healthy person should be a semi-invalid after a meal, requiring a snooze to recover; dawdling over a meal is as bad as bolting it.—Chicago Tribune.

FOUGHT WITH KNIVES.

Sensational Duel in Arkansas' First State Legislature.

During the session of the first legislature that convened after Arkansas became a state, the new capitol, then still in an uncompleted condition, received a baptism of blood when, in 1837, J. J. Anthony, representative from Randolph county, was slain in a knife duel by John Wilson, speaker of the house of representatives, during an open session of the house.

In the course of a debate on a trivial matter Anthony offered a resolution, which was construed as a thrust at Speaker Wilson. The speaker became enraged and ordered Anthony to take his seat. Anthony refused to do so. This enraged Wilson still more, and, leaving the chair, he advanced down the aisle toward Anthony, drawing a knife as he did so. Anthony stated he had acted in jest, but Wilson refused to be pacified.

Anthony then also drew a knife and stepped from behind his desk to await Wilson's onslaught. Grandison D. Royston, who sat near by, thrust a chair between the combatants, but the latter struck at each other over the obstacle. Suddenly Anthony's knife was struck from his hand, and he was left defenseless. Wilson raised the chair and plunged his knife into Anthony's body, Anthony expiring almost instantly.

Speaker Wilson was immediately expelled from the house and Grandison D. Royston was elected speaker in his place. Wilson was indicted, but when tried in Saline county on a charge of venue he was acquitted on the ground of excusable homicide. The killing and the subsequent acquittal of Wilson caused a tremendous sensation throughout the state.—Farm and Ranch.

DEFIED THE KAISER.

A Pilot Who Knew His Business and Had Lots of Nerve.

In a fit of impatience because the speed of his yacht was slowed down on entering a certain harbor, the German emperor on one occasion tried to assert his authority and rang the bell for "Full speed ahead." To his great surprise, the pilot, an old Norwegian named Nordhuns, who knew the dangerous character of the channel, placed himself in the way and, leaning over the wheel, called down the tube to the engine room, "Half speed ahead—never mind the bell!"

"What! You dare to countermand my orders?" cried the impetuous monarch, again ringing the bell.

"Disregard the bell," calmly repeated Nordhuns through the tube.

For a moment the kaiser glared at the intrepid pilot, and then, drawing himself up to his full height, said majestically, "Go below, sir, and report yourself under arrest."

"Leave the bridge!" thundered the Norwegian grimly, as he grasped the wheel more firmly. "This ship is in my charge, and I'll have no interference with my orders from emperor or seaman!"

The officers on deck hurried silently aft, wishing luck to the sturdy old sea dog, who, knowing that he had the law as well as common sense on his side, stood at his post unshaken by threats, unheeding commands, and steered the Hohenzollern safely into port.

The next day the emperor came to his senses and decorated the pilot—the king at the wheel—with one grade of the Order of the Black Eagle and also appointed him his life pilot in Norwegian waters.—Pearson's Weekly.

Oily Petrels.

Various sea birds, especially the petrels, contain a large amount of oil in their tissues, and for this reason are greatly valued by the inhabitants of the Scottish coasts, who obtain from them "oil for their lamps, down for their beds, a delicacy for their table, a balm for their wounds and a medicine for their distemper." On the island of St. Kilda as many as 20,000 birds are killed in the one week of the year when this killing is legal. So rich in oil are some of these birds that their bodies can be used as lamps if wicks are passed through them.—London Live Stock Journal.

Early Welfare Work.

The "sick fund" among factory employees was known as far back as the first quarter of the nineteenth century, a manufacturing company at Dover having established it for the benefit of employees. A hospital for factory operatives was established in Lowell in

SEALED LEAD PACKETS ONLY

The native purity and garden freshness of

is preserved by the use of sealed lead packets.

1839. The charges were \$4 a week for the men and \$3 for the women. If they were not able to pay, the employing corporation became responsible.—New York Evening Post.

Misunderstood.

French Chauffeur (to deaf farmer on a Maine road)—Can you tell me, sare, vere I get some of ze gazzoline? Farmer (with his hand to his ear)—Hey? French Chauffeur—Non, non, non! Not ze hay—ze gazzoline. Zizz ez a motor-car, not a horse.—Exchange.

Discovered.

Wife—What would you do, George, if you were left a widower? Hub—Oh, I suppose the same as you would if you were left a widow. Wife—You horrid wretch! And you told me you could never care for anybody else.—Boston Transcript.

The Dear Girl.

"Wife, why don't you make some flannel cakes?" "I will if you wish it," said the bride. "Shall I use red or white flannel?"—Kansas City Journal.

How to Grow Tall.

A man's organs and those of his bones which are not subjected to pressure grow continuously until he is forty years old—that is to say, the heart should become stronger, the capacity of the lungs increase and the brain should develop steadily until the fourth decade of life. Also one should wear a larger hat at the age of forty than at thirty. A man ceases to grow tall, however, at the beginning of the third decade, because after that time the downward pressure exerted by the weight of the body while in the erect position compresses the vertebrae or small bones in the spine, the disks of cartilage between them, the pelvis and the thigh bones, and this pressure overcomes the natural elasticity of the disks and the growth of these bones. However, a British scientist contends that were man a quadruped and therefore freed from the downward pressure produced by his weight upon his spinal column he would continue to grow in height for ten years longer than he does at present, since it has been found that bones not subjected to compression increase up to the fourth decade.—Chicago Tribune.

Pretty Names For Books.

The following are some of the curious titles of old English books:

"A Most Delectable Sweet Perfumed Nosegay For God's Saints to Smell At."

"Biscuit Baked In the Oven of Charity, Carefully Conserved For the Chickens of the Church, the Sparrows of the Spirit and the Sweet Swallows of Salvation."

"A Sigh of Sorrow For the Sinners of Zion Breathed Out of a Hole In the Wall of an Earthly Vessel Known Among Men by the Name of Samuel Fish" (a Quaker who had been imprisoned).

"Eggs of Charity Layed For the Chickens of the Covenant and Billed With the Water of Divine Love. Take Ye Out and Eat."

"The Spiritual Mustard Pot to Make the Soul Sneeze With Devotion."

Most of these were published in the time of Cromwell.

The Wearing of Hats.

More or less of a modern habit is the constant wearing of hats. Even as late as 1759 Horace Walpole mentions as a matter of course that he never wears a hat. "Remember," he says, writing to a friend notoriously careless about his dress, who was expected home from Holland, "everybody that comes from abroad is supposed to come from France, and whatever they wear at their first reappearance immediately grows the fashion. Now if, as is very likely, you should through inadvertence change hats with the master of a Dutch smack in a week's time we shall all be equipped like Dutch skippers. You see, I speak very disinterestedly, for, as I never wear a hat myself, it is indifferent to me what sort of a hat I don't wear."

A Grand Scheme.

Mr. Biggins had a scheme for protecting his house against burglars during his absence from home, but in spite of that his friend Mr. Higgins met him recently looking very down-

cast. "What's wrong?" queried Mr. Higgins.

"Oh, everything!" groaned Mr. Biggins. "You remember my scheme for keeping off burglars? Well, the secret of it was to leave a gas jet turned on, so that any burglar who entered would be asphyxiated by the fumes."

"Didn't it work, then?"

"Oh, yes, it worked well enough—too well. The burglar came in with a lighted match, and we haven't been able to find him or the house since."

The Privilege of Peers.

There is a curious case in Fortescue's "reports" relating to the privilege of peers, in which the bailiff who many years ago arrested a lord was forced by the court to kneel down and ask his pardon, though he alleged that he had acted by mistake, for that his lordship had a dirty shirt, a wornout suit of clothes and only sixpence in his pocket, so that he could not believe that he was a peer and arrested him through inadvertence.—Green Bag.

He Changed.

"Greymair's wife brought him home a suit of clothes, but I understand he mustered up the courage to tell her that he had made up his mind to change it."

"Did he change it?"

"Oh, yes; he changed his mind."

Hit It.

"You can't guess what sister said about you just before you came in, Mr. Higheollar," said little Johnnie.

"I haven't an idea in the world, Johnnie."

"That's it. You guessed it the very first time."

Domestic Bliss.

Mr. Wyborn—Ever since I married you I've drunk the cup of bitterness to the dregs. Mrs. Wyborn—Yes; imagine you leaving a drain of anything in any cup!

In the Same Class.

"I have a fishing boat and a chauffeur that are both in the same class."

"How do you mean?"

"I am always balling them out."

Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

More Indictments Against Dr.

Nesbitt.

Toronto, Nov. 26.—Five true bills were returned by the grand jury in the criminal assizes this afternoon, charging Dr. Beattie Nesbitt with making false returns to the government in connection with the Farmers Bank. Dr. Nesbitt is very ill, having taken a turn for the worse three days ago, and he has been confined to his bed, requiring constant attention.
