Wild Strawberry Compound

In use and for bottles of your Druggist's. Sold by Geo. and Charles Co. of London, England. 612

Mormons are Driven Out

London, July 18.—Mormon missionaries who have been conducting a campaign in Brixton, South London, for some months past, have now been compelled to retreat by force of local antagonism under the generalship of the Rev. Hook Longdon, vicar of the parish. Owners of the hall where the Mormons held their meetings have given the Latter Day Saints notice to quit. Their meetings have been largely attended by young girls, who were especially welcomed by the elders. These tactics were combated by young men stationing themselves as pickets at the doors, persuading girls not to enter the meeting.

Ready-Made Farm Plan of Government

Fredericton, July 18.—Premier Fleming, who had a conference with Percy W. Thompson, immigration commissioner of Norton Griffiths, Limited, has made the first announcement concerning the putting into operation of the new ready-made farms policy.

The commissioners to be known as the farm settlement board, will probably be appointed at the next meeting of the government, and will commence at once locating properties which will be purchased and improved and made ready for settlers. It is likely that for the inauguration of the policy about ten pieces of ten acres each in the Blue Bell Tract, Victoria county, will be cleared and improved and that an equal number of unimproved ten acre lots will be laid out. The unimproved lots will be offered at the regular price of \$1. per acre, with the usual settlement regulations, and the improved lots will be offered at the same price plus the cost of the improvements.

The intention is to have the work of clearing and improving the properties commence this fall.

Mr. Thompson has looked over the country from Fredericton as far down the St. John River valley as Gagetown, accompanied by W. W. Hubbard, and was much impressed with the country.

Andrew Lang, Noted Scottish Writer, Dead

Banchory, Scotland, July 21.—Andrew Lang, critic, poet and anthropologist, died here today.

Andrew Lang was born at Selkirk, March 31, 1844. His writings extend over the period from 1872 and include ballads and lyrics, fairy tales, angling sketches, history, critical essays and translations. He was a frequent contributor to periodical literature and was associated for a long time with the London Daily News. In 1888 he was Gifford lecturer at St. Andrew's University on national religion.

A Bad Accident

Vaughn Trafford, a lad aged 12 years, son of Riley Trafford of East Florenceville, fell from the bridge at that place on Thursday afternoon, July 11th., on a ledge of rock. A compound fracture of the skull and other injuries was the result. The distance that he fell is said to be 48ft. Drs. Brown, Ross and Peppers held a consultation and decided an operation was the only hope, and accordingly Dr. Brown, assisted by the others, operated on him that evening. Several pieces of bone were removed, but as the brain was uninjured it is hoped recovery will speedily ensue. The lad did not recover consciousness until the following day.

Battleship Wyoming Fastest in the World

Rockland, Me., July 20.—All speed records for big gun battleships were broken yesterday by the new United States battleship Wyoming, "twin" ship of the super-dreadnought Arkansas, during her standardization trials. Her speed of 22.045 knots is declared by naval experts aboard to be the fastest ever made by any battleship in the world carrying 12-inch guns.

Three More Deaths of Bubonic Plague in Porto Rico

San Juan, P. R., July 21.—Three deaths occurred yesterday in the suburbs of San Juan from bubonic plague. One suspect has been found. These cases were not reported to the authorities. Since the outbreak of the plague, there have been thirty-seven cases and twenty-six deaths throughout Porto Rico.

Steam Pipe Burst, Five Were Killed

NEW YORK, July 20.—Five men were killed and several severely injured by the bursting of a steam pipe on the steamer Principe Di Piemonte, en route here from Naples and due to-day, according to a wireless message received from Captain Domeniconi by Dr. Derati, the royal Italian medical officer attached to the Italian consul's office in this city.

Francis Joseph's Long Reign

A Vienna dispatch of July 4, to the London Times has the following:

The Emperor Francis Joseph left today for his summer "holiday" at Ischl. This is his 81st visit to his favorite villégiatura, but the day has for him a significance surpassing that of an annual escape from the immediate pressure of the affairs of State. To-day, in fact the length of his reign equals that of the reign of Queen Victoria. July 5th. he will have out-reigned her. Queen Victoria ascended the throne on June 20 1837, and reigned 63 years, 7 months and 2 days. Francis Joseph succeeded his uncle the Emperor Ferdinand on December 2, 1842, and has thus reigned exactly 63 years, 7 months and 2 days. The Elector Charles Theodore of the Palatinate and Louis XIV. of France have alone surpassed Francis Joseph's record, the former having reigned 66 and the latter 72 years, but both of them came to the throne as minors, the former at the age of 9 and latter as a child of 5. Thus, Charles Theodore in reality reigned only 57 years and Louis XIV. only 62 years. The Emperor Francis Joseph has both reigned and governed from the day of his accession.

HOT WEATHER AILMENTS

A medicine that will keep children well is a great boon to every mother. This is just what Baby's Own Tablets do. An occasional dose keeps the little stomach and bowels right and prevents sickness. During the hot summer months stomach troubles speedily turn to fatal diarrhoea or cholera infantum and if Baby's Own Tablets are not at hand the child may die in a few hours. Wise mothers always keep the Tablets in the house and give their children an occasional dose to clear out the stomach and bowels and keep them well. Don't wait till baby is ill—the delay may cost a precious life. Get the Tablets now and you may feel reasonably safe. Every mother who uses the Tablets praise them and that is the best evidence that there is no other medicine for children so good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Saskatchewan Wants 25,000 Harvest Hands

Regina, July 21.—Government officials here estimate 25,000 men will be required to handle this year's bumper crop. They are laying plans to get this number from eastern Canada. Last year this plan was followed with immense success and for 1912 it is intended to duplicate where possible. Tom Maloy, head of the labor branch, and A. Frank Mantelle, deputy minister of agriculture have the matter in hand.

Hon. William Paterson, former Minister of Customs, is seriously ill at the Russell House, Ottawa. Some months ago he had an attack of heart trouble but recovered and had been in Ottawa for three weeks. He took a bad turn Friday and his condition is regarded as critical.

THE LITTLE GIANT Potato Harvester

Strong as a Giant Performs the Work Easily

"Made Right" *A Perfect Digger*

A Few Good Reasons Why The Little Giant Digger Excels.

Great Strength because perfectly proportioned—Light Draft, by reason of scientific design of hitch—Leverage System direct and easily manipulated—Truck Wheels, large size, and automatically turned—Vines and Trash deposited at side of row—Potatoes not bruised but are thoroughly separated from soil—Main Wheels set close to frame, do not run on the next row—Chain Driven, no gears to wear out—Light Enough for Two Horses and strong enough for four horses—Elevator Web Capacity sufficient for heaviest rows, being 22 inches wide and 7 feet long—Main Sides of Frame are moulded in one piece to secure a rigid frame.

The Little Giant Potato Digger took the lead in Aroostook County last year, not only in the number sold but in the superior quality of its digging power as well. Many farmers, after seeing it work discarded machines they had used but a few seasons and bought the little Giant, not only on account of the superior work done with this machine, but on account of its light draft, being easily handled by two horses, and as we consider the farmers of Carleton County entitled to just as good machines as our neighbors across the Line, we have secured the agency for the Little Giant and will be pleased to show you this machine and quote prices. Call at our warehouse or send for circulars.

Emperor of Japan is Critically Ill

Tokio, July 20.—Emperor Mutsuhito is critically ill. His Majesty is suffering from affections of the stomach and brain. He was unconscious yesterday. Emperor Mutsuhito was born November 3rd, 1852, at Kioto, and has reigned since 1867, when he succeeded his father, Kamei. He married in 1869 a daughter of Prince Ichijo. The heir-apparent to the Japanese throne is Prince Yoshihito, a son of the Emperor, who was born August 31st, 1870.

The Emperor's condition at 3 o'clock this afternoon was so critical that the ministers of state were assembled at the palace and the announcement was made that His Majesty was sinking.

A bulletin issued by the attending physicians gives the history of the Emperor's illness as follows:

"Since July 14th, His Majesty has been suffering from intestinal trouble. Great drowsiness followed the early attacks, this symptom increasing rapidly. On July 18, His Majesty became unconscious and his brain was affected. On the evening of the 19th the fever suddenly increased, showing a temperature of 104.7. The pulse rate was 104, and the respirations 38."

Sudden Death of Mrs. Dearborn Shock to City

Mrs. Louisa Carleton Dearborn, widow of Charles H. Dearborn, and one of the best known women in St. John, particularly on account of her prominence in connection with charitable institutions and the Women's Christian Temperance Union, died suddenly at her home, 168 King St. east, Sunday, at the age of seventy years.

Mrs. Dearborn was in her usual good health until Sunday, when she was stricken with paralysis. On Saturday afternoon she had enjoyed an excursion trip to Westfield. She had been connected with the W. C. T. U. since 1865, when she first came to the city, and for the last ten years had been president of that organization. She was also active in the Associated Charities and had been a member of the board of management for several years. Mrs. Dearborn was one of the mainstays of the Little Girls

Home, which flourished in this city several years ago, and was a prominent member of the Congregational church, where she had taught the infant class for forty years.

Mrs. Dearborn was formerly Louisa C. Wellington and was born in Boston and educated at Vassar College. She married Charles H. Dearborn there in 1860, and came to this city with him in 1865 and had remained here ever since. Her husband died eight years ago. She was very fond of traveling, and during her life made two trips around the world. Only on June 1st. she returned after a trip to South America and Panama.

Mrs. Dearborn is survived by one son, Frederick R., of this city. Other relatives here are Mrs. Allan Wetmore, a niece and Harry N. Dearborn, a nephew. Her death will be sincerely mourned by many who have come within the gentle influence of her kindly manner and by the city as a community because of the loss of one whose principal desire was the welfare of others.—Telegraph.

SCHOOL FOR WATCHMAKERS

A Swiss Must be Fourteen Years of Age to Enter

The famous Swiss watch schools are said to be the most exacting industrial institutions in the world. In one of the most celebrated of these institutions in Geneva, for example, a boy must first of all be at least 14 years of age in order to enter. After being admitted, the student is introduced to a wood-turning lathe and put to work at turning tool handles. This lasts for several weeks, according to the beginner's aptitude, and is followed by exercises in filing and adjusting screw-drivers and small tools. In this way he learns to make for himself a fairly complete set of tools. He next learns to make a large wooden pattern of a watch frame, perhaps a foot in diameter, and after learning how this frame is to be shaped, he is given a ready-cut one of brass of the ordinary size, in which he is taught to drill holes for the wheels and screws. Throughout this instruction the master stands over the pupil directing him with the greatest care. The pupil is next taught to finish the frame so that it will be ready to receive the wheels. He is then instructed how to make fine tools and to become expert in handling them. This completes the instruction in the first room, and the young watchmaker next passes to the department where he is taught to fit the stem-winding parts and to do fine cutting and filing by hand. Later on he learns to make the more complex watches which will strike the hour, minute, etc., and the other delicate mechanisms for which the Swiss are famous.—Weekly Telegraph.

Wanted—a Tailor

To Clean, Press and Repair Clothing

Will let the shop, or pay good wages. Apply to
