MRS. ELBRIDGE ESTEY

Victoria Sealers May Transfer to the German Flag.

Victoria, B. C. Nov. 9.—The owners of The Victoria sealing schooners are threatening to put their vessels under the German flag and thus evade the treaty recently signed in Washington, D. C., prohibiting pelagic sealing in the North Pacific for a period of fifteen years.

The reason alleged for the threatened act is that the government has apparently failed to forward the compensation which, it was understood, would be paid for the loss of their industry. The signatures to the treaty were those of Japan, Britain and the United States.

By the local sealers, of which there is a fleet of forty, under the German flag, it is said they could operate from this port, although it is considered likely that such a situation would give rise to an international question which might lead to complications.

ACCEPTED CALL

—Rev. G. B. MacDonald who some time ago accepted a call to the Main Street United Baptist Church will begin his ministry next Sunday Nov. 10th. His introductory subjects for that Sunday will be as follows:—morning service "Tenting on the Old Camp Ground." Evening, "An Apostolic Greeting." Mr. MacDonald is regarded as one of the ablest among the young ministers of the Baptist Association of New Brunswick. He was a former Sussex boy, spending part of his school days here attending our public school. He is a son of the late Rev. Geo. W. MacDonald, a former pastor of the Main Street Church.

Tuberculosis

Berlin, Nov. 8.—At a meeting of the Berlin Medical Society today, Dr. Frederick Friedman announced the discovery of what he believed to be a practical cure for every form of tuberculosis. He exhibited cured patients and declared that he had treated 682 cases by his method with invariable or almost invariable complete cures. Prominent physicians testified to successes by this method in their own practice.

Dr. Friedman injects living tubercle bacilli which has been rendered benevolent.

Florenceville Consolidated School.

The following are the names of those making an average of 80 per cent and over on the Oct. examinations arranged in order of merit.

Grade XI.

Jennie Chapman, Ida Birmingham, Ruby Ross, Stella Hunter.

Grade IX.

Andrew Stevenson, Erma Evertt, Lynn Stickney, Lewis Evertt, Phoebe McLean, Sarah Stevenson, Kenneth Squires, Hazel McCormack.

Grade VII.

Laura Banks, Mary Richardson, Bradstreet Tompkins.

Grade VI.

Viola Hartley, Mildred Tompkins, Frank Stickney, Clifford Hunter, Hazen Kilpatrick, Jean Charlton, Elizabeth Mackay, Marion McLean, Earl Atkinson, Kenneth Atkinson, Mina Wilson, Catherine Haughn.

Union Button Strike of Coal Miners To End

Wilkesbarre, Pa., Nov. 9.—Two thousand miners and laborers employed by the Lehigh & Wilkesbarre Coal Company, who have been on strike because some of their fellow workmen did not wear union buttons, held a mass meeting last night and voted to return to work on Monday.

THE BEST MEDICINE FOR YOUNG CHILDREN

Mrs. Ulderic Roberge, Lac Long, Que., writes:—"I have used Baby's Own Tablets for my baby who suffered from stomach trouble and vomiting, also from constipation and they completely cured him. I can recommend them to all mothers as the very best medicine for young children. The Tablets are superior to all other medicines not only because they promptly cure stomach trouble, constipation, colic, etc., but because they are guaranteed to be absolutely safe and free from all harmful drugs. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont."

Anaemic Girls Seem Everywhere

Nine Out of Every Ten Show Symptoms of This Serious Trouble

So steadily does anaemia undermine the health of young, growing girls and young women that it is rightly regarded as one of the greatest enemies of her sex. Nine women out of ten are bloodless, more or less, and in many cases neglect has allowed anaemia to develop into hopeless decline. There is a security and new strength for weak, tired girls and women in Dr. Williams' Pink Pills for Pale People. They actually make the new, good blood of health that banishes the "always tired" weakness, and the continual backaches of anaemia. They drive away headaches, the low spirits, the palpitation of the overworked heart and the fits of nervousness that mark the women whose weak blood is unable to nourish their wasting frames. Dr. Williams' Pink Pills have given health to unhappy anaemics in cases too numerous to record. Here is one example. Miss Hattie B. White, Whitehall, Ont., says:—"Some two years ago I became very much run down. I consulted a doctor who told me that it was a bad case of anaemia and nervousness. I had most of the symptoms that accompany this trouble, such as headaches, a tired feeling, poor appetite, and pallor. The doctor's medicine did not seem to help me and then I began changing from one medicine to another, but with no better results. Finally at the suggestion of my mother I decided to try Dr. Williams' Pink Pills. I got two boxes and by the time I had taken them I began to feel better. This cheered me very much, and I continued using the Pills until I had taken nine or ten boxes. When I was again enjoying the very best of health, and had gained in weight as well. I have proved in my case that Dr. Williams' Pink Pills are a cure for anaemia, and can recommend them to similar sufferers."

Sold by all medicine dealers or by mail at 50 cents a box, or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

SMOKELESS PEAT FUEL.

New Method of Extracting Water Makes Combustion Complete.

Consular Agent John B. Brewer of Welsbadep furnishes the following information concerning the invention of a German engineer which, it is claimed, will make peat "the ideal fuel."

At a time when the superiority of oil as fuel for seagoing vessels is eagerly discussed and tested there has come to my notice an invention regarding the production of a new fuel which seems destined to play an equally prominent part in industrial as well as in domestic life and to form an important chapter in the problem of the preservation of the natural resources of the United States.

A civil engineer, having his experimental plant in this district, has found and patented a very simple process for extracting at little expense all water from peat, of which inexhaustible quantities are found the world over—inexhaustible because of the continuous and steady growth of new peat formations after exploitation of the old.

Knowing that millions of dollars had been spent in the past for the purpose of completely extracting water from peat on a large scale by powerful pressure as well as by electricity, my attitude toward the new claim was rather skeptical for some time, and therefore I hesitated to report thereon until I had consulted scientists and experts and until the experiments and tests made before me personally had convinced me of the value of the discovery.

The briquets made from the material so treated furnish a fuel which appears far superior to the best coal, as to caloric power, low price, small specific weight and absence of all smoke and ashes during and after combustion.

The freedom from water is accomplished by the admixture of peat coke to the peat before pressing in the proportion of one to fifteen. As no extraneous substance is used, there is complete independence from other ingredients. The pressing proper is done by specially constructed and patented machinery of a simple kind. As the three main elements of peat are carbon, hydrogen and oxygen, the process of combustion leaves hardly any ashes and must seem ideal, since peat contains neither sulphur nor phosphorus nor any other ingredient to which the ordinary smoke nuisance is due.

Revolution in Gasmaking.

By use of vertical retorts an English inventor has so improved the system of gasmaking that his work promises what is practically a revolution in this industry. By constructing retorts that are fed from the top and by providing for new circulation of hot gases the designer has lessened the cost of production and raised the quality of all the products of the gasmaking process to a wonderful degree. The principal feature of his improvement is the continuous carbonization of coal, which he has secured in place of the older intermittent process. Instead of constant fresh drawing and changing of retorts, requiring the labor of many men, he has accomplished an unbroken feed of coal and ejection of coke without waste, with little handling and without any of the extremely unpleasant accompaniments of former processes. He has produced gas at a cost of only a fraction of former costs and has increased the volume and the ease of manufacture for space and capital involved.

Paint Ore of Pennsylvania.

Beds of "paint ore," an iron carbonate containing 33 per cent of metallic iron, are found in southern Carbon county, in Pennsylvania, in an east and west strip that ranges in width from half a mile to two miles and is about twenty miles long. The ore occurs in a two foot bed that lies between a cement rock and a clay bed. It is mined at two places. The paint made from it is free from grit, is very durable and requires no drier. It is mixed with boiled linseed oil and used for painting ships, railroad cars, tin roofs and other metal surfaces, and also as a filler for oilcloth and linoleum.

LEAD IN MONTANA.

Ores in the Bearpaw Mountains May Prove Valuable.

The approaching exhaustion of the world's richer known lead producing districts gives special interest to the study of any possible source of lead in countries where increasing prices or improved methods may soon make even low grade deposits valuable. Accordingly the United States geological survey has published a report by L. J. Pepperberg on the little known lead field of the Bearpaw mountains, in Montana.

The region considered was long ago prospected for gold and silver, but no valuable mineral deposits were found until about 1888, when work was begun on a vein of argentiferous galena near Lloyd. A claim on this vein was patented in 1892, but work was suspended because it proved to be unprofitable. Since that time several other claims have been patented, and some work has been done, though no ore has yet been produced.

The rocks in this region are widely mineralized. The ores were probably deposited by hot waters ascending from great depths. Later, during the long continued wearing down of the Bearpaw mountains by erosion and weathering, the metallic minerals were dissolved, carried down again into the rocks by rainwater and redeposited in concentrated form within moderate distances of the surface.

The ore contains a little gold, forty or fifty ounces of silver to the ton and 50 or 60 per cent of lead and is easily crushed and concentrated. More thorough prospecting in this region may develop ore bodies of greater value.

To Improve Solder.

The addition of cadmium to soft solder composed of tin and lead lowers its melting point and increases its strength.

CITY CIRCULATION AGENT

Of Leading Montreal Daily Endorses GIN PILLS

I have long years of suffering from Kidney Trouble—two boxes of GIN PILLS—and it's all gone. That has been the experience of Mr. Eugene Quesnel, Chief City Circulation Agent of La Patrie, of Montreal. He describes it feelingly:

Montreal, May 3rd, 1912

"I have been suffering from Kidney Trouble for over five long years. I had also lumbago in all my bones and muscles, could not sleep nights and on some occasions could hardly walk. I had been treated by some of our best Physicians but without relief and I lost over fifteen pounds. One day I met one of our leading hotelkeepers, who had been cured by your famous GIN PILLS, and he advised me to try them. So I bought two boxes at my drugist's and before I had used one box I felt a big change. Before I finished the second one I was completely cured."

I can assure you I can hardly believe it for if I had only known what I know now I would not have spent over One Hundred Dollars for nothing when two boxes of GIN PILLS cured me."

EUGENE QUESNEL.

GIN PILLS are gaining a world-wide reputation, by the way they conquer the most obstinate cases of Rheumatism and all kinds of Kidney Trouble. 50c. a box, 6 for \$2.50. Sample free if you write National Drug and Chemical Co. of Canada, Limited, Toronto. 145

WILLIAMSTOWN

November, 5th., 1912.

This is a remarkable fine day for this time in the year.

The young folk, of Williamstown and Pioneer, had a concert in the Methodist Church, Williamstown, on Sunday evening. Proceeds will go to the Church and S. School.

Mrs. Corey, Pictou, has been visiting her daughter Mrs. Harry Corey at Pioneer.

Mr. and Mrs. Harry Corey are rejoicing over the arrival of an eleven pound boy.

Miss Annie Woodrow is staying with Mrs. Emily McWade, who continues in poor health.

Mrs. Howells Corbett is also on the sick list, but is better at present.

Miss Sarah Jameson spent Sunday with Miss Lena Porter.

Mr. and Mrs. John A. Waters took a trip to Four Falls last week to see their cousin Mrs. George Wiggins who is in failing health.

Charles Armstrong, Fort Fairfield, visited his brother, Deputy Sheriff Armstrong, last week.

Mr. and Mrs. Clark Watt, of Richmond, were guests of her brother Deputy Sheriff, on Sunday.

Miss Charlotte Kennedy has been dressmaking for Miss Bessie Armstrong.

Miss Sadie Jameson made a trip to Woodstock last week.

It begins to look as if we would have a railroad sometimes, as they are working between Lakeville and Centreville and are erecting some shacks.

Farmers are hauling potatoes to Florenceville and Hartland over the worst of roads for \$1.00 per barrel.

Report says that Carvell Bros. have taken a contract to build about half of the R. R. between Lakeville and Centreville.

Wm. L. Ford was a caller at Andrew Jameson's last Sunday P. M.
