

New Fall

in the latest styles.

**One piece Dresses,
Coat Suits and
Underskirts.**

A fine display of
Waists
in the Newest Designs
**Whitewear, Hosiery,
Wall Paper.**

MRS. F. L. MOOERS
Payson's Block, Main St

Lord Milner.

(Toronto Weekly Sun.)

There is an ominous significance in the reported arrival of Lord Milner at Halifax for a tour of the Canadian Clubs ostensibly in aid of the naval contribution propaganda. If the ostensible object were the real object, apprehension would be relieved. But, there is reason to believe that Lord Milner is an ambitious bureaucrat, whose head is filled with schemes of violence to human liberty. Of German extraction and education, he spent some time as a social reformer, then, as a journalist under the late W. T. Stead, and later entered the civil service in which he was employed for some years in Egypt. His training was thought to have led him to hold in contempt the methods of free popular government and to prefer over these the methods of the benevolent despot. When sent to South Africa as High Commissioner and Governor of the Cape it was his duty as the representative of a constitutional Crown to keep aloof from party and not to plunge as he did into politics, allying himself with the Utlanders. His challenge and defiance of Kruger, which precipitated war, he sought to justify on the ground that it was necessary, in order to hold South Africa, to make some striking vindication of British prestige. When he returned finally to England the subject of violent public controversy after a vain attempt to give the conquered Boers the government practically of a Crown colony, he persuaded Mr. Chamberlain to adopt the scheme of Imperial Federation to which Mr. Chamberlain himself added Imperial Preference, his critics said to cover the memory of the war. About Federation the bureaucrat is, no doubt, sincere and prepared to use ruthless methods in its realization and to justify them on lofty grounds.

He and his associates recognize that Imperial Federation cannot be carried but by degrees, and the first degree on which they are now engaged is naval contribution. That is an inference fortified by Lord Milner's arrival on the ground. It is not any longer reasonable to believe that the motive of this curious and persistent agitation is fear of Germany, but only to catch the colonies in the net of Federationist intrigue.

For Canadians, therefore, the preservation of autonomy becomes the crucial question of the naval discussion. Let them go forward with their eyes open and, if they then yield their constitutional liberties, they will have no rea-

Hymei

The Breatheable Remedy for
Catarrh

The rational way to combat Catarrh is the Hymei way, viz: by breathing. Scientists for years have been agreed on this point but failed to get an antiseptic strong enough to kill catarrh germs and not destroy the tissues of the membrane at the same time, until the discovery of Hymei (pronounced High-o-me).

Hymei is the most powerful yet healing antiseptic known. Breathe it through the inhaler over the inflamed and germ-ridden membrane four or five times a day, and in a few days the germs will disappear.

A complete Hymei outfit, including the inhaler, costs \$1.00 and extra bottles, if afterwards needed, cost but 50 cents. Obtainable from your druggist or postpaid from The R. T. Booth Co., Ltd., Fort Erie, Ont. Hymei is guaranteed to cure asthma, croup, sore throat, coughs, colds or grip or refund your money back. Sold and guaranteed by W. Mair.

son to complain. If they are resolved to keep these liberties and at the same time to be relieved of the charge of ingratitude, there is only one course open. That is to undertake their own defence and reserved all other questions till the occasion arises for their decision.

**New C P R Ships
The Safest
Afloat**

Montreal, Oct. 4.—In speaking of the two new steamships, the Empress of Russia and the Empress of Asia, which the Canadian Pacific Railway is building for service on the Pacific ocean between Canada and the Orient, a C. P. R. official remarked yesterday that he felt justified in saying that the two new boats would be the safest vessels afloat.

"In preparing the plans for the new Empresses," he remarked, "we took particular care to make provision for all exigencies, and as a result the boats are as near to being unsinkable as can be built with double bottoms and watertight compartments, the latter being numerous and closely placed. Ordinarily, if a ship is designed to float with only two compartments flooded, a sufficient margin of safety is thought to be allowed, but in the cases of the new Empress of Russia and Empress of Asia, should four compartments be flooded they will still float. In the matter of safety, these are the first vessels built to fulfil these conditions."

It was also stated that the new steamships would be equipped with all the other latest devices making for safety such as wireless apparatus, search lights submarine signals, and from the very moment they are assembled, the members of the crews will be trained in the life saving fire and other drills, which are a feature of all the company's steamships.

\$100 Reward \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Toledo, O.

Sold by all Druggists, 75c.
Take Hall's Family Pills for constipation.

**Cancer Cures Said To Be
Worthless**

New York, Oct. 3.—Dr. E. F. Bashford, director of the London Imperial Cancer Research Fund, and the foremost English authority on cancer, declared in an address before the American Pathological Society here last night that "practically all of the so-called cures of cancer announced, within the last few years are worthless." He added that the only means of saving or prolonging the life of a person afflicted with the disease is "by operation. 'Cancer kills one man in every seven," he said. "In one hundred families of six members each, equally divided between the sexes, about sixty-four or more than ten per cent., will die of cancer. It is an important, cause of death from thirty-five years on, getting rapidly more so as age increases. Cancer is becoming more frequent in young persons."

**Two New Professors For Acadia
University**

The following new Professors have been appointed at Acadia University. Mr. Ralph P. Clarkson has been appointed to the Iven Curry Professorship of Engineering. Mr. Clarkson is a graduate of Worcester Polytechnic Institute having taken his work in Electrical Engineering; he also included most of the Mechanical subjects. Besides practical work he has taught one year in the University of Vermont and left there to accept an important position in the Patent Office in Washington. There Mr. Clarkson has been employed as a government expert in the examination of applications for United States patents in Engineering subjects, passing judgment on the operativeness, usefulness, and novelty of machines submitted. Mr. Clarkson will take up the work in Engineering formerly done by Professor Durkee.

Harold Garnet Black has been appointed Professor of English. Mr. Black was a native of Pagwash, Cumberland County; prepared for college in Sackville Academy and graduated from Mt. Allison in 1907 when he was valedictorian of his class. The following year he taught in the Mt. Allison Ladies College and since then has been doing graduate work in English at Harvard. He has received his M. A. from the latter Institution and has almost completed his residence for his Doctor of Philosophy requirements. Mr. Black comes to Acadia with highest recommendations and the authorities feel assured of his success.

Everything Out.

A "cub" reporter was sent out by his city editor to cover a fire in the Back Bay district. Before he could reach the house the fire had been extinguished and the fire department gone. Nothing daunted, the reporter rang the bell of the house and soon was confronted by a servant girl.

"I wish to see Mr. Robinson," said the reporter, politely tipping his hat.

"He's out," tersely answered the servant.

"Is his wife at home?" asked the reporter.

"No; she's out too."

"Well," came back the reporter, "I understand you have had a fire here."

"Oh, that's out, too," and the reporter went sadly away as the door slammed in his face.—Boston Traveler.

A Suggestion.

The retailer stopped one of his oldest customers on the street.

"I want to speak to you," he began.

"Go ahead, and see if I care."

"You've got to care. This bill of yours has been running a long time now."

"Poor thing! How can you be so cruel as to let it run a long time?"

"Well, what are you going to do with it?"

"I'm going to make you a suggestion. If that bill has been running for as long as you say it has give it a rest. Let it stand for a month or two."

—Cleveland Plain Dealer.

STEAK FROM BEANS.

The Succulent Tenderloin May Be Imitated In Cheaper Material. What's there to worry o'er? Laugh and cook beans! When beefsteak prices soar Boycott the butcher store. Simply cook beans, and more. More and more beans!

That suggestion has an expert opinion back of it, for very recently R. E. Doolittle, M. D., Dr. Wiley's successor as the "pure food" head of the bureau of chemistry of the department of agriculture, sent forth the slogan, "Beans as a substitute for beef." They are, he says, the very best substitute for that expensive luxury.

It cannot be denied that there is a sort of prejudice in the popular mind against beans. They are accepted when they keep their place as a humble poor relation on the menu. But fancy the emotions of an epicure if beans were placed before him as the piece de resistance! And yet why shouldn't they be? What is the reason of the slurs we hear on beans, such as calling cheap restaurants "beaneries," and jokes like that? It must be just because they don't cost much. Let some wily trust magnate create a corner in beans and send the quotations on them upward a few dozen points and women would probably be doing without hats to buy beans for their husbands' dinners. And then the country would be saying, "How is the poor man to live with beans at the price they are?"

There are many varieties of beans. All are nourishing. All legumes, even in an immature state, as green beans and peas, have more nutritive value than other vegetables, and in the dried forms they approach beef. According to a bulletin issued by the United States department of agriculture in 1911, the comparative percentage of protein in lean beef, navy beans and lentils is, respectively, 21.3, 22.5 and 25.7.

A Revelation in Tea Goodness

is a delicious and fragrant blend of the finest Ceylon Tea. Get a package from your grocer and enjoy its excellent qualities.

A Mere Man's Opinion.
"Do you mean to tell me," demanded Mrs. Whackhurst, "that it is a bad thing for a woman to have an aim in life?"
"I do," said Whackhurst, "especially if she's going to throw bricks. She might hit something."—Harper's.

Flagrant.
A senator was condemning a piece of political deception.
"The thing was as flagrant," he said, "as the railway case. Two men, one of them very short, were passing through a station toward the train gates, when the bigger one was heard to say:
"I've took a half ticket fur ye, George. Yer so little ye'll pass all right."
"But," protested George, "how about my beard?" And he twiddled his chin beard nervously.
"Oh," rejoined the other, "tell 'em it's a male."—Washington Star.

Some Things Worth Knowing.
Vacuum Cleaner.—There are moderate priced vacuum cleaners which can be obtained. Once a housewife begins to use this wonderful invention she will wonder how she ever got along so many years without one. They are the most sanitary thing on the market for sweeping, cleaning walls, bedding, furniture and draperies.

Beaded Waists.—If the beads have come off from a blouse one can easily sew them on again. Beads come in every imaginable color, so there will be no trouble in matching yours.

Gathering a Rolled Hem.—When gathering a rolled hem hold the material between the thumb and first finger of the left hand and do the rolling with the thumb and first finger of the right hand. Keep the left hand about an inch behind the right and near the hem, so that when the material is rolled one can keep it taut. After a thin, even roll is made over the desired length do the gathering. Gather as you work—that is, after about twelve stitches have been taken gather by pulling the thread.

Covered Boxes.—The fad is on for covering boxes with cretonne. They make dainty and beautiful presents, but the work must be done extremely neat to be successful. It may mean covering one or two boxes before one really catches on to arranging the corners and using the paste dexterously.

Fried Shrimps.
Drain one pint of cold boiled or canned shrimps, dip each one first in well

READY FOR SERVING.

beaten egg, then in sifted breadcrumbs, and fry in smoking hot fat until delicately browned, says Table Talk.

Drain on white paper, garnish with slices of radish and serve very hot with tartare sauce which has been colored pink with a little powdered lobster coral.

Needlework Notes.

Girls with an appreciation for the artistic are outlining the designs at the ends of pretty chiffon scarfs with pearl beads and crystal bangles and are thus securing remarkably fine effects.

Luncheon cloths or between meal cloths of color are gaining in favor, and no material is more popular for novel ones at present than dress linens. These are often embroidered in simple designs.

There is a little pincushion just out that is made with a wrist strap to fasten snugly on the left arm while one is doing dressmaking. Its usefulness is evident, and it could easily be made at home by a handy woman.

A Change of Tone.

Von Blumer (roaring with rage)—Who told you to put that paper on the wall? Decorator—Your wife, sir. Von Blumer—Pretty, isn't it?—Exchange.

Life is a tragedy wherein we sit as spectators awhile and then act our part in it.—Swift.

A la Crimson Gulch.
"These great nations," remarked Piute Pete as he thoughtfully folded his newspaper, "have purty much the same idea that we have here in Crimson Gulch."
"In what respect?"
"They sort of take it for granted that the one that kin shoot quickest, straightest and oftenest is sort of naturally entitled to be considered boss."—Washington Star.

Phonograph Records.
"The family in the flat next to ours have a phonograph."
"Have they any good records?"
"Yes; they have one record for six hours continuously playing and another of six hours and twenty minutes almost continuous."—Kansas City Journal.

Chemical Changes.
By taking some limewater and blowing one's breath into it a fine white powder will be formed in the water. By adding some common salt to a solution of nitrate of silver a thick white powder is produced which, if placed in the sunlight, will turn brown. Pour the juice of a red cabbage into a test tube or thin glass bottle, drop in very gradually a solution of washing soda, shaking the bottle every time you put the washing soda in, and you will see the red solution gradually turning blue. Go on adding the soda solution, and the blue color will give way to green.

Their Reward.
Dr. Strachan, bishop of Toronto, was waited upon by two churchwardens, who complained that their clergyman wearied his congregation by repeating the same sermon. He had preached it twelve times. The bishop asked for the text. Neither of the churchwardens could remember. "Go back," said the bishop sternly, "and ask your clergyman to preach the sermon once more and then come back and tell me the text."

Quick Action.
"Rube, how cold did you ever see it?" He said, "Well, sir, one time when I was living down in Pickaway county, in hog killing time, we had a kettle of boiling water setting on the stove, and we took it out in the yard, and it froze so doggone quick the ice was hot."—National Monthly.

The Delay.
Willie Chumpleigh—D'ye know, Miss Gladys, I hadn't been talking to your father more than a couple of minutes when he called me a brainless idiot. Miss Gladys—Indeed! I wonder what caused the delay?—Life.

All He Was Fit For.
A tramp was passing a marine store, and, seeing the man at the door, he asked in a joking way, "Do you buy rags and bones?"
"You've guessed it first time, old chap," answered the man. "Get on the scales!"—London Telegraph.

Down the Rhine.
"Look at this beautiful castle."
"Don't bother me. How can I read the guidebook if you keep pestering me to look at rocks and castles?"—Washington Herald.
